Napier, William (*b* ?1740/41; *d* Somerston [? Somers Town, London], 1812). Scottish musician and music publisher. He is first recorded in 1758 as a violinist in the Canongate Theatre orchestra, Edinburgh. By 1765 he had moved to London, where in September that year he became a member of the Royal Society of Musicians. He married Jane Stewart on 8 January 1766. For a number of years he played in the private band of George III and in the Professional Concert, led the band at Ranelagh Gardens and led the violas at the 1784 Handel Commemoration, but gout in the hands forced him to give up playing in about 1795. He set up as a publisher in 1772, and in 1784 established a circulating music library. The music publisher George Smart was employed in Napier's shop for a time, as was the caricaturist James Gillray. Napier apparently had good relationships with composers, including J.C. Bach and J.S. Schroeter, and published instrumental music, dance collections and sheet songs in addition to the popular ballad operas of the day such as Shield's *The Flitch of Bacon*, *The Maid of the Mill* and *Rosina*. Some of these copyrights, together with plates and stock, he sold to Joseph Dale about 1785 for £450, a sign perhaps of his mounting financial difficulties. A benefit concert for his 11 surviving children was given under Cramer's direction on 11 June 1788, but this and a further one on 17 June 1789 did not prevent his bankruptcy in 1791. Haydn, on his first London visit in the same year, helped Napier to re-establish himself by contributing the accompaniments to a second volume of Napier's best-known publication, *A Selection of the Most Favourite Scots Songs*. This second volume appeared in 1792 as *A Selection of Original Scots Songs ... the Harmony by Haydn*, and like the first it bore a frontispiece engraved by Bartolozzi. Its success allowed Napier to pay Haydn for his contribution and to commission from him a third volume, which he published in 1795; the three volumes eventually went through three issues. Napier continued in business until 1809.

Naples (It. Napoli). City on the south-west coast of Italy. During the era of Spanish domination and the Bourbon Kingdom (16th to 18th centuries) it was considered one of the capitals of European music. This myth survives to the present day, along with the controversial definition of a 'Neapolitan school'.

1. Antiquity and the Middle Ages. 2. The Aragonese monarchy (1443–1503). 3. The Spanish era (1503–1734). 4. The Kingdom of the Two Sicilies (1734–1860). 5. From 1860.

1. ANTIQUITY AND THE MIDDLE AGES. Founded by Greek settlers from nearby Cuma about the 6th century BCE and under Roman rule from 326 BCE, Naples kept the original features of a Greek city well into the late imperial period. As a favourite resort of Roman patricians, it must have been the seat of an intense artistic and theatrical life, as is demonstrated by the numerous archaeological discoveries of vases bearing musical images. Statius noted the existence of two theatres, one in the open air, the other covered; Suetonius and Tacitus reported that Nero, on a journey to Greece, chose to stop in Naples, 'quasi graeca urbs', in order to sing there. The fall of the Roman Empire at first strengthened the city's links with Greek culture because when the troubled period of barbaric invasions was over, Naples came under Byzantine rule; from the end of the 6th century, however, the city enjoyed some degree of autonomy, and was an independent duchy in the 8th century. Defence of that independence induced the Neapolitan bishops and dukes to draw increasingly close to Rome, and this resulted in the adoption of Roman liturgy by the Neapolitan church: in the 7th century a number of Neapolitan clerics were sent to Rome to be trained at the Schola Cantorum. There was also a Schola Cantorum in the Neapolitan church at the beginning of the 6th century. The early Neapolitan rite also travelled to distant churches, such as those in Ireland, but there are no sources predating the 11th century. In the centuries following, some manuscripts were compiled (such as the *Innario* in *I-Nn*), which are valuable because they predate Archbishop Giovanni III Orsini's reform of the Neapolitan rite in 1330; this reform prevented Naples from retaining its own ancient rite in the 16th century, according to the decrees of the Council of Trent. There must in any case have been a scriptorium in Naples for the compilation of liturgical manuscripts such as those which produced the treasures of Beneventan music in Bari and Benevento. After the Norman unification of southern Italy and Sicily in the first half of the 12th century, Naples became part of that kingdom, but remained peripheral to Palermo, its principal political and cultural centre. Frederick II of Swabia was among the first to give significant stimulus to Neapolitan cultural life; in 1224 he issued a decree founding the university, the oldest in southern Italy.

The decisive turning-point, however, was when Charles of Anjou overpowered the Norman-Swabian dynasty (1266) and, having seized the kingdom, moved its capital from Palermo to Naples. In 1283 Adam de la Halle went to Naples and remained there between two and five years, and the *Jeu de Robin et de Marion* was performed at court. A period of intense artistic and cultural activity ensued, which came to full splendour during the reign of Roberto 'Il Saggio' (1309–43): the influence of French culture, already lively during the preceding dynasty, was consolidated, but close relations with towns of central and northern Italy were also established, favoured by the

king's key position in the Italian political life of his day. Naples thus became a melting-pot for cultural influences that left their mark on literary life (as witness the visits of Boccaccio and Petrarch to the court of Anjou), and on both the figurative arts and architecture. Musical documentation from this period is fragmentary. The few surviving documents from this period (*I-Na* 'Registro angioini' 256) record the names of two *pulsatores viole*, two *pulsatores organorum*, one *pulsator salteriorum*, two *nactarii* and four *tubatores* active at court in 1324, while in 1343 there is mention of other singers, musicians and 'canzonette'. Many of these musicians came from Germany, Tuscany and from various places in southern Italy. During the reign of Roberto the Neapolitan court rang to the sound of 'various feasts, new games, beautiful dances, endless instruments of amorous songs . . . made, played and sung' (as Boccaccio describes it in the *Elegia di Madonna Fiammetta* and in the *Ninfale d'Ameto*). Philippe de Vitry dedicated a motet to Roberto (Ivrea manuscript) and Marchetto da Padova (who was in Naples before 1319) dedicated his treatise *Pomerium* 'ad superi regis laudem et gloriam'. In the King's funerary monument in the church of S Chiara there is sculpted a roll of square notation which is perfectly legible and which can be found in a contemporary manuscript held in Prato.

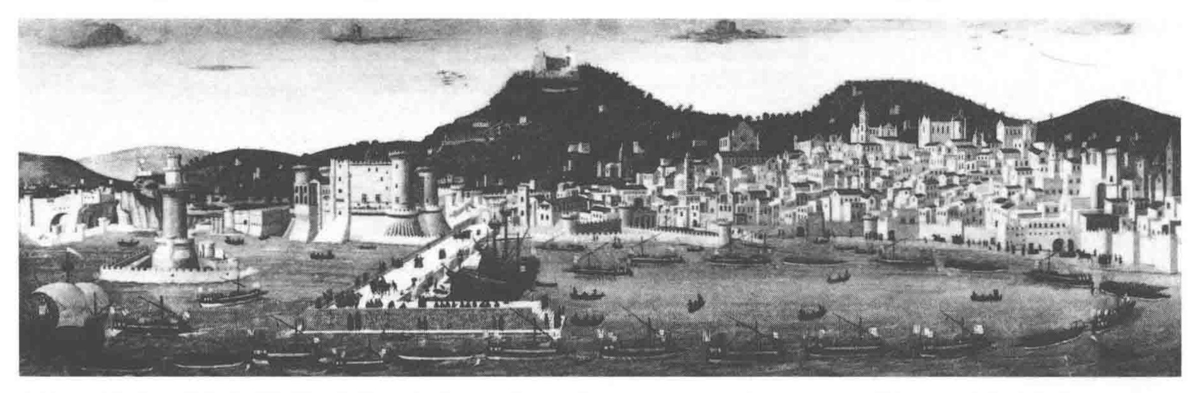
Between the end of the 14th century and the beginning of the 15th the first group of native Neapolitan composers are known, including Anthonello and Philippus de Caserta (the latter also a theorist), Niccolo da Aversa and Niccolò da Capua. All their works reflect strong French influence.

2. The Aragonese monarchy (1443–1503). The passing of the Kingdom of Naples from the Anjou to the Aragonese dynasty marked the beginning of a new cultural flowering, favoured also by the political stability enjoyed by the whole of the Italian peninsula in the second half of the 15th century. The policy of equilibrium followed by the more powerful Italian states was based on a complex network of diplomatic relations which, at a time when the most delicate state functions were entrusted to men of letters and humanists, promoted a fertile cultural exchange. The sumptuous patronage of the Aragon kings, pre-eminent among them Alfonso V (I of Naples) 'el Magnánimo' (1442–58) and his son Ferrante (1458–94), did the rest. The impulse given to a flourishing literary activity, which had its centre in the Accademia (founded 1458) and its most eminent exponents in Giovanni Pontano (1462–1503) and Sannazaro (1456–1530); the setting up of a large and valuable library; and the embellishment of the city with remarkable architectural monuments are the most celebrated cultural achievements of the Aragon kings.

Equally cherished was the activity of the chapel, whose performances were highly praised for their magnificence and variety. The organization of the royal chapel had already been noted down in the final years of the Anjou kingdom: in 1442 Gentile de Sancto Angelo de Fasanella was appointed *magister capellae*, with eight chaplains chosen 'inter cantores et paraphonistas'. The first *maestro di cappella* in Naples in the Aragonese period was Dominicus de Exarch, a monk appointed in 1445 to the post of abbot of the monastery of Santes Creus, who also held the same post in the Aragon kingdom. Alfonso introduced more singers and performers from his court in Barcelona into the royal chapel, and entrusted the duties of Senior Chaplain to a high ecclesiastical dignitary. As early as 1451 the royal chapel was the largest in Italy, made up of at least 21 choristers, two organists, one organ builder, five boys and two *maestri di cappella* (Exarch and another monk from Santes Creus, Jaume Albarells). The number of choristers remained stable in the known lists of 1455 and 1480, while the number of organists went up to four, and in 1476 a 'meste de fer lauts' was also added. If we include the chaplains who

were not musicians and the boys, there were as many as 44 members of the chapel by 1489. There were, in addition, numerous instrumentalists in the king's service, whether for secular entertainments or for state ceremonies. In 1494, for the coronation of Alfonso II, a Neapolitan chronicler counted 46 'schiate' and ten 'bifare' trumpets, as well as 12 drums, and lutes, harps and trombones. The many court organists were particularly highly regarded, both in the 'music rooms' specifically created in Castel Capuano and in Castel Nuovo, as well as in the chapel of S Barbara.

The first Italian *maestro di cappella*, Giuliano de Caiacza, was appointed in 1488. While initially Alfonso had attempted to restrict entry to Spaniards, many members of the royal chapel were recruited from distant places, and some of them were known throughout Europe. Pietro Oriola, mentioned in Naples for the first time in November 1441, remained in the service of the court until at least 1470, and is the composer of two pieces in the Perugia manuscript (*I-PEc* 431) and two in the Montecassino manuscript (*I-MC* 871). The latter manuscript, the main source for the music at the Aragonese court in Naples, also contains eight compositions by Johannes Cornago, King Ferdinand's almoner in 1466. It seems that Cornago was active in Naples, with a very high salary, from 1455 to 1475, when he moved to Spain to the chapel of King Ferdinand V. The Fleming Vincenet was a chorister and copyist (the manuscript *US-NH* 91, known as the 'Mellon Chansonnier', is his work) at Ferrante's chapel from at least 1469 until his death, around 1479. Bernhard Ycart was active at court from around 1476 to 1480. For a brief period other important composers were in Naples, called to the city in an attempt to establish a permanent position at court: for example, the lutenist Pietrobono, who came with a delegation from Ferrara in 1473; the theorist Florentio de Faxolis and possibly Josquin came with Ascanio Sforza on his visit to the city in 1481–2; Alexander Agricola was detained in Naples in 1492, after the defeat of his protector Charles VIII, whom, however, he rejoined in France.



The Aragonese chapel, however, derived its greatest glory from Tinctoris and Gaffurius, two musicians who seem not to have had permanent positions in the royal chapel. The exact date of Tinctoris's arrival in Naples is not known, but it is thought that he was there by 1473; he was preceptor to Ferdinand's daughter, Beatrice, to whom he dedicated the treatises *Terminorum musicae diffinitorium*, *Complexus effectuum musices* and *Tractatus de regulari valore notarum*; other treatises (*Proportionale musices* and *Liber de arte contrapuncti*) were dedicated to Ferdinand. Tinctoris remained in Naples until 1487; in October of that year he was sent by the king to the courts of Charles VIII of France and of Emperor Friedrich III to recruit singers for the Neapolitan chapel, and he is known to have returned at the end of 1488, staying in or returning to Naples occasionally until the beginning of 1491. Gaffurius was in Naples between 1478 and 1480, and his first theoretical work, *Theoricum opus musice discipline* (1480) was published there, the first edition containing woodcuts. Besides the Montecassino and Perugia manuscripts already mentioned, other important sources for music at the Aragonese court survive: the sumptuous 'Tinctoris codex' (*E-VAu* 835) compiled for Ferrante; two manuscripts intended for the princess Beatrice; the 'Mellon Chansonnier', and the manuscript in *I-Nn* 8.E.40, which contains six anonymous tenor masses on 'L'homme armé', written in the most elaborate Franco-Flemish polyphonic style. In addition, seven other sources of polyphony and two surviving tablatures for plucked string instruments can be connected to the Neapolitan court of the period 1450–1500.

Unfortunately we have almost no knowledge of musical practice in Naples outside the court. Some fragmentary documents provide the names of builders of organs and other instruments (especially strings), while the surviving plainchant manuscripts in the various churches active at the time give information on liturgical music. One of the manuscripts formerly used in the Augustinian monastery of S Giovanni a Carbonara (whose chapel contains marvellous paintings of musical instruments that can be dated before 1441, including one which is thought to be the earliest depiction of a clavichord) contains the signature of a 'fr. Paulus de Neapoli' who was a musician and music teacher at the monastery between 1457 and 1489, as well as a member of the chapel of the Duke of Calabria from 1458.

Side by side with the *ars perfecta* of polyphony from beyond the Alps, however, the less assuming but cherished indigenous practice of solo singing with instrumental accompaniment also flourished at the Naples court, which was the natural meeting-point of the Italian and Spanish musical traditions. The most popular composer of *strambotti*, Serafino de' Ciminelli dall'Aquila, studied music in Naples under the guidance of Guillaume Garnier; another famous composer of *strambotti*, and an improviser, the Spaniard Benedetto Gareth ('Il Chariteo'), spent a large part of his life at the Naples court. An outstanding figure is the poet and humanist Sannazaro; he wrote love-poems in imitation of Petrarch, which were among the favourite texts of 16th-century madrigalists, popular nonsense-rhymes in frottola style, and works for the theatre, the *farse*, in which music was important. The earliest *barzelletta* to have survived in print was sung in a Sannazaro *farsa* performed in Castel Capuano in 1492 to celebrate the capture of Granada by Ferdinand V.

3. THE SPANISH ERA (1503–1734). Naples lost its independence in the early years of the 16th century and entered into a long period of foreign domination, first as a viceroyalty of Spain (1503–1707), then of Austria (1707–34), before becoming once again the capital of a kingdom. This period has traditionally been considered one of serious cultural decline, but recently the role of Naples in these years has been re-evaluated as one of the great centres of European culture. This can be seen in science, philosophy, literature and figurative art, but it is even more apparent in music. It was in this period that the legend of the 'Neapolitan school' came into being, and the city was able to enhance its reputation as, together with Venice, the principal musical centre of Italy.

The roots of this legend lay in the lost 'golden age' of the Aragonese era; and while the few surviving documents cannot prove a genuine musical interest on the part of the kings of Naples, it is certain that they wished to construct an image of power that involved music, and the display of the largest and most important royal chapel in Europe. In the early part of the 16th century Pontano, Sannazaro, Summonte and other intellectuals then revived the legend of the city's foundation by the siren Partenope, selecting it as the symbol of Naples' destiny to become the kingdom of music.

2. *View of the Bay of Naples (the 'Tavola Strozzi'), showing the Castel dell'Ovo, Torre di S Vicenzo, Castel Nuovo and the Molo Angioino: detail of a painting by an unknown artist, 1464 (Museo Nazionale di S Martino, Naples)*

(i) Aristocratic and popular music. This legend served to justify a distinct change in the education of young Neapolitan aristocrats, who were prevented by the new powers from following the traditional pursuits of combat and chivalry. For the first time learning to sing, play instruments and dance had an important place in the education of young noblemen. A number of Neapolitan nobles quickly became highly skilled in the art of music, publishing theoretical treatises (A.M. Acquaviva d'Aragona in 1524, Luigi Dentice in 1552, Scipione Cerreto at the beginning of the 17th century) and anthologies, particularly of polyphony and sacred music. Promising composers such as Ghiselin Danckerts, Lassus, Giaches de Wert and Philippe de Monte, and virtuosos on various instruments were called to the city for their education. It is no coincidence that during the 16th century no fewer than 25 Neapolitan composers belonged to various ranks of the nobility, among them Gesualdo, Dentice, Caracciolo and Nenna. The idealized image of a prince of music had already appeared in Jacopo de Jennaro's poem *Le sei etade de la vita humana* which placed the noble Vincenzo di Belprato 'at the head of all musicians', and it was first embodied in the Prince of Salerno, Ferrante Sanseverino, who dominated artistic life in Naples in the first half of the 16th century. He transformed his famous palace (now the church of the Gesù Nuovo) into an auditorium for concerts and staged performances, obtained the participation of leading musicians and introduced the first comedies with music to Naples. Although he was exiled for life by the Spanish viceroy Pedro de Toledo after the failed revolution of 1547, his example served to break down any remaining ideological barriers between patronage and participation in music: one of Prince Ferrante's musicians, the cavalier Fabrizio Dentice (son of Luigi), became one of the most celebrated virtuoso lutenists of the century, and his polyphonic compositions were long performed by the leading musical chapels. At the end of the 16th century, the Prince of Venosa, Carlo Gesualdo, brought the principal Neapolitan professional musicians together in a symbolic battle with the aristocratic amateurs of his circle. The influence of Gesualdo's taste for extreme experimentation lingered on in Naples even after his death in 1613 and prevented the latest northern Italian musical trends (Florentine accompanied monody and Monteverdi's Venetian *stile concertato*) from taking root until at least 1630.

(ii) The Palace Royal Chapel. The musical establishment of the Aragonese kings included both the singers and *ministriles* (instrumentalists) of the royal chapel and the wind players at the Castel Nuovo, who were supplemented by other players from the other royal garrisons for the most formal ceremonies. These permanent positions did not suddenly disappear with the fall of the dynasty in 1503. The last king, Federico, had kept his chapel active to the end and probably took some of his favourite musicians with him during his brief exile in France. Some Neapolitan musicians preferred to seek new, more secure posts at other courts in Italy and Europe; but certainly there were still many left in Naples during the visit of King Ferdinand V in 1506, because he added new, Neapolitan members to his own chapel for his journey home. Even then the activities of the royal chapel and of the players at the Castello did not cease altogether: they were put in the service of the viceroy for ceremonies of state.

There is no documentation of the chapel singers in the first half of the 16th century, although we know that in 1507 the senior chaplain was Giovan Maria Pulderico, Archbishop of Nazareth. There are, however, receipts for payments made in 1510 and 1514 to four *ministriles* (the players at Castel Nuovo); the ordinary players were supplemented by 'extraordinary' ones: six in 1511, a drummer and, from 1530, a trombone. In 1540 the viceroy Pedro de Toledo moved the royal chapel to the new royal palace he had built next to the Castello. Documentation of the continuing activity of the royal chapel resumes only in May 1555, and for this reason it was believed to have been re-established that year by the viceroy, and was from then on known as 'di Palazzo', possibly to distinguish it from the former 'del Castello'. The first *maestro* of the new administration was the Spaniard Diego Ortiz (1555–70), who had come with other Spanish musicians in the retinue of Pedro de Toledo. His successor Francisco Martinez de Loscos (1570–83) was also Spanish, while the subsequent *maestri* of the royal chapel were two Flemings: Bartolomeo Roy (1583–99) and Giovanni de Macque (1599–1614), with brief interludes when the assistant *maestro*, Bartolomeo Carfora, was in charge. The composer Stefano Lando is listed in the personnel under the description of 'conservatore delle viole' from 1565 to 1571.

The destruction of the treasury registers of the Archivio di Stato in Naples means that we have no information on composition in the chapel during that period, but

Salvatore Di Giacomo compiled a list of at least 93 musicians for 1555 to 1603 (manuscript in *I-Nn*, to be combined with the surviving papers in the archive of Ulisse Prota-Giurleo entitled *Catalogo generale del servizio musicale a Napoli, 1560–1800*). All the *maestri* of the royal chapel kept the post until their deaths, a clear indication of the position's prestige. During the time when the viceroy was the Duke of Alba, in 1588, the royal chapel directed by Ortiz (the organist was the renowned Spanish theorist Francisco de Salinas) amounted to at least 15 members.

When Macque died in 1614, the first Italian *maestro*, G.M. Trabaci, was elected. The chapel was then made up of 26 choristers (seven sopranos, four altos, three countertenors, six tenors and six basses) and 12 instrumentalists (six violins, cornetto, trombone, lute, harp and two organists). Among the most important figures who belonged to the chapel were Pietro Cerone, G.S. Ranieri, G.D. Montella, Ascanio Maione, P.A. Guarino and Francesco Lambardi. Apart from one reform carried out by the viceroy Cardinal Zapata in 1621 with the intention of reducing costs, the make-up of the royal chapel (which had changed location again, joining the vice-regal court in the new palace constructed in 1602) remained practically unchanged up to the time of Alessandro Scarlatti, although the plague of 1656 killed 20 of its 35 members, including the *maestro di cappella*.

The duties of the royal chapel were naturally principally linked to court ceremonies and in consequence to the taste and habits of the viceroy. Pedro de Toledo, for example, took every opportunity to use the chapel: 'He kept the portable royal chapel excessively well attired, and served by the finest prelates and priests, and excellent singers; and wherever he went, he took it with him'. There is a wealth of information on the chapel's contributions to the various feasts of the liturgical year or to state occasions in the court *Etiquetas* copied by Raneo in 1634, as well as in a number of supplementary sources. The prefaces of opera librettos often reveal the involvement of the royal chapel in opera performances not only in the royal palace, but also at the Teatro di S Bartolomeo and other locations in the city. Even more frequent was its participation in public ceremonies in the city's churches and squares. Throughout the 17th century choristers always outnumbered players (20 against 12 to 14), with one organ and harpsichord builder.

When Alessandro Scarlatti arrived in Naples in 1683 in the retinue of the new viceroy del Carpio, he initiated a double revolution in the age-old traditions of the chapel. The elderly Francesco Provenzale's failure to be elected as Ziani's successor, despite being considered the most deserving Neapolitan candidate for the post, led to a mutiny by six royal choristers and instrumentalists loyal to him. All six places were filled by Roman musicians who had come with Scarlatti, while he himself was appointed the new *maestro di cappella* (–1704). Scarlatti left the chapel several times to travel abroad, and for two short periods it was directed by leading Neapolitan musicians: Gaetano Veneziano (1704–7) and Francesco Mancini (1708). In 1702 Alessandro Scarlatti's son Domenico entered the royal chapel as organist, although he too did not stay long. In 1704 the establishment consisted of the *maestro*, *vice-maestro*, three organists, and 19 choristers of the first rank (including the famous castratos Matteo Sassani and Nicolini), as well as eight violins, two violas, two double basses and one harp. By this time duties of the royal chapel had changed, and it was employed much more in the opera performances in the palace and in the city theatres, and less in official liturgical ceremonies. The single innovation in the years of the Austrian viceroyalty was that of a new bureaucratic post, the Captain of the German Guard, who was the chief inspector of matters relating to the royal chapel, and who shared with the *maestro di cappella* the responsibility for decision-making which had formerly been the preserve of the senior chaplain.

On the death of Alessandro Scarlatti, Mancini was again appointed (1725–37), followed by Domenico Sarro (1737–44). Sarro was the first of the *maestri* of the Bourbon age, which represents the final phase of the royal chapel's existence. His successors were Leonardo Leo (1744), Giuseppe de Majo (1745–71, replaced for a short time by Giuseppe Vitagliano), Pasquale Cafaro (1771–87) and Vincenzo Orgitano (1787–1805). Distinguished names also appear among the organists and other members of the chapel, including Domenico Auletta (1779–89), Domenico Cimarosa (1779–99) and Niccolò Piccinni (1771–1776).

(iii) The 'most faithful city' and the Treasury of S Gennaro. Even when ruled by the viceroy, the city of Naples had an autonomous mechanism of self-government, with the election of representatives: these 'Eletti' represented the nobility's five piazzas and the single piazza of the people. The Eletti also had responsibility for organizing public celebrations, including processions and carnival entertainments. The music which accompanied such ceremonies, the most important of which were the three evenings of the September feast of St Januarius (Gennaro), one of the 22 patron saints of Naples in the 17th century, was entrusted to a *maestro di cappella* elected for the purpose. In 1665 the 'maestro di cappella della Fidelissima Città' was Francesco Provenzale, who retained the post until 1699, when he was replaced by Gaetano Greco. The Eletti of the 'most faithful city' also supervised the religious ceremonies within the cathedral, in the famous chapel of the Treasury of S Gennaro (inaugurated in 1646).

The first information on the musical chapel of the Treasury, which was assembled specifically for celebrations connected with the saint, dates from the 1660s, when the *maestro di cappella* was Filippo Coppola, and the forces consisted of between two and four choirs with two organists (the two organs had been constructed in 1649 by Pompeo di Franco), harp, archlute, four violins and violas. Provenzale attempted to assume the direction of the Treasury as well from 1665, but he had to wait for the deaths of both Coppola and his successor G.C. Netti before he became *maestro di cappella* of the Treasury in 1686. He retained the post until 1699, when he was replaced by Cristoforo Caresana, who died in 1709 and was in turn replaced by a pupil of Provenzale, Nicola Fago (1709–31). His son Lorenzo and grandson Pasquale took the post in succession, followed by Giacomo Insanguine in 1781, who on his death in 1795 was followed in turn by Raffaele Orgitano and Antonio Cipolla. One of the most significant *maestri* of the 'most faithful city' after Greco was Carlo Cotumacci. During the 18th century some of the finest singers, including Farinelli, and instrumentalists were involved in the music of the Treasury. Apart from the chapel of the Treasury, the cathedral also had its own musical chapel, employed

by the Archbishop of Naples, which was in open rivalry with the royal chapel. The *maestri di cappella* at the cathedral were always prestigious musicians, from Stefano Felis at the end of the 16th century to Angelo Durante at the beginning of the 18th century.

(iv) The SS Annunziata, Congregazione dell'Oratorio and other churches. After the royal chapel and the cathedral and Treasury, the most important musical institutions in the city were the Casa dell' Annunziata and the Congregazione dell'Oratorio. The former was a charitable institution for orphans, which gradually came to specialize in providing the children with a musical education, and in performing music in the church. According to Giovanthomaso Cimello, the celebrated Tinctoris had been *maestro di musica* of the church of the SS Annunziata at the end of the 15th century. The name of the composer Di Maio appears in the registers in 1548, although the first *maestro di cappella*, documented in 1557, was G.A. Bolderino. In 1563 Giovanni Domenico da Nola was appointed *maestro di cappella*, and in 1580 the chapel, still under Nola, consisted of between 18 and 24 singers, with three organists, a trombonist, a cornett player and a viola da gamba player. On Nola's death in 1592 Camillo Lambardi became *maestro di cappella*, with even larger forces, including the best musicians in the city, particularly the organists Giovanni de Macque and Scipione Stella, subsequently replaced by G.M. Trabaci and Ascanio Maione (later followed by his son Giulio, a virtuoso harpist). At the same time there was an increase in the teaching at the orphanage, where music was now taught to the girls as well as the boys. However, the institution soon found itself in straitened circumstances, and was obliged to reduce the musical forces and use 'sabbatari' musicians, usually members of the royal chapel brought in only for the most significant musical events. In 1604 there were only nine choristers, with two organists and five 'sabbatari'. Over the years, names associated with the Annunziata included the lutenist Crescentio Salzilli, the theorist Pietro Cerone, the composers Orazio Giaccio, Scipione Dentice and Gregorio Strozzi (from 1641) and also the first castratos. When Lambardi died in 1634, G.M. Sabino was elected *maestro*, succeeded on his death in 1649 by his brother Donato Antonio, organist at the Annunziata since 1635, who survived him by only a year. In 1650 the *maestro di cappella* was Filippo Coppola, who held the post until his death in 1680. But by now the crisis in the musical life of the Annunziata, caused by a drop in earnings and by competition from the conservatories, had reduced the forces to a small group of choristers and violinists, with regular guest musicians. There was even a reduction in the duties of the new *maestro di cappella*, Gennaro Ursino, who was limited to directing the music for the major feast days, and in 1700 the post of master of plainchant was abolished. However, the full post of *maestro di cappella* was restored to Ursino in 1705, and on his death in 1715 it passed to Lorenzo Rispoli. In the following decades, despite the Annunziata's apparent decline in importance, the church employed *maestri* of the level of Francesco Feo (1727–45), his nephew Gennaro Manna (1745–54) and Carlo Cotumacci (organist from 1749). After the destruction of the church by fire in 1757, the new building designed by Vanvitelli saw the return of Gennaro Manna (1774) who succeeded in having his grandson Gaetano appointed (1780), instead of the prestigious assistant *maestri* already serving the institution.

The Congregazione dell'Oratorio was established in Naples in 1586, at the behest of Filippo Neri, and from the very beginning it attached great importance to music, with the Roman composer Giovenale Ancina present until 1596: in his *Tempio armonico* (1599[6]) he included *laudi* and other works by Neapolitan composers. In 1612, after years of disagreement, the Naples establishment separated from the Roman one, and assumed its present name of the Oratorio dei Girolamini. From 1632 onwards liturgical functions with music were governed by precise instructions, under the direction of a *musicae praefectus*. Soon the Girolamini's musical chapel rivalled the leading musical institutions in the city. Musicians associated with the institution include Scipione Dentice (who composed two books of *Madrigali spirituali* for the Girolamini), G.M. Trabaci (*maestro* from 1625 to 1630), G.M. Sabino (*maestro* from 1630 to 1637), Erasmo Bartoli, known as Padre Raimo (who introduced the use of four choirs in the middle of the 17th century, *prefetto* from 1645), Filippo Coppola (*maestro* about 1664), Donato Ricchezza (*maestro* until 1714), Giuseppe Conti (1717–31), his son Nicola Conti (1731–62), Nicola Sabatino (1763–88), Giuseppe de Magistris (1781–93) and finally Giuseppe Arena. There were also many musicians who worked with the Oratorio on an occasional basis, including Cristoforo Caresana who bequeathed his entire music collection to the Oratorio, which still holds the most valuable collection of Neapolitan sacred music in existence. The Oratorio also encouraged the publication and dissemination of numerous collections of *laudi* and frottolas, and put on performances of oratorios and sacred music dramas.

There were many other religious institutions in Naples which were musically active, especially from the end of the 16th century. These included the Spanish church, S Giacomo degli Spagnoli, the church of the Gesù Nuovo, the Collegio Gesuitico dei Nobili, S Domenico Soriano, S Maria del Carmine, S Gregorio Armeno (which still possesses a valuable collection of music), the convents of S Maria la Nova and of SS Severino e Sossio, S Chiara and Monteoliveto, as well as the confraternities. But, as many surviving organs indicate, music was cultivated in virtually every tiny chapel of the nearly 500 churches in Naples during the Spanish era.

(v) The confraternities. As in the other principal Italian cities, after the Council of Trent (1545–63) various confraternities were created in Naples for the mutual assistance of craftsmen. The first confraternity of musicians, 'S Maria degli Angeli' in the church of S Nicola alla Carità, was established in 1569; its statutes were confirmed at the beginning of the 17th century and its patron was the distinguished lutenist and theorist Scipione Cerreto. However, it was not until the middle of the century that other confraternities of musicians were founded. A confraternity named after 'Gregorio Magno e Leone, et di S Cecilia V' was formed in 1644 in the church of S Brigida, although it seems to have been discontinued after 1649. In this year Domenico Cenatiempo, a member of the order of the Padri Pii Operai, created a much larger confraternity of musicians in the church of S Giorgio Maggiore. This confraternity numbered approximately 150 musicians, over half of whom lost their lives in the terrible plague of 1656. In 1667 the confraternity of S Giorgio Maggiore was split between the 'Master Players

of Strings' and 'Players of Wind and Trombones', who moved to the same chapel of the first confraternity in the church of S Nicola alla Carità. The statutes, and as a result this division between players, were confirmed in 1681 and again in 1721 (wind) and 1723 (strings).

The musicians of the royal chapel also had their own exclusive confraternity, named after S Cecilia, of which the earliest documentation dates from 1655. In the meantime a confraternity of makers of strings for lutes and other instruments had been formed. It seems that some Neapolitan musicians continued to use the S Giorgio Maggiore establishment at least until 1701, the year in which an oratorio by Nicola Sabini, a member of the confraternity, was performed on the musicians' principal annual feast day of St Casimir. From 1709, possibly as a result of the new Austrian government, the musicians' confraternity seems to have moved permanently to S Nicola alla Carità, like S Giorgio an establishment of the Padri Pii Operai, where it remained for 30 years, meeting at the altar of Our Lady of Sorrows. In 1716, however, at least five musicians joined together in the convent of S Maria la Nova in a 'Royal Congregation and Assembly of Musicians'. The two confraternities did not merge until 1738, when they moved to a new home, the church of Ecce Homo. Apart from the professional confraternities, to which all the great Neapolitan musicians who were not aristocrats belonged, there were countless confraternities of craftsmen that sponsored performances of music in religious establishments or during public processions, in some cases maintaining their own chapel and *maestri*, but usually engaging professional musicians or students from the conservatories as the need arose.

(vi) The conservatories. The Seminary of Naples, attached to the cathedral, had from its foundation in 1568 a singing master, with a 'great hall for learning lessons in singing and music'; the seminary was suppressed in 1865. But here, as in many other Neapolitan religious institutions, the study of music was only a marginal element. From the middle of the 16th century some of the many charitable institutions known as *conservatorii* began to specialize in teaching music, in response to the increasing enthusiasm for music in the city. This quickly led to a change in nature of the conservatories, which began to take in boys from poorer families who were not orphaned, in order to prepare them for a career in music.

Apart from the Casa dell'Annunziata, mentioned above, there were four principal institutions specializing in music. The earliest was the Conservatorio di S Maria di Loreto, founded in 1537 by the Spaniard Giovanni di Tapia. Payments for musicians were recorded as early as 1545, although the first mention of a *maestro di cappella* dates only from 1633. Later *maestri* included the leading figure in 17th-century Neapolitan music, Francesco Provenzale (1664–75). The success of the Conservatorio di Loreto under Provenzale was such that in 1667 it was closed to new pupils, because the roll had exceeded 100. Giuseppe Cavallo, Provenzale's assistant, was *maestro* from 1675 until his death in 1684. He was succeeded by another of Provenzale's assistants, Gaetano Veneziano (1684–5 and – after the temporary service of Nicola Acerbo and Pietro Bartilotti – from 1695 to 1716), who was in turn succeeded by Giuliano Perugino. For a single month, in 1689, Alessandro Scarlatti accepted the post, and during the 18th century some eminent musicians appear in the lists: Francesco Mancini (1720–37), Giovanni Fischietti (1737–9), Nicola Porpora (1739–41 and 1758–60), Francesco Durante (1742–61), Gennaro Manna (1756–61), Pietro Antonio Gallo (1761–77) and Fedele Fenaroli (1777–1807).

The Conservatorio di S Onofrio in Capuana dates from the beginning of the 17th century, and took its name from the charitable foundation established in the church of S Onofrio in 1578. The young pupils wore the same white habit as the members of the order. There is no information on specific musical activity until 1653, when 11 paying pupils and a 'mastricello' are listed, together with the first singing master, Matteo Arajusta, and Carlo Sica (*d* 1655) who was already *maestro di cappella.* None of his early successors were eminent musicians, with the exception of Francesco Rossi (1669–72) who then moved to Venice where he composed operas; subsequently, however, S Onofrio rivalled the other conservatories, thanks to such *maestri* as P.A. Zani (1678–80), Cataldo Amodeo (1681–8), Cristoforo Caresana (1688–90), Angelo Durante (1690–99 and 1702–4), Nicola Sabini (1699–1702), Nicola Fago (1704–8) and Matteo Marchetti (1708–14). The most illustrious sequence of *maestri* occurred between the two tenures of Francesco Durante (1710–11 and 1745–55): Nicola Porpora (1715–22 and 1760–61), Ignazio Prota (1722–3 and 1740–48), Francesco Feo (1723–39), Leonardo Leo (1739–44) and Girolamo Abos (1742–60). They were followed by Carlo Cotumacci (1755–85), Giuseppe Dol (1755–74), Giacomo Insanguine (1774–95), Giovanni Furno (1785–97) and Salvatore Rispoli (1793–7). The *maestro di cappella* was assisted by a violin master (and, from 1785, by a cello master) and by a 'cornetta' master. During the 17th century S Onofrio's principal role had been to supply young pupils for the city processions, and to present oratorios (including *Il ritorno di Onofrio in padria*, 1671). In 1797 the few remaining pupils at the Conservatorio di S Maria di Loreto transferred to S Onofrio, and this affiliation lasted until 1807, when all three surviving conservatories (including the Pietà dei Turchini) merged into a single institution which was to become the Real Collegio di Musica and later the Conservatorio di Musica S Pietro a Majella.

The Conservatorio di S Maria della Pietà dei Turchini originated in 1583 from a confraternity which had met in the church of the Incoronatella from 1573. At the end of the 16th century the necessary premises were acquired next to the church to accommodate young students and from the early years of the new century there was an upsurge in music. The first *maestro di musica* was a humble priest, Lelio d'Urso (1615–22), who was succeeded by an official *maestro di cappella*, G.M. Sabino (1622–6), the first of a series of prestigious composers and teachers, including Francesco Lombardi (1626–30), Giacinto Anzalone (1630–57), Domenico Vetromile (1657–62), Giovanni Salvatore (1662–73), Francesco Provenzale (1673–1701), Gennaro Ursino (1701–5), Nicola Fago (1705–40), Leonardo Leo (1741–4), Lorenzo Fago (1744–93), Nicola Sala (1793–9) and Giacomo Tritto (1799–1800). As in the other institutions, the Turchini (named after the deep blue 'turchino' colour of the pupils' uniform) had only one teacher for string instruments (apart from an occasional lute master) and one for all wind instruments. The Pietà dei Turchini had been the most wealthy of the four old conservatories, and was the last to disappear when, in 1807 it was transformed

together with what remained of the others into the Real Collegio di Musica.

The only one of the four principal conservatories not to merge into the Real Collegio was the Conservatorio dei Poveri di Gesù Cristo, which from its inception in 1599 was under the control of the Archiepiscopal Curia of Naples. The first music masters are recorded from 1606 onwards, but only from 1633 are there records of the names of permanent music teaching staff. About 1644 the conservatory had an annual revenue of some 1000 ducats for 'various music and processions, performed and served by the children'. From that period, the teachers were sufficiently well known to rival those at the other Neapolitan conservatories: Donato Antonio Sabino (1642), Alessio Capece (1643), Domenico Arcucci (1667–77), Giovanni Salvatore (1677–88), Giandomenico Oliva (1684–5), Gennaro Ursino (1686–95), Gaetano Greco (1696–1706 and 1709–28), Nicola Ceva (1706–9), Francesco Durante (1728–38), Francesco Feo (1738–43) and Girolamo Abos (1740–43). Pergolesi was the most distinguished pupil from the Conservatorio dei Poveri, the strategic location of which (opposite the church of the Girolamini and close to the cathedral) encouraged continual interchanges. In 1743 one of the last 'foreign' pupils joined the Conservatorio dei Poveri. He was Benedetto Rivière, brother of the French ambassador to Naples. But in November of the same year the conservatory was suppressed and transformed into an establishment of the archiepiscopal seminary 'because of the scant progress made in religious matters'. Other music schools lived a short life in Naples, like the Musical Seminary in S Gennaro de'Poveri (1670–1702), which was subsequently named S Gennarello.

(vii) Instruments and instrumental music. In general, the Neapolitans have invented neither musical instruments nor genres, but in assimilating them from outside have often taken them to the highest level of perfection. In instrumental music, Naples lay on an axis between the east, Spain and continental Europe. As early as the end of the 15th century Tinctoris declared that much attention was given in Naples to the viola 'de arco' (viola da gamba, to which Diego Ortiz devoted a treatise in 1553), and the viola de mano, or vihuela. During the 16th century Neapolitan virtuosos on the lute, viol, lira da gamba, keyboard and, especially, harp acquired a European reputation, as the lists in Scipione Cerreto's treatise *Della prattica musica vocale* (Naples, 1601) reveal. One instrument which was long the exclusive province of Neapolitan virtuosos was the double harp, one of whose principal exponents, Adriana Basile, was also famous for singing to the accompaniment of the guitar, known in Naples both in its four-double-string version (the 'bordelletto' or 'chitarrino alla napoletana') and in the five-string version known during the 17th century as the 'Spanish guitar', but which probably originated in Naples. German lute makers satisfied the demands of a society that valued stringed instruments above all others. The distinctive twangy sound of the 'tiorba a taccone', the Neapolitan name for the colascione, struck Burney during his visit to the city in 1770. The great keyboard composers of the early 17th century, from Macque to Trabaci and Maione to Strozzi, produced works in 4 part score (*partitura*) which could be played by any kind of polyphonic instrument. But some of their works were intended for extremely complex experimental instruments, such as the 'chromatic' or 'enharmonic' harpsichord, as was the treatise by Fabio Colonna, *La Sambuca lincea* (Naples, 1618). By 1638 the experimental phase of Gesualdo and his followers was over, as is evident from a letter by the painter Domenichino, in which he wrote that he could no longer find musicians able to play the enharmonic instruments he had designed. Around the same time, in 1630, the violin hitherto little known in Naples, made its first official appearance in the Neapolitan conservatories.

It was during this period that sacred music in *stile concertato*, on the Venetian and Monteverdian model, made its belated entry into Naples. Although there was an early group of at least five violins in the royal chapel, directed by Trabaci and employed as 'outsiders' in other institutions, the first collection of music for violins and other instruments was *primo libro di canzone* published in Naples in 1650 by the new *maestro* at the royal chapel, Andrea Falconieri. Naples also had a flourishing school of wind playing. Beside the cornetts, shawms, bassoons and flutes, there was the distinctive *sordellina*, a member of the bagpipe family, for which, as well as numerous literary sources, there is at least one manuscript of music written in special notation on two lines, dated Naples 1603 (manuscript of G.L. Baldano in the Biblioteca Vescovile in Savona). It is noticeable that other types of musical notation had exclusive use in Naples, such as 'Neapolitan' lute tablature (identified from the end of the 15th century, *I-Bu* 596 H.H.24, in Cerreto's treatise of 1601) and Valentini's *Liuto anatomizzato* (Rome, 1640) and 'Neapolitan' harpsichord notation used only once by Antonio Valente (1576[3]).

Besides printed and manuscript collections for harpsichord, very few collections of music for solo instruments were produced in Naples before the end of the 17th century, although the city had important violinists who created a distinctive school of string playing: G.C. Cailò (?1659–1722), Pietro Marchitelli (?1643–1729) and G.A. Avitrano (1670–1756), the composer of three collections of trio sonatas, the first of which dates from 1697. The cellists Rocco Greco, Francesco Alborea and Francesco Scipriani were among the great virtuosos of the early 18th century. Marchitelli was the famous 'Petrillo' who in 1702 humiliated Corelli during a performance of his music in Naples, according to an anecdote related by Burney. Naples was also the birthplace of Nicola Matteis (i), the most important violinist in 17th-century London, and in the early years of the 18th century Geminiani followed the same route, while Michele Mascitti, G.A. Piani and Salvatore Lanzetti, all Neapolitans, made their mark in Paris. Keyboard virtuosos followed the developments in their respective instruments, and through them we know of many famous organ and harpsichord builders in Naples, often several generations of the same family. The genius of Domenico Scarlatti, born and trained in Naples, was founded on techniques acquired from the Neapolitan masters, while the vast output of Gaetano Greco still awaits research.

(viii) Music publishing and theoretical treatises. After only two attempts at music publishing in the 15th century (Gaffurius and Tinctoris), the first printed music in Naples dates from 1519: a lost book of *Mottetti* by A. de Frizis and the second book of *Fioretti di frottole* by G.A. Caneto da Pavia (1519[4]), although a Neapolitan, Pietro Sambonetto, had already published a collection of frottolas in Siena (1515[2]). For several decades in the early viceregal

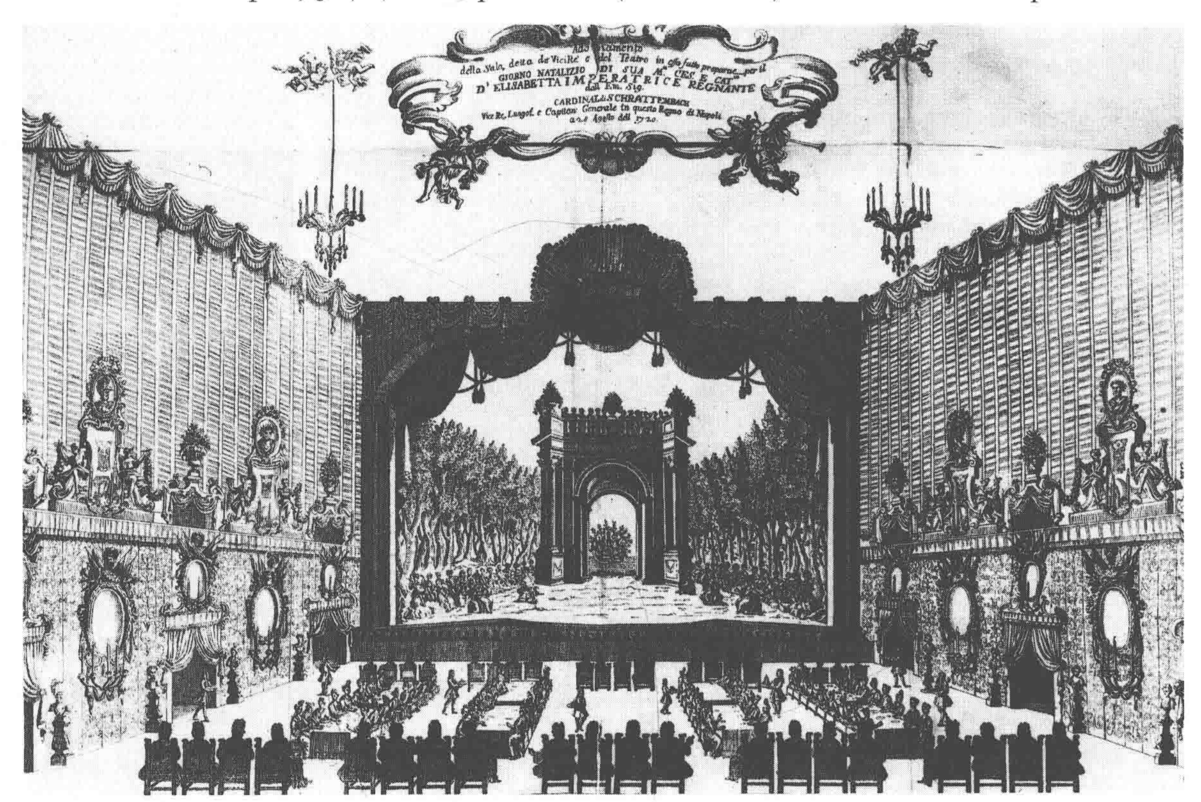
3. *Musical gathering; painting by an artist of the Neapolitan school, c1725 (Museo d'Arte Antica, Milan)*

period publication remained a rare event. It must have been the visit of Charles V to Naples that prompted the publication of the two *Libri della fortuna*, lute tablatures by Francesco da Milano, partly in so-called 'Neapolitan tablature' (1536, a single copy in *F-Pn*). In 1537 the first edition of *Canzone villanesche alla napolitana* (Giovanni de Colonia, 1537[5]) appeared, the official birth certificate of the 'villanella alla napolitana', a musical genre that was extremely popular in Europe until the beginning of the 17th century. Subsequent Neapolitan publications were largely collections of villanellas by Nola (1541), Cimello and Fontana (1545), Burno and di Maio (1546), and many other anthologies. One collection of particular importance is the *Aeri* published in 1577 by Rocco Rodio, for the way it reflects contemporary stage spectacles with music which anticipate the Florentine experiments with monody.

It was only from 1591 onwards that collections of madrigals were published in Naples, despite the many madrigals by Neapolitan composers which had already appeared in other cities, particularly Venice. And yet Naples became the main centre in the final phase of the madrigal until the 1630s, with the majority of composers connected either to Gesualdo's circle or to the royal chapel.

The leading publishers of music were Cancer, Cacchio, Vitale, Sottile, Stigliola, Gargano, Scoriggio and Ricci, the archiepiscopal printers Beltrano, De Bonis, and, most importantly, G.G. Carlino, Gesualdo's personal printer. As for instrumental music, after the edition of lute music in 1536 there were only three publications during the rest of the 16th century (Rodio 1575, Valente 1576 and 1580), while the 17th century saw just a few publications for keyboard or guitar. After the first collection of dances and sonatas for several instruments by Falconieri (1650) there was a gap of half a century before the collections by Avitrano and the lost edition of sonatas by Chiarelli (1699). Music publishing was dominated by sacred music, particularly motets, and by theoretical treatises. The earliest of these was the short treatise *De musica* by A.M. Acquaviva d'Aragona, interpolated in his commentary on Plutarch's *De virtute morali* (1524), which was partly repeated in the better known *Duo dialoghi* by Luigi Dentice (1552). Apart from two manuscripts that can be attributed to Giovanthomaso Cimello (*I-Nn*, V.H.210 and *Bc*, B 57) the other 16th-century Neapolitan treatises were on playing a musical instrument (viol for Ortiz, lute for Lieto, harpsichord/organ for Valente's tablature) or singing (C. Maffei da Solofra). Rocco Rodio's *Regole di musica* (various editions from 1600 to 1626) provided a thorough contrapuntal method, revised and expanded by his pupil Olifante, who in turn collaborated with Giovanni Salvatore on his subsequent treatise *Porta aurea* (1641). In the 17th century, following the encyclopedic treatises by Cerreto (1601) and Cerone (1613), there were more treatises devoted to the composition of sacred music and to music teaching. The most vivid treatise of the period is Giovanni d'Avella's *Regole di musica* (printed in Rome in 1657) which upheld the music of Gesualdo and his circle as the ideal model of musical composition.

(ix) Vocal music and opera. The success of the villanella – possibly the only musical genre to have been invented in Naples before *opera buffa* – from the 1550s onwards owed much to its use of Neapolitan dialect to poke fun at the madrigal and its conventions. The villanella infiltrated



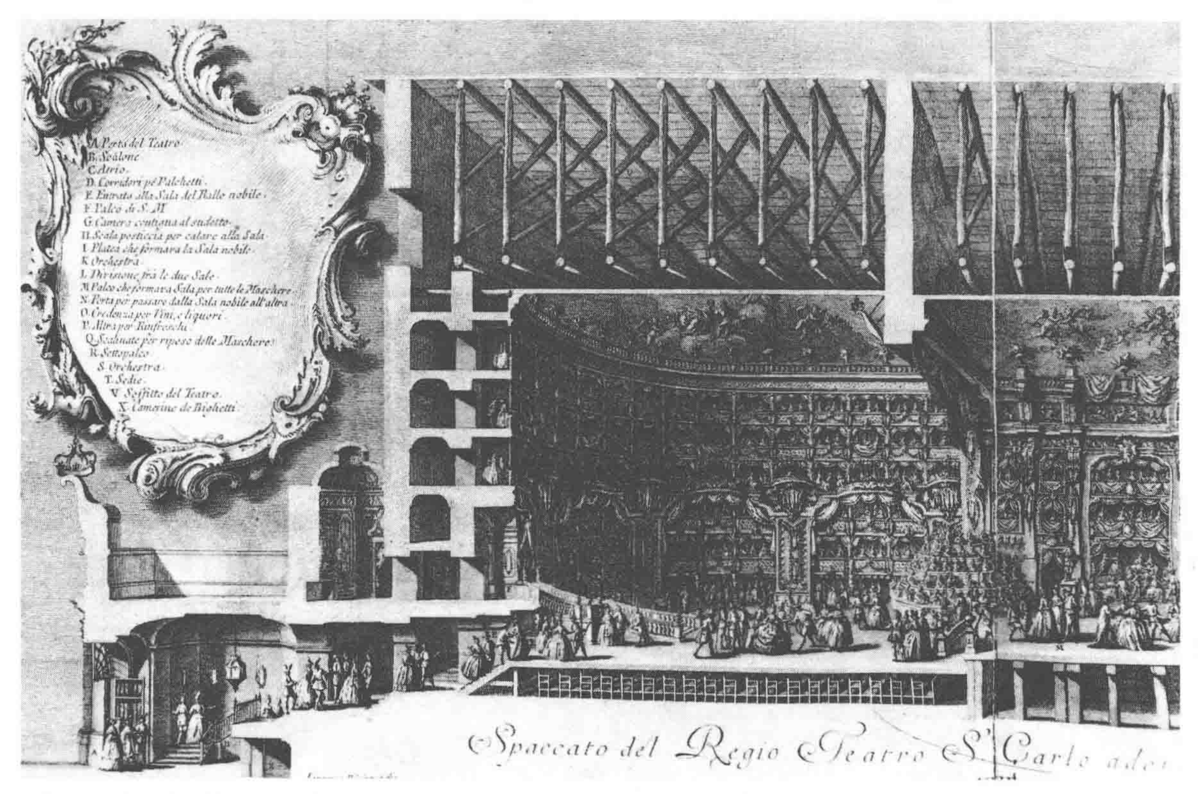
many musical genres during the viceregal period, turning up in the most unlikely places: in the sacred dramas performed in the conservatories, for instance, in chamber cantatas and in opera. Leonardo Vinci's only surviving comic opera *Li zite 'ngalera* (1722) actually opens with a villanella. Neapolitan dialect was an aspect of the *commedia dell'arte* tradition that passed into comic opera, establishing a distinctive Neapolitan style. An anonymous prologue interpolated in the manuscript of Francesco Boerio's *Il disperato innocente* (1673) provides a valuable description of how operas were performed in Naples at that time. The same subject is dealt with in depth by the famous librettist Andrea Perrucci in his manual *Dell'arte rappresentativa, premeditata e all'improvviso* (1699), which summarizes the reciprocal influences between comedy, sacred oratorio and heroic opera. Giulia de Caro, a singer and later the impresario of the first opera house in Naples (from 1673 to 1675) began her career in *commedia dell'arte*, as did another actress-impresario, Cecilia Siri Chigi.

The generic name of the companies that staged operas in 17th-century Naples was 'Febi armonici', a reference to the name of the company of comedians and musicians which had been summoned from Rome by the Count of Oñate, Viceroy of Naples, in 1650 and had introduced Venetian opera to the city. Before this, however, there had been more than a century of continually developing links between theatre and music. Theatrical performances with music were first given in the homes of Neapolitan aristocrats, in association with leading academies, such as the Sereni. The model was provided by the spectacles organized by Prince Sanseverino in about 1545 (*Gli ingannati* and *Philenia*, with music by, respectively, Zoppino and Mariconda). In the 17th century there were produced two particularly significant court entertainments consisting of masquerades with a concluding dance: the 'festa a ballo' *Delitie di Posilipo Boscarecce, e Marittime* (1620), the printed libretto of which preserves all the vocal music (by Trabaci, F. Lambardi, Giramo, Anzalone and Spiardo) and diagrams of the dance movements; and the mascherata *Monte Parnaso* given in honour of the arrival in Naples of the king's sister, Maria of Austria, Queen of Hungary, in 1630. Here the music (by Giacinto Lambardi, now lost) and dances were accompanied by spectacular scenic transformations. Another important entertainment was that given for the imperial coronation of the King of Hungary in 1637; but after this date, court 'feste a ballo' were increasingly replaced by the new fashion for opera.

The viceroy was unable to create a true system of patronage that could include entertainments and opera, since the average length of his government was only a few years. Moreover, only a few of them had a personal predilection for music and theatre. For example, the Viceroy d'Oñate's decision to introduce opera performed by the Febi Armonici was purely political: a celebration of the victory over Masaniello with a type of heroic spectacle hitherto unknown in Naples. Celebrations at the royal palace of birthdays, namedays and anniversaries linked to the Madrid court should be viewed in the same light. The viceroys' tentative efforts to introduce comedies and opera sung in Castilian at court led to nothing; the music has survived in only one such case, *El Robo de Proserpina* by Filippo Coppola (*maestro* of the royal chapel), performed in 1678 and revived in 1681 under a different title.

The first opera performed in Naples was *Didone*, in September 1650. The composer is unknown, but the libretto is the same as that of Cavalli's opera of the same name, given in Venice in 1641. This marked the beginning of a Neapolitan operatic tradition, which at first was limited to importing operas from Venice, adapted to local taste. The first pieces included Monteverdi's *L'incoronazione di Poppea* (1651), the score of which has survived, and Cavalli's *Veremonda* (1652) with 'Appearances of Scenes, Machines and Dances' by G.B. Balbi. Subsequently the companies of 'armonici' made their permanent home in the Teatro S Bartolomeo (Teatro di San Bartolomeo), which until then had been used only for spoken plays: for 30 years after 1654 there were no great changes in the organization of Neapolitan opera. The Neapolitan 'adapters', composers belonging to the troupe of 'armonici', began to introduce characters singing in Neapolitan into operas in Venetian style. The most skilled were Francesco Cirillo (who arranged Cavalli's *Orontea* in 1654 and composed *Il ratto d'Elena* in 1655), Giuseppe Alfiero (*La fedeltà trionfante*, 1655), Filippo Coppola and, especially, Francesco Provenzale, who was the first to produce operas independent of pre-existing models. Of his operas only the scores of *La Stellidaura vendicante* (1674) and *Lo schiavo di sua moglie* (1672) have survived. After 1683, when he became director of the Teatro S Bartolomeo, the leading figure in opera in Naples was Alessandro Scarlatti, who did much to modernize the genre and make it truly international. During his 20 years in Naples, Scarlatti wrote about 40 operas and produced works by his leading northern Italian contemporaries, Legrenzi, Pollarolo, Sartorio, Pallavicini, Perti, Bononcini, Draghi, Pasquini and Gasparini.

Besides the public opera house run by an impresario (with two seasons, one during Carnival and the other, in the open air, in summer), operas were produced in the royal palace and sometimes also in the homes of the aristocracy. Home-grown pieces performed by the musicians of the royal chapel alternated with operas brought in by travelling companies, usually staged first at the royal palace and then at the S Bartolomeo. One effect of Scarlatti's arrival from Rome in 1683 to become the director of a troupe which included some of the most important Italian singers of the day was to erase the difference between church (the singers in the royal chapel) and theatre performers. From 1650 until the end of the Spanish viceroyalty in 1706, more than 170 operas were performed, to judge by the surviving librettos. The annual number increased steadily during the subsequent Austrian viceroyalty, when new theatres were built, mainly devoted to comic opera (the Teatro dei Fiorentini, 1707; the Teatro Nuovo, 1724; and the Teatro della Pace, 1724). The old Teatro S Bartolomeo (which had already burnt down in 1681, reopening in 1682) was demolished in 1737, when the new Teatro S Carlo (Teatro di San Carlo) was inaugurated by the first Bourbon King of Naples. The players and singers of the royal chapel, together with teachers and pupils from the conservatories, were responsible for the musical performances both at court and at the S Bartolomeo, at least until 1684. That date initiated the third phase of Neapolitan opera, which flourished especially under the viceroyalty of the Duke of Medinaceli, an enthusiastic opera lover and a generous patron of



4. Performance of the 'Scherzo festivo fra la ninfe di Partenope' (music by Domenico Natale Sarri) in the 'gran sala' of the Palazzo Reale, in celebration of the birthday of Elisabeth of Brunswick, 28 August 1720: engraving by Francesco De Grado after Ferdinando Poletti

musicians and singers particularly of Angela Voglia, 'La Georgina'. The many Neapolitan operas composed by Scarlatti and his most renowned successors (Vinci, Leo, Pergolesi) are an eloquent demonstration of the city's passion for opera, particularly after the emergence of specifically Neapolitan forms of comic opera: the *commedia ppe mmuseca* (in Neapolitan throughout, the first documented examples of which date from after 1706), comic 'intermezzos' (including Pergolesi's famous examples), and *opera buffa*, which achieved success around 1720 with the works of Vinci, Leo, Pergolesi and many others.

With the arrival of the Austrian viceroyalty in 1707 Scarlatti left Naples; however, in 1708 the first Austrian viceroy, Cardinal Grimani, invited him to resume his office. The previous year Michelangelo Faggioli's *La Cilla*, a setting of a text by F.A. Tullio, was revived in the palace of the prince of Chiusano. This is thought to be the first opera sung entirely in Neapolitan; its libretto has survived (as have fragments of the music, preserved in *I-Nc*). The first public performance of a comic opera, *Patrò Calienno de la Costa* by Antonio Orefice, was given in 1709 at the Teatro dei Fiorentini. Scarlatti himself did not tackle this new genre until 1718, with *Il trionfo dell'onore*.

But another and more memorable event in Naples in 1724 must be mentioned – the production, at the S Bartolomeo, of Metastasio's first drama, *Didone abbandonata*, with music by Sarro. In the Metastasian drama the classical and rational ideas that had inspired Italian culture from the last decades of the previous century found full expression. It provided a paradigm for the new type of opera elaborated by the generation that had come to the fore in the years after 1720 – the one traditionally referred to by the controversial designation of Neapolitan opera. It could be regarded as a rationalization and a simplification of Baroque opera on the basis of the following: the well-cadenced articulation of the dramatic-musical structure in recitatives and arias; the rigorous, definitive differentiation of the role which the former and the latter play in the dramatic mechanism; the equally rigorous differentiation of the roles of the characters and the consequent introduction of a rigid internal hierarchy; the parallel definition of an affective typology of the arias, each one corresponding to a specific role; and the absolute prevalence of the three-part aria – in short, all the well-known characteristics of *opera seria*. Yet this structure, however uniform and standardized, precisely because of its intimate rationality retains enough flexibility to allow within itself an evolution, a gradual adjustment to changes in taste and sensibility. Compared with *opera seria*, comic opera is characterized not only by a much more simple style, but also, and above all, by a more varied formal articulation and by the presence of ensemble passages. Finally, the advent of Metastasian drama encouraged the formation, also in the Neapolitan environment, of another musical genre for the theatre, the intermezzo. For in Naples the practice of mixing a secondary, comic plot with the main, heroic one had remained more lively than elsewhere. Only after 1720 were comic scenes deleted from the text of dramas to form a short action, wholly independent from the main one and performed in the two intervals, between the three acts of an *opera seria*. Intermezzos, however, were relatively short-lived in Naples, because in 1736 they were banned by King

5. Cross-section of the Teatro S Carlo during a festival ball: engraving by Giuseppe Vasi after Vincenzo Ré, from 'Narrazione delle solenni reali feste fatte per celebrare in Napoli ... la nascita di ... Filippo Principe delle Due Sicilie' (Naples, 1748)

Charles III and replaced with dances. They reappeared, however, in the second half of the century, included, as *farsette*, in the third act of a comic opera.

Vinci was one of the first Neapolitan composers to embark on a career in opera outside Naples, in Venice, Rome and London, where Handel made pasticcios of some of his works. In 1724 Vinci was asked to set Stampiglia's *Partenope* (first set to music in Naples by Mancia in 1699 and then by Sarro in 1722) for the opera season in Venice. While Vinci is associated with the beginnings of *opera buffa* in Naples, Sarro owes his operatic reputation to his close collaboration with Metastasio (from *Didone abbandonata*, 1724, onwards) and to the commission to provide the opera that inaugurated the Teatro S Carlo in 1737 (*Achille in Sciro*). Vinci's decision to arrange Sarro's score of *Partenope* instead of making an original setting is an acknowledgement of his senior colleague's reputation as the only Neapolitan before Leo and Vinci himself who could rival Alessandro Scarlatti as a representative of the modern operatic style.

During the same period Naples had come to be considered one of the most important musical capitals, as the many distinguished visitors to the city confirm, and the conservatories achieved a European reputation: students no longer came only from the various provinces of the kingdom, but from the other Italian regions and even from outside Italy. The most respected teachers were Durante (who taught at three of the conservatories, but was not involved in opera) and Leo (who was a *maestro* at S Onofrio, Pietà dei Turchini, the royal chapel and also a leading figure in opera), while Vinci died before achieving an appropriate role in the musical life of the city. Other names were added to these; in the 1720s, Porpora, Feo and the 'Saxon' J.A. Hasse, who throughout his career remained strongly influenced by his training in Naples, and in the 1730s Pergolesi, Perez, Latilla, Sabatino, Jommelli and, later, Gennaro Manna. Many of these composers were successful in both *opera seria* and comic opera (Vinci, Leo, Pergolesi), while others worked almost exclusively in comic opera (Logroscino, Auletta). All of them also excelled in sacred music.

4. The Kingdom of the Two Sicilies (1734–1860). In 1734 the Kingdom of Naples, involved in the vicissitudes of the Polish war of succession, was assigned to Charles, son of Philip V of Spain and of Elisabetta Farnese, and formerly Duke of Parma and Piacenza. Urban and cultural life derived a new impulse from the regained independence; the city was adorned with new, grandiose monuments, among them the Teatro S Carlo (fig.5) which opened on 4 November 1737.

While opera dominated 18th-century Neapolitan musical life, sacred music was almost equally important. Sacred music generally followed a development parallel to that of opera; so there soon appeared a 'Neapolitan' mass, which often had the dimension of the so-called 'messa di Gloria' (in which only the first two parts of the Ordinary were set to music), with alternate choral passages and solos in the aria style. The same can be said of the motet for several voices with instruments, consisting of a choral introduction (normally repeated at the end) and of a succession of recitatives and arias, duets, etc. The liturgical cycles for Holy Week and Christmas (lessons and lamentations, responsories) and for the Office for the Dead are particularly rich examples of Neapolitan sacred music in the 18th century. Oratorio was practised mainly

by the pupils of the conservatories, and went out of fashion after about 1730. Instrumental music was less important; even in this genre, however, the activity of the Neapolitan musicians was not so trifling as was once thought. While instrumental music was an 'appendix' to the work of some masters mainly devoted to opera (Mancini, Porpora, Leo, Pergolesi), it constituted a fundamental part of Durante's output. Much of the instrumental music by Neapolitan composers had a didactic purpose, as was often written specifically for use in the city's conservatories.

In the second half of the 18th century the refined mechanism of Metastasian opera was modified more and more radically, under the new demand for new means of expression that required greater dramatic verisimilitude and, therefore, more agile and dynamic structures. The most radical innovations, however, were away from the Neapolitan milieu (Jommelli in Vienna and Stuttgart, Traetta in Parma, G.F. de Majo in Mannheim). In Naples, taste remained linked for some decades to the old tradition – as is shown by the scant success enjoyed by Jommelli after his return from Germany – and only after 1790 did the operas by the last representatives of the Neapolitan school, of the greater composers (Piccinni, Paisiello, Cimarosa) as of the lesser (Tritto, P.A. Guglielmi, N.A. Zingarelli), open themselves to the possibilities of innovation. Two factors contributed to this: the growing influence of French opera, and the increasingly frequent grafting on to the rigid structure of *opera seria* of the variety of formal solutions typical of comic opera. Even in comic opera, however, besides the purely Neapolitan tradition (vernacular texts, strictly local characters, local humour and local situations), there emerged a trend, adhering to the latest European developments, towards sentimentalism and the 'lachrymose style'. Piccinni's *La buona figliuola* (1760, libretto by Goldoni, after Richardson) and Paisiello's *Nina, o sia La pazza per amore* (1789, libretto by G.B. Lorenzi) are the best-known examples of this genre; as can be seen, parallel with this evolution of taste, comic librettos were no longer by local poets (the most prolific were, indeed, Lorenzi, who was the most significant, G. Palomba, P. Mililotti and Francesco Cerlone), but also came from figures of a higher literary stature. In 1776 Piccinni, considered the leading figure in Neapolitan opera, was called to Paris to counter the ascendancy of Gluck.

In the conservatories the Neapolitan didactic tradition was kept alive by Fenaroli and Tritto; but although the schools went on producing excellent musicians, sometimes of the highest rank, there was a progressive decadence towards the end of the century. Burney's disappointed reaction, on visiting the Conservatorio di S Onofrio in 1770 is well known. In the meantime the upheavals that followed the end of the *ancien régime* also shook the Kingdom of Naples. After the short life of the Neapolitan Republic (1799) had been brought to an end by a bloody Bourbon repression (of which Cimarosa, among others, was a victim), Naples was again under French influence (1806–15) when, the Bourbons having been defeated once more, the continental portion of the kingdom was entrusted first to Joseph Buonaparte, then to Joachim Murat. Among the numerous reforms carried out during the 'French decade', one of the first was the fusion of the two surviving conservatories into a single institute called the Real Collegio di Musica (from 1807), directed first by a triumvirate (Tritto, Paisiello and Fenaroli) and, from 1813, by Zingarelli. Thus reorganized, the conservatory continued to flourish. Among those who studied under Zingarelli's direction were Bellini and Mercadante. The same period also saw the formation of the conservatory's rich library, from a small nucleus at the Pietà dei Turchini, by Saverio Mattei and Giuseppe Sigismondo, who was the library's first director (1795–1826). Primarily through the tenacity and enthusiasm of Francesco Florimo (librarian from 1826 to 1888), the library became by far the most important source for the history of Neapolitan music. In 1826 the conservatory moved permanently to its present home in the monastery of S Pietro a Majella.

In the first half of the 19th century Naples also remained a theatrical centre of primary importance, very much open (again because of political events) to French influence: this is an important factor in the operas of N.A. Manfroce, one of the most significant Neapolitan musicians of the first years of the 19th century, who died young in 1813. Meanwhile Paisiello had returned to Naples, having been called to Paris by Napoleon in 1802; but he took no part in operatic life in the city, limiting himself to directing the court chapel from 1804 until his death in 1816. A leader in Neapolitan theatre life until 1840 was Domenico Barbaja (new documents published in Maione and Seller, B1994), impresario of the royal theatres S Carlo and del Fondo (the latter opened in 1779); he is remembered mainly for having called Rossini to Naples, where the composer worked from 1815 to 1822. Donizetti, who was director of the royal theatres (1827–38), and teacher of composition in the conservatory from 1834, was an important stimulus to Neapolitan musical life. When he left in 1838, Mercadante assumed his role in Naples for more than two decades; not only was he active at the S Carlo as an opera composer, but he also strove to disseminate knowledge of the instrumental music of the great Viennese Classical composers (principally of Beethoven), until then cultivated only by private circles. Besides this mainstream, comic opera in the Neapolitan style continued to flourish in the smaller halls of the Nuovo and the Fiorentini; but its level of taste became increasingly provincial, although it did not lack, at least in the more gifted musicians, a certain biting *vis comica* and a genuine musical vitality (e.g. Vincenzo Fioravanti's *Il ritorno di Columella*, Errico Petrella's *Le precauzioni* and Luigi Ricci's *La festa di Piedigrotta*). Finally, the lively activity of numerous publishing houses, both in vocal and instrumental music, should not be forgotten; foremost among these was B. Girard & Co. (later Stabilimento Musicale Partenopeo di Teodoro Cottrau), whose publications included the *Gazzetta musicale di Napoli* (1852–68), a weekly that carried generous, if naive, attempts at criticism. Other music publishers active during the same period included Clausetti (associated with Ricordi in Milan), Fabbricatore and Tremater, and the nature of their work can be inferred from the advertisements published in the press, especially in the *Giornale del Regno delle due Sicilie* (1817–60). The titles of these publications indicate a decisive change in the market from the previous century, and a circulation in private salons, élite circles and the new academic institutions and musical organizations, where the demand was equally for songs and instrumental music. It was at this time that a vogue for songs in Neapolitan was born, or rather revived. The two most famous Neapolitan songs

of the century, *Fenesta ca lucive* and *Te voglio bene assaje*, were long attributed to, respectively, Bellini and Donizetti, albeit with no factual basis.

5. FROM 1860. After the unification of Italy (1861), Naples went through a cultural resurgence. The mainstay of musical life was no longer opera, but instrumental music. In 1866 Beniamino Cesi, a pupil of Thalberg, was a piano professor at the Naples Conservatory and founded a vigorous school of pianists (Giuseppe Martucci, Alessandro Longo and Florestano Rossomandi), simultaneously carrying on an intense campaign for the diffusion of the best Classical and Romantic chamber repertory. After some 20 years of sporadic attempts, two resident concert societies were finally formed in 1880: the Società del Quartetto and Società Orchestrale. The Neapolitan orchestra, led by Martucci, having taken part in the concerts at the 1884 Turin exhibition, was unanimously proclaimed Italy's best. The Teatro S Carlino, the historic comic opera house constructed in 1783 and clearly named to parody the grand royal theatre of S Carlo, was meanwhile demolished in 1884.

Finally, the 19th century saw the beginning of historiographical research on Neapolitan music and musicians through the efforts of the Marquis of Villarosa, Francesco Florimo and Nicola d'Arienzo. The thrust of this research was an investigation of the evolution of the so-called 'Neapolitan school', a concept which took as its starting-point the European importance of Neapolitan composers from the end of the 17th century to the end of the 18th. While 18th-century music historians and intellectuals including Charles Burney, grouped operatic composers, notably Vinci, Leo, Pergolesi and Hasse, under the banner of a 'Neapolitan school', musicologists from the mid-20th century onwards have come to reject this notion; as has been convincingly demonstrated by Robinson (B1972), Degrada (B1977), and others, composers born or active in Naples may have made a considerable contribution to 18th-century opera, but cannot be clearly distinguished in form and style from operatic composers working north of the Alps.

The rhythm of Neapolitan musical life, somewhat slackened in the last decade of the 19th century through the absence of Cesi (in St Petersburg from 1885) and Martucci (in Bologna from 1886), regained its full vigour after the latter's return in 1902 as director of the conservatory. A resident orchestra was reconstituted, this time at the conservatory, and important lacunae were filled in both the symphonic and theatrical repertories, which included first performances there of Beethoven's Ninth Symphony (1905) and of *Tristan und Isolde* (1908). The legacy of Martucci was taken by Longo who was also a composer, pianist, organizer of concerts, teacher and publisher of early music and music periodicals (*L'arte pianistica*, later *Vita musicale italiana*, 1914–26). Other musicians who followed Martucci included Camillo de Nardis, Antonio Savasta, Gennaro Napoli and F.M. Napolitano. Although the quality of the music was excellent, local tradition on one hand and the values of late Romantic culture on the other remained powerful influences. The task of rejuvenation and widening of musical horizons was undertaken in the 1930s by a handful of musicians, all born about 1900: Achille Longo, Renato Parodi, Terenzio Gargiulo, Mario Pilati, Antonio Cece and Jacopo Napoli. About the same time, Alfredo Parente and Guido Pannain gave a new direction to criticism and musical aesthetics, applying to the discipline the principles of Croce's philosophy. The results of archival and historical research already obtained in the previous century were consolidated, enlarged and corrected by such scholars as Salvatore Di Giacomo, Ulisse Prota-Giurleo and Pannain. An outline of the main musical institutions in Naples follows.

(i) Opera theatres. The Teatro S Carlo (cap. 1530) is the only regularly active theatre; it has an opera season running from January to December, accompanied by a symphony season and occasional short additional seasons in the open air or elsewhere in summer. In the years after

6. Interior of the Teatro S Carlo, Naples: engraving, mid-19th century

World War II (Pasquale di Costanzo was director and Pannain was artistic adviser), there were efforts to update the repertory and raise it to an international level. Important landmarks in this effort were the first postwar revival of *Wozzeck* (1948, conducted by Böhm), and the first revival of Schoenberg's *Von heute auf morgen* (1952, conducted by Hermann Scherchen), as well as the first Italian performance of Hindemith's *Neues vom Tage* (1954, conducted by the composer) and Prokofiev's *The Gambler* (1953) and *Betrothal in a Monastery* (1959). More recently the S Carlo has produced important stagings by Roberto De Simone of rare repertory (Pergolesi's *Flaminio*, Valentino Fioravanti's *La cantatrici villane*, De Simone's *Eleonora* etc.) and has succeeded in raising its performances to an international level.

In 1952 the Teatro di Corte del Palazzo Reale, destroyed during the war, was restored, reopening in 1954 with Paisiello's *Don Chisciotte*. Between 1958 and 1966 this was the location for the Autunno Musicale Napoletano, a small festival of 18th-century opera buffa organized by the S Carlo in collaboration with the RAI. The theatre has recently been used for occasional productions of 18th-century operas. (Latilla's *La Fiuta cameriera* was produced there in February 2000 and recorded by RAI.)

Of the numerous 19th-century Neapolitan theatres – the Goldoni (1861), Rossini (1861), Bellini (1864, destroyed by fire in 1868, rebuilt in 1878 in an enlarged and more ambitious form, seating about 1600), the Mercadante (1870), Politeamo Giacosa (1871), Teatro Sannazzaro (1874) and Filarmonico (1874) and others like Teatro alla Fenice, Mezzocarnnone or Partenope – only the Bellini was continuously active as an opera house. Converted into a cinema in 1950, the Bellini was restored in 1988 and is again being used as a theatre, although only occasionally for opera. The Teatro Mercadante was restored in 1987 and reopened that year with Stravinsky's *The Soldier's Tale*, directed by Roberto De Simone and conducted by Salvatore Accardo. Since 1999 it is used for special productions of Teatro S Carlo (as Provenzale's *La Colomba Ferita*).

(ii) Concert life. For several decades the main centre of Neapolitan concert life was the Sala Grande in the Naples Conservatory. It was built in 1926 and named after Alessandro Scarlatti in 1955; in 1973 it was destroyed by fire and only restored, together with the smaller Sala Martucci, in the early 1990s. The RAI auditorium (cap. 1100) has been used since it was built in 1963, in addition to many Baroque churches.

Naples used to have two resident orchestras: the S Carlo orchestra and the Orchestra Alessandro Scarlatti. The latter was formed immediately after World War II by the Alessandro Scarlatti Association and later (1957) became one of the resident orchestras of the RAI. Because of its modest size, its repertory was mainly of Baroque, Classical and 20th-century music. Its principal conductors were Franco Caracciolo (1945–65 and from 1972) and Massimo Pradella (1971). In the late 1980s the RAI disbanded all its regional orchestras, including the Scarlatti. More recent ensembles, partly created from the old Scarlatti, are active as chamber orchestras.

The principal concert society is the Alessandro Scarlatti Association, founded in 1919 by F.M. Napolitano and Emilia Gubitosi. Since its orchestra became associated with the RAI the activity of the association has been confined almost entirely to organizing concerts of chamber music. The association has also established the prestigious Settimane di Musica d'Insieme (1971–94, and revived in 1998), and the summer festival Musica e Luoghi d'Arte. The Accademia Musicale Napoletana, founded in 1933 by Daniele Napoletano and Alfredo Casella, is very active; it organizes, among other things, the biennial Alfredo Casella International Piano Competition.

The RAI established a production centre at Naples in 1962; its auditorium was used for annual seasons of public symphony concerts until the orchestra was disbanded. Apart from the Settimane Musicali Internazionali of the Scarlatti Association, series of open-air summer concerts have been organized in the Bourbon palace in Capodimonte (Luglio Musicale di Capodimonte) and in October (Autunno Musicale Napoletano), a small festival devoted mainly to early Neapolitan music. Short seasons or festivals devoted to early music (Giugno Barocco, Ars Neapolitana) and contemporary music (Dissonanze) are also a feature of the city's musical life.

The Centro di Musica Antica 'Pietà dei Turchini' was founded in 1996 in the Conservatorio della Solitaria of the monastery of S Caterina da Siena. Its purpose has been to explore the early Neapolitan repertory through the collaboration of musicians (the Cappella della Pietà dei Turchini, founded in 1987 by its conductor Antonio Florio), musicologists and cultural historians. In 1996 the Cappella started a series of recordings of unpublished Neapolitan music from the period 1470 to 1800 (Opus 111, 'Tesori di Napoli') and has performed operas and sacred vocal works by Provenzale, Caresana, Vinci, Jommelli, Sabatino, Latilla and Piccinni.

(iii) Education. The S Pietro a Majella Conservatory is the direct descendant of the Naples Conservatory, and the custodian of its traditions. After Martucci, its directors have included G.A. Fano, Cilea, Adriano Lualdi, Napolitano, Jacopo Napoli, Terenzio Gargiulo, Ottavio Ziino, Irma Ravinale, Roberto De Simone and Vincenzo Di Gregorio. In 1898 Sigismondo Cesi and Ernesto Marciano founded the Liceo Musicale di Napoli, which flourished in the first half of the 20th century; among its teachers were Gennaro Napoli, Antonio Savasta and Cesi and Marciano themselves. The first chair in the history of music was created at the Università Federico II in 1982, and has been occupied by Agostino Ziino and, since 1997, by Renato Di Benedetto. The library of the S Pietro a Majella Conservatory is one of the most important music libraries in the world, with 200,000 manuscripts dating from before 1850. The small music collection of the Casa Oratoriana dei Girolamini (1500 manuscripts) is the principal source for 17th and 18th-century Neapolitan sacred music, mostly in autograph scores.

(iv) Local traditions. An accurate distinction must be drawn between the manifestations of authentic musical folklore and those of the Neapolitan song. Traces of the former are to be found in the cries of street vendors (now almost vanished) and in the rituals connected with some religious festivals, such as that of the Madonna dell'Arco, which, beneath a Christian veneer, conceal a fundamentally pagan nucleus (*see* ITALY, fig.20); the latter, although cultivated and widespread among all social strata, belongs to a higher cultural sphere. Indeed, in Neapolitan song, popular tradition is blended with elements derived from 19th century melodrama and drawing-room song; and it is also significant that the main exponent of its golden era, during the late 19th and early 20th centuries, was a

7. Music and dance by the Bay of Naples: painting by Pietro Fabris, c1770

refined poet such as Salvatore Di Giacomo (even Gabriele d'Annunzio wrote the lyrics for a Neapolitan song), while its musicians were not (except in the case of Salvatore Gambardella) uncultivated if talented improvisers, but artists who had a perfect command of the technique of composition such as Paolo Tosti, Luigi Denza and Enrico de Leva. The characteristics of these drawing-room songs are apparent simplicity allied to an extremely fluid harmonic structure. The collaboration between Di Giacomo and Pasquale Mario Costa (composer of such works as *Scugnizza* and *L'histoire d'un Pierrot*) was particularly fruitful, and produced a vast number of successful songs, such as *Catarì*, *Era di maggio* and *Lariulà*. Expressed alternately in a sentimentality now languid, now passionate, and a light and pungent wit – and occasionally in a skilful blending of the two – Neapolitan song was able to maintain, at least until the 1940s, a reasonably high artistic level: an inferior one, no doubt, but indisputably full of vitality; for nearly a century the traditional song festival on 7 September, coinciding with the enormously popular feast of the Madonna di Piedigrotta, has been a major event in Neapolitan life. After Di Giacomo, the most outstanding poet was Ferdinando Russo. In addition, the poets Pasquale Cinquegrana, Ernesto Murolo, Libero Bovio and E.A. Mario (who also wrote the music for his own songs), and the musicians Evemero Nardella, Ernesto Tagliaferri, Ernesto de Curtis and Eduardo di Capua, must also be remembered. In the years after World War II the remarkable efforts of some poets and musicians (Antonio Vian, Domenico Modugno) to breathe new life into the genre have not sufficed to avert its inevitable decline. Neapolitan songs continue to be listened to in Naples and, intermittently, to have a place in the panorama of recent Italian light music (Murolo, Ranieri, Arbore, D'Angelo, Grignani).

The most authentic Neapolitan folk music is that found in the countryside surrounding the city; since the 1970s this has been revitalized through the ethnomusicological research of Roberto De Simone, and by its revival in modern arrangements, principally by the Nuova Compagnia di Canto Popolare, and in various stage works of which the most famous is *La gatta Cenerentola*, 1976). This has resulted in, among other things, the vigorous rediscovery of the 16th-century villanella.

Napoleão (dos Santos), Artur (*b* Oporto, 6 March 1843; *d* Rio de Janeiro, 12 May 1925). Portuguese pianist, composer and teacher. A child prodigy, he made his first concert appearance in Lisbon at the age of seven and then toured Europe, playing for kings and Napoleon III. In London he studied with Hallé, and in Paris with Herz. In Berlin Meyerbeer presented him at court in 1854 and in Weimar he was praised by Liszt. His first trip to Brazil took place in August 1857, giving four concerts at the Teatro Lírico Fluminense in Rio where he wrote the piano polka-mazurka *Uma primeira impressão do Brasil*. He later made another concert tour which included the USA, and finally settled in Rio de Janeiro in 1866. There he was active as a performer, piano teacher and businessman. He taught well-known Brazilian musicians such as Chiquinha Gonzaga and João Nunes. The publishing house Narciso and Artur Napoleão, later adding Leopoldo Miguéz, was founded in 1878, and provided a significant stimulation to Brazilian musical production for about a century. With the Cuban violinist José White Lafitte, Napoleão also founded the Sociedade de Concertos Clássicos. The critic Alfredo Camarate said that Napoleão resembled Chopin in the sweetness of his playing and Liszt in his bravura. He composed an opera, *O remorso vivo* (1866), orchestral works, songs, and piano pieces. He also wrote études of pianistic techniques based on those of Cramer.

GERARD BÉHAGUE

Napoleon I, Emperor of France (*b* Ajaccio, Corsica, 15 Aug 1769; *d* St Helena, 5 May 1821). French ruler and patron of music. A member of the Buonaparte family – he (and his relatives) adopted the spelling Bonaparte in the mid- to late 1790s – he was one of the most important patrons of his time, influencing several different areas of music.

1. Introduction. 2. Institutions, the Opéra and other theatres. 3. Commissions and individual patronage. 4. Other members of the family.

1. INTRODUCTION. Napoleon seized power in a coup d'état on 10 November 1799. As first consul, later *consul à vie* (2 August 1802) and finally emperor (18 May 1804), he increasingly adopted monarchist patterns of musical patronage, often modelled on late *ancien régime* procedures. He re-established a court musical chapel, brought theatres under closer government supervision, re-introduced a series of concerts at court and rewarded those who celebrated musically the principal events of his reign. But his was not simply a reactionary approach: astutely, as he did in other domains, Napoleon capitalized on the

situation he inherited from the Revolution and sought to make musical institutions and public life reflect his political and cultural agenda. Thus he continued to support strongly the Paris Conservatoire and the Beaux-Arts department at the Institut. Furthermore, he recognized the Parisian theatres' lead in staging opera and their need to satisfy their audiences. Unlike the 1770s and 80s, no significant operas had their premières at court during his reign, and few were performed there in fully staged versions. Rather, the presence of Napoleon, or members of his family, at the Opéra or the Opéra-Comique became a highly regarded mark of official approbation.

Napoleon's reaction to music was always positive: he enjoyed it, knew something about it and gave it a particular value within his conception of the state. He personally preferred melodious Italian music to the modern French style of Méhul, H.-M. Berton and Cherubini, and he valued good singing highly. His own taste ensured the continued absorption of Italian influences into France; nothing was done to promote German music. During his reign opera thrived, and opera attendance became increasingly fashionable. A new generation of singers was formed at the Conservatoire, and several of them later became the stars of early *grand opéra*. Similarly, the excellence of instruction for instrumentalists there ensured that Parisian orchestras were among the most admired in Europe for decades to come. While during the Empire symphonic music did not receive active patronage from Napoleon, this indirect legacy is not to be underestimated, as the careers of Berlioz and Habeneck attest. Finally, whatever his personal preferences, Napoleon ensured that French as well as Italian composers received substantial imperial patronage.

2. Institutions, the Opéra and other theatres. The consular chapel was opened on 20 July 1802, following the arrival in Paris on 25 April of Napoleon's favourite composer, Paisiello. The two men first came into contact when Paisiello won a competition set by Napoleon in October 1797 that invited musicians from northern Italy to write music for the death of General Hoche; Napoleon himself presented Paisiello's score to the Paris Conservatoire. The aging composer was luxuriously treated by Napoleon, and in return he provided masses, motets, coronation music (see §3 below) and the opera *Proserpine* (1803). When this opera failed, Napoleon suspected intrigue on the part of French factions. Paisiello returned to Naples some time after July 1804, holding membership of the Institut and the Légion d'Honneur. He later became Joseph Bonaparte's director of chamber and chapel music. Napoleon's chapel originally had eight singers (including castratos) and 27 players, with an annual budget of 90,000 francs. By 1812 there were 50 musicians, costing 153,800 francs annually. Premises were makeshift until the opening of a new building in February 1806. Le Sueur succeeded Paisiello – Napoleon had enjoyed his opera *Ossian* in July 1804 and rewarded him with 6000 francs and a gold snuffbox.

The 'private' music generally consisted of the leading singers of the Opéra and the Opéra-Comique, as well as

'Concert under the Consulate', apparently in the Palais Royal: painting by Nicolas-Antoine Taunay, 1812 (private collection)

virtuoso professionals from the chapel orchestra. Paisiello directed numerous evening concerts at Malmaison; he was succeeded as personal court musician by the Italian Paer, whom Napoleon removed from the Saxon court at Dresden; Paer's contract, signed on 1 January 1807, made him official imperial composer and musical director for life. He was an ingratiating and capable courtier, singer and accompanist, but he wrote little of importance in Paris. His Italian operas *Numa Pompilio* (1808), *Cleopatra* (1808) and *Didone* (1810) were all given at court, not in public. In 1812 Napoleon chose him to succeed Spontini as director of the Théâtre Italien. At Malmaison the emperor's favourite and well-rewarded singers were the soprano Catalani, the contralto Grassini, the castrato Crescentini, the tenor Elleviou and the baritone Lays. Numerous other Italian singers were heard. Occasionally, more brilliant concerts were held in the Tuileries, sometimes followed by a ballet.

Court theatres were opened at Malmaison (1802), on a domestic scale; at Saint Cloud (1803), for entertaining notables; and at the Tuileries (1808), as a showpiece. At Fontainebleau, sumptuous evenings were seen, particularly after Napoleon's second marriage, to the Archduchess Marie-Louise of Austria, in 1810. By 1811 the annual theatrical budget amounted to 458,400 francs; the imperial musicians and others followed the court as necessary between the aforementioned places and of course Versailles.

In 1801–2 the Paris Conservatoire was rife with internal dissensions; already by the late 1790s the government assembly had called for economies there. The combination of circumstances led to the ousting of Le Sueur and others in an overall reduction of staff (to 38). But the institution's position slowly improved during the Consulate and Empire. Pupils' boarding accommodation was opened in 1806 and the concert hall in 1811. In 1803 the first music students received the Prix de Rome and went to the Villa Medici: otherwise Napoleon left the basic structure of the Conservatoire unaltered. In Italy he founded academies of music at Bologna, Bergamo and Milan. Musicians also benefited from various imperial decrees concerning copyright. The protection of authors and their families was strengthened in 1805, 1806 and 1810. Pension allowances were occasionally made by decree to musicians of long standing.

The Paris Opéra became an instrument of state policy and propaganda. In 1800 Napoleon gave his Minister of the Interior the right to authorize operas for performance; in 1802–3 he reserved to himself the allocation of money for new works. By 1806 he controlled the hierarchy of theatre administration, and in 1807 he defined the scope of the repertory. His constant point of reference was the desire to make the Opéra a showpiece for France, and in the end he personally determined not only what was performed but the order in which new works went into rehearsal. By 1811 its annual grant was 750,000 francs, and up to 200,000 francs was levied from the smaller theatres. Certain operas were censored completely; others, particularly Le Sueur and Persuis' *Le triomphe de Trajan* (1807), were commissioned as obvious allegories of imperial might and clemency. *L'oriflamme* (February 1814) was patched together by Berton, Rodolphe Kreutzer, Méhul and Paer as a hopeless call to arms even as the allies approached. (Napoleon abdicated on 11 April 1814.) Some interesting and important works, such as Le Sueur's *Ossian* (1804), were mounted at this time; but neither Cherubini nor Méhul could make any artistic headway at the Opéra.

There is no clearer indication of Napoleon's musico-cultural policy than his support for the new Théâtre Italien in October 1801. He gave the first of several grants and issued instructions to attract the best Italian actors 'in order to perfect the taste for singing in France'. The Théâtre Italien and the Opéra-Comique subsequently encountered hard times, when Parisians frequented gayer entertainments in smaller theatres and halls. Fearlessly, Napoleon moved against public taste: in 1806 he arrogated control of the repertory of the main theatres and took away the right (established under the Revolution) of anyone to open a theatre. In August 1807 he peremptorily closed all the Paris theatres except for eight 'official' ones, including the Opéra, the Opéra-Comique and the Italian troupe. Over 25 companies were out of work without compensation, at a few days' notice. The following November the office of *surintendant des théâtres* was created. By 1811 anyone wishing to put on a concert had to have the proposed day cleared by this functionary in consultation with the director of the Opéra.

3. COMMISSIONS AND INDIVIDUAL PATRONAGE. The joint celebration of Bastille Day 1800 and the victory at Marengo was marked in the Invalides by Méhul's *Chant national* for solo voices, three choirs and three ensembles. The concordat with the Roman Church was celebrated on Easter Day (14 April) 1802 with a *Te Deum* by Paisiello and a *Domine salvum fac rempublicam* by Méhul for two choirs and two orchestras. Napoleon's coronation as emperor on 2 December 1804 incorporated what was probably a revised version of this *Te Deum* and a mass by Paisiello for similar forces plus 77 military musicians. Le Sueur wrote a motet, *Accingere gladio*, and a march. Berton's cantata *Trasibule* was given at one of the ancillary ceremonies. In February 1806 Spontini's cantata *L'eccelsa gara* was performed after Austerlitz; in 1807 Méhul's *Chant du retour*; and in 1809, for Wagram, L.-S. Lebrun's *Te Deum*. The marriage to Marie-Louise in 1810 was marked by works by Berton, Cherubini, Le Sueur, L.E. Jadin, J.P.G. Martini, Méhul, Paer, Paisiello and Steibelt. Most of these composers wrote again for the birth of the King of Rome (Napoleon II) in 1811. This account necessarily omits the many uncommissioned pieces written following Napoleonic incidents of all kinds whose authors were sometimes rewarded by the Emperor.

The parts played by Paisiello, Paer and Le Sueur have been described above. Spontini was the third favoured Italian. Enjoying the special patronage of Josephine – he was her particular director of music – it was rumoured that he was able to have *La vestale* performed in 1807 only through the empress's insistence. Not before he had heard excerpts performed privately did Napoleon take it up (in October 1806) and recognize its importance. In its heavy classicism it was to epitomize the 'Empire style'. *Fernand Cortez* (1809) was subsequently ordered by Napoleon to rouse public interest in his current Spanish campaign. The operatic public, however, were swayed by the patriotism of the Spaniards rather than by the barbarity of the priesthood, and the work was called off after 13 performances. Cherubini, too, benefited from official commissions: his *Pimmalione* had its première at the Tuileries (1809), and his music was quite often performed in court concerts. (The tales of Napoleon's

animosity towards him date from the Restoration and should be viewed with scepticism.) Towards Méhul, Napoleon showed respect and some affection. *L'irato* (1801), in a light (though not really italianate) vein, is dedicated to him, 'your conversations regarding music having inspired me'.

4. OTHER MEMBERS OF THE FAMILY. The family generally had too little individual power and permanence to be great patrons. Beethoven stated in a letter of November 1808 that Napoleon's younger brother Jérôme, as King of Westphalia, had recently offered him the post of Kapellmeister at Kassel, but he appears to have thought of accepting the offer only as a lever against his Viennese patrons. Napoleon's sister Pauline took Felice Blangini both as her musical director (in 1806) and as her lover; in 1809 he became Jérôme's Kapellmeister. Elise, Napoleon's eldest sister and wife of Prince Felice Baciocchi, employed Paganini as leader of her chamber orchestra from 1805, and he followed her to Florence when in 1809 she became Grand Duchess of Tuscany. Napoleon's stepdaughter and sister-in-law HORTENSE (later Queen of Holland) was very musical. Her music master was Dalvimare; she composed songs, some of which were published. Her *Le beau Dunois* ('Partant pour la Syrie'), popular during the 1809 war, subsequently became a rallying song for *bonapartistes*, and during the reign of her son, Napoleon III, it became a national hymn. Napoleon's cousin Lucien was ambassador in Madrid and a patron of Boccherini.

DAVID CHARLTON/M. ELIZABETH C. BARTLET

Napoli, Jacopo (*b* Naples, 26 Aug 1911; *d* Ascea, Salerno, 19 Oct 1994). Italian composer. He studied composition with his father, Gennaro Napoli, and the organ and piano with Cesi at the Naples Conservatory. He taught at the conservatories in Cagliari and Naples and was director of the Naples (1954–62; 1976–8), Milan (1962–72) and Rome (1972–6) conservatories. He was a member of the Accademia di S Cecilia and of the Consiglio Superiore delle Antichità e delle Belle Arti, and was artistic director of the Teatro dell'Opera in Rome and the Teatro S Carlo in Naples. In 1972 he founded a school of piano, violin and woodwind teaching in Cremona.

Napoli's output includes numerous operas along traditional lines, characterized by a broad melodic style. Some of these have the quality of a vignette, such as *Miseria e nobiltà*, on a typically Neapolitan subject, while others are more intensely dramatic, e.g. *Mas'Aniello*. In his later stage works, including *Il barone avaro* and *Dubrowski II*, Napoli responded, albeit in a limited way, to some of the linguistic and formal innovations of contemporary music theatre. However, his instrumental and vocal output remained cautiously conservative, if rich, varied and fluid.

WORKS
(*selective list*)

Op: Il malato immaginario (M. Ghisalberti, after Molière), Naples, 1939; Miseria e nobiltà (V. Viviani, after E. Scarpetta), Naples, 1946; Un curioso accidente (Ghisalberti, after C. Goldoni), Bergamo, 1950; Mas'Aniello (Viviani), Milan, 1953; I pescatori (Viviani), Naples, 1954; Il tesoro (Viviani), Rome, 1958; Il rosario (Viviani, after F. De Roberto), Brescia, 1962; Il povero diavolo (Viviani), Trieste, 1963; Il barone avaro (M. Pasi, after A. Puškin), Naples, 1970; Dubrowski II (Pasi, after Puškin), Naples, 1973; A San Francisco (Viviani, after S. Di Giacomo), Naples, 1982

Inst: Preludio della campana, orch, 1975; Partita sopra passacaglia, orch, 1979; Gui Conc., gui, orch, 1981; Tempo di ciaccona, vn, 1983

Vocal: La passione di Cristo, orat, chorus, 1951; Terre lontane, 1960–78; Piccola cantata per il Venerdi Santo, chorus, 1963; Munasterio (cant, Di Giacomo), chorus, 1969; Via Crucis e Resurrezione, orat, 2 S, Mez, Bar, insts, 1984

Edns.: ops by Cimarosa, Paisiello, Piccinni, Raimondi

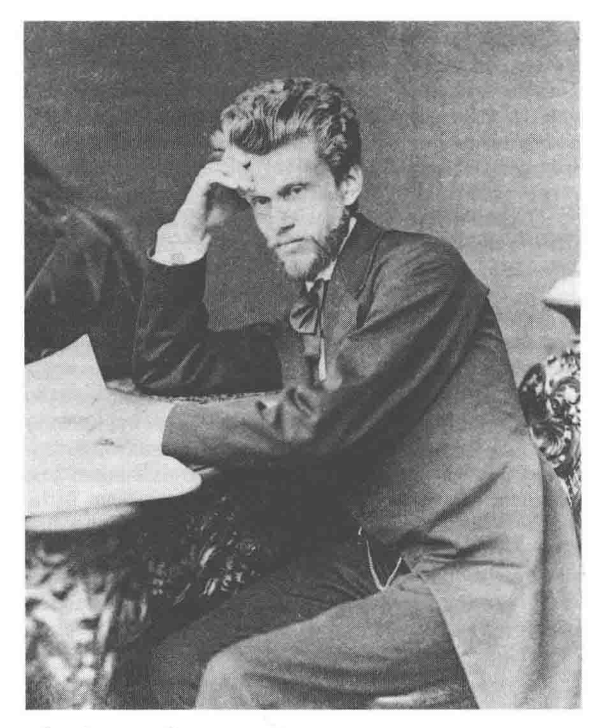
ROBERTA COSTA

Napolitana (It.). A shortened form of 'villanella alla napolitana', hence another term for VILLANELLA.



Nápravník, Eduard (Frantsevich) (*b* Býšť, nr Hradec Králové, 24 Aug 1839; *d* Petrograd [now St Petersburg], 10/23 Nov 1916). Russian conductor and composer of Czech birth. The son of a village schoolmaster, he studied music as a child with one of his father's colleagues and later with his uncle, Augustin Svoboda, precentor of the cathedral church in Pardubiče, where young Eduard played the organ. He was left an orphan upon his father's death in 1853 (his mother had died of consumption in 1850), and soon thereafter he enrolled in the Prague Organ School, taking organ lessons with Blažek and studying elementary theory, harmony, counterpoint and

fugue. In 1855 he began piano lessons with Peter Maydl (1817–96) of the Maydl Institute, making such rapid progress that he subsequently taught at the institute for five years, 1856–61. In these years too he took private lessons in score reading and orchestration from Johann Friedrich Kittl (1806–68), director of the Prague Conservatory. By the age of 25 he had composed several substantial works, including a symphony, a violin sonata and several piano pieces and songs – all despite his lack of formal training in composition.

In 1861 Nápravník was offered the post of associate director in Frankfurt, but went instead to St Petersburg to become the director of Prince Nikolay Yusupov's serf orchestra. Two years later Yusupov disbanded his orchestra in the wake of Aleksandr II's emancipation of the serfs. Nápravník then joined the staff of the Mariinsky Theatre as the result of a happy accident. At a performance of Glinka's *Ruslan and Lyudmila* the staff pianist failed to appear. Nápravník took over at a moment's notice, sight-reading the part with great skill, whereupon he was hired, by the Mariinsky's chief conductor, Konstantin Lyadov, as theatre organist and répétiteur the moment his contract with Yusupov had expired. In 1867 he was appointed assistant conductor of the Mariinsky, and succeeded Lyadov as chief conductor at the end of the 1868–9 season; he held his position at the Mariinsky, one of the most important in Russian musical life, until his death in 1916. Also in 1869 he succeeded Balakirev as conductor of the Russian Musical Society's concerts in St Petersburg, but his choice of programmes and his interpretations were frequently criticized in the press, and he resigned in 1881 after a particularly hostile article by N.F. Solovyov. Thereafter he conducted Russian Musical Society concerts only occasionally, to mark special events. During the 1870s and 80s, he conducted the concerts of the Mariinsky Theatre Orchestra, the concerts of the Russian Merchants Assembly (given during Lent) and court concerts in the Winter and Marble palaces; he also participated as organist or pianist in musical evenings at the private homes of high-ranking personages.

An industrious and conscientious musician, Nápravník possessed both a fine musical memory and an unusually keen ear. His accomplished professionalism brought artistic standards at the Mariinsky Theatre up to the level of the best opera houses in Europe, even though his performances at times were criticized as mechanical, too brisk and emotionally disengaged. A strict disciplinarian and wily diplomat, he showed great acumen in controlling the business side of the theatre. When in 1882 the theatre's budget was increased by 70%, from 167,000 rubles to 284,200 rubles, he immediately expanded the orchestra to 102 players and the chorus to 100 singers. He also concerned himself with improving the financial position and social standing of performing musicians, even risking the loss of his position in 1876 to obtain a full *bénéfice* for the theatre's chorus and orchestra.

Though himself a composer of four operas (of which *Dubrovsky*, after Pushkin, is the most likely to be encountered today), Nápravník is of greatest importance as a conductor. He led the world premières of many of the late 19th-century Russian operas that today constitute the basic international Russian repertory, including Rimsky-Korsakov's *The Maid of Pskov* (1873), *May Night* (1880), *The Snow Maiden* (1882), *Mlada* (1892) and *Christmas Eve* (1895); Tchaikovsky's *The Oprichnik*

Eduard Nápravník

(1874), *The Maid of Orléans* (1881), *The Queen of Spades* (1890) and *Iolanta* (1892); Dargomïzhsky's *The Stone Guest* (1872) and Musorgsky's *Boris Godunov* (1874). He also directed many foreign works, among them *Fidelio*, *Carmen*, *Tannhäuser*, the complete *Ring* cycle, *Rigoletto*, *Aida* and *Falstaff*; he found the last affected and forced, adding, 'No comic streak can be found in Verdi's bold operatic talent'.

Relations between Nápravník and The Five grew cool at an early date, thanks to Rimsky-Korsakov's snide review of the conductor's opera *Nizhegorodtsï* ('The Nizhniy-Novgoroders'; 1868). But it is an exaggeration to suggest, as some Soviet writers once did, that the conductor was implacably hostile toward The Five. Of Musorgsky, for example, Nápravník wrote (Kutateladze, 1959, pp.48–9):

> Musorgsky . . . stood out . . . because of his originality. He had great natural gifts and was antagonistic towards any formal training: he was almost a musical illiterate. He had a realistic and revolutionary approach to music; nonetheless, at all times and places, he was true to his own genius. . .. Had he followed Rimsky-Korsakov's example and enthusiastically studied elementary theory, harmony, counterpoint, instrumentation, and so forth, one can only imagine what talented works he would have created in operatic literature!

Though his remarks show no real understanding of Musorgsky's work – just as his view of *Falstaff* shows little understanding of that opera – they probably should not be construed as ill-disposed.

For over half a century Nápravník was a leading figure in Russian musical life. Although his primary career as a conductor gave him little time to compose, Kutateladze (1959) cites 77 works in all genres, published and unpublished, dating from Nápravník's years in Prague to 1906. By temperament Nápravník was drawn strongly to Glinka and Tchaikovsky, whose influence is apparent in both the lyric and dramatic moments of his music. His four operas were produced successfully in both St

Petersburg and Moscow, and Tchaikovsky thought well of the historical grand opera *Harold* (1884–5), set in the period of the Norman conquest of England. Nápravník's Piano Trio op.24 took first prize at a Russian Musical Society competition in 1876. His Violin Sonata in G major op.52 (1890) is a well-crafted and idiomatic work with a brilliant and colourful scherzo; the sonata's finale takes as its second theme the same folktune used by Musorgsky for Marfa's aria in Act 3 of *Khovanshchina*. The opera *Dubrovsky*, however, is 'Nápravník's emblematic score and his one palpable hit. In its way this far from negligible work stands as monument to the golden age of the Imperial Russian opera, testifying to the magnificent company Nápravník assembled and trained and to its distinguished level of routine' (Taruskin, *GroveO*). But despite the composer's technical fluency, most of his music now exists only on the fringes of the repertory. Nápravník's primary legacy in Russian music remains the high standard he achieved as an executant.

WORKS
(*selective list*)

STAGE
all given at St Petersburg, Mariinsky Theatre

Nizhegorodtsï [The Nizhniy-Novgoroders] (op, 5, P.I. Kalashnikov, after M. Zagoskin: *Yury Miloslavsky, ili Russkiye v 1612 godu* [Yury Miloslavsky, or The Russians in 1612]), op.15, 27 Dec 1868/8 Jan 1869, vs (Moscow, 1884)
Garol'd [Harold] (dramatic op, 5, P.I. Veynberg, after E. Wildenbruch), op.45, 11/23 Nov 1886, vs (Moscow, 1885)
Don Zhuan [Don Juan] (incid music, A.K. Tolstoy), op.54, 1891, March 1892, suite
Dubrovsky (op, 4, M.I. Tchaikovsky, with J. Paleček, after A.S. Pushkin), op.58, 3/15 Jan 1895, vs (Moscow, 1894)
Francesca da Rimini (op, 4, Ye.P. Ponomaryov, after S. Phillips), op.71, 26 Nov/9 Dec 1902, vs (Moscow, 1902)

ORCHESTRAL

Sym. no.1, before 1861; Vlasta, ov., op.4, before 1861; Solemn Ov., op.14, 1866; Sym. no.2, C, op.17, 1873; Sym. no.3 'The Demon' (after Lermontov), e, op.18, 1874; 2 folkdance suites, opp.20, 23, 1875–6; Ballade 'Kazak' (A.S. Pushkin), Bar, orch, op.22, 1875; 2 ballades: 'Voyevoda' (A. Mickiewicz, trans. Pushkin), Bar/B, orch, 'Tamara' (M. Lermontov), Mez, orch, op.26, 1877; Pf Conc., op.27, 1877; Fantasia on Russ. themes, vn, orch, op.30, 1878; Sym. no.4, d, op.32, 1879; 2 Solemn Marches, opp.33, 38, 1880–81; Fantasia on Russ. themes, pf, orch, op.39, 1881; Vostok, sym. poem, op.40, 1881; Funeral March, op.42*bis*, 1882; Suite, A, op.49, 1888; Suite, vn, orch, op.60, 1896; Deux pièces russes, orch, op.74, 1904

CHAMBER

Str Qt, E, op.16, 1873; Str Qnt, D, 2 vn, va, 2 vc, op.19, 1874; Pf Trio, g, op.24, 1876; Str Qt, A, op.28, 1878; 2 suites, vc, pf, D, op.29, 1878, A, op.36, 1880; 3 pieces, vc, pf, op.37, 1880; Pf Qt, a, op.42, 1882; Sonata, vn, pf, G, op.52, 1890; Pf Trio, d, op.62, 1897; 4 pieces, vn, pf, op.64, 1898; Str Qt, C, op.65, 1898; 4 pieces, vc, pf, op.67, 1899

OTHER WORKS

Messa figurata, org; Prelude and Fugue, org; Cantata, C, 1862; 8 sets of songs, opp.21, 25, 31, 35, 44, 56, 59, 68; other songs, duets, choruses a cappella; many pf pieces, opp.43, 46–8, 51, 53, 57, 61, 72

ROBERT W. OLDANI

Naqqāra [naghara, nakkare]. Kettledrum of the Islamic world, the Caucasus and Central Asia. It is widely used in military music as well as in religious and ceremonial music (*see* NAQQĀRAKHĀNA); it is often a symbol of royalty and is sometimes played with trumpets. *Naqqāra* are usually played in pairs and tuned to different pitches, exceptions being the large types from India, parts of the Caucasus and Central Asia. They are made of silver, copper, brass, wood or pottery. *Naqqāra* have been played in Turkey, Syria and Egypt since the Middle Ages. Carried on horseback or on camels, they are beaten with sticks, the higher-pitched of the two drums on the player's right.

In Turkey the *nakkare* is an instrument of the Ottoman *mehter* (military or Janissary band), made of copper with a skin membrane (*see* JANISSARY MUSIC). It is played

Naqqārat (kettledrum) player, Iraq

singly, held in the left hand or hung from the neck, and in pairs. In 20th-century Iran and Morocco *naqqāra* are usually made of pottery and the Moroccan types consist of a large and a small kettledrum laced together with gut. The *naghara* of Armenia is made of clay with a skin membrane and is played in *sazandar* and *ashugh* ensembles. The drums are warmed before playing so that the membrane is tightened in order to give a good sound. In the 1920s and 30s, V. Buni's 'Yerevan Oriental Symphony Orchestra' used *naghara* with a screw tuning mechanism which enabled the instruments to be tuned in 4ths. The *naghara* is also known as the *tabla*; in Georgia it is called the *diplipito*. *Naghara* were formerly used for military and state music by the Uzbek, Uighur and Tajik peoples of Central Asia.

Local variant names and uses of the *naqqāra* include the *nuqayra* of the north African Berbers and Syrians and the *nagārit* which is widely used in Ethiopian military and religious music. Large kettledrums spread to India where (known as *nagāṛā*) they are used in temples for ceremonial music. In Pakistan the *naqqāra* is widely used for outdoor music-making. *Naqqārā* are played in Surinam. The *naqqārā* is also the instrument from which the European kettledrum and NAKERS developed.

For further illustration *see* NAKERS, fig.1.

Naqqārakhāna [naqqārak͟hāna, tablkhāna]. An outdoor band of West and Central Asia, South Asia, Malaysia and Sumatra (*nobat*), used for royal, ceremonial, civic or military music. Its typical instrumentation includes oboes, horns or trumpets, and drums, and sometimes cymbals. *Naqqārak͟hāna* means '*naqqāra* house', the large kettledrum (*naqqāra*) being often housed in a pavilion at the gateway of palaces, Muslim shrines or Hindu temples. Its origins appear to lie in Iran and Central Asia, and its specific role is to play at sunrise, sunset and certain other times of day, a tradition which may point to an early connection with Zoroastrianism. In South Asia it is often called *naubat* (a Persian word denoting watches or stages of the day) or *naubatkhāna*. For the South-east Asian *nobat*, *see* MALAYSIA, §I, 1(ii).

At Sanchi, in central India, what appears to be a representation of a *naqqārakhāna* ensemble was sculpted at about the time of Christ. It consists of a pair of conical pipes, two S-shaped trumpets and two drums. The players' costumes suggest that they were probably Scythians (*Śaka*) or Parthians. Oboes, trumpets and drums of Arabo-Persian origin are recorded in India from the late 1st millennium, but the *naubat* orchestra is first mentioned in South Asia in the early period of Turko-Iranian rule, the Delhi Sultanate (1193–1526), for example the *nāobatikā* of the Maithili work *Varṇaratnākara* (*c*1325), and during this period the band's instruments were frequently mentioned (*see* ŚAHNĀĪ, NAGĀṚĀ and NĀGASVARAM). In South Asia the *naubat* appears to have replaced the earlier Hindu-Buddhist royal band, the *pañcamahāśabda* (which was similar but with conch-shell trumpets instead of oboes), and spread throughout South Asia, functioning at state, religious and military occasions and accompanying

Naqqārakhāna ensemble led by one pair of tenor kettledrums (centre), with two oboes of the Persian type (to the leader's right and left) and one oboe of the Indian type (behind); (front, from left) one bass drum and five pairs of treble kettledrums; (behind, from left) cymbals, one curved and four straight trumpets: detail from a painting (17th century) depicting the surrender of Kandahar (private collection)

local and Ādivāsī dances, processional bands for weddings etc.

During the Delhi Sultanate and the succeeding Mughal period (1526–1858) the *naubat* was part of the insignia of feudal rank in India, its use granted and its size determined by the Emperor. The Emperor's own *naqqārakhāna* was naturally the largest of all; that of the great Mughal ruler, Akbar, described by his chronicler Abū'l Fazl (*c*1590), contained 18 pairs of *kuwargāh*, or *damāma* (bass drums), about 20 pairs of *naqqāra* (treble and bass kettledrums), four *duhul* (cylindrical drums), several *karnā* (long trumpets) of gold, silver and brass, nine *śahnāī* (oboes), *nafīr* (trumpets), *sīṅg* (brass curved trumpets) and three pairs of *sanj* (cymbals). Fazl also gave an important account of the melodies and scoring of the Mughal *naqqārakhāna*, and of Akbar's performing ability, especially on *naqqāra*.

With the abolition of the princely states at Independence *naqqārakhāna* have been reduced in number, but a few small ones still exist, such as the one at the shrine (*dargāh*) of Mu'inuddin Chishtī at Ajmer, India. In South Asia the highland bagpipe, brought by Scottish regiments during the British raj, has largely replaced the oboe in local ensembles.

Naquaire. *Naquaires* is an alternative spelling for NAKERS; in 16th- and 17th-century England a *naquaire* or *naccara* could also be a bagpipe or a shawm.

Nara. City in Japan. The country's capital from 710 to 794, it was the cultural centre of ancient Japan. The town and its vicinity are rich with archaeological materials, including remains of ancient instruments such as the *wagon* (a zither). It was to this area that foreign music was first introduced in Japan; records report that 80 musicians were sent to Nara in 453 by the ruler of Silla, a small Korean kingdom, and that *gigaku* (Chinese dance and music) was imported in 612. During the succeeding years, music from the continent was frequently introduced, encouraging lively musical activities which eventually led to the establishment of Gagakuryō (the Imperial Music Bureau) in 701; at its inception, the bureau included 250 Japanese musicians and dancers, 72 Chinese, 72 Koreans and a few others. They participated in the celebration of the completion of the Great Buddha of Tōdaiji (a temple) in Nara (752); the instruments used at the occasion, together with some other instruments and musical tablatures, are still preserved in Shōsōin (the Imperial Treasury of Nara).

The great ceremony in 752 also included performances of *Shōmyō* (Buddhist chants) and soon a number of *shōmyō* schools were established by various Buddhist sects. The old tradition is strictly kept at Tōdaiji (the Kegon sect), Kōfukuji (the Hossou sect) and several other temples. The founders of *nō* drama, Kannami and Zeami, were natives of the Nara area; the *nō* tradition in Nara has been kept primarily by the Komparu school, for which the Nara Komparu Nō Theatre was built in 1962. A movement to revive *kagura* (*Shintō* ritual) and gagaku (court music) has been growing since the end of the 19th century and is promoted by a preservation group which has its headquarters at Kasuga Shrine.

MASAKATA KANAZAWA

Narayan, Ram (*b* Udaipur, 25 Dec 1927). Indian *sāraṅgī* player. His great-great-grandfather Bagaji Biyavat was a singer and established the family in Udaipur with patronage from the court. His great-grandfather Sagad Danji, grandfather Har Lalji Biyavat and father Nathuji Biyavat were also singers, but farming was as much a family occupation as music and the *Sāraṅgī* was not played. Ram Narayan's contact with the instrument as a child was almost accidental: the family's *Ganga guru* (genealogist and holy man) happened to leave his *sāraṅgī* in the house where the young boy tried to play it. Despite a reluctance to allow his son to take up an instrument regarded as both difficult and of low social status, Nathuji Biyavat taught Ram Narayan a basic method of fingering which formed the basis of his matchless technique. His main musical studies were with Uday Lal and Mahadev Prasad in Udaipur. In 1944 he moved to Lahore where Jivan Lal Mattu gave him a job as a radio artist, guided his training and helped him to learn from the singer Abdul Wahid Khan. When Lahore became a city of Pakistan following the partition of India in 1947, Ram Narayan moved to Delhi where he was employed by All India Radio. *Sāraṅgī* players have always been primarily accompanists to vocalists, but by this time Ram Narayan was feeling resentful of the curbs this role placed on his own artistry and he became notorious and even feared among the vocalists in Delhi. This prompted him to move to Bombay in 1949. In 1954 he was engaged as an accompanist at a large music conference. His success in that role led him to try a solo but he was given a bad slot and the audience was impatient to hear the famous artists, so he was driven from the stage. Two years later, after further solo recitals to more intimate gatherings, he tried again at a similar conference, and this time his performance was a success. By then he had decided to devote himself exclusively to solo performance, an unprecedented strategy among *sāraṅgī* players. It inevitably led to difficulties and he supplemented his income with more lucrative work in the Bombay film industry. After earlier visits to Afghanistan in 1952 and China in 1954, he travelled to Europe and America in 1964 with his brother, the *tablā* player Chatur Lal (1925–65), beginning a successful campaign to raise dramatically the status of the *sāraṅgī* and bring it to a worldwide audience. He is an honoured and respected *sāraṅgī* virtuoso with many recitals and recordings around the world to his credit.

Narantsogt, P (*b* Buyant *sum*, Bayan Ölgii *aimag*, west Mongolia, 1921). Altai Urianghai Mongol TSUUR player. Narantsogt (see illustration) inherited the traditions of playing and constructing this rare three-finger-hole end-blown pipe from his grandfather Gar'd, a renowned player. Narantsogt also plays the jew's harp and uses a variety of stones and pieces of wood to produce musical sounds. He moved to Duut *sum*, Hovd *aimag*, west Mongolia when he was 17 years old, working as a shepherd in the Altai Mountains. He had to hide his *tsuur* during most of the communist period in Mongolia in order to prevent its destruction (*see* MONGOL MUSIC). Narantsogt often improvises melodies which imitate the sounds surrounding him, as in *Balchin Heer Mor'* ('The Chestnut Bay') and *Har Huryn Naadgai* ('The Playing of Black Grouse'), or which praise the spirits that he believes both live in and comprise nature, as in *Altain Magtaal* ('Praise-song of the Altai'). In post-Soviet Mongolia, Narantsogt's son, Gombojav, continues the tradition by performing in international and local concerts.

CAROLE PEGG

Nardini, Pietro (*b* Livorno, 12 April 1722; *d* Florence, 7 May 1793). Italian violinist and composer. He displayed an early musical talent and received his first lessons in the town of his birth. In 1734 he was accepted as a pupil of Tartini in Padua and soon became his favourite student (according to Leoni and Burney). He then undertook an intensive programme of teaching and giving public and private concerts, for which he often went abroad for long periods. In 1760 he was in Vienna at the wedding festivities of the crown prince; from October 1762 until March 1765 he served at the court in Stuttgart under the direction of Jommelli, returning to his own country only for short visits; in 1765 he went to Brunswick, and in May 1766 he returned to Livorno. Two years later he was appointed solo violinist, and later music director, at the chapel of the court of the Grand Duke Leopold of Tuscany in Florence, where he remained until his death. The Florentine orchestra was made up of eminent musicians, including Campioni and Dôthel, who helped raise the musical and cultural level of the town: Nardini, for example, was a close friend of the poet Corilla Olimpica-Maddalena Morelli, and was himself a member of the Arcadia under the name of Terpandro Lacedemone. His one absence from Florence was during Tartini's final illness, when, according to Burney, he cared for the dying *maestro* with true filial affection and tenderness.

Nardini was famed not only for his orchestral playing but also for his solo performances, which he gave until the 1790s. He performed at the court of Ferdinand III of Bourbons in Naples, in Rome at the Gonzaga residence and in Pisa in the presence of Emperor Joseph II in 1784. His compositions reflect his abilities as a performer. He was noted for his perfect technique, excellent bow control and a superb sound. Leopold Mozart heard him play in 1763 and remarked: 'The beauty, purity and evenness of his tone and his cantabile cannot be surpassed'. He was particularly famed for his performance of *adagio* movements, which were more suited to his lyrical rather than dramatic nature. According to Schubart, he managed to move even the most insensitive listeners by the deep emotions expressed so effortlessly and naturally. His compositions, accordingly, combine two traits typical of the Italian style in the 18th century: cantabile and passionate writing in slow movements and fluency in fast ones.

It is difficult to establish a chronology of Nardini's works, which include larger-scale works and chamber music for flute, strings and harpsichord. Stylistically they seem to fall into three main periods. 12 violin sonatas and four violin concertos, all unpublished, and the six sonatas op.5 and concertos op.1 date from *c*1760. The overtures, harpsichord sonatas and *Adagios brodés* were composed *c*1765–6, while the six quartets, other violin sonatas and the flute concertos were written after 1770. The sonatas show the influence of Corelli and Tartini, and mainly follow the sequence slow–fast–fast. The tonality remains the same for all three movements, which normally have a bipartite structure. The first *allegro* is often bithematic and the most developed, whereas the last movement is usually a dance, rondo or set of variations. The *adagio* movements, which are generally in free form, are the most lyrical. The concertos, although influenced by Tartini, are written in the order fast–slow–fast. Less

well known are Nardini's works for flute, which reveal his excellent knowledge of the instrument and display the same deep emotion found in his works for the violin. His overtures were much influenced by Jommelli, while the simple and musically attractive harpsichord sonatas are indebted to Alberti and Pasquali. The string quartets differ most from Tartini's works in their structure, phrase syntax, thematic invention, development of ideas, dynamic contrast, characterization of parts and emancipation of the basso continuo. Nardini's disciples included Gaetano Brunetti, Cambini, Campagnoli, Giulini, Gozzi, Lucchesi and Manfredi in Italy and Joseph Agus, Thomas Linley (ii), Pichl and F.W. Rust abroad.

MARIA TERESA DELLABORRA

Nardò, Benedetto Serafico (*fl* 1575–81). Italian monk and composer. The dedications of his two known works indicate that he was living at Naples in 1575 and at Lecce in 1581. *Il primo libro delli madrigali a cinque voci* (Venice, 1575, inc.) contains 27 works; it was prepared four years earlier for publication by the Neapolitan bookseller Orazio Salviani, but the manuscript was lost and Nardò made another copy, withdrawing some of the madrigals from the previous version and adding others. *Il terzo libro di madrigali a cinque et a sei voci con un dialogo a dièce* (Venice, 1581, inc.), dedicated to Francesco, Grand Duke of Tuscany, contains 22 pieces, setting poems by Petrarch, Ariosto, Tasso and Tansillo. Many of Nardò's texts are strongly erotic and passionate, and two pieces from the first book, *Lamento d'Olimpia* and *Lamento di Fiordeliggi*, are settings from Ariosto's *Orlando furioso*.

PIER PAOLO SCATTOLIN

Nares, James (*b* Stanwell, Middlesex, bap. 19 April 1715; *d* London, 10 Feb 1783). English composer, organist and teacher. He was a chorister of the Chapel Royal, London, under Gates, and he afterwards studied under Pepusch. For a short time he assisted John Pigott, organist of St George's Chapel, Windsor Castle, immediately before assuming duties as organist of York Minster in August 1735. The formal minute of his appointment at York is dated 8 November 1735. He left York on his appointment (dated 13 January 1756) as one of the organists and composers of the Chapel Royal, and in 1757 he took the Cambridge degree of MusD. In October 1757 he succeeded Gates as Master of the Children of the Chapel Royal, and took the choristers to sing in at least one theatrical production, Charles Dibdin's *The Institution of the Garter*, an afterpiece at Drury Lane that ran for 12 nights from 28 October 1771. He resigned from the post on 1 July 1780 while retaining his other Chapel Royal appointments. He was buried at the church of St Margaret's, Westminster.

Nares exercised his pleasant if slender talent for composition chiefly in the fields of church and keyboard music. His services, which do not represent him at his best, are in the dull 'short service' style as practised in his day, but have a slight interest in being possibly the earliest such compositions to add explicit changes of tempo to existing methods of giving variety to the setting of successive clauses. His *Service in F*, nonetheless, was very popular. His anthems throw almost the whole of their emphasis on music for solo voices, especially trebles. Very few indeed are of the 'full' type (examples are *Call to remembrance* and *O clap your hands together*), and for the most part he preferred to set even sombre and penitential texts as solos, duets and trios. His style is mellifluous and, if neither arresting nor individual, occasionally strikes an agreeable and expressive vein, particularly in music for boys' voices, though in duets he was apt to rely overmuch on the charm of passages in 3rds. A survey of his anthems does not suggest that he is ill-represented by his most famous piece, *The souls of the righteous*, written during his time at Windsor.

His 1747 collection of *Eight Setts of Lessons for the Harpsichord* displays a certain interest in the keyboard as such, and no.5 has an interesting Larghetto which, after

James Nares: stipple engraving by William Ward after John Hoppner and George Engleheart, after 1781

opening in A major, turns to A minor and then passes through F, B♭, G♭, B minor, G, C minor, A♭ and C♯ minor back to A. But none of his harpsichord compositions is more distinguished than the Lesson in B♭, no.3 of his op.2 (printed in full in *OHM*, iv, 328). The fifth lesson of the same set, in G, also has some appeal, and concludes, exceptionally for Nares's harpsichord music, with a fugue. But this is not learned, an aspect more in evidence in his organ music. The 'Sonata in Score' included in op.2 is for two violins and continuo with an easy obbligato keyboard solo.

Nares's most ambitious work, *The Royal Pastoral* ('Damon and Delia', libretto by Daniel Bellamy, published in his *Ethic Amusements*, 1768), consists chiefly of recitatives, arias and duets for the two characters, with two choruses in a somewhat Handelian vein and a full-scale overture. The instrumentation is for strings, horns, oboes and bassoons. Though it is always pleasant, there is nothing so memorable as to redeem such an extended work from insipidity. It appears to have been written for the anniversary in 1742 of the marriage of Frederick, Prince of Wales. The collection of *Catches, Canons and Glees* (which includes Nares's attractive *O fairest maid* and *Wilt thou lend me thy mare*, as well as the Elegy from Shakespeare, *Fear no more the heat of the sun* for two sopranos and bass, afterwards extended by R.J.S. Stevens, and the 1770 Catch Club prize glee *To all lovers of harmony*) is designed to show that canons, no less than catches, can be 'chearfull Music'.

Il principio or A Regular Introduction to Playing on the Harpsichord or Organ stresses the importance of early attention to shakes and to the development of the weak fingers. It also includes many attractive keyboard pieces. In his treatises on singing, Nares distinguished, in a manner casting some light on the history of solmization in England, between what he called French sol-fa (which used the octave, and was thus so much easier in application) and Italian sol-fa (which he described as 'an ingenious Study for young People who intend to profess Music'). Both books contain the same useful details about vocal ornamentation.

WATKINS SHAW

Narratology, narrativity. Terms referring respectively to the study and intrinsic quality of narrative; recently, and especially from the 1980s on, these concepts have been applied to musical studies in various ways.

Narratology, the study of narrative, is associated historically with east European formalism and European structuralism, intellectual movements that borrowed tools from social science, especially linguistics, for the study of many aspects of culture. Formalists and structuralists studied different kinds of story-telling such as myth and literary fiction in order to discover recurring patterns, much as grammarians study a language to discover the principles of its well-formed utterances. (Barthes, Chatman, Genette, Greimas, Propp and Todorov provide characteristic examples of these approaches; classic surveys include Ehrlich and Culler.) Narrativity is the quality of some artefact that makes it an example of narrative or, in some usages, a quality that creates a resemblance to narrative.

Formalist and structuralist work emphasized that story-telling follows norms of which story-tellers and audiences may not be conscious, just as speakers of a language unconsciously follow grammatical norms. These norms of story-telling constitute a layer of intervention, perhaps of arbitrary or mutable convention, that shapes individual narrative representations. When a story seems like an accurate account of the world, or a satisfying fiction, this is partly because it meets the appropriate norms of story-telling; some of these may be general constraints on narrative, others may be specific to certain times and places. Thus, as writers in formalist and structuralist traditions maintained, it can be important to recognize and perhaps question the narrative norms that shape historical or biographical story-telling, and to discern the recurring patterns that make fictional works seem whole.

This general awareness of story-telling as a patterned activity has had broad implications for the epistemology of historical knowledge (White), the philosophy of temporality (Ricoeur) and the notion of philosophical inquiry (Rée). The tradition of narratology orientated to social science is, of course, not the only interpretive approach to narrative literature or other forms of narrative, but it has had a strong influence on certain musicologists. Some (Treitler, DeVeaux, Pederson) have identified narrative conceptions that shape histories of music; heightened consciousness of these narrative devices has led them to challenge familiar accounts of music history. Others have studied relations between types of narrative genre and related compositions (Schrade on tragedy, Tarasti on myth, 1978). Within a texted musical genre one might identify a plot pattern that invites interpretation, as when Clément recognizes the pattern of leading female operatic characters dying; or one might study the role of moments of story-telling within operatic drama (Abbate, Hudson).

Beginning in the late 20th century, music theory and criticism often explored the possibility of narrativity in non-texted, non-programmatic music from European concert traditions. These studies lie at the intersection of many disciplines, not just narratology and music criticism, but historical interpretation, technical music theory, philosophical study of expression and representation, and semiotics. The attractive but problematic conception that shapes much recent work is that an individual composition – whether a single movement or a multi-movement work – sometimes resembles, or simply is, a narrative, and that recognition of this is important for critical interpretation. Some studies of this type have drawn directly on existing theories of narrative, applying them to musical instances (McCreless, Tarasti, 1994). Others have worked from within existing traditions of music criticism, moving from critical issues about individual compositions to comparisons with narrative. Often the interpretation of musical narrativity has been offered as an alternative to purely technical description and as a key to musical meaning (as in Guck and, by strong implication, Randall).

One recurring issue in such discussions of narrative and music concerns the identification of agents or actors. Ordinary story-telling normally concerns characters, and musicologists who explore analogies to narrative often identify fictional agents such as themes or instruments; Cone's discussion (1974) of persona and agent is an influential model. Maus argues that agency is often indeterminate in instrumental music, but some genres, such as the concerto or chamber music, seem to depend for their effects on the interplay of distinct characters. Kerman (1992, 1999) has given sustained interpretation to the dramatic exchanges in concertos. McClary (1991) argues that sonata-form compositions typically imply masculine and feminine antagonists through their main themes.

Another recurring issue concerns plot, a central concern of classic narratological work. Musicologists have proposed various plot archetypes for instrumental music, sometimes very broadly (as in Todorov's sequence of equilibrium–disequilibrium–equilibrium), sometimes more specifically. McClary's claim about the subordination of feminine themes to masculine ones is an example of a plot archetype, drawing on de Lauretis's feminist narratology; another example is Newcomb's argument that a number of 19th-century multi-movement pieces follow the archetype of suffering leading to triumph or redemption (as in Beethoven's symphonies nos.5 and 9).

Analogies between music and narrative, or stronger claims that instrumental music can be narrative, raise issues about the relevant description of the events of a piece. Descriptions offered in support of a narrative analogy may remain close to ordinary technical analysis, but often they become anthropomorphic and sometimes, as in Newcomb's account of Mahler's Symphony no.9, musical events may be translated into a detailed, almost novelistic story about an individual protagonist. A writer may abandon conventional musical terms altogether, moving into a purely literary style (Randall). Anthropomorphic descriptions raise complex questions: Are they

metaphorical, or should they be understood in terms of some theory of imagination or fiction? What are the constraints on such descriptions, and how do such descriptions contribute to knowledge about music? These questions are not trivial; the answers affect the status of scholarly claims about music and narrative.

Another kind of description, the historically based identification of 'topics' deriving from Ratner's work, seems closely related to the issues of music and narrative, especially when critics write about the succession of topics within pieces (Agawu, Allenbrook, Hatten). If topical description is important, the succession of topics in a piece must affect the narrative interpretation of that piece.

Several writers have challenged the assertion that instrumental music can be narrative. Kivy argues that instrumental music cannot narrate a story but can, at most, illustrate a story (as do pictures that accompany a prose narrative). Various writers have pointed out features that are central to narrative but seem to be absent from most instrumental music: for instance, the distinction between subject and predicate (Nattiez), the capacity for various kinds of reflexive self-commentary (Kramer, 1990), the existence of a past tense and the resulting space between story and story-telling (Abbate). Such failures of analogy have led Kerman, Maus, Newcomb and others to suggest that instrumental music may often be closer to drama than to prose narrative, offering enactments of stories rather than story-telling in the most literal sense. This links narrative interpretation of music to the traditional conception of sonata form and Classical style as 'dramatic' (Tovey, Rosen).

The taxonomic and rule-orientated qualities of formalism and structuralism already seemed dated to many literary and cultural scholars by the 1980s, and the subsequent promotion of narratology by musicologists may have been untimely. The same aspects of classic narratology that suggest an affinity with music theory and analysis may also, in applications to literary and musical examples, invite simplification and reduction. On the other hand, the deconstructive habit of identifying gaps and discontinuities in interpreting narrative, exemplified by some writings of Abbate and Kramer, has also lost some of its allure in recent years.

Contemporary interpretation of culture often emphasizes historical and social context, and casts suspicion on approaches that adopt the traditional self-limitations of textual analysis. From this perspective, music criticism based on narrative analogies may share with the arguments against those analogies a dubious attachment to the critical tradition of commentary on isolated musical works. The exploration of instrumental music as narrative remains a tantalizing, confusing, problematic area of inquiry.

FRED EVERETT MAUS

Narrenflöte (Ger.). *See* JESTER'S FLUTE.

Nartosabdho [Sunarto], **Ki** (*b* Wedi, Central Java, 25 Aug 1925; *d* Central Java, 1985). Javanese gamelan musician, composer and *dhalang* (shadow puppeteer). He was born the youngest of eight children in a poor family; after several years at an Islamic school and then at a Roman Catholic school, he left home to perform music with various itinerant *kethoprak* (folk theatre) troupes. He specialized in drumming and in 1945 his skills gained him the position of musical director with one of the most prestigious *wayang orang* (dance-drama) troupes in Java, Ngesti Pandowo, based in Semarang on the north coast of Java. There he began to compose light gamelan pieces, often with humorous content and introduced by the popular *punakawan* (clown-servants) of the *wayang orang*. At Ngesti Pandowo he sometimes also took the role of *dhalang* (narrator/singer of mood songs in *wayang orang*) and soon began performing as *dhalang* (shadow puppeteer) for performances of *wayang kulit* (shadow play). His first public performance as a *dhalang* of *wayang kulit* took place in 1955 in Yogyakarta; in 1958 he began to perform for broadcasts on the national radio station, Radio Republik Indonesia (RRI). In addition to his activities as shadow-play *dhalang*, involving numerous live engagements and commercial cassette recordings of all-night (eight-hour) shadow plays, he maintained an active musical career until his death, composing many pieces, arranging pieces from various regional traditions of Java and playing drum for commercial gamelan music recordings. In 1969 he formed the gamelan group Condhong Raos, which for more than 15 years was widely recognized as one of the top gamelan groups in all of Java.

R. ANDERSON SUTTON

Narváez, Luys de (*b* Granada; *fl* 1526–49). Spanish composer and vihuelist. He may have entered the service of Charles V's secretary, Francisco de los Cobos, in Granada as early as 1526, thereafter residing in Valladolid until his patron's death in 1547. From 1548 he is listed among the musicians of the royal chapel, with the added duty of teaching music to the boy choristers. Late in 1548 he travelled abroad with Prince Philip (later Philip II of Spain), and his presence is reported for the last time in the Low Countries during the winter of 1549. His son Andrés was also an accomplished vihuelist.

Aside from two motets, both published by Moderne, one reprinted by Berg & Neuber, all of Narváez's music is included in his book, *Los seys libros del delphín* (Valladolid, 1538/*R*1980; ed. in MME, iii, 1945/*R*; ed. and arr. G. Tarragó, Madrid, 1971). The pieces are for solo vihuela and are notated in tablature similar to that used in Italian lute sources, with minor points of difference, such as the printing of notes to be sung in red ciphers. There are fantasias, variation sets, intabulations of vocal pieces, songs and a *baxa de contrapunto* (setting of a basse danse tenor). Selections from the *Delphín* were reprinted in French lute tablature by Phalèse (in Leuven) and Morlaye (in Paris) and five, sometimes freely arranged, were set in Spanish keyboard tablature by Venegas de Henestrosa. Narváez's book is the first to contain groups of pieces identified as variations (*diferencias*) and to include symbols indicating tempo.

His 14 fantasias, with at least one in each of the eight modes, are all of the highest quality. They are characterized by pervading but not rigorous imitation. Most open with a short theme treated imitatively and continue with sections in two- and three-part textures. They are reminiscent of the style of Josquin and are characterized by techniques such as voice pairing and sequences. Known to have collected music by Francesco da Milano, Narváez was the earliest composer for the vihuela to work in the new Italian style of lute music in the 1530s. Famed as an improviser on the vihuela, he was reputed to be able to extemporize four parts over another four at sight. His fantasias reflect improvisatory techniques in their motivic simplicity and use of certain short motifs with identical left-hand fingering patterns in more than one work.

He included vocal pieces by Josquin (six works), Gombert (two) and Richafort (one) in intabulations as vihuela solos, elaborated with passing notes and scalar ornaments. His arrangement of Josquin's famous *Mille regretz* is described as 'la canción del Emperador', presumably a favourite song of Charles V.

There are three types of variation sets. In those on the Spanish hymn *O gloriosa Domina*, the hymn tune appears in each variation and sometimes phrase openings are imitative. Variety of texture, rhythm, tempo and placing of the cantus firmus provides contrast between the six *diferencias*. Variations on ostinato harmonies include seven entitled *Guárdame las vacas* (although only three are on the romanesca, the last three being on the passamezzo antico), and 22 on *Conde claros*, a form of the *bergamasca*. The latter set contains bravura scale passages, unusual arpeggio patterns, sudden changes of register and one variation which 'imitates the guitar'.

In two of the five villancicos, the vocal line is repeated, often without significant change in tune or text, while the accompaniment is varied. *Paseávase el rey Moro*, which is one of the two *romances*, survives in three other contemporary Spanish settings, including two with vihuela accompaniment.

Nasat (Ger.). *See under* ORGAN STOP (*Nasard*).

Nasci, Michele (*fl* Naples, 1770s). Italian violinist and composer. Burney mentioned Nasci as a violinist and director of the orchestra at the Teatro dei Fiorentini in Naples in 1770. Burney also heard him perform his trios at the home of William Hamilton, the British minister there. About 1771 his *Sonate sei di cembalo con accompagnamento di violino* were published in London, dedicated to Catherine Hamilton, an accomplished keyboard player. Since the Hamiltons visited London in that year (when he received his knighthood), they may have arranged the publication. However, Burney himself may have been the agent, as the sale of his library in 1814 included manuscript copies of sonatas and trios by Nasci.

Despite the designation 'cembalo' on the title-page, the music of these sonatas is pianistically conceived. (In 1770 Catherine Hamilton owned an English square piano, likely to have been the only one then in Naples.) Apart from their pianistic dynamics, the sonatas are of only moderate interest; they seem caught in an awkward phase

of the general transition in style then taking place. Nasci's other extant works include a sonata for violin and continuo and three violin concertos (in *A-Wgm*), and a solo motet with accompaniment for violins and continuo, composed in 1769 for the castrato Caffarelli (in *GB-Lbl*). A further six concertos at the Naples Conservatory library and ascribed to Nasci are questionable on stylistic grounds.

RONALD R. KIDD

Nascimbene, Mario (*b* Milan, 28 Nov 1913). Italian composer. He studied composition and conducting at the Milan Conservatory with Pizzetti and Renzo Bossi, and graduated in 1935. He then studied film music at the Accademia di S Cecilia in Rome with Masetti, and made his cinema début with Ferdinando Maria Poggioli's *L'amore canta* (1941). In all he has composed more than 300 film scores. A skilled craftsman with an ability to extract the most from sometimes weak materials, Nascimbene was one of the first composers to acquire the ability to manipulate emotions, typical of the film specialist. His resulting achievements, while conceptually banal, were highly effective on a psychological level, with the abandonment of traditional hierarchies and the adoption of musically organized sound effects, such as the noise of a typewriter in *Roma ore undici* (1952) and *Cronaca di un delitto* (1953). He made equally effective use of primitive sounds and instruments including whistling and the jew's harp, as in *Giorni d'amore* (1954) and *Uomini e lupi* (1957), and the electro-acoustic manipulation of orchestral instruments, for example in *Alexander the Great* (1956), *The Vikings* (1958) and *Barabbas* (1961). As well as important collaborations with directors such as Valerio Zurlini, Nascimbene is probably the Italian composer who has worked most with directors from the USA (Joseph Mankiewicz, Charles Vidor, King Vidor), and the UK (Val Guest, Jack Clayton, Jack Cardiff, Don Chaffey). He has been awarded three Nastri d'argento and one David di Donatello.

SERGIO MICELI

Nascimbeni [Nasimbeni], **Stefano** (*b* Mantua; *fl* 1588–1619). Italian composer. In 1588 he contributed to Alfonso Preti's *L'amorosa caccia* (RISM 1588[14]), a collection devoted to native Mantuan composers. In 1600 he was for a short period *maestro di cappella* of Mantua Cathedral, and between April 1609 and August 1612 succeeded Gastoldi as *maestro di cappella* of the ducal chapel of S Barbara in Mantua; he had taken holy orders by the date of this appointment. He apparently left Mantua in 1612 and is later recorded as *maestro di cappella* of S Andrea in Portogruaro, near Concórdia, between May 1614 and the second half of 1615; this post was also held by Lodovico Viadana, his predecessor at Mantua Cathedral.

PIERRE M. TAGMANN

Nascimento, Milton (*b* Rio de Janeiro, 26 Oct 1942). Brazilian composer, singer and instrumentalist. As a child he was taken by his adoptive parents to Três Pontas in Minas Gerais, where his mother taught him the piano. He also learned the accordion, guitar and bass. At 15 he formed his own vocal group, Luar de Prata, which included Wagner Tiso, a keyboard player and arranger who worked with Nascimento throughout his career. In 1963 he moved to Belo Horizonte where he mostly played jazz and also met his future partners, the musicians Fernando Brant and the brothers Márcio and Lô Borges, with whom he co-authored many pieces. He began to compose on a regular basis in 1963 and two years later was recognized as best performer at the first Festival of Brazilian Popular Music. In 1966 the pop singer Elis Regina recorded his song *Canção do Sal*, and in 1967 his prize-winning *Travessia*, with lyrics by Brant, was included on his first album *Milton Nascimento*, later reissued as *Travessia*. In the next year he recorded the LP *Courage* in the USA for A&M Records with the participation of Herbie Hancock and Airto Moreira, and also performed in USA and Mexico with João Gilberto and Art Blakey.

Upon his return to Brazil in 1969 he recorded two albums, *Milton Nascimento* and *Milton*, in which he began a long cultivation of Minas Gerais themes. The second of these albums included his great hits *Para Lennon e McCartney*, *Canto Latino* and *Clube da Esquina*. In 1971 he worked on the album *Clube da*

Esquina (1972), whose most significant songs included *San Vicente*, somewhat reminiscent of Chilean *tonada* style, *Saidas e Bandeiras* and the lively and sophisticated *Nada Será Como Antes*. His next album, *Milagre dos Peixes*, represented a tour de force in vocal effects, particularly effective in their content as almost all the lyrics were banned by the military government censors.

In 1975 Nascimento participated in Wayne Shorter's album *Native Dancer*, and in 1976 released his own *Minas* and *Gerais*, in which he explored Brazilian and other Latin American folk sources and styles. His own aesthetic orientation in the 1980s was based on a political agenda poetically expressed, as in *Sentinela* (1980) and especially *Missa dos Quilombos* (1982), a statement against poverty and oppression which radically mixes Afro-Brazilian musical instruments and rhythms with Catholic hymns. In 1989 he turned his attention to the plight of the native communities of the Amazon, resulting in the album *Txai* (1990), which contains excerpts of traditional Indian music. In 1994 he made his début at Carnegie Hall, followed by appearances in Canada and Europe. The attraction of his music is undoubtedly due to its sophisticated novelty, Nascimento's extraordinary vocal ability, and the extremely refined and socially conscious poetry.

GERARD BÉHAGUE

Nascinbeni [Nascimbeni], **Maria Francesca** (*b* Ancona, 1658; *fl* 1674). Italian composer. Her name is spelt Nascimbeni in modern reference works, but it appears as Nascinbeni in her publications, the only sources of information about her. She studied in Ancona with Scipione Lazzarini, an Augustinian monk, who included her motet *Sitientes venite* in his *Motetti a due e tre voci* (RISM 1674[1]). In 1674 she also published a volume of her own music, *Canzoni e madrigali morali e spirituali a una, due e tre voci e organo* (one ed. in Jackson, 1990), dedicated to Olimpia Aldobrandini Pamphili, mother of Pope Innocent X and Cardinal Benedetto Pamphili. In the dedication she described herself as being 16 years old.

BARBARA GARVEY JACKSON

Nasco, Jan [Gian, Giovanni] (*b* *c*1510; *d* Treviso, 1561). Netherlandish composer, active in Italy. Sometimes known as 'Metre Gian', Nasco has often been mistaken for Maistre Jhan of Ferrara, an older composer of French origin. In 1547, four years after its foundation, the Accademia Filarmonica of Verona chose him as its first musical director. (He had previously been in the personal service of the nobleman Paolo Naldi in nearby Vicenza.) In 1551 he reluctantly left the academy for the better-paid post of *maestro di cappella* of Treviso Cathedral, an appointment he held until his death. However, he maintained a close association with the academy, to which he dedicated his first book of madrigals; in a series of letters to the Accademia, Nasco made informative remarks about contemporary performing practice, particularly regarding the use of instruments in motets and madrigals. Shortly after his death his widow dedicated a volume of his sacred works to the members of the academy in acknowledgment of their interest and support.

Along with Vincenzo Ruffo and Jacquet de Berchem, Nasco belonged to the group of musicians working near Venice and greatly influenced by Willaert. He had special ties with Ruffo, *maestro di cappella* of Verona Cathedral and for a time also employed by the academy. Perhaps in friendly competition instigated by the academy, Nasco and Ruffo set many of the same texts, notably a series of verses by Ariosto; Ruffo published five of Nasco's madrigals in his own second book of five-part madrigals (1553[28]). To a large extent Nasco's choice of poets (Petrarch, Boccaccio, Ariosto, Folengo, Bembo and Tasso) reflects the tastes and attitudes of his literary-minded patrons. Like Berchem, he was drawn to the madrigal cycle. The pastoralism of texts like *Su la fiorita riva* (1554) led Einstein to call such works, by Nasco and others, prototypes of the later chamber cantata. In Nasco's secular works there is usually syllabic declamation with careful text setting, and in secular and sacred pieces alike there is a strong inclination to homophonic writing; Nasco showed a keen ear for sonorous effect as well as a remarkably modern conception of harmonic function. One madrigal introduces amusing imitations of cuckoo, nightingale and frog. In others, Nasco extolled the cities of Lodi, Venice and Vicenza.

Nasco composed in all the sacred forms. Relatively little was published, and unfortunately only a small part of the extensive manuscript repertory at Treviso survived World War II. Among the items lost were four masses, Nasco's only known works in that form. Of particular interest among the surviving large-scale pieces are a vernacular *canzon spirituale* in 13 sections in honour of the Blessed Sacrament and a setting of the *St Matthew Passion* (once regarded as the work of Maistre Jhan) that may have served as a model for Rore's *St John Passion* (1557); participants in the narrative are represented by characteristic voice-combinations, varying from two to six voices. The setting, simple, direct and effective, is almost entirely homophonic in a style close to the popular *falsobordone* writing of a later generation.

GEORGE NUGENT

Nash, Heddle (*b* London, 14 June 1894; *d* London, 14 Aug 1961). English tenor. He studied with Giuseppe Borgatti in Milan, where he made his début as Almaviva in *Il barbiere di Siviglia* in 1924. He sang in Genoa, Bologna and Turin before returning to London in 1925, when he was engaged by the Old Vic company and at once made his name as the Duke in *Rigoletto*, also singing Tamino, Faust and Tonio (*La fille du régiment*). Tours with the British National Opera Company followed, during which he sang a wide variety of roles, among them Almaviva, Fenton, Turiddu, Roméo, Massenet's Des Grieux and David (*Meistersinger*). In 1929 he made his début at Covent Garden, when his Don Ottavio was compared with that of McCormack; he sang there regularly until the war, as Almaviva, Rodolfo, Pinkerton, Eisenstein, Faust, Rinuccio (*Gianni Schicchi*), Pedrillo, Roméo (on tour) and David. In 1947–8, the first postwar season, he returned as Des Grieux and David. He was a mainstay of the early Glyndebourne seasons, singing every Ferrando, Don Basilio and Pedrillo from 1934 to 1938, and Don Ottavio in 1937. He created Dr Manette in Arthur Benjamin's *A Tale of Two Cities* at Sadler's Wells in 1957, his final stage appearance.

Nash was also a markedly popular concert and oratorio singer. He was particularly admired in Handel and as Gerontius, which he first performed in 1932, at Elgar's insistence, and which he sang in the work's first complete recording in 1945. In recital he attempted a wide repertory, and was well known for his advocacy of Liszt's songs. Charm, grace, romantic ardour and what Richard Capell in *Grove5* termed 'a minstrel-like effect of spontaneity' represented a rare natural gift enhanced by technical assurance; these qualities were epitomized in his noted account of the Serenade from Bizet's *La jolie fille du Perth*. Among the best of his early recordings are solos from *Don Giovanni* and Handel's *Jephtha*, the pioneering sets of *Faust* (under Beecham) and the first complete *Così fan tutte*, made at Glyndebourne in 1935. He later made many worthwhile recordings for HMV, including Handel arias and Nadir's Romance from *Les pêcheurs de perles*.

ALAN BLYTH

Nash Ensemble. British chamber ensemble. It was formed in 1964 by Amelia Freedman, with fellow students at the RAM, to perform the mixed chamber repertory and works for voice and instruments. The group took its name from the architect John Nash, who designed the terraces in Regent's Park, London, close to the RAM. Freedman was the original clarinettist of the ensemble, whose nucleus consisted of piano, wind quintet, string quartet, double bass, harp and percussion. In 2000 its members were Ian Brown (piano), Philippa Davies (flute), Gareth Hulse (oboe), Richard Hosford (clarinet), Ursula Leveaux (bassoon), Richard Watkins (horn), Leo Phillips and Elizabeth Wexler (violins), Roger Chase (viola), Paul Watkins (cello), Duncan McTier (double bass), Skaila Kanga (harp) and Simon Limbrick (percussion).

From its earliest professional concerts at the American Embassy in London in 1965, the Nash Ensemble quickly gained a reputation for outstanding musicianship, imaginative programming of an adventurous repertory, including works written for between three and 20 players, and a commitment to the commissioning of new works. The ensemble made its début at the Queen Elizabeth Hall, London, in 1967 and its Wigmore Hall début in 1969, and within a few years had performed for music societies and at festivals throughout Britain and in Europe. A close relationship with the BBC began in 1968, laying the foundation for numerous studio and live recordings, including many made at the Proms. The group took part in concerts to mark Walton's 70th birthday in 1972, and in the Purcell tercentenary celebrations in Westminster Abbey in 1995. It made its US début, at Alice Tully Hall, New York, in 1983, and has subsequently toured in Central and South America, East Asia, Australia and New Zealand.

By 2000 the Nash Ensemble had given over 225 premières, including 85 works specially commissioned by the group from, among others, Simon Bainbridge, Richard Rodney Bennett, Harrison Birtwistle, Roberto Gerhard, Jonathan Harvey, Simon Holt, James MacMillan, Detlev Müller-Siemens, Paul Patterson, Anthony Payne, Robert Saxton, John Tavener, Mark-Anthony Turnage and Judith Weir. The ensemble has given series of concerts devoted to contemporary music at the Wigmore Hall and elsewhere, and regularly took part in the Arts Council's Contemporary Music Network tours. It has recorded much of its repertory and has received several international awards. The group's artistic director, Amelia Freedman, was appointed Chevalier de l'Ordre des Arts et des Lettres in 1986 and created an MBE in 1989.

RICHARD WIGMORE

Nashville. Capital city of Tennessee, USA. In the mid-20th century Nashville became known as the home of country music.

As in many American cities in the 19th century, music instruction was offered principally in women's seminaries and black schools. Opera was introduced as early as 1854, when a performance of Donizetti's *Lucia di Lammermoor* was given at the Adelphi Theatre by Luigi Arditi's Italian Opera Company. By the 1860s operas by Verdi and other Italian composers were a regular feature

of Nashville's concert life. Amateur organizations, especially those made up of children, were active in benefit concerts, and amateur musical groups on European models were often formed. The Schiller Music Festival was held in 1859, at which oratorios by Handel and Haydn were performed. In the 1880s the impressive Vendôme theatre opened with a gala performance of *Il trovatore*. Later the theatre was the site of concerts by Paderewski, Caruso and the New York SO under Walter Damrosch (1904), and of a performance of Wagner's *Parsifal* given by members of the Metropolitan Opera (1905).

There were several early attempts to form a symphony orchestra in Nashville; an orchestra performed under the name Nashville SO in 1904, as did an ensemble of 62 players, founded and led by F. Arthur Henkel, from 1920 to 1927. A permanent organization was formed in 1946 by Walter Sharp; its conductors have been William Strickland (1946–51), Guy Taylor (1951–9), Willis Page (1959–67), Thor Johnson (1967–75), Michael Charry (1976–82) and Kenneth Schermerhorn (from 1983). In 1980 the orchestra moved to Andrew Jackson Hall, a handsome structure with an auditorium seating 2440; the hall is one of three buildings in the Tennessee Performing Arts Center.

Music instruction is offered at a number of colleges and universities, notably Belmont College, the music department at Fisk University, founded in 1885, and Tennessee State University.

Vernacular musical traditions date back to early times; in 1820 Cary Harris published a tunebook, *Western Harmony for Singers*. By 1823 riverboat traffic with New Orleans had been initiated, and Nashville began to reap the advantages of its geographical position. In the 1850s several minstrel groups visited Nashville. In the 1890s W.D. Scanlon and his Irish Singing Comedians were immensely popular. The Fairfield Four, from Nashville's Fairfield Baptist Church, was perhaps the most influential male gospel quartet before World War II. Nashboro Records, established in the early 1950s, built an important catalogue of black gospel music, and its subsidiary Excello Records recorded several rhythm-and-blues artists in the 1950s.

Country music began to evolve and become commercially successful in the 1920s. George D. Hay, an announcer for radio station WSM, elicited a strongly favourable response from his audience when he programmed music by a string band and an old-time fiddler. He became the host of an hour-long radio show, 'WSM Barn Dance', modelled after that of Chicago's station WLS; among the musicians who performed was Uncle Dave Macon, a banjo player and singer with a repertory of vaudeville material and black and white gospel music. The programme was expanded to three hours, and in 1927 was renamed the 'Grand Ole Opry'; Hay helped to popularize the new name and also encouraged the (admittedly exaggerated) 'hayseed' image of country music. The 'Grand Ole Opry' was broadcast, before live audiences, from successively larger venues. Hank Williams joined the 'Grand Ole Opry' in 1949; his great popularity was an important factor in the growth of Nashville's country-music industry.

Despite the popularity of the 'Grand Ole Opry', the focus of much country-music activity was eastward, in Knoxville and Bristol, Tennessee, for instance. Nashville did not have a significant recording or music-publishing industry until the 1950s, when the advent of rock and roll led rival cities (especially Chicago and Los Angeles) to abandon country music, leaving Nashville as its undisputed centre. Bullet Records, a small, independent recording company formed during World War II, gave Nashville its first recording studio and prepared the way for RCA (1946) and other important labels to establish operations in the city. The increasing popularity of country music abetted the growth of BMI, which opened an office in Nashville. Many musicians came to record in Nashville, and Chet Atkins and Owen Bradley, who owned studios, helped broaden the appeal of the 'Nashville sound'. The Country Music Association (founded 1958) promotes and publicizes country music in Nashville, as do the Country Music Hall of Fame and Museum (founded 1961; museum opened 1967) and the Country Music Foundation Library and Media Center (opened 1972). Opryland USA, a music-orientated amusement centre, which also opened in 1972, was the home of the 'Grand Ole Opry' from 1974 until its closure in 1997.

STEPHEN E. YOUNG

Nashville sound. A term used in the late 1950s and early 1960s to describe the rock- and pop-influenced COUNTRY MUSIC being recorded in Nashville. The emergence of this style was the result of an attempt by the country-music industry to preserve and expand its audience in the face of the threat posed by the enormous popularity of rock-and-roll. Chet Atkins, the guitarist and country-music director for RCA in Nashville, supported by Ken Nelson of Capitol, Owen Bradley of MCA, Billy Sherrill and Glen Sutton of Columbia, and other leaders of the industry, sought to create a musical sound that would preserve a rural flavour within an urban style, and thus broaden the appeal of country music to urban, middle-class listeners. Some critics, however, felt that such a compromise with popular taste destroyed the character of country music. Banjos, steel guitars and the honky-tonk sound were replaced by string sections, brass instruments and vocal choruses, and the studios built up a group of backing musicians who performed with a variety of soloists. The repertory emphasized melodic ballads and novelty songs over more traditional country material. Among the earliest performers influenced by this trend were Eddy Arnold, Patsy Cline and Jim Reeves. From the 1970s the term gained broader usage, describing any kind of popular or traditional music produced in Nashville.

BILL C. MALONE/R

Nasidze, Sulkhan (*b* Tbilisi, 17 March 1927; *d* Tibilisi, 21 Sept 1996). Georgian composer and teacher. He graduated from the Tbilisi Conservatory in 1951 from the piano class of A. Svanidze, and then in 1955 from the composition class of Tuskia. From 1963 to the end of his life he taught polyphony and composition there, occupying the posts of lecturer (from 1963), assistant professor (from 1972) and professor and head of the composition department (from 1979). He was also dean of the faculty of theory and composition (1969–74), and in 1974 he was invited to become artistic director of the Georgian State Philharmonia. He was involved in the activities of the Georgian Composers' Union; he was twice elected secretary (1962, 1979) and later chairman of the board (1992). His works have received European broadcasts and have appeared in international festivals and concert series. He was awarded the title Honoured Representative of the Arts of Georgia (1966) and People's Artist of Georgia (1979), and won the Shota Rustaveli State Prize (1973) and the Laureate of the USSR State Prize (1986). In 1996 he was posthumously awarded the National Order of Merit.

Nasidze's music testifies to the conceptual depth of his thinking and could be considered a summation of one of the most typical features of the Georgian world view, namely the cognizance of parallels between the inner and outer worlds so inherent in the Georgian psyche. Primarily an instrumental composer – vocal genres did not determine his importance in Georgian music – his music operates on several levels, frequently embracing polar antitheses such as the dynamics of a dramatically effective principle as opposed to an almost completely static immersion in infinity, or an austere objectivity of statement set off against the agonizing tension of a reflective consciousness. His development was determined by the renewal of the national tradition with the achievements of not only the classical past but also of contemporary Western music. Spiritual and ethical concerns govern the themes and genres of his works.

If Nasidze initially took the Georgian Romantic school as his starting point (the First and Second Piano Concertos, the First Symphony), then the start of the 1960s was already marked by an active attempt to overcome the inertia of his previous style, and by the development of trends latent in the symphonism of Shostakovich and Hindemith (Second Symphony, *Ostinato*). At the end of this decade he made an astounding stylistic leap in his Chamber Symphony (Third Symphony) and the First and Second string quartets. There is much here that speaks of the fruitful influence of Bartók: a leaning towards rhythmic ostinato, development through counterpoint and variation, the aphoristic thematic formulae, the specific principles of cyclical constructing, and finally, the characteristic method of using ancient strata of musical folklore. In the folklore of the highlanders (Pshav), with its austere modal and harmonic system, Nasidze found the potential for a deeply psychological content. National style became an important indication of an individualism within the context of a contemporary language which fashioned the large-scale form of his subsequent compositions. In these, semantic significance unifies image, event and reaction, thus calling for comparison with film in terms of methods of structural resolution be they montage, panorama, fade-in or parallel confrontations. Operating with contrasting strata, he synthesizes both consecutively and simultaneously various systems, styles, genres afresh within the framework of each work employing allusion, quotation and collage. Previous models – particularly neo-classicism – create a canvas of correlations between tempo, rhythm and texture, whilst pitch and timbre are often governed by contemporary methods such as serialism and sonoristic and aleatory techniques. Some vivid examples in which the confrontation of styles is artistically cogent can be found in the works written at the turn of the 1970s and 80s (symphonies five to seven, the Concerto for violin, cello and chamber orchestra, the Second Piano Sonata). Predominance of rationalism over emotion led to the neo-Bachian Tenth Symphony 'Mizgva I.S. Bakhs' ('An Offering to J.S. Bach'), of 1989, whereas the later prevalence of emotionalism reveals an inner concentration and a reflective consciousness which departs from extra-musical programmes in favour of an ever greater generalization and abstraction. The works of the 1990s make use of indeterminism and experiment with noise and sonoristics (which supplement the sound of the standard instruments with acoustic effects); his attempt to embody the changeless nature of world harmony led to the creation of quiet, meditative and spatial music whose charm lay in the unreal beauty of static panorama.

Nasimbeni, Stefano. *See* NASCIMBENI, STEFANO.

Nasolini [Nazolin], **Sebastiano** (*b* Piacenza or Venice, ?1768; *d* ?Venice, ? 1798 or 1799). Italian composer. He is said to be a native of Piacenza on the manuscript scores of several of his operas, but some printed librettos refer to him as 'di Venezia' or 'maestro di cappella veneziano'. After musical training during the 1780s, probably in Venice, he was appointed *maestro di cappella* at the Cathedral of S Giusto in Trieste; he became *maestro al cembalo* at the Teatro S Pietro in Trieste before April 1789. According to Choron and Fayolle he died in Venice in 1798; Gervasoni placed his death in 1799. The production of several apparently new operas under his name between 1800 and 1816 has led some scholars (for example Jackman) to suggest that Nasolini may still have been alive in 1816; but a lack of evidence of his activities after 1799 supports the view that he died shortly before 1800. Some of the later operas attributed to him are probably the work of the prolific and long-lived Giuseppe Nicolini. Mount Edgcumbe, writing in the 1820s, remembered Nasolini as 'a young composer of great promise, but who died at an early age' (*Musical Reminiscences*, London, 1824).

Nasolini's early operatic output suggests a devotion to serious opera. His first work, a setting of Metastasio's *Nitteti*, was performed in Trieste during spring 1788. Following its success, he produced a number of other *opere serie*, only occasionally interrupted by comic operas, for the principal theatres of northern Italy (he seems not to have accepted commissions from southern cities, except for some Neapolitan operas of questionable attribution). By the time his *Andromaca* was performed in London in May 1790, the *Public Advertiser* could call him 'the most fashionable composer now extant in Italy'. Only in the late 1790s did he give sustained attention to comic opera, working with Giovanni Bertati among other librettists.

Gli umori contrari (1798), a one-act opera to a libretto by Bertati, was one of the most often performed of Nasolini's comic operas; the relatively large number of surviving manuscripts attests its popularity. Among his most successful serious operas was *Merope* (1796), a *dramma per musica* written for the soprano Elizabeth Billington, who created the title role in Venice and went on to sing it in Bologna, Bergamo, Livorno and Trieste; she triumphed with it in London in 1802.

WORKS

OPERAS

dm – *dramma per musica*

La Nitteti (dm, 3, P. Metastasio), Trieste, S Pietro, 5 April 1788

Il Catone in Utica (dm, 3, Metastasio), Venice, S Samuele, carn. 1789, *GB-Lbl**

Adriano in Siria (dm, 3, Metastasio), Milan, Scala, 26 Dec 1789, *I-Mr*

Andromaca (dm, 3, A. Salvi, after J. Racine), Venice, S Samuele, Feb 1790, *F-Pn*

Teseo a Stige (dramma tragico per musica, after C.I. Frugoni: *Ippolito ed Aricia*), Florence, Pergola, 28 Dec 1790, *A-Wn*, *F-Pn*, *I-Fc*

Ercole al Termodonte, ossia Ippolita regina delle Amazzoni (dramma, Sografi), Trieste, S Pietro, spr. 1791

La morte di Cleopatra (dm, 2, Sografi), Vicenza, Nuovo, 22 June 1791, *D-Bsb*, *Dl*, *F-Pn*, *I-Fc* [also as La Cleopatra; Cleopatra regina d'Egitto]

La Calliroe (dm, 2, M. Verazi), Florence, Pergola, carn. 1792, *Fc*

La morte di Semiramide (tragedia in musica, 2, Sografi), Rome, Carn. 1792 [probably incl. music written for pasticcio of G. Pratti's La vendetta di Nino, as La morte di Semiramide, Padua, 1790]

Eugenia (dramma, 3, G. Foppa, after P.-A. Beaumarchais), Venice, S Benedetto, aut. 1792

Gl'innamorati [Act 1] (dgm, 2, Foppa, after C. Goldoni), Venice, S Benedetto, 4 Feb 1793, *B-Bc* [also as Gli amici; Act 2 by V. Trento]

Tito e Berenice (dm, 2, Foppa), Venice, Fenice, Ascension 1793, *F-Pn*

Amore la vince (dg, Foppa, after Goldoni: *La locandiera*), Venice, S Benedetto, Oct 1793; reduced to 1 act by G. Artusi as La locandiera

Le feste d'Iside (dm, 2, G. Rossi), Florence, Pergola, carn. 1794, *Bc* [also as Sesostri, ossia Le feste d'Iside]

Epponina (dm, P. Giovannini), Bergamo, Riccardi, Aug 1794, aria *I-Gl*, rondo *Mc*, aria *PAc*

I raggiri fortunati (farsa, 1, P. Chiari, after *Il marchese villano*), Venice, S Benedetto, 5 Feb 1795 [also as La contessa di Sarzana, ossia Il maritaggio in contrasto]

Merope (dm, 3, M. Botturini), Venice, S Benedetto, 21 Jan 1796, *D-DS*, *F-Pn*, *GB-Lbl*, *I-Fc*, *Nc*, *US-Wc* [also as Merope e Polifonte]

La morte di Mitridate (tragedia per musica, Sografi), Trieste, S Pietro, aut. 1796, *D-Mbs*, *F-Pc*, *GB-Lbl*, *I-Fc*, *MOe* [also as Vonima e Mitridate; Il Mitridate]
Gl'Indiani (dm, 2, Botturini), Venice, S Benedetto, 9 Dec 1796
Zaira (dm, 2, ?Botturini), Venice, S Benedetto, 22 Feb 1797
Alzira, Bologna, Pubblico, spr. 1797, collab. N. Zingarelli; rev. of Zingarelli's 1794 setting
Il medico di Lucca (dgm, 1, G. Bertati), Venice, S Samuele, aut. 1797, *B-Bc*, *D-Dl*, *F-Pc*, *GB-Lbl* [also as Il medico universale; Il medico dei bagni; Il medico ai bagni]
Timoleone (dramma serio per musica, 2, Sografi), Reggio Emilia, Moderno, 29 April 1798, *I-REm*
Gli umori contrari (dgm, 1, Bertati), Venice, S Cassiano, June 1798, *A-Wgm*, *B-Bc*, *F-Pc*, *I-Fc*, *Nc*; rev. as Gli opposti caratteri, ossia Olivo e Pasquale (farsa, 1, Foppa and G. Artusi), Venice, S Samuele, 15 Oct 1799 [also as I temperamenti contrari]
Melinda (favola romanzesca in musica, 2, Bertati), Venice, S Benedetto, 12 Sept 1798
Il trionfo di Clelia (dramma, 2, Sografi), Milan, Scala, 26 Dec 1798, *Mc*
Il torto immaginario (farsa giocosa in musica, 1, Foppa), Venice, S Moisè, aut. 1800
Music in: La morte di Semiramide, Padua, 1790, Venice, 1791; Vasco di Gama, 1792; Pirro, 1793; Ines di Castro, 1795
Works attrib. Nasolini dating from after his supposed death: Gli sposi infatuati (farsa giocosa per musica), 1801; Tersandro in Eleusi (dramma serio per musica), Florence, Pergola, 1807; L'Achille (dramma serio per musica), Florence, Pergola, 1811; I riti d'Efeso, 1812; Il ritorno di Serse (dm), Naples, Fondo, 1816; La morte di Patroclo (dramma serio), Milan, Carcano, 1819

OTHER WORKS

Eurilla (cant., S.A. Sografi), Venice, S Benedetto, 1794
Il voto di Jefte (orat) mentioned in Anguissola
Della conversione di S Agostiono (orat); score, *I-Pca*
Laudate Dominum, Dilexi quoniam, both *D-Mbs*; Salmo, S, B, org, *A-Wgm*; Gratias agimus tibi
Concerto per saltero, Sinfonia: *I-Gl*

JOHN A. RICE

Nason. *See under* ORGAN STOP.

Nassarre [Nasarre], **Pablo** (*b* Aragon, *c*1654; *d* Zaragoza, *c*1730). Spanish theorist, composer and organist. Documentation concerning his life is scanty, but we do know that he was blind from infancy, studied the organ with Pablo Bruna, entered the Franciscan order (at 22, according to early biographers) and served throughout his career as organist of the monastery of S Francisco at Zaragoza. From evidence in his publications he must have been born at least ten years earlier than 1664, the date of birth traditionally given. His first work was *Fragmentos músicos*; a second edition (by José de Torres) is much longer and is provided with music examples. Its four sections deal with plainchant, mensuration, counterpoint and dissonance treatment, using dialogue form and concentrating on practical considerations; for the treatment of speculative matters Nassarre referred the reader to his *Escuela música*, which was already in preparation but did not finally appear until 1723–4, representing, in his own words, a labour of 50 years. Its two volumes total over 1000 pages; each is divided into four books of 20 chapters. Comparable to Cerone in comprehensiveness, ranging from fanciful speculation to practical matters, its topics include definitions and the effects of music, plainchant, the metres and modes of polyphonic music, an exhaustive description of instruments, harmonic combinations, strict counterpoint, free composition, performing practices (particularly embellishment) and the activities of the church musician. Nassarre remained faithful to the conservative Spanish tradition, defending it against Italian innovations; his work maintained unquestioned authority among later Spanish theorists until the attacks of Eximeno, who referred to him as 'an organist by birth and a blind man by profession' and attempted to overthrow the Pythagorean view of music that he had so staunchly upheld. Of his few surviving compositions one is a toccata surprisingly in the style of an Italian concerto.

ALMONTE HOWELL/JUAN JOSÉ CARRERAS

Nast, Minnie (*b* Karlsruhe, 10 Oct 1874; *d* Füssen, 20 June 1956). German soprano. She studied at the Karlsruhe Conservatory and made her début at Aachen in 1897. She sang in Dresden from 1898 to 1919 and then taught there until the bombing of the city in 1945. She toured the USA and Canada in 1905 and was also heard in Russia, the Netherlands and England, where, at Covent Garden, her principal roles were Aennchen, Marzelline and Eva. This was in the 1907 winter season; its tragic sequel, the shipwreck in which many of the company lost their lives, made her determined never to go overseas again. She sang mostly light and soubrette roles, specializing in Mozart and, in 1911, creating the part of Sophie in *Der Rosenkavalier*. Her technical accomplishment and clear tone are well preserved in some early solo recordings; she also recorded her original part in the trio from *Der Rosenkavalier* and sang Micaëla in the first recording of *Carmen*.

J.B. STEANE

Nastasijević, Svetomir (*b* Gornji Milanovac, 1 April 1902; *d* Belgrade, 17 Aug 1979). Serbian composer. An architect

by profession, he played the violin and the viola in various orchestras and chamber ensembles (1920–32) in Belgrade. He also worked as assistant stage manager at the Belgrade Opera (1935–6) and as general secretary of the music programme at Radio Belgrade (1940–41).

Nationalistic ideas, in both text and music, are characteristic of his compositions; his style is predominantly diatonic and homophonic, and often achieves an archaic and folklike sonority. His best opera, *Djuradj Branković* (1938), a dramatic portrayal of the tragic destiny of a Serbian emperor, is close in style to Russian historical operas, with melodic recitative, modal diatonic harmony and leitmotifs. Among his other works, he composed orchestral suites that served as a basis for ballets (e.g. *Sabor*, 'The Country Fair', 1927) and concertos that emphasize the role of the soloist.

WORKS
(*selective list*)

STAGE

Medjuluško blago [The Medjulužje Treasure] (musical drama, 5, M. Nastasijević), 1927, concert perf., Belgrade, 4 March 1937
Djuradj Branković (musical drama, 5, M. Nastasijević), 1938, Belgrade, 12 June 1940
Začarana vodenica [The Bewitched Water-Mill] (comic op, 4, V. Goldner, after M. Glišić: *Posle devedeset godina* [After Ninety Years]), 1946, Belgrade, 1959
Prvi ustanak [The First Uprising] (4, S. Nastasijević), 1953, concert perf., Belgrade, 3 Feb 1959

Ballets: U dolini Morave [In the Morava Valley], 1926; Dragan i Milena, 1927; Živi oganj [The Living Fire], 1943–56

OTHER

Inst: Fl Conc., 1927; Sabor [The Country Fair], suite, 1927; Str Qt, 1927; 7 narodnih igara [7 Folk Dances], orch, 1928; Str Qt, 1930; Vn Conc., 1932; Vidjenje Kosovke devojke [The Vision of the Kosovo Girl], sym. poem, 1943; Sym. no.1 'Seoska' [In the Country], 1950; Hp Conc., 1951; Cl Conc., 1952; 8 balkanskih igara [8 Balkanic Dances], orch, 1955; Conc., 2 fl, orch, 1956; Sym. no.2 'Eroica', 1961
Choral: Suite, 1929–64; Slovo ljubavi [Words of Love] (cant.), 1936–60; Omer i Merima (cant.), 1937; Njegoševi aforizmu [Njegoš's Aphorisms], 1951–62; Dubrovački madrigali [Dubrovnik's Madrigals], 1961; Reči u kamenu [Words in the Stone] (cant.), 1966
Songs, incl. 10 pesama moga brata [10 of my Brother's Songs], 1926–32

ROKSANDA PEJOVIĆ

Nat, Yves (*b* Béziers, Hérault, 29 Dec 1890; *d* Paris, 31 Aug 1956). French pianist and composer. He showed musical talents from an early age: when he was ten he conducted an orchestral *Fantaisie* of his own composition. Saint-Saëns and Fauré heard him and insisted he be sent to the Paris Conservatoire, where in 1907 he took a *premier prix* in Diémer's piano class. His international career began in 1909 when Debussy took him to England; during the next 25 years he appeared throughout Europe and the Americas. He was particularly noted for his performances of Beethoven and Schumann, and he also accompanied Ysaÿe, Thibaud and Enescu. In 1934 he retired from concert life and accepted a professorship at the Paris Conservatoire, where he taught until his death; among his students were Geneviève Joy, Jean-Bernard Pommier and Pierre Sancan. His final public performance was in Paris in 1954, as soloist in his own piano concerto; his other compositions include a symphonic poem, *L'enfer* (1942), piano pieces and songs. Nat's recordings of Beethoven's complete sonatas and Schumann's major works are characterized by dramatic sweep, vivid colour and a strong sense of architecture. He described his approach to performance in *Carnets* (Paris, 1983). Proust wrote of him: 'His playing is that of so great a pianist that one no longer knows if he is a pianist at all; for it becomes so transparent, so filled with what he performs, that he disappears from view and is no more than a window giving on to the masterpiece'.

PAUL GRIFFITHS/CHARLES TIMBRELL

Nataletti, Giorgio (*b* Rome, 12 June 1907; *d* Rome, 16 July 1972). Italian ethnomusicologist and composer. He studied composition with Vincenzo di Donato and took a diploma at Pesaro Conservatory. During his varied career he was artistic director for the first Italian radio station (Radio Araldo of Rome, 1922–3), an originator of sound films in Italy (Istituto Luce, 1930–31), a broadcaster for RAI (more than 1000 broadcasts of 'Cronache Italiane del Turismo', 1936–43), of which he was later music director (1948–55), artistic director for RCA in Italy (from 1955) and later music consultant for Fonit-Cetra. He began his research in 1926, which included making transcriptions and tapes in ethnomusicology in Italy, the Maritime Alps and Tunisia. He continued this work until 1936 and from 1946 to 1961 as technical director of Le Arti e le Tradizioni Popolari dell'OND (ENAL), and as secretary of the Comitato Nazionale delle Arti Popolari (1947–52). In 1948, under the auspices of the Accademia di S Cecilia and RAI, he founded (with Ildebrando Pizzetti and others) and became director of the Centro Nazionale Studi di Musica Popolare, an institute for Italian folk music studies, unique in Italy; by 1974 it had collected 20,000 documents. After teaching in Tunisia (1932–4), he taught folk music (from 1940), and later music history (from 1961), at the Rome Conservatory.

Nataletti was a member of many national and international societies, including the International Folk Music Council and the Italian commission on folk music to UNESCO. His writings deal chiefly with Italian folk music and he collaborated with Alan Lomax and Diego Carpitella on the Italian section (vols.xv–xvi) of *The Columbia World Library of Folk and Primitive Music*. His compositions, most of which date from the 1920s, include large-scale choral compositions (*Il cantico dei cantici*, 1929) as well as orchestral and chamber works.

CAROLYN GIANTURCO

Natali [Natale], **Pompeo** (*b* Ripatransone, nr Ascoli Piceno; *d* ?Rome, after 1681). Italian composer, organist and teacher. A priest, he was *maestro di cappella* and organist of Tivoli Cathedral from December 1651 to December 1652. He then moved to Rome and became chaplain and *maestro di cappella* of S Maria Maggiore. He later founded a music school there which enjoyed a great reputation; G.O. Pitoni was a pupil in the early 1660s. As a composer he is of little consequence. His two volumes of *solfeggi* possibly originated as teaching material in his school; like his two earlier books of madrigals, they are for small forces.

WORKS

Madrigali, 3 equal vv (Rome, 1656)
Madrigali e canzoni spirituali e morali, 2–3vv (Rome, 1662)
Solfeggiamenti . . . per cantare e suonare, 2–3vv (Rome, 1674)
Libro secondo solfeggiamenti per cantare, suonare, 2–3vv, vn, vle, fl etc. (Rome, 1681)
Motet, 1672[1]

G. Radiciotti: *L'arte musicale in Tivoli nei secoli XVI–XVIII* (Tivoli, 1907, enlarged 2/1921)

ARGIA BERTINI

Natalis, N. (*fl* 1420–30). Composer, probably active in northern Italy. He is represented only by a three-voice Gloria found in *I-Bc* Q15. Its texture alternates between discantus–tenor duets marked 'unus' and three-part sections marked 'chorus'; it begins, however, with the discantus alone. The work has interesting rhythmic patterns created through coloration, and strong dissonances which raise doubts about the skill of the composer or copyist. (See also G. de Van: 'An inventory of the Manuscript Bologna, Liceo Musicale, Q 15 (*olim* 37)', *MD*, ii, 1948, pp.231–57.)

TOM R. WARD

Nathan, Hans (*b* Berlin, 5 Aug 1910; *d* Boston, 4 Aug 1989). American musicologist of German birth. His early schooling in Germany included private study of the piano, conducting, theory and stagecraft. In 1934 he received the doctorate in musicology from Berlin University, where he studied musicology with Sachs and psychology with Wolfgang Köhler; his university studies also included art history and philosophy. From 1932 to 1936 Nathan was a music critic in Berlin. After emigrating to the USA, he devoted two years to postgraduate study in musicology at Harvard University. In 1945 he was a visiting professor at Tufts University and in 1946 he became a member of the faculty of Michigan State University, from which he retired in 1981.

Nathan's broad scholarly background led to an equally broad range of musicological interests. His writings cover music from the 13th to the 20th centuries; in all of his work he attempted to place the composition or composer in question in the context of the artistic trends of his time. Negro minstrel music and the works of Dallapiccola were two of his particular enthusiasms. He edited the complete works of William Billings (Boston, 1977), and a volume of Israeli folk music (Madison, WI, 1994).

PAULA MORGAN

Nathan, Isaac (*b* Canterbury, 1790; *d* Sydney, 15 Jan 1864). Australian composer of Polish descent and English birth. Educated at Cambridge by Solomon Lyon from 1805, he was apprenticed by his father to Domenico Corri in London (1809) for training in singing and composition. His introduction to Lord Byron in 1814 led to their collaboration in the *Hebrew Melodies* (1815–19), for which Nathan adapted ancient Jewish chants to Byron's poems; the songs were first sung in London by John Braham and were an instant success, remaining in print until 1861. They were at once the basis and highlight of Nathan's English career, which was fostered by his association with Lady Caroline Lamb, his pupil the Princess Charlotte and the court circles of George IV, to whom he was music librarian and perhaps secret agent. He supported himself with writing, teaching and running a music warehouse and publishing business; he also made an undistinguished stage appearance as Bertram in Henry Bishop's *Guy Mannering* (1816) at Covent Garden. In recurring periods of financial distress, he wrote and published several comic operas and burlettas with the librettist James Kenney, including a pasticcio opera

Sweethearts and Wives (1823) from which the song *Why are you wand'ring here, I pray?* was still in print in 1883. But he was eventually ruined financially by some unspecified services to William IV and decided to emigrate to Australia in 1841.

In February 1841 Nathan arrived in Melbourne, where he gave several well-publicized concerts before settling in Sydney two months later. He immediately opened a singing academy, became choral director of St Mary's Cathedral and arranged an inaugural concert of Classical sacred works. Soon he established himself as a prominent member of society by his ready production of patriotic odes, including *Australia the Wide and Free* for the first municipal council of Sydney (1842) and *Loyalty, a National Paean*. Among his more ephemeral colonial works are *Currency Lasses* for the 58th anniversary of the founding of Sydney (1846), *Leichhardt's Grave*, an elegiac ode mourning the presumed death of Ludwig Leichhardt in 1846, and its instant sequel *Thy Greeting Home Again* for the explorer's unexpected return. His last composition, *A Song to Freedom* (1863), was written as a gift to Queen Victoria. A more original contribution to Australian culture was Nathan's precise observation of Aboriginal musical practice and his experiments in transcribing Aboriginal music, including *Koorinda Braia* (1842) and a series of Australian melodies published in his miscellany *The Southern Euphrosyne* in 1849. Unfortunately, he interpreted native tribal chant within the conventions of the 19th-century drawing-room.

Nathan set up his own musical type and publishing business, gave the first concerts of madrigals and contributed to many early performances of opera in Sydney, arranging, orchestrating and copying parts as well as directing performances from the keyboard. As a teacher and conductor he assisted early colonial musicians in their concert careers, and lectured on music at Sydney College (1844–6). He was responsible for the first operas written in Australia, neither of which was a financial or artistic success: *Merry Freaks in Troublous Times*, a comic opera on the life of Charles II composed in 1843 but never fully staged, and *Don John of Austria*, a historical Spanish romance composed in 1846 and first performed the following year; both suffer from poor librettos and an indebtedness to the more sentimental conventions of contemporary English opera. Three of his London operas were successfully performed in Sydney in the 1840s. Several of his descendants have contributed to music in Australia, including Harry Nathan, claimant to the music of *Waltzing Matilda*, and the conductor Sir Charles Mackerras.

WORKS

(*selective list*)

extant MSS and prints in Mitchell Library, Sydney

STAGE

Sweethearts and Wives (comic op, J. Kenney), London, Haymarket, 7 July 1823, vs, excerpts (London, 1823); collab. J. Whitaker, T.S. Cooke and J. Perry

The Alcaid, or Secrets of Office (comic op, 3, Kenney), London, Haymarket, 10 Aug 1824, vs (London, 1824)

The Illustrious Stranger, or Married and Buried (operatic farce, 2, Kenney and J.G. Millingen), London, Drury Lane, Oct 1827, excerpts (London, 1827)

Triboulet, or the King's Jester (drama, Millingen), London, Sadler's Wells, 1840, lost excerpt, Sydney, Royal Hotel, 29 May 1844, vs

Merry Freaks in Troublous Times (comic op, 2, C. Nagel) (Sydney, 1851)

Don John of Austria (op, 3, J.L. Montefiore), Sydney, Royal Victoria, 7 May 1847, vs (Sydney, n.d.)

OTHER WORKS

Collection of Hebrew Tunes (London, 1815), collab. J. Braham; A Selection of the Hebrew Melodies (Byron), 1–3vv, pf acc. (London, 1815–19); Long Live our Monarch (W. Montague), solo v, 4vv, orch, fs (London, 1830); Koorinda Braia (Sydney, 1842), transcrs. of aboriginal music; Numerous odes, songs, piano pieces

WRITINGS

An Essay on the History and Theory of Music, and on the Qualities, Capabilities and Management of the Human Voice (London, 1823, enlarged 2/1836 as *Musurgia vocalis*)

ed.: *Fugitive Pieces and Reminiscences of Lord Byron* (London, 1829)

Memoirs of Madame Malibran de Bériot(London, 3/1836; Ger. trans., 1837)

Series of Lectures on the Theory and Practice of Music (Sydney and London, 1846)

The Southern Euphrosyne and Australian Miscellany (London and Sydney, *c*1848) [incl. transcrs. of aboriginal music and orig. vocal pieces, pf acc.]

ELIZABETH WOOD

National. *See* RESONATOR GUITAR.

National anthems. Hymns, marches, songs or fanfares used as official patriotic symbols.

National anthems are the equivalent in music of a country's motto, crest or flag. The English term 'anthem' as applied to such a piece became current in the early 19th century; in most other languages the word corresponding to the English 'hymn' is used. The occasions upon which national anthems are required vary from country to country, but one of their main functions has always been to pay homage to a reigning monarch or head of state; they are therefore normally called for on ceremonial occasions when such a person or his representative is present. The playing of anthems in theatres, cinemas and concert halls, now less widespread than it once was, dates from 1745 when Thomas Arne's version of *God Save the King* was sung at the Theatre Royal, Drury Lane. Anthems are frequently used today at football matches and sports meetings, notably at the quadriennial Olympic Games, where the winner of each event is saluted with the anthem of the country he represents. The power of a national anthem to strengthen a nation's resolve was demonstrated during World War II when the BBC's weekly broadcasts from London of the anthems of the Allied Powers attracted an audience of millions throughout Europe. It is now as much a matter of course for every country to have its own anthem as to have its own flag.

Many of the older anthems, including those of France and the USA, came into being during a period of national crisis. The earliest of all, that of Great Britain, was sung and printed at the time of the Jacobite rising, although the melody itself is probably much older; and by the end of the 18th century Spain, France and Austria had also adopted national anthems. It was the growing awareness of nationalism in the 19th century that led to their proliferation, especially in central Europe and South

America. Japan's national anthem dates from 1893, but it is only since 1949, when China adopted its anthem, that Eastern countries as a whole have followed the West's example in this way. The emergence of new independent states in Africa and elsewhere since the end of World War II and the break-up of the former Soviet Union have led to a corresponding increase in the number of anthems now in use.

The texts of national anthems are rarely of literary merit. Patriotic fervour is usually the keynote, although the forms and images used to express it vary a good deal and can reveal much about the character of a nation at the time the words were written. The text of an anthem may often have to be revised or modified in the light of political changes within the country or in its relations with its neighbours. Some countries, particularly those that have enjoyed long periods of peace and political stability, choose anthems that dwell on the natural beauty of the land. Several anthems are built around a national hero, such as Denmark's King Christian and Haiti's Jean-Jacques Dessalines, or around a nation's flag, like those of Honduras and the USA. Many are in effect prayers, like *God Save the King/Queen*, or calls to arms, like France's *La Marseillaise*. The struggle for independence (or the pride in achieving it) is a favourite theme among those countries that have emerged since 1945.

Few national anthems are noted for their musical quality any more than for their texts, but most countries have succeeded in finding a tune that is suitably dignified or stirring. Not surprisingly there has been a tendency for some countries to emulate their neighbours, with the result that the musical style of an anthem is often determined as much by geographical locality as by the date it was written. Broadly speaking, anthems may be divided according to their musical characteristics into five categories, which are not, however, entirely exclusive:

(a) *Hymns*. The stately rhythmic tread and the smooth melodic movement of *God Save the King/Queen* have served as a model for many anthems, both in Europe and among those countries that were formerly British colonies. European anthems of this kind tend to be among the oldest.

(b) *Marches*. Together with the first group, these account for the majority of all anthems. The earliest march to be adopted as a national anthem was the *Marcha real* of Spain (1770), but it is *La Marseillaise* that has provided the main inspiration for anthems of this type. Its initial phrase is echoed, either rhythmically or in pitch, in many examples.

(c) *Operatic anthems*. The tendency for an anthem of one country to resemble those of its neighbours is nowhere more clearly shown than in the examples of South and Central America. As a group they are strongly influenced by the style of 19th-century Italian opera, and at least three of them were composed by Italians. They are without question the longest, most elaborate and most impractical of all anthems. Always in march rhythm and often with an imposing orchestral introduction, they are mostly cast in a ternary form of chorus–verse–chorus. The longest and most ambitious, that of El Salvador, would not be out of place in one of Verdi's middle-period operas.

(d) *Folk anthems*. A notable and perhaps disappointing feature of the anthems of those countries previously under the rule of Britain, France or Belgium is that they have mostly been content to imitate European traditions. Several of them were composed by nationals (missionaries or government officials) of the former controlling powers. For anthems independent of the European tradition one must look mainly to Eastern countries such as Myanmar, Japan, Tibet and Sri Lanka, whose anthems rely strongly on folk music and sometimes call for indigenous instruments and are accompanied by formal gestures.

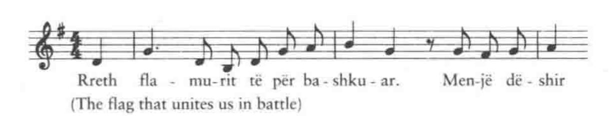
(e) *Fanfares*. A few countries, mainly in oil-producing regions of the Middle East (Bahrain, Qatar, Kuwait and the United Arab Emirates), adopted anthems that were little more than fanfare-like flourishes without text.

A 20th-century development stemming from the national anthem is what might be termed the 'international' or 'supra-national' anthem. The tune known as the *Internationale* (formerly the anthem of the USSR) has been used as a left-wing revolutionary song in many countries, including Italy and Yugoslavia. The melody listed under South Africa, Tanzania and Zambia has existed for many years as a pan-African anthem, especially among the southern Bantu. In January 1972 an arrangement by Herbert von Karajan of the main theme from the finale of Beethoven's Ninth Symphony was adopted (against the wishes of many musicians) as a European anthem by the Committee of Ministers of the Council of Europe (it was later chosen also as the national anthem of Rhodesia). The United Nations Organization also has an anthem by Pablo Casals to words by Auden, although this has not been (nor is likely to be) officially adopted.

The list below gives brief details of the anthems, past and present, of each country. For the complete text and music of anthems in current use see W.L. Reed and M.J. Bristow, eds.: *National Anthems of the World* (London, 9/1997); see also the general bibliography at the end of this article.

MALCOLM BOYD

ABU DHABI. See United Arab Emirates.

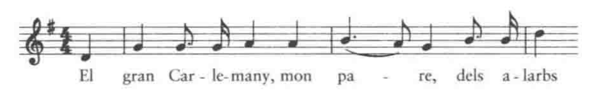


AFGHANISTAN

Music by Ustad Salim Sarmad (*b* 1928). Words by Suleiman Laeq (*b* 1930). Adopted in 1978.

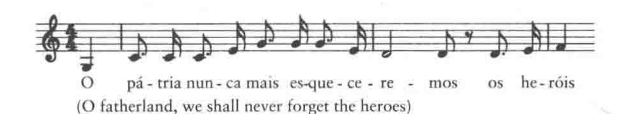
This replaced an anthem beginning 'So che do mezaka asmen wee' ('As long as there is earth and heaven') with music by Abdul Ghafoor Bereshna (1907–74) and Abdul Jalil Zaland (*b* 1931) and words by Abdul Rauf Benawa (*b* 1913), which in turn replaced one composed by Mohammed Farukh and in use since 1943.

ALBANIA



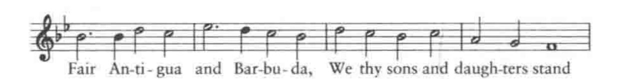
Music by Ciprian Porumbescu (1853–83). Words by A.S. Drenova (1872–1947). Music composed in 1880, adopted in 1912.

ALGERIA



Music by Muḥammad Fawzi (1918–66). Words by Mufdī Zakariyyā (1930–78). Adopted in 1963.

ANDORRA



Music by Enric Marfany Bons (1871–1942). Words by Joan Benlloch i Vivó (1864–1926). Adopted in 1914.

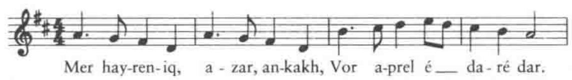
ANGOLA

Music by Rui Alberto Vieira Dias Mingas (*b* 1939). Words by Manuel Rui Alves Monteiro (*b* 1941). Adopted in 1975.

ANTIGUA AND BARBUDA

Music by Novelle Hamilton Richards (1917–86). Words by Walter Picart Chambers (*b* 1908). Adopted in 1967.

ARGENTINA



Music by Blas Parera (1765–1817), arranged in 1860 by Juan Pedro Esnaola (1808–78). Words by Vicente López y Planes (1784–1856). Adopted in 1813.

BIBLIOGRAPHY

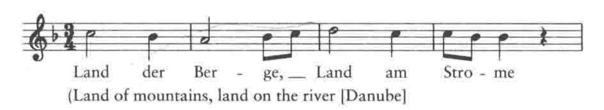
ARMENIA

Music by Barsegh Kanachyan (1885–1967). Words by Miqayél Ghazari Nalbandyan (1829–66). Adopted in 1991.

AUSTRALIA



Music and words by Peter Dodds McCormick (1834–1916). Adopted in 1974.

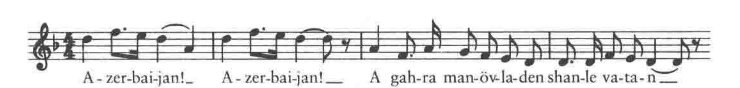
A competition was organized in 1973 to choose an Australian anthem, but none of the entries, which numbered over 1200, was considered suitable. *Advance Australia Fair* was chosen from three well-known national songs after a poll

conducted by the Australian Bureau of Statistics. The words were not regarded as part of the official anthem until changes were made to them in 1984.

Until April 1974 the official anthem was *God Save the King/Queen* (see British Isles), and this is still used on occasions when the British monarch is present, or when it is important to acknowledge him/her as King/Queen of Australia and head of the Commonwealth.

AUSTRIA

Composer unknown. Words by Paula Preradović (1887–1951). Adopted in 1947.



The usual attribution of the music to Mozart is questionable. The melody was first published after Mozart's death as an addition to the little masonic cantata, *Laut verkünde unsre Freude* (K623), but has no connection with that work. Johann Holzer and Joseph Baurnjöpel, both members of Mozart's masonic lodge, must also be considered as possible authors. The words originally associated with the melody began 'Lasst uns mit verschlungnen Händen'; those of Paula Preradović were selected from a number of texts submitted by Austrian poets in 1946.

The first Austrian national anthem was Haydn's *Kaiserhymne* ('Gott erhalte Franz den Kaiser'), composed in 1797 to a text by Lorenz Leopold Haschka (1749–1827). The melody is used today for the German anthem. Haschka's text was altered a number of times until 1848, when Franz Joseph became emperor and new verses were called for. The winner of the competition organized to select them was Johann Gabriel Seidl, whose text was sung to Haydn's melody until 1917. With the establishment of the Austrian Republic at the end of World War I a new national anthem was chosen with music by Wilhelm Kienzl (1857–1941) and words by Karl Renner, *Deutsch-Österreich, du herrliches Land*. This was never popular, however, and in 1929 Haydn's *Kaiserhymne* was reinstated with a text by Ottokar Kernstock, 'Sei gesegnet ohne Ende'. Meanwhile Germany had also adopted Haydn's melody to other words, and this led to Austria's selection of the present anthem in 1947.

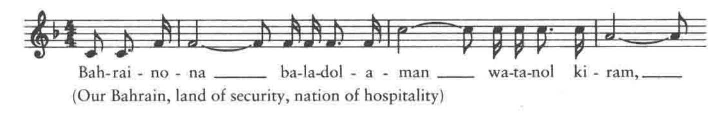
AZERBAIJAN

Music by Uzeir Hajibeyov (1885–1948). Words by Ahmed Javad (1892–1937). Adopted in 1992.

The words and music were written in 1919.



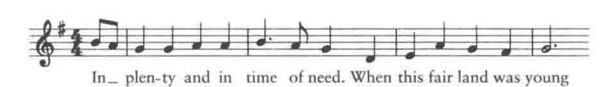
BAHAMAS

Music and words by Timothy Gibson (1903–78).

This anthem was chosen from entries submitted in a national competition and was approved by the government of the Bahamas on 21 November 1972. It became the official anthem on 10 July 1973 when the country attained independence.

BAHRAIN

Composer unknown. Words by Muḥammad Sidqī 'Ayyāsh (*b* 1925). Adopted in 1971.



BANGLADESH

Music and words by Rabindranath Tagore (1861–1941). Adopted in 1972.

The anthem was written during the movement against the partition of Bengal effected by Lord Curzon in 1905. It was widely sung during the struggle for independence against Pakistan and was adopted as a national anthem by the provisional Bangladesh government in 1971.

BARBADOS

Music by Van Roland Edwards (1912–85). Words by Irvine Burgie (*b* 1924). Adopted in 1966; before that *God Save the King/ Queen* was used.

BELARUS

Music by Nester Sakalowski (1902–50). Adopted in 1955.

The words, by Mikhas Klimkovich (1899–1954), to which this melody was originally sung are no longer in general use. From 1911 *A chto tam idzie*, with music by Ludomir Michał Rogowski (1881–1954) and words by Yanka Kupala, was used as the national anthem. Belarus became a Soviet republic in 1919. After it became independent again in 1991 two competitions for a new anthem were held, but without result.

BELGIUM

Music by François van Campenhout (1779–1848). Original text by Hippolyte Louis Alexandre Dechet ('Jenneval'; 1801–30) replaced in 1860 by another by Charles Rogier. *La Brabançonne* was written in 1830 during the struggle with Holland for Belgian independence. The Flemish population had as their own national anthem a setting by Karel Miry (1823–89) of words by H. van Peene, *De vlaamse leeuw*, composed in 1845. This was replaced in 1951 by a Flemish version of *La Brabançonne*.

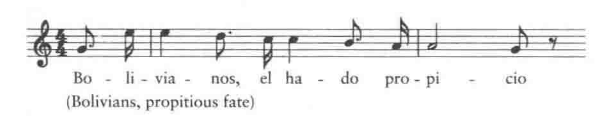
BELIZE

Music by Selwyn Walford Young (1899–1977). Words by Samuel Alfred Haynes (1898–1971). Adopted in 1981 when the country became independent.

BENIN

Music and text by Gilbert Dagnon. Adopted in 1960.

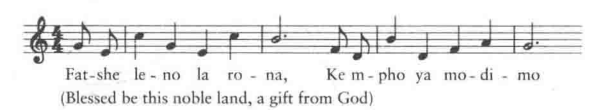


BHUTAN

Music by Aku Tongmi (*b* 1913). Words, beginning 'Druk tsendhen koipi gyelkhap na' ('In the kingdom of the thunder dragon'), by Gyaldun Dasho Thinley Dorji (1914–66). Adopted in 1953.

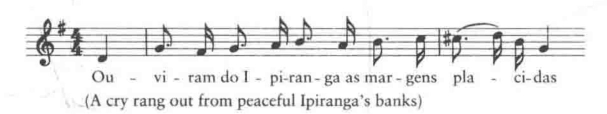
BIAFRA. See under Nigeria.

Bolivia



Music by Leopold Benedetto Vincenti (1815–1914). Words by José Ignacio de Sanjinés (1786–1864). Adopted in 1845.

Bosnia-Hercegovina



Music and words by Dino Dervišalidović. Adopted in 1995.

Botswana

Music and words by Kgalemang Tumediso Motsete (1900–74). Adopted in 1966.

Brazil

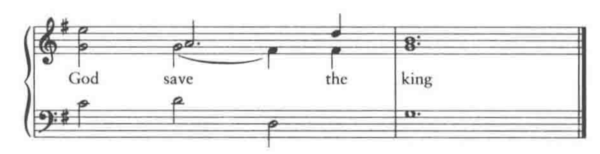
Music by Francisco Manuel da Silva (1795–1865). Words by Joaquim Osório Duque Estrada (1870–1927). Adopted in 1922. The music was composed as a national anthem in 1831, on the accession of Emperor Dom Pedro II. The original text was replaced by the present one in 1922.

The first Brazilian anthem, *O patria, o rei, o povo*, was written and composed by Pedro I when he proclaimed himself emperor in 1822. It was also used as the national anthem of Portugal when Pedro I ascended the Portuguese throne in 1826. After the country became a republic in 1889 a competition was held to select a new Brazilian anthem, but the winning entry, by Leopoldo Miguez to words by Medeiros e Albuquerque, was not adopted and Silva's was retained.

British Isles

Music and words anonymous.

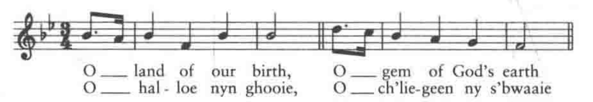
The origins of this, the oldest of all national anthems, remain obscure. The earliest known source is a printed volume of miscellaneous songs issued with the title of *Harmonia anglicana* in 1744 by John Simpson 'at the Bass Viol and Flute in Sweeting's Alley opposite the East Door of the Royal Exchange'. The existence of this volume was first reported by William Chappell (1855–9), but later scholars, failing to find a publication with that title containing *God Save the King*, assumed Chappell to be in error, and a similar volume with the title *Thesaurus musicus* had been generally regarded as the earliest source for the anthem. But Kidson suggested in 1916 (and again in his article on the anthem in *Grove3*) that a faint line discernible about 5 cm from the top of the title-page indicated that the words *Thesaurus musicus* had been inserted in place of another title, presumably *Harmonia anglicana*, and this theory was proved correct by the discovery of a unique copy of the original publication in the music division of the Library of Congress, Washington. Kidson suggested that Simpson might have altered the title because of the existence of five earlier collections with the title *Harmonia anglicana*, published by Walsh & Hare in 1701–3. Krummel advanced the theory that Simpson changed his title to a less nationalistic one in anticipation of a Stuart defeat and consequently of a more stable foreign commerce, but the existence of yet another *Harmonia anglicana*, published by Walsh and dated about 1745 by Smith and Humphries, might suggest a still more plausible reason.



The earliest recorded performances of *God Save the King* took place at the Drury Lane and Covent Garden theatres, where the anthem was sung on several successive nights in September 1745 following the defeat of Sir John Cope's army at Prestonpans. Arne's arrangement (in E♭) for Drury Lane is in the British Library, and another version (in G, with optional flute part in F) appeared in *The Gentleman's Magazine* for October 1745 as 'a song for two voices, as sung at both the playhouses'. None of the early sources bears a composer's name, and although Thomas Arne, James Oswald, Henry Carey and others have all at various times been credited with its composition, it seems likely that the melody existed in some form before the 18th century. An *Ayre* that might be taken for a minor-key version of the anthem and

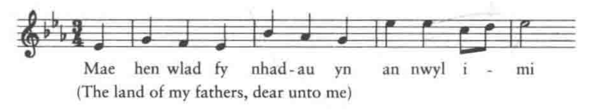
said to be by John Bull exists in a 19th-century copy in the hand of George Smart. It was transcribed from a manuscript, formerly in the library of J.C. Pepusch and later owned by William Kitchiner, dating from 1619 and containing keyboard pieces by Bull. After Kitchiner's death in 1827 the manuscript passed into the hands of Richard Clark, who is said to have made certain alterations to the *Ayre* in order to support his attribution of the anthem to Bull. Since the manuscript has now disappeared it is impossible to judge how far Smart's copy represents Bull's original tune, but the similarity as it now stands is quite striking. Further evidence of the possibility of a 17th-century origin for the anthem is found in a catch by Henry Purcell, *Since the duke is returned*, where the words 'God save the king' are prominently set to its first four notes.

Both the words and the music have undergone minor alterations since the 18th century, and no 'official' version has ever been approved. Only the first of the three strophes is now normally sung, and the tendentious second strophe ('Confound their politics/Frustrate their knavish tricks') is avoided altogether. As far as the music is concerned, only the last line is now subject to different renderings, each one of the following versions being frequently encountered:



The first of these three versions is generally preferred, but any movement towards a standardization of the anthem's melody and harmony at this point would do well to consider a return to Arne's altogether sturdier version for Drury Lane in 1745:

There exist numerous arrangements, including choral ones by Elgar (1902) and Britten (1961).



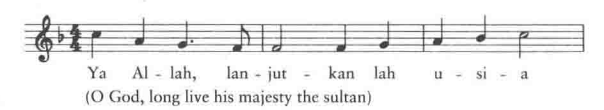
During the 19th century the music of *God Save the King* served as the national anthem for many other countries, including Denmark, Sweden, Switzerland, Russia, the USA and several independent German states. It is still used for the national anthem of Liechtenstein. The melody has also found its way into several musical compositions, although references frequently found to its use in Handel's *Occasional Oratorio* are mistaken. Beethoven used it for his *Wellingtons Sieg, oder Die Schlacht bei Vittoria* (1813) and also for a set of piano variations (1802/3). Paganini composed a set of variations on it for violin and orchestra (1829), Marschner introduced it into a concert overture for the baptism of the Prince of Wales (King Edward VII) in 1842, Weber used it as the Saxon anthem in his *Jubel-Ouvertüre*, written in 1818 to celebrate the jubilee of King Friedrich August I, and Ives based his *Variations on 'America'* for organ (1891–2) on it. A long list of works using the melody will be found in Scholes's *God Save the Queen!* (1954).

The Isle of Man and the Principality of Wales have their own anthems which are used in conjunction with, and sometimes independently of, *God Save the King/Queen*.

Music traditional, adapted by William Henry Gill (1839–1923). Words by William Henry Gill.

This melody is based on a traditional Manx air. The anthem was dedicated to Lady Raglan in 1907. The Manx translation is by John J. Kneen (1873–1939).

Music by James James (1832–1902). Words by Evan James (1809–93).



This anthem was composed in 1856 and became popular in Wales after its performance at the Llangollen Eisteddfod in 1858. It first appeared in print in John Owain's *Gems of Welsh Melody* (1860).

BRUNEI

Music by Inche Awang Besar bin Sagap (*b* 1914). Words by Pengiran Dato Utama Haji Mahomed Yusuf bin Pengiran Haji Abdul Rahim (*b* 1923). Composed in 1947, adopted in 1951.

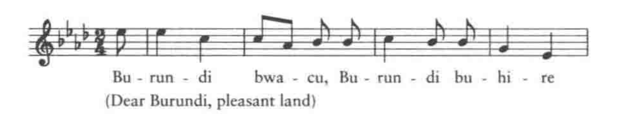
BULGARIA

Music and words by Tsvetan Tsvetkov Radoslavov (1863–1931), based on a popular patriotic song, *My Beloved Land*. Adopted in 1964.

The song was composed by Radoslavov in 1885 while he was still a student and on his way to fight in the Serbo-Bulgarian war. It was used by Boris Trichkov (1881–1944) in his choral work *My Beloved Land*. Only the first of the three verses now in use is by Radoslavov. The others are by Pavel Matev and Georgy Dyagarov.

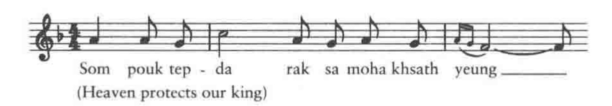
Before 1885 the Bulgarians used the Russian anthem as a patriotic song. In that year the anthem *Shoumi Maritsa* was composed by a Czech living in Bulgaria, Gabriel Šebek (*d* after 1907), to words by Maraček, later revised by Nikolo Shivkov (1847–1901). This was sung until 1946 when it was replaced by *Bulgaria mila, zemya na gheroi*, with music by Georgi Dimitrov, G. Tslatev-Cherkin and S. Obtetenov, and words by Nikola Furnadziev, M. Isacvand and Elizaveta Bagriana. This in turn was replaced by the present anthem.

BURKINA FASO



Composer unknown. Words, beginning 'Contre la férule humiliante' ('Against humiliating bondage'), by Thomas Sankara (1949–87). Adopted in 1984.

Between 1960 and 1984 the country, as Upper Volta, used as its anthem *Fière Volta de mes aïeux*, with music and words by Robert Ouédraogo.



BURMA. See Myanmar.

BURUNDI

Music by Marc Barengayabo (*b* 1934). Words written collectively by a committee presided over by Jean Batiste Ntahokaja (*b* 1920). Adopted in 1962.

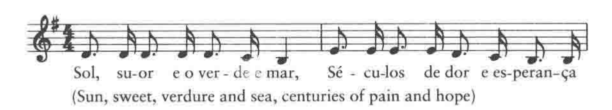
CAMBODIA

Music adapted by F. Perruchot and J. Jekyll from a Cambodian folksong. Words by Chuon Nat (1883–1969). Adopted in 1941.

When the country became the Khmer Republic, in 1970, an anthem beginning 'Chon cheat Khmer lebey pouké muoy kong lok' ('Khmers are known throughout the world as descendants of glorious warriors') was used. This in turn was replaced by another anthem during the country's period as Kampuchea (1975–89). The present anthem was reinstated in 1993.

CAMEROON

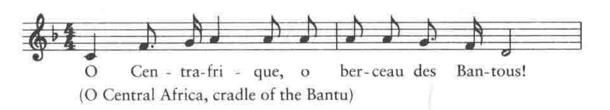
Music by Samuel Minkyo Bamba (*b* 1911) and Moise Nyatte (1910–78). Words by René Djam Afame (1910–81) and a group of students from the Ecole Normale de la Mission Presbytérienne Américaine at Sangmelina. Used unofficially as the national anthem since 1948; officially adopted in 1957. Revisions to both text and music were made in 1978.



CANADA

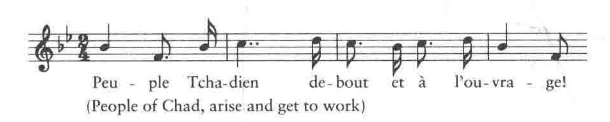
Music by Calixa Lavallée (1842–91). Words by Adolphe Basile Routhier (1839–1920); English text by Robert Stanley Weir (1856–1926). Adopted in 1980.

Before it was officially adopted on 1 July 1980, *O Canada!* was widely used as a patriotic song. The official anthem before that date was *God Save the King/Queen* (see British Isles).



CAPE VERDE

Music and words by Amilcar Lopes Cabral (1924–73). Adopted in 1975.



The anthem is also used by Guinea-Bissau.

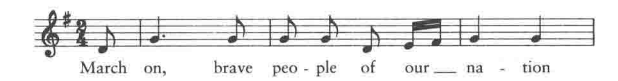
CENTRAL AFRICAN REPUBLIC

Music by Herbert Pepper (*b* 1912). Words by Barthélémy Boganda (1910–59). Adopted in 1960.

CHAD

Music by Paul Villard (1899–1988). Words by Louis Gidrol (*b* 1922) and students from St Paul's School, Fort Archambault. Composed in 1960, when Chad became independent.

CHILE



Music by Ramón Carnicer (1789–1855). Words by Eusebio Lillo (1826–1910). Present text officially adopted on 27 June 1941.

The first national anthem, *Ciudadanos, el amor sagrado*, was composed in 1819 by Manuel Robles to words by Bernardo de Vera y Pintado (1789–1826). Carnicer's music replaced this in 1828, and in 1847, after the signing of a peace treaty between Spain and Chile, a new text was written by Lillo. Subsequent modifications were made to the anthem by Fabio Petris in 1907 and by Enrique Soro (1884–1954) in 1909.

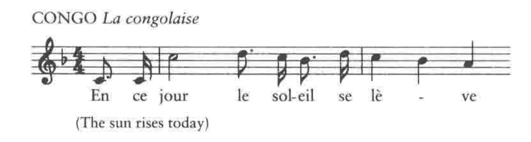
COMOROS

Music by Kamildine Abdallah (1943–82) and Said Hachim Sidi Abderemane (*b* 1942). Words by Said Hachim Sidi Abderemane. Adopted in 1978.



CONGO, DEMOCRATIC REPUBLIC OF THE

Music and words by Boka di Mpasi Londi (*b* 1929).

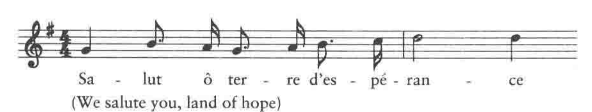
The first national anthem of the Belgian Congo, *Vers l'avenir* ('Le siècle marche et pose ses jalons'), was composed by François-Auguste Gavaert (1828–1908) in 1908, when the Congo was an independent state. It was replaced by *La Brabançonne* when the Congo became a Belgian colony. In 1960, when the country became independent again, a new anthem, *Debout Kongolais, unis par le sort*, was written by Joseph Lutumba and Simon-Pierre Boka. This was replaced by the anthem above after the country's change of name from Congo (Kinshasa) to Zaïre in 1971. It is the most recent anthem available.

CONGO, REPUBLIC OF THE

Music and words by Jean Royer, Jacques Tondra and Jo Spadiliere.

The anthem was replaced in 1969 by *Les trois glorieuses*, with music by Philippe Mockovamy (*b* 1938) and words by Henri Lopes (*b* 1937), and was reinstated in 1991.

COSTA RICA



Music by Manuel María Gutiérrez (1829–87). Words by José María Zeledón (1877–1949). The music was adopted in 1853; the words were chosen as the result of a public competition in 1900.

BIBLIOGRAPHY

CÔTE D'IVOIRE

Music by Pierre Michel Pango (*b* 1926). Words by Mathieu Ekra (*b* 1917), Joachim Bony and Pierre Marie Coty (*b* 1927). Adopted in 1960.

CROATIA

Music by Josip Runjanin (1821–78). Words by Anton Mihanović (1796–1861). Adopted in 1990.

The words were written in 1835, and the anthem was used in Croatia before it joined with other Balkan states in 1918 to form what in 1928 became Yugoslavia. The country became independent again in 1992. The music has been attributed also to Lichtenegger.

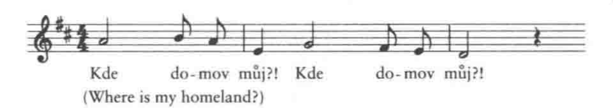
CUBA

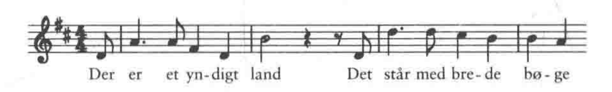


Music and text by Pedro Figueredo (1819–70). Written and first sung during the Battle of Bayamo in 1868.

BIBLIOGRAPHY

E. Gay-Calbo: *Las banderas, el escudo y el himno de Cuba* (Havana, 1956)

CYPRUS. The national anthem of Greece is generally used. See under Greece.



CZECH REPUBLIC

Music by František Jan Škroup (1801–62). Words by Josef Kajetán Tyl (1808–56). Adopted in 1919 as part of the anthem of Czechoslovakia.

The music was composed in 1834 as part of the incidental music Škroup wrote for Tyl's play *Fidlovačka* ('Shoemaker's Fair'). Between 1919 and 1992, when the Czech Republic and Slovakia separated, it formed the first section of the Czechoslovak anthem.

DENMARK

Music by Hans Ernst Krøyer (1798–1879). Words by Adam Oehlenschlaeger (1779–1850).

Denmark was the first country after Britain to adopt the tune of *God Save the King/Queen* (see British Isles) as a national anthem. The words, a free translation of the English text, were by Heinrich Harries (1762–1802) and appeared in 1790 in the *Flensburger Wochenblatt* as a *Lied für den dänischen Unterthan an seines Königs Geburtstag zu singen.*

The present anthem was written in 1819 in response to a competition for a new national anthem, and by the 1920s it was accepted as such. It has existed as a patriotic song beside *Kong Kristian stod ved højen mast*, with words that originally formed part of the libretto Johannes Ewald (1743–81) wrote for the ballad opera *The Fishermen* by J.E. Hartmann (1726–93). Hartmann's melody is, however, quite different from that now sung to the words. This is sometimes attributed to Ditlev Ludvig Rogert (1742–1813), but it underwent several changes before being given its final form in the music Friedrich Kuhlau (1786–1832) wrote for J.L. Heiberg's play *Elverhøj* ('The Elf Hill', 1828).

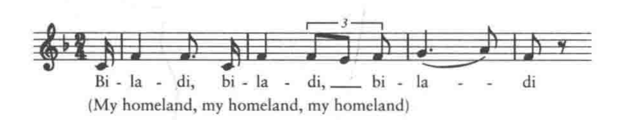
DJIBOUTI

Music by Abdi Robleh Karshileh (*b* 1941). Words, beginning 'Hinjinne u sara kaca' ('Rise up with strength, for we have raised our flag'), by Aden Elmi God, Qooyare (*b* 1948). Adopted in 1977.

DOMINICA

Music by Lemuel McPherson Christian (*b* 1913). Words by Wilfred Oscar Morgan Pond (1912–85). Adopted in 1967.

Dominican Republic



Music by José Reyés (1835–1905). Words by Emilio Prud'homme (1856–1932). Composed in 1883 and first sung as the national anthem in 1900.

Previous anthems include the *Himno de capotillo*, composed about 1865 by Ignacio Marti Calderón.

A. Espinosa Pólit: *Reseña histórica del himno nacional ecuatoriano* (Quito, 1948)

Egypt

Music and words by Sayyid Darwīsh (1892–1923). Adopted in 1979.

Between 1960 and 1979 the anthem used was *Walla zaman yā silābī* (music by Kamāl al-Ṭawīl, words by Ṣalāḥ Shāhīn).

El Salvador

Music by Juan Aberle (1846–1930). Words by Juan J. Cañas (1826–1918). Composed in 1879, adopted in 1953.

Equatorial Guinea

Composer unknown. Words by Atanasio Ndongo Miyono. Adopted in 1968 when the country became independent.

Eritrea

E - rt - ra, E - rt - ra, E - rt - ra,
(Eritrea, Eritrea, Eritrea)

Music by Isaac Abraham Meharezghi (*b* 1944) and Aron Tekle Tesfatsion (*b* 1963). Words by Solomon Tsehaye Berakhi (*b* 1956). Adopted in 1993.

The words were written in 1986 and slightly altered when the country became independent in 1993.

Estonia

Music by Fredrik Pacius (1809–91). Words by Johann Voldemar Jannsen (1819–1900). Adopted *c*1917.

The music was composed in 1848 and first sung with Jannsen's text in 1869. The melody is also used for the Finnish national anthem (see Finland).

Ethiopia

Music by Solomon Lulu Mitiku (*b* 1950). Words by Dereje Melaku Mengesha (*b* 1957). Adopted in 1992.

This anthem replaced *Ityopya, qidä mi* (music by Daniel Yohannes Haggos, words by Assefa Gebre-Mariam Tessama), adopted in 1975. This in turn had replaced the imperial anthem *Hail Ethiopia, land elect* (music by K. Nalbandian, words by a group of Ethiopians), which was adopted in 1930 at the coronation of Haile Selassi I.

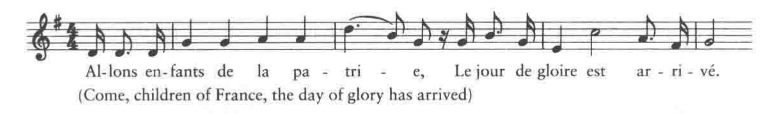
Færoes

Music by Peter Alberg (1885–1940). Words by Símun av Skarthi (1872–1942).

Tú alfagra landmítt became the national anthem in the late 1930s when it superseded *Eg oyggjar veit* by Frisrikkur Petersen (1853–1917) with music by Hans Jacob Højgaard (*b* 1904).

Fiji

Music based on a traditional Fijian song. Words by Michael Prescott (*b* 1928).



Finland

Music by Fredrik Pacius (1809–91). Words by Johan Ludvig Runeberg (1804–77).

The words were written in 1846, the music two years later, and the anthem was first sung at a students' gathering on 13 May 1848. Pacius's melody is also used for the Estonian national anthem (see Estonia).

France

Music and words by Claude-Joseph Rouget de Lisle (1760–1836). Adopted in 1795.

La Marseillaise was written in a single night in April 1792 as a marching song for Marshal Lukner's army of the Rhine. It was first sung by Mayor Dietrich of Strasbourg at his own home and was performed a few days later by the band of the Garde Nationale. Its popularity throughout France became assured when it was taken up by a battalion of volunteers from Marseilles, who sang it as they entered Paris in July the same year. It thereafter became known as *La Marseillaise*, though it had already been printed in Strasbourg under the title *Chant de guerre pour l'armée du Rhin*. An attempt was made during the Second Empire to replace the anthem with another of a less 'revolutionary' character, *Partons pour la Syrie*, in the composition of which Queen Hortense, mother of Napoleon III, is said to have had a hand. After the fall of Napoleon III *La Marseillaise* was immediately reinstated.

The authorship of *La Marseillaise* has often been contested, and claims to the music have been made on behalf of Dalayrac, Gossec, Grétry, Méhul, Ignace Pleyel and several others. Pleyel did, in fact, provide the music for another of

Rouget de Lisle's patriotic poems, *Hymne à la liberté*, but there is nothing to suggest that the composer of *La Marseillaise* was other than Rouget de Lisle himself.

The melody has been quoted by many composers, including Philipp Carl Hoffmann (set of variations, 1795), Salieri (*Palmira, regina di Persia*, 1795), Jean-Baptiste Lucien Grison (*Esther*), Schumann (overture *Hermann und Dorothea*, *Faschingsschwank aus Wien* and *Die beiden Grenadiere*), Wagner (*Les deux grenadiers*), Litolff (overture *Maximilian Robespierre*), Liszt (*Heroïde funèbre*), Tchaikovsky (overture *1812*), Arnold Mendelssohn (*Der Bärenhäuter*, 1900), Siegfried Ochs (*Im Namen des Gesetzes*, 1888) and Debussy (*Feux d'artifice*).

GABON

Music and words by Georges Damas (1902–82). Adopted in 1960.

GAMBIA

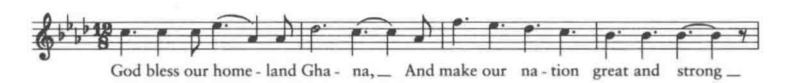
Music adapted by Jeremy F. Howe (*b* 1929) from the traditional Mandinka song *Foday kaba dumbuya*. Words by Virginia Julia Howe (*b* 1927). Adopted in 1965.

GERMANY

Music by Joseph Haydn. Words by August Heinrich Hoffmann von Fallersleben (1798–1874) from a poem by Walther von der Vogelweide (*c*1170–*c*1230). Adopted in 1922; present text adopted in 1950.

Haydn's music was originally written in 1797 as the national anthem of Austria, and it was used in that country until the beginning of World War II (see Austria). In 1922 it was officially adopted by Germany with Hoffmann von Fallersleben's poem beginning 'Deutschland, Deutschland über alles', and from 1933 this was sung in conjunction with the Nazi party song, the *Horst-Wessel-Lied*. In 1950 the Federal Republic replaced the first verse of Hoffmann von Fallersleben's poem by the third verse quoted above.

Until 1922 the Germans used as their anthem the tune of *God Save the King/Queen* (see British Isles), which they sang to the words 'Heil Dir im Siegerkranz' by Heinrich Harries, with modifications by B.G. Schumacher. This had been adopted as the national anthem when the German empire was established in 1871. The situation before that date was rather confused. *Heil Dir im Siegerkranz* had been in use since 1796, and during the first half of the 19th century it existed alongside a number of pan-German anthems as well as several others more particularly associated with separate German states. In 1818 Spontini composed the *Preussischer Volksgesang* to a text by J.F.L. Duncker, 'Wo ist das Volk, das kühn von Tat?'. This remained in use for about 20 years until it was superseded by *Ich bin ein Preusse* with words by Bernhard Thiersch and music by Heinrich August Neithardt. Between 1949 and 1990 the DDR used *Auferstanden*



aus Ruinen, with music by Hanns Eisler (1898–1962) and words by Johannes R. Becher (1891–1958), as the national anthem.

Haydn used the melody of his anthem for a set of variations in the String Quartet op.76 no.3. It has also been quoted as a patriotic symbol in works by Tobias Haslinger, Anton Diabelli and others.

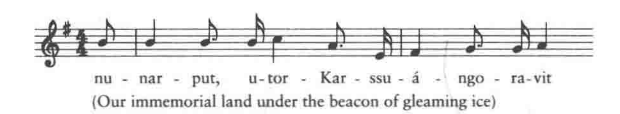
GHANA

Music by Philip Gbeho (1905–76). Adopted in 1957; present words adopted in 1966.

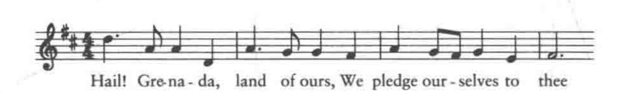
The original words, 'Lift high the flag of Ghana', by various authors including the composer, were written in 1956 together with the music. They were replaced by the present text following a change of government in 1966.

GREAT BRITAIN. See British Isles.



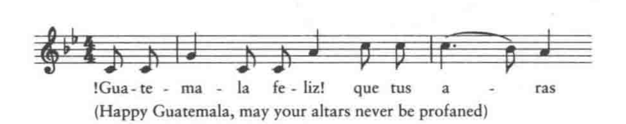
GREECE

Music by Nicolaos Mantzaros (1795–1872). Words by Dionysius Solomos (1798–1857). Adopted in 1864.



Solomos's poem was written in 1823–4; there are 158 stanzas of which only the first two are normally sung as the national anthem.

GREENLAND



Music by Jonathan Petersen (1881–1961). Words by Henrik Lund (1875–1948).

GRENADA

Music by Louis Masanto (*b* 1938). Text by Irva Baptiste (*b* 1924). Adopted in 1974 when Grenada became independent. Before that date *God Save the King/Queen* was used (see British Isles).

GUATEMALA

Music by Rafael Álvarez (1860–1948). Words by José Joaquín Palma (1844–1911). Adopted in 1896.

This anthem was chosen from entries in a public competition in 1887. It was adopted by governmental decrees in 1896 and 1897, and modified in 1934.

BIBLIOGRAPHY

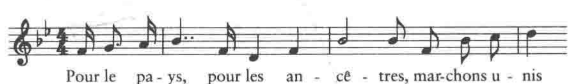
R. Bran Azmitia: *Historia de nuestro himno nacional* (Guatemala, 1958)

GUINEA

Music by Fodeba Keita (1925–70). Words (beginning 'Peuple d'Afrique! Le passé historique!') anonymous.

GUINEA-BISSAU

Music and words by Amilcar Cabral (1924–73). Adopted in 1974 when the country achieved independence. The anthem is also used by Cape Verde.



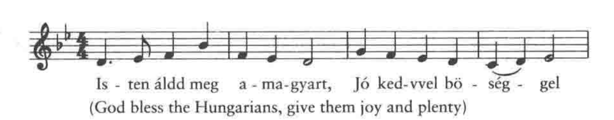
GUINEA, EQUATORIAL. See Equatorial Guinea.

GUYANA

Music by Robert Cyril Gladstone Potter (1899–1981). Words by Archibald Leonard Luker (1917–71). Adopted in 1966.

HAITI

Music by Nicolas Geffrard (1871–1930). Words by Justin Lhérisson (1873–1907).
The anthem was written to celebrate the centenary of Haiti's independence on 1 January 1904. The title refers to Jean-Jacques Dessalines, the island's liberator and its first emperor.

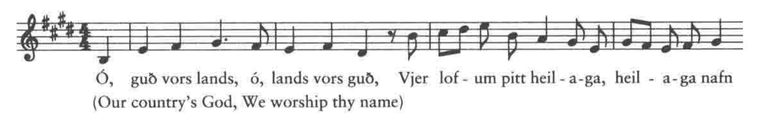


HAWAII. See under United States of America.

HONDURAS

Music by Carlos Hartling (1869–1920). Words by Augusto C. Coello (1883–1941). Adopted in 1915.

HUNGARY



Music by Ferenc Erkel (1810–93). Words by Ferenc Kölcsey (1790–1838). Adopted in 1845.
The words were written in 1823. The music was chosen as the result of a public competition.

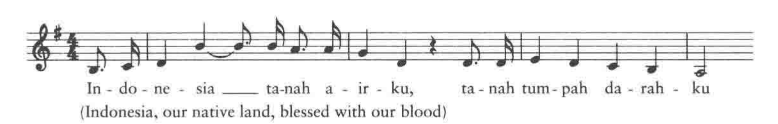
L. Somfai: 'A himnuz ösbemutatójának szólamanyga', *Írások Erkel Ferencről és a magyar zene korábbi századairól*, ed. F. Bónis (Budapest, 1968), 57–62

ICELAND

Music by Sveinbjörn Sveinbjörnsson (1847–1927). Words by Matthias Jochumsson (1835–1920). Adopted in 1874, when Iceland secured its own constitution and celebrated the 1000th anniversary of the island's first permanent settlers.



INDIA

Music and words by Rabindranath Tagore (1861–1941). Adopted in 1950.

The anthem was first published in 1912 and together with another patriotic song, *Vande mātaram*, it was for years associated with India's struggle towards independence. It was sung at the historic midnight session of the Constituent Assembly on 14 August 1947 and became the national anthem just over two years later.

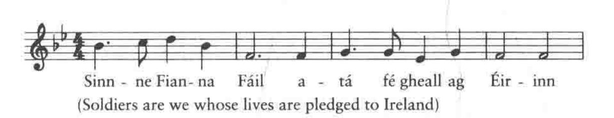
INDONESIA

Music and words by Wage Rudolph Supratman (1903–38). Adopted in 1945. Sung as the Nationalist party song since 1928.

IRAN

Music by Hassan Rihahi (*b* 1945). Words, beginning 'Sar zad az ufuq mihr-i-hāwaran' ('On the horizon rises the eastern sun'), anonymous.

An early Iranian anthem was *Salamati Shah*, a setting of anonymous words by a Frenchman, General Lemaire, composed in 1873. From 1933 to 1979 the anthem in use was *Shahhanshahemaw zende baw* ('Long Live the shah'), with music by Davood Najmi Moghaddam (*b* ?1900) and words by S. Afsar (1880–1940). This was followed in 1980 by *Shod jomhooreeye eslahme bepah* ('The Islamic Republic has been established'), with music by Mohammed Beglary and words by Abolghasem Halat. The present anthem was chosen as the result of a competition in 1990.

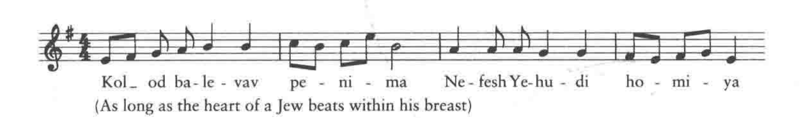


IRAQ

Music by Walīd Georges Gholmieh (*b* 1938). Words, beginning 'Waṭanun medde 'alā l-ufqi janāḥa' ('A homeland that spreads its wings over the horizon'), by Shafīq 'Abd al-Jabbār al-Kamālī (1930–84). Adopted in 1981.

Previously Iraq had used a textless anthem with music by L. Zambaka, adopted in 1959.

IRELAND

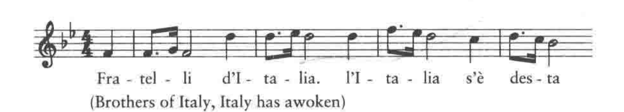


Music by Peadar Kearney (1883–1942) and Patrick Heaney (*d* 1911). Words by Peadar Kearney.

The chorus (quoted above) was adopted as the national anthem in 1926. The words were written in 1907 and first published in *Irish Freedom* in 1912.

ISLE OF MAN. See under British Isles.

ISRAEL



Music traditional, arranged by Samuel Cohen. Words by Naftali Herz Imber (1856–1909). Adopted in 1948.

The text of this anthem was probably written in 1878 and was first published in the collection *Barkai* ('Morning star') in 1886. The melody was adapted in 1888 from a Moldavian folksong arranged by G. Popovici as *Carul cu boi*. During the first half of the 20th century it served as the anthem of the Zionist organization.

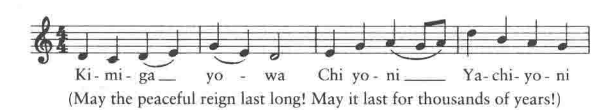
ITALY

Music by Michele Novaro (1822–85). Words by Goffredo Mameli (1827–49). Adopted in 1946.

This is Italy's first official national anthem. It came into use with the establishment of the Italian Republic after World War II. Composed in 1847, its original title was *Canto degli italiani*. The anthem most widely used before 1946 was the

Marcia reale d'ordinanza, composed by Giuseppe Gabetti (1796–1862) at the request of King Carlo Felice in 1831. The *Inno di Garibaldi*, composed in 1858 by Alessio Olivieri (1830–67) to a text by Luigi Mercantini, became popular after Garibaldi's victory over the Bourbons in 1860. During the period of Fascist rule *La giovinezza* was used as a party song; the music was by G. Castaldo, the words by Marcello Manni.

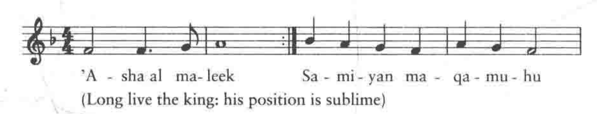


IVORY COAST. See Côte d'Ivoire.

JAMAICA

Music by Robert Lightbourne (1909–95). Words by Hugh Sherlock (*b* 1905). Adopted in 1962.

JAPAN



Music by Hiromori Hayashi (1831–96). Words selected from the seventh volume of *Kokinshu* (9th century). Adopted in 1893.

The anthem was first performed in 1880 on the birthday of Emperor Meiji (3 November).

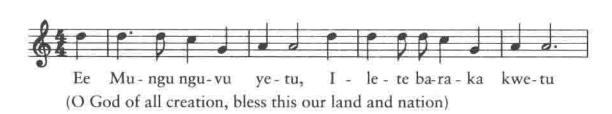
JORDAN

Music by 'Abd al-Qādir al-Tannīr (1901–57). Words by 'Abd al-Mun'im al-Rifā'ī (1917–85). Adopted in 1946.

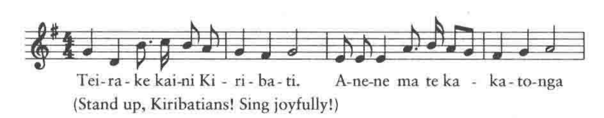
KAMPUCHEA. See Cambodia.



KAZAKHSTAN

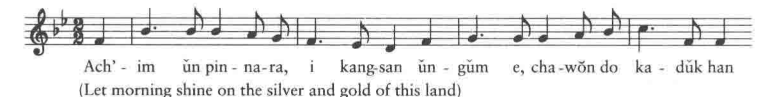
Music by Latif Khamidi (*b* 1906), Mukhtan Tulebayevich Tulebayev (1913–60), and Yevgeny Grigor′yevich Brusilovsky (1905–81). Words, beginning 'Azatyk zholinda zhalyndap zhanypyz' ('We are brave people, children of honesty'), by Muzafar Alimbayev (*b* 1923), Kadïr Mïrzaliyev (*b* 1935), Tumanbai Moldagaliyev (*b* 1935) and Zhadïra Daribayeva. The music was adopted in 1944, the words in 1946.

Modifications were made to the text in 1978 and 1985.



KENYA

Music traditional, based on a Kenyan folksong and adapted by a five-man commission who also wrote the words.



KHMER REPUBLIC. See Cambodia.

KIRIBATI

Music and words by Urium Tamuera Ioteba (1910–88). First sung in 1979 when Kiribati became independent.

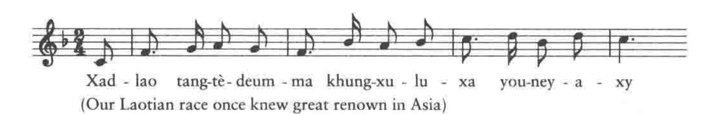
KOREA, PEOPLE'S DEMOCRATIC REPUBLIC OF (NORTH)

Music by Kim Wŏn-Gyun (*b* 1917). Words by Pak Se Yông (1902–89). Adopted in 1947.

KOREA, REPUBLIC OF (SOUTH)

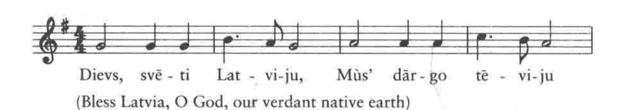
Music by Eacktay Ahn (1906–65). Words anonymous. Adopted in 1948. The words were originally sung to a different melody.

KUWAIT



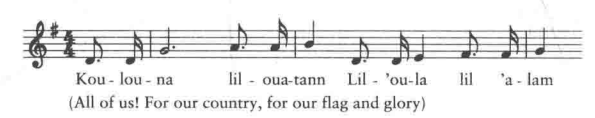
Music by Ibrāhīm Nāṣir al-Soula (*b* 1935). Words, beginning 'Waṭanī al-Kuwayt salemta lilmajdi' ('Kuwait, my country, may you be safe and glorious'), by Aḥmad Mushārī al-Adwānī (1923–92). Adopted in 1978.
Between 1951 and 1978 the textless *Amiri salute* by Yusuf Adees was used as the country's anthem.

KYRGYZSTAN



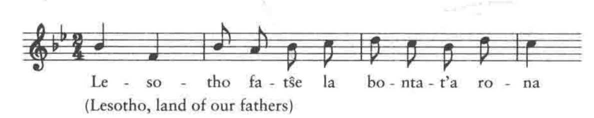
Music by N. Davlesov and K. Moldobasanov. Words by J. Sadïkov and Sh. Kuluyev. Adopted in 1992.

LAOS



Music by Thongdy Sounthônevicit (1905–68). Words by Sisana Sisane (*b* 1923). Written in 1941; adopted in 1947. A new text was adopted in 1975.

LATVIA



Music and words by Karlis Baumanis (1834–1904). Written for a singing festival in 1873.

LEBANON

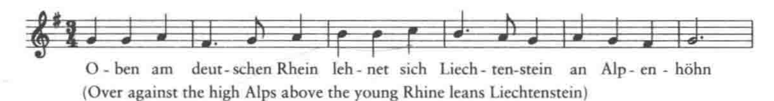
Music by Wadī' Ṣabrā (1876–1952). Words by Rachid Nakhlé (1873–1939). Adopted in 1927.

LESOTHO

Music by Ferdinand-Samuel Laur (1791–1854). Words by François Coillard (1834–1904). Adopted in 1967.

LIBERIA

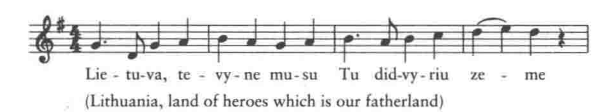
Music by Olmstead Luca. Words by Daniel Bashiel Warner (1815–80), the third president of Liberia, 1864–8. Adopted in 1847.



LIBYA

Music by Maḥmūd al-Chareïf (1912–1990). Words, beginning 'Allahu aklar' ('God is greatest'), by Shams al-Dīn 'Abdalla (1921–77). Adopted in 1969.

Between 1954 and 1969 the anthem used was *Yā bilādī*, with music by Muḥammad 'Abd al-Wahhāb and words by Al-Bashīr al-Arabī.



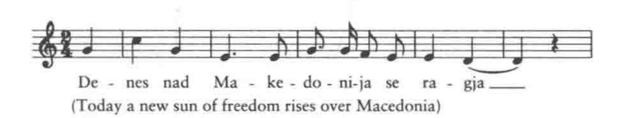
LIECHTENSTEIN

Music anonymous. Words by Jakob Joseph Jauch (1802–59).

The melody is that of *God Save the King/Queen* (see British Isles). The text was written in 1850 and altered slightly in 1963.

LITHUANIA

Music and words by Vincas Kudirka (1858–99). Adopted in 1918.

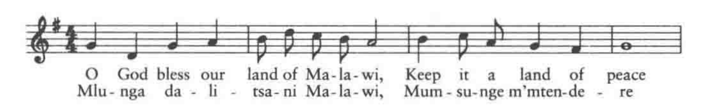


LUXEMBOURG

Music by Jean Antoine Zinnen (1827–98). Words by Michel Lentz (1820–93). Adopted in 1993.

This anthem was composed and first performed in 1864. In the 1890s it gradually replaced *De feierwôn* ('The Fire-Wagon'), music and words by Lentz, in popularity.

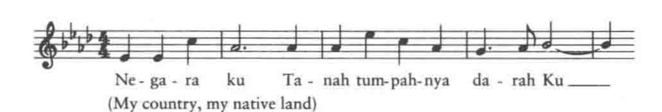
MACEDONIA



Music by Todor Skalovski (*b* 1909). Words by Vlado Malevski (1919–84). Adopted in 1992.

MADAGASCAR

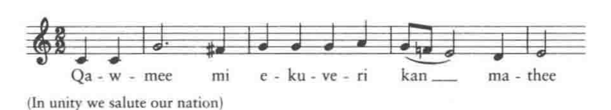
Music by Norbert Raharisoa (*d* 1964). Words by P. Rahajason (1897–1971). Adopted in 1958.



MALAWI

Music and words by Michael-Fred P. Sauka (*b* 1934). Adopted in 1964.

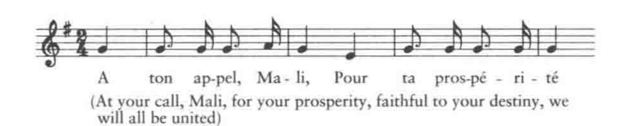
The anthem was chosen as a result of a competition held in 1964. It replaced *God Save the King/Queen* which had been in use since 1891 when Malawi (then Nyasaland) became a British protectorate. The Chitumbuka version, beginning 'Chiuta mtumbike Malawi', is no longer used, the official languages in Malawi now being English and Chichewa.



MALAYSIA

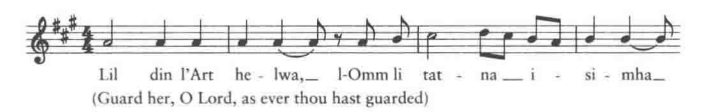
Music traditional. Words compiled by a special committee. Adopted in 1957.

As well as this national anthem each of the 13 princely states of Malaysia has its own state anthem. They are Johore, Kedah, Kelantan, Malacca, Negri Sembilan, Pahang, Penang, Perak, Perlis, Sabah, Sarawak, Selangor, Trengganu. The melody of the national anthem, *Negara ku*, was adapted from the former anthem of the state of Perak.



MALDIVES

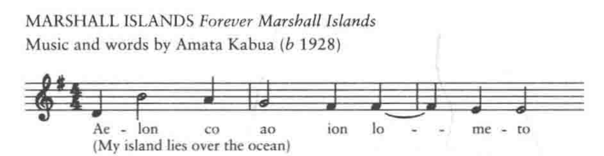
Music by Wannakuwattawaduge Don Amaradeva (*b* 1927). Words by Mohamed Jameel Didi (1915–89). The music was composed and adopted in 1972.



From 1946 until 1972 the words were sung to a melody based on the tune of *Auld lang syne*.

MALI

Music by Banzoumana Sissoko (1890–1987). Words by Seydou Badian Kouyaté (*b* 1928). Adopted in 1962.



MALTA

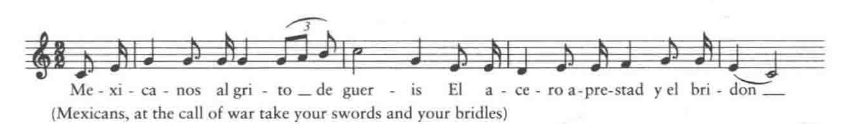
Music by Robert Sammut (1870–1934). Words by Dun Karm Psaila (1871–1961). Adopted in 1941.

The words of this anthem were written as a school hymn in 1923. Before 1941 *Tifhîra lil Mâlta*, with words by Giovanni Antonio Vassallo and a traditional melody, was used as a national anthem.

MARSHALL ISLANDS

Music and words by Amata Kabua (*b* 1928).

MAURITANIA



Music by Tolia Nikiprowetzky (*b* 1916), based on traditional music. No words. Adopted in 1960.

MAURITIUS

Music by Philippe Gentil (*b* 1938). Words by Jean Georges Prosper (*b* 1933). Adopted in 1968.

MEXICO

Music by Jaime Nunó (1824–1908). Words by Francisco González Bocanegra (1824–61). Adopted in 1854.

Bocanegra's poem was first sung in 1854 to music by Juan Bottesini which was coolly received. A competition organized by Mexico City led to the adoption of Nunó's setting.

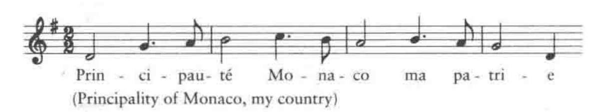
MICRONESIA



MOLDOVA

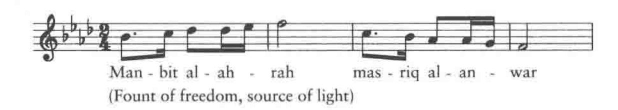
Music by Alexandru Cristi. Words, beginning 'Limba noastră-i o comoară' ('Our language is a treasure'), by Alexei Mateevici. Adopted in 1994.

MONACO

Music by Albrecht (1817–95). Words by Théophile Bellando de Castro (1820–1903).

The music is based on a folksong which, to Bellando's words, was used as a marching song by the Garde Nationale, in which Bellando served as a captain. It was first performed as a national anthem in December 1867 to greet the arrival in the port of Monaco of Prince Albert I.

MONGOLIA

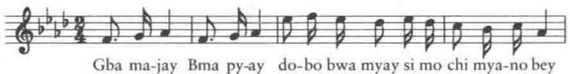


Music by Bilegyn Damdinsüren (1919–91). Words by Luvsanjamts Murjarj (1915–96) and Tsendyn Damdinsüren (1908–86). Music adopted in 1950, words in 1991.

Between 1963 and 1991 the anthem was sung to words by Tsevegmidyn Gaitav (1929–79) and Choizilyn Chimed (*b* 1927).

MONTENEGRO. See under Yugoslavia.

MOROCCO

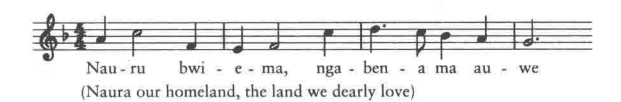


Music by Léo Morgan (1919–84). Words by 'Alī Squalli Ḥusaynī (*b* 1932).

MOZAMBIQUE

Music and words by Justino Sigaulane Chemane (*b* 1923). Adopted in 1975 when the country became independent.

MYANMAR

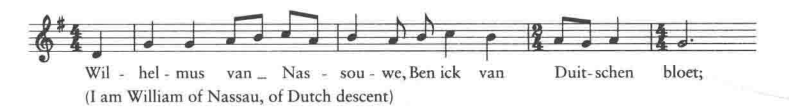


Music and words by Saya Tin (1914–47). Adopted in 1948.

NAMIBIA

Music and words by Axali Doeseb (*b* 1954). Adopted in 1991.

NAURU



Music by Laurence Henry Hicks (*b* 1912). Words written collectively. Adopted in 1968.

NEPAL

Music by Bakhatbir Budhapirthi (1857–1920). Words by Chakrapani Chalise (1884–1959). Music adopted in 1899, words in 1924.

NETHERLANDS

Music anonymous. Words by Philip Marnix van St Aldegonde (1540–98).

The words date from about 1568 and are first found together with the music in Adriaen Valerius's *Neder-landtsche gedenck-clanck* (Haarlem, 1626). The melody, however, is even older and exists in a number of different versions. Mozart's piano variations on *Willem van Nassau* (K25) show the tune in an 18th-century guise.

Occupying a position somewhat analogous to that of *Rule Britannia!* in Great Britain is the patriotic hymn *Wien Neêrlandsch bloed door d'adren vloeit*, with words by Hendrik Tollens (1780–1856) and music by Johann Wilhelm Wilms (1772–1847), which was chosen as the first national anthem in 1816 following the foundation of the Kingdom of the Netherlands. It was gradually replaced by the present anthem after Wilhelmina became queen in 1898.

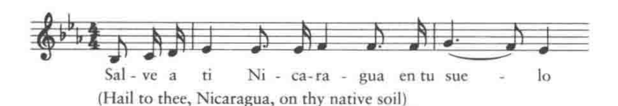
NETHERLANDS ANTILLES

Music by J.B.A. Palm (1885–1963). No words. Adopted in 1964.

This is used together with the national anthem of the Netherlands. Before 1964 it was used as the anthem of the island territory of Bonaire.

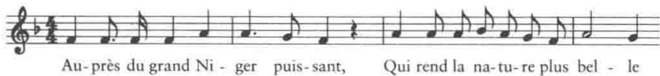


NEW ZEALAND

Music by John Joseph Woods (1849–1934). Words by Thomas Bracken (1843–98).

In 1977 this anthem was officially accorded equal status with *God Save the King/Queen* (see British Isles). There is also a Maori version by Thomas Henry Smith (1824–1907), beginning 'A ihoa, atua, Onga iwi! Matoura'.

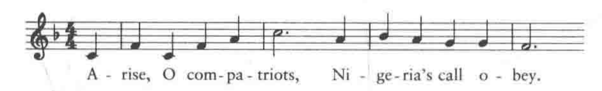
Nicaragua



Music by Luis Delgadillo (1887–1962). Words by Salomón Ibarra Mayorga (1890–1985). Present text adopted in 1939.

The music has sometimes been attributed to Anselmo Castinove. It was originally sung to a text which began 'La patria amada canta este día'. Another patriotic song which has enjoyed the status of a national anthem is *Hermosa soberana*, with music by A. Cousin and words by Blas Villatas.

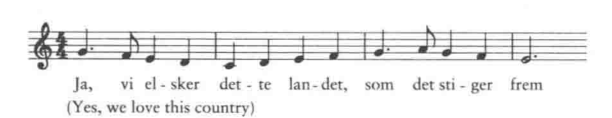
BIBLIOGRAPHY



S. Ibarra Mayorga: *Monografía del himno nacional de Nicaragua* (Managua, 1955, 2/1964)

Niger

Music by Robert Jacquet (1896–1976) and Nicolas Frionnet (*b* 1911). Words by Maurice Thiriet (1906–69). Adopted in 1961.

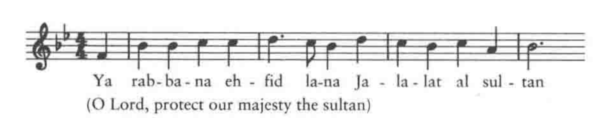


Nigeria

Music by Benedict Elide Odiase (*b* 1934). Words written collectively. Adopted in 1978.

The first anthem of Nigeria was one beginning 'Nigeria we hail thee', with music by Frances Benda and words by Lilian Jean Williams; this was used from 1960, when the country became independent, until 1978. During a short and precarious period of independence (1967–71) the Nigerian state of Biafra used as a national anthem a theme from the tone poem *Finlandia* by Sibelius.

Norway



Music by Rikard Nordraak (1842–66). Words by Bjørnsterne Bjørnson (1832–1910). Adopted in 1864.

The words were first published in 1859 and the anthem first performed in public on 17 May 1864 to celebrate the 50th anniversary of the Norwegian constitution. *Sønner af Norge det aeldgamle rige* ('Sons of Norway, the time-honoured realm'), with music by Christian Blom (1787–1861) and words by Henrik Bjerregaard, has also enjoyed the status of a national anthem.

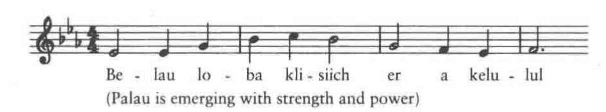
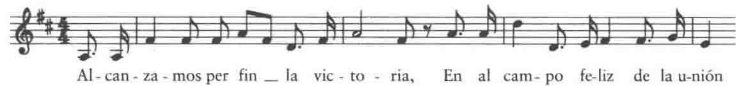
Oman

Composer and author unknown.



Orange Free State. See under South Africa.

Pakistan



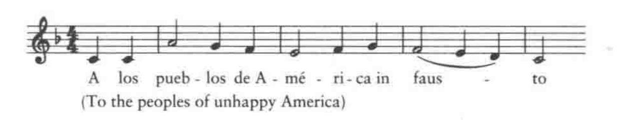
Music by Ahmad Ghulamali Chagla (1902–53). Words by Abul Asar Hafeez Jullunduri (1900–82). Music adopted in 1953; words adopted in 1954.

PALAU

Music by Ymesei O. Ezekiel (1926–84). Words written collectively. Adopted in 1980.

PANAMA

Music by Santos Jorge (1870–1941). Words by Jerónimo de la Ossa (1847–1907). Adopted in 1925.



The music of this anthem was originally written to a text by Juan Agustín Torres. It was first used with the present text in 1903, when Panama became a republic. Provisionally adopted by the country's national assembly in 1906, it became the official anthem in 1925.

PAPUA NEW GUINEA

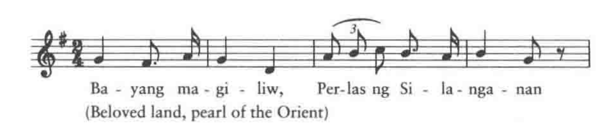
Music and text by Thomas Shacklady (*b* 1917). Adopted in 1975 when the country became independent.

PARAGUAY

Music by Francés Dupuy (1813–61) or Louis Cavedagni (*d* 1916). Words by Francisco Esteban Acuña de Figueroa (1791–1862). Adopted in 1846.

The music is sometimes attributed to Acuña de Figueroa, author of the text, who also wrote the words of the Uruguayan national anthem. The arrangement by Remberto Giménez was declared the official version in 1934.

PERU

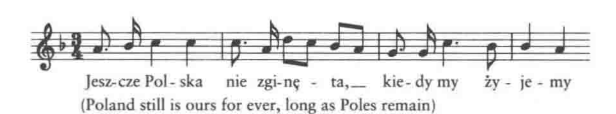


Music by José Bernardo Alcedo (1788–1878). Words by José de la Torre Ugarte (1786–1831). Adopted in 1821.

The anthem was chosen as the result of a public competition and first sung at the Teatro Segura, Lima, on 24 September 1821. It was revised in 1869 by Claudio Rebagliati and in this version declared unalterable by the Peruvian Congress in 1924.

BIBLIOGRAPHY

C. Raygada: *Historia crítica del himno nacional* (Lima, 1954)



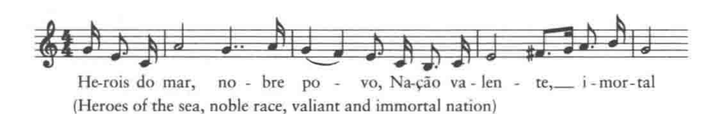
PHILIPPINES

Music by Julian Felipe (1861–1944). Words by José Palma (1876–1903).

The music was written in 1898 and performed for the first time in June that year in connection with the proclamation of Philippine independence. The text was written the following year and published in the newspaper *La independencia*. In the original Spanish this began 'Tierra adorada, hija del sol de oriente'; the Tagalog translation quoted above was made by Felipe Padilla de Leon (1912–92).

POLAND

Music traditional. Words by Józef Wybicki (1747–1822). Adopted in 1927.



The music has sometimes been attributed to General Wybicki, who wrote the words, and to Michał Kleofas Ogiński (1765–1833). In a slightly different form it came to be associated in the 19th century with the pan-Slavonic anthem *Hej slované*, which was adopted as the national anthem of Yugoslavia in 1945. The words were written in 1797 when Wybicki was serving as a legionary in Reggio nell'Emilia, Italy, and the anthem was sung when General Dąbrowski, commander of the Polish legions, entered Poznań in 1806. In 1948 a new version harmonized by Kazimierz Sikorski (*b* 1895) was approved by the Polish Ministry of Culture and Arts.

QATAR

No words. Adopted in 1954.

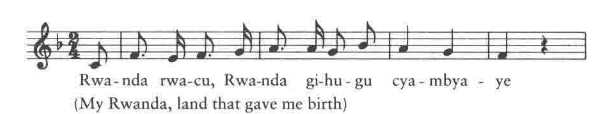
RHODESIA. See Zimbabwe.

ROMANIA

Music by Anton Pann (1796–1854). Words by Andrei Mureşanu (1816–63). Adopted in 1990.

The first national anthem of Romania was *Trăiască regele în pace şi onor*, composed in 1861 by Edward A. Hübsch (1833–94). The words, by Vasile Alexandri, were written some years later. In 1947, after the proclamation of the Romanian People's Republic, Matei Socor (*b* 1908) composed a new hymn, *Zarobite cătuse in urmă vămân*, with words by Aurel Baranga. In 1953 this was replaced by another anthem by Socor which, until 1964, was sung to words by Eugen Frunza and Dan Desliu beginning 'Te slăvim Românie, pămint strămoşesc'. Between 1977 and 1990 yet another anthem, with words (beginning 'Trei culori cunose pelume') and music by Ciprian Porumbescu (1853–83), was used.

RUSSIA

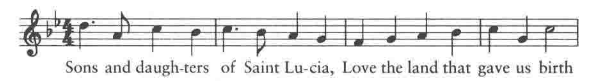


Music by Mikhail Ivanovich Glinka (1804–57). No words.

Russia's first anthem was the royalist *Bozhe, tsarya khrani* ('God Save the Tsar'), composed in 1833 by Aleksey Fyodorovich L'vov (1798–1870) to words by Vasily Andreyevich Zhukovsky. Before that date the music of *God Save the King/Queen* (see British Isles) had been used, and its influence on L'vov's anthem is easily recognizable. *Bozhe, tsarya khrani* remained in use in Russia until the Revolution of 1917 when it was replaced by the *Internationale*, composed by Pierre Degeyter to a text that Eugène Pottier, a Parisian transport worker, had written in 1871. A Russian

translation was made by A.Y. Kots and another, in 1932, by A. Gapov. This remained the national anthem of the USSR until 1943, when a new anthem with music by Aleksandr Vasil'yevich Aleksandrov (1883–1946) and words, beginning 'Soyuz nerushimïy respublik svobodnïkh' ('Unbreakable union of free-born republics'), by Sergey Mikhalkov (*b* 1913) and Garold Gabriyelevich El-Registan (*b* 1924) was adopted. The present anthem became current after the dissolution of the USSR in 1991.

RWANDA



Music based on a Rwandan folktune. Adopted in 1962.

ST KITTS AND NEVIS

Music and words by Kenrick Anderson Georges (*b* 1955). Adopted in 1983.

ST LUCIA

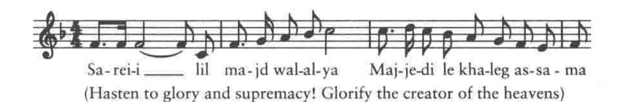
Music by Leton Felix Thomas (*b* 1926). Words by Charles Jesse (1897–1985). Adopted in 1967. St Lucia became independent in 1979.

ST VINCENT AND THE GRENADINES

Music by Joel Bertram Miguel (*b* 1938). Words by Phyllis Joyce McClean Punnett (*b* 1917). Adopted in 1969. St Vincent and the Grenadines became independent in 1979.

SAN MARINO

Music by Federico Consolo (1841–1906). Words by Giosuè Carducci (1835–1907), not officially in use. Adopted in 1894.



SÃO TOMÉ E PRÍNCIPE

Music by Manuel dos Santos Barreto de Sousa e Almeida (*b* 1933). Words, beginning 'Independéncia total, glorioso canto do povo' ['Complete independence, glorious song of the people'], by Alda Neves de Graça do Espirito Santo (*b* 1926).

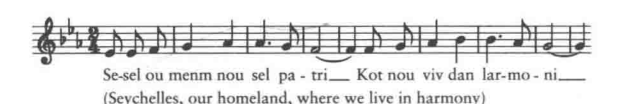
São Tomé e Príncipe became independent in 1975.

SAUDI ARABIA

Music by 'Abd al-Raḥmān al-Khaṭīb (*b* 1923). Words by Ibrāhīm Khafajī (*b* 1935). First sung in 1947, adopted in 1950.

SCOTLAND. See under British Isles.

SENEGAL



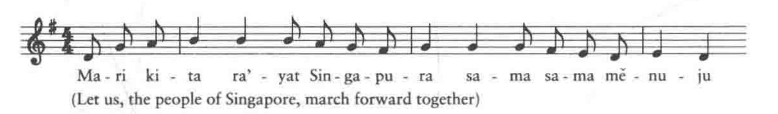
Music by Herbert Pepper (*b* 1912). Words by Leopold Sédar Senghor (*b* 1906). Adopted in 1960.

The words are adapted from the first version of an anthem previously written by the author for the former Federation of Mali. The anthem is preceded by a short flourish played on the *kora*.

SERBIA. See under Yugoslavia.

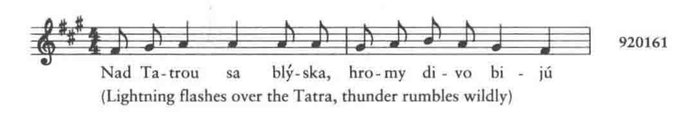
SEYCHELLES

Music and words by David François Marc André (*b* 1958) and George Charles Robert Payet (*b* 1959). Adopted in 1996.



Between 1976, when the country became independent, and 1996 the anthem in use was *En avant* (composer and author unknown).

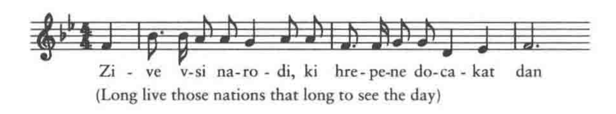
SIERRA LEONE



Music by John Joseph Akar (1927–75). Words by Clifford Nelson Fyle (*b* 1933). Adopted in 1961.

SINGAPORE

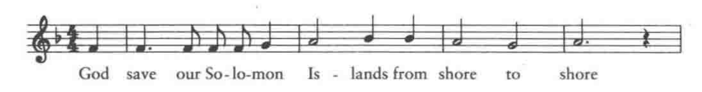
Music and words by Zubir Said (1907–87). First performed in 1958 and adopted in 1959.



SLOVAKIA

Music traditional. Words by Janko Matuška (1821–77). Adopted in 1919.

Between 1919 and 1992 this formed part of a composite anthem for Czechoslovakia. The words were written in 1844.



SLOVENIA

Music by Stanko Premrl (1880–1965). Words by France Prešeren (1900–49). Adopted in 1989.

The music was probably composed in 1905 and first published in 1906. The words date from 1934. In 1990 it was decreed that only the seventh stanza of Prešeren's poem (beginning as above) should serve as the national anthem. An earlier anthem, dating from 1860, was *Naprey zastava Slave*, with music by Davorin Jenko (1835–1914) and words by Simón Jenko.

SOLOMON ISLANDS

Music and words by Panapasa Balekana (*b* 1929). Adopted in 1978 on the declaration of independence.

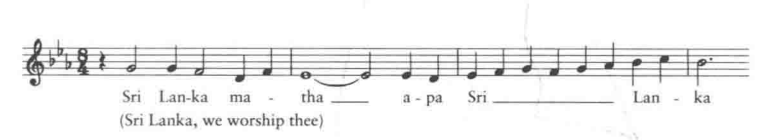
SOMALIA

Music by Giuseppe Blanc (1886–1969). No words. Adopted in 1960.

SOUTH AFRICA

Music by Enoch Mankayi Sontonga (1860–1904) and Marthinus Lourens de Villiers (1885–1977). Words by Enoch Mankayi Sontonga and Cornelis Jacob Langenhoven (1873–1932). Adopted in 1995.

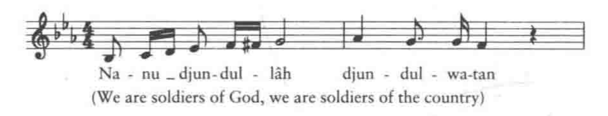
The history of South African national anthems is closely bound up with efforts to preserve the Afrikaans language against the growing domination of English. In 1865 the Orange Free State, then an independent republic, adopted the anthem *Heft, burgers, 't lied der vryheid aan*, with music by Willem Niccolaï (1829–96) and words by H.A.L. Hamelberg. At the beginning of the Eerste Taalbeweging (First-Language Movement, 1870–1900) the poem *'n leder nasie het syn land* was written by members of the Genootskap van Regte Afrikaners and set to music by J.S. de Villiers. It became better known in the setting by W.J. van Gorkum. In 1875 Catherina van Rees wrote the music and words of the Transvaal national anthem, *Kent gy dat volk vol heldenmoed*. After the Anglo-Boer War the need was felt for a truly national anthem. At first Haydn's *Kaiserhymne* was used to the words *Afrikaners, landgenote*, but this achieved neither official nor popular recognition. In 1928 *Die huisgenoot* published Langehoven's poem, *Die stem van Suid-Afrika*, in a setting by F.J. Joubert. Several other composers took up the words, and ultimately the melody by M.L. de Villiers found general and, in 1936, official approval. An English version, *The Call of South Africa*, appeared in 1952 and was revised in 1959. In 1994 two anthems were adopted, *The Call of South Africa* and the pan-African *Nkosi sikelel'iAfrika*. In 1995 these two were shortened and merged to form a single anthem which brings together two native languages (Nguni and Sotho), Afrikaans and English.



SPAIN

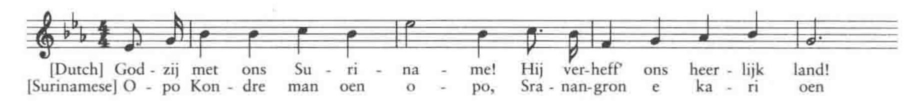
Music anonymous. No words. Adopted in 1942.

This anthem was chosen as the Royal March by Carlos III in 1770, and must therefore rank as the oldest national anthem after the British *God Save the King/Queen*. A popular patriotic song in the 19th century was the *Himno de riego* ('Soldados, la patria nos clama') and this was adapted as the national anthem during the period of the Spanish Republic (1931–6). In 1870 a competition for a new anthem promoted by King Amadeo I attracted over 400 contestants, but none of the entries was chosen.



SRI LANKA

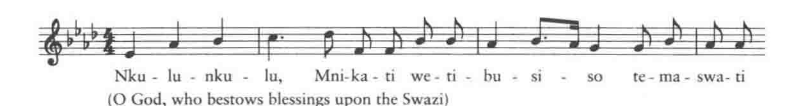
Music and words by Ananda Samarakone (1911–62). Adopted in 1952.



Slight alterations were made to the words in 1973 when Ceylon became the Republic of Sri Lanka. There is also a Tamil version, beginning 'Sri Lanka thāāyé, nam Sri Lanka'.

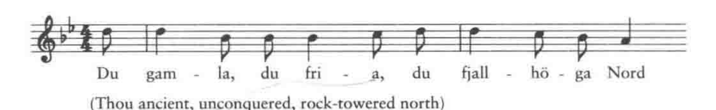
SUDAN

Music by Aḥmad Murgān (1905–74). Words by Aḥmad Muḥammad Ṣāliḥ (1896–1971).



SURINAME

Music by Johanne Corstianus de Puy (1835–1924). Words by Cornelis Atses Hoekstra (1852–1911). Adopted in 1954.



The music was written in 1876, the words in 1893. The anthem is used together with the national anthem of the Netherlands.

SWAZILAND

Music by David K. Rycroft (*b* 1924). Words by Andrease Enoke Fanyana Simelane (*b* 1934). Adopted in 1968.

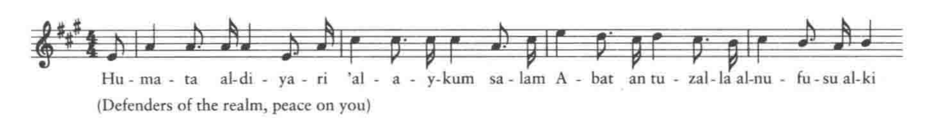
SWEDEN

Music traditional. Words by Richard Dybeck (1811–77).

This was first sung in 1844; its use as a national anthem dates from 1880–90. It is usually sung today in the arrangement by Edvin Kallstenius (1881–1967). Other anthems have been used from time to time, including *Bevare Gud var kung* to the tune of *God Save the King/Queen*. In the same year as *Du gamla, du fria* the song *Ur Svenska hjärtans djup en gång* ('From deep in Sweden's heart') was composed, with music by Otto Jonas Lindblad (1809–64) and words by Carl Wilhelm August Strandberg (1818–77), and this also served as a royal anthem for a while. Yet another, *Sverige, Sverige, fosterland*, was written by Werner von Heidenstam (1859–1940) and set to music in 1905 by Wilhelm Stenhammar (1871–1927).

BIBLIOGRAPHY

O. Andersson: '*Du gamla, du fria* i Finland', *Om visor och låtar: studier tillägnade Sven Salén* (Stockholm, 1960), 9–28; repr. in *Studier i musik och folklore*, i (Helsinki, 1964), 311–25

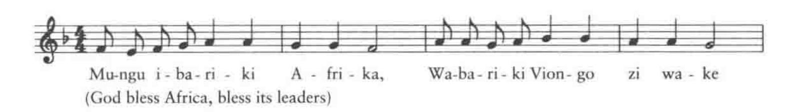


SWITZERLAND

Music by Alberik Zwyssig (1808–54). Words by Leonhard Widmer (1808–67). Adopted in 1961.

The French version is by Charles Chatelanat (1833–1907), the Italian by Camillo Valsangiacomo (1898–1978), the Surselvisch by Alfons Tuor (1871–1904) and the Romansch by Gion Antoni Bühler (1825–97). Zwyssig, who was a monk as well as a musician, adapted this melody to Widmer's text in 1841; it was originally contained in one of his Gradual settings. The anthem was printed for the first time in the *Festheft der Zürcher Zofinger für die Aufnahme Zürichs in der Schweizerbund* in May 1843, and in the same year it was heard at a singing festival in Zürich. In 1961 it was adopted for a trial period of three years as the official anthem for the army and for Swiss representations abroad. In 1965 12 of the Swiss cantons declared themselves wholeheartedly in favour of the anthem; seven cantons voted to prolong the trial period, and the other six (which included Zürich) found the anthem unsuitable. It was therefore decided to postpone a final decision and to extend the trial period indefinitely. Before 1961 there was no official national anthem, though *Rufst du, mein Vaterland?* was widely regarded as one. The words, written in 1811 by Johann Rudolf Wyss (1782–1830), were sung to the tune *God Save the King/Queen*.

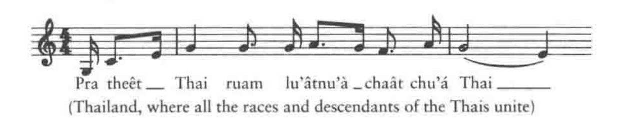
SYRIA



Music by Aḥmad Flayfel (1906–91) and Muḥammad Flayfel (1899–1986). Words by Khalīl Mardam Bey (1895–1959). Adopted in 1936.

TAJIKISTAN

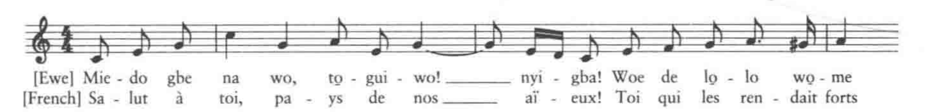
Music by Suleiman Yudakov (*b* 1916). Words not available.



TANZANIA

Music by Enoch Mankayi Sontonga (1860–1904). Words by a group of Tanzanians. Adopted in 1964.

This was adopted as the national anthem of Tanganyika in 1961 and was retained when Tanganyika and Zanzibar were united to form Tanzania in 1964. The music is that of the Bantu song *Nkosi sikelel'iAfrika*. The words were selected from six prizewinning entries for a competition organized in 1961 by the Ministry of Education in Tanganyika. A national march for the Sultan of Zanzibar was composed by Donald Tovey (1875–1940).



THAILAND

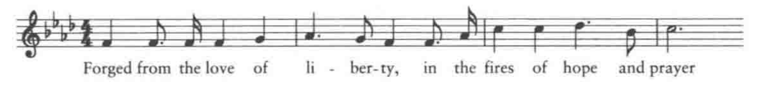
Music by Phra Chenduriyang (1883–1968). Words by Luang Saranuprapan (1896–1954). Adopted in 1939.

The music was composed shortly after the country became a constitutional monarchy in 1932; words by Koon Wijitmatra, beginning 'Phendin Siam nam prathuang wa muang thong', were added later and officially adopted in 1934. When the country's name was changed from Siam to Thailand in 1939 a contest to replace Wijitmatra's words was arranged and Saranuprapan's text chosen. A second anthem, *Sanrasoen phra barami*, with music by Pyotr Shurovsky (1850–1908) and words by Prince Narisaranuvadtivongs (see *Grove6*), was officially approved in 1934, but a decision to use only Chenduriyang's anthem was made some time later.

TOGO

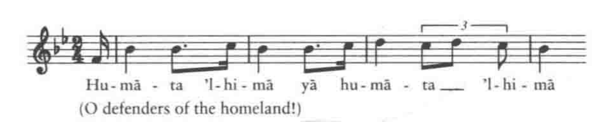
Music and words by Alex Casimir-Dosseh (*b* 1923). Adopted in 1960.

The anthem was chosen as a result of a competition held in 1960 when Togo attained independence. The Ewe translation is by H. Kwakume.



TONGA

Music by Karl Gustavus Schmitt (1834–1900). Words by Prince Uelingatoni ngu Tupoumalohi (1854–85). Composed before 1875.



TRANSVAAL. See under South Africa.

TRINIDAD AND TOBAGO

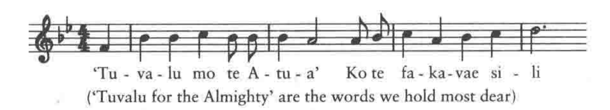
Music and text by Patrick Stanislaus Castagne (*b* 1916). Adopted in 1962.

TUNISIA

Music by Muḥammad 'Abd al- Wahhāb (1915–91). Words by Muṣṭafā Ṣādiq al-Rāfi'i (1880–1937) and Aboul Kacem Chabbi (1909–34). Adopted in 1987.

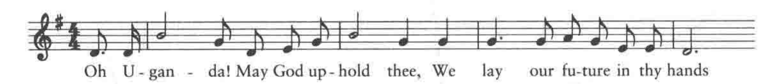
The anthem in use between 1958 and 1987 was *Älä khäludî yä dimänälgläwälî*, with music by Ṣalāḥ al-Mahdī (*b* 1925) and words by Jalāl al-Dīn al-Naqqāsh (*b* 1912).

TURKEY



Music by Osman Zeki Güngör (1880–1958). Words by Mehmet Akif Ersoy (1873–1936). Adopted in 1921.

TURKMENISTAN



Music by Veli Mukhatov (*b* 1916). Words not available.

TUVALU

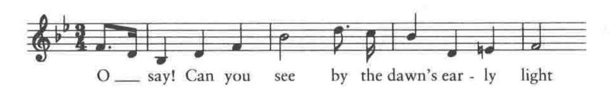
Words and music by Afaese Manoa (*b* 1942). Adopted in 1978 when the country became independent.

UGANDA

Music and words by George Wilberforce Kakoma (*b* 1923). Adopted in 1962.

UKRAINE

Music by Mikhail Verbitsky (1815–70). Words by Pavel Chubïnsky (1839–84). First performed in 1864 and adopted in 1918.



UNITED ARAB EMIRATES

Music by Sa'd 'Abd al-Wahhāb (1915–91).

This anthem replaced another, by Isḥāq Sulaymān (*b* 1930), which was adopted in 1963 as the national anthem of Abu Dhabi.

UNITED STATES OF AMERICA

Music by John Stafford Smith (1750–1836). Words by Francis Scott Key (1779–1843). Adopted in 1931.

The words were written on 14 September 1814 on board a British frigate in Baltimore Harbour where Key had been detained after successfully petitioning for the release of a civilian friend, Beanes. He was inspired to write the poem when he saw in the morning the American flag still flying over Fort McHenry, which had withstood the British bombardment during the previous night. Key fashioned his verses to fit the melody of *To Anacreon in Heaven* by the English composer John Stafford Smith, which was then very popular in America both with its original words by Ralph Tomlinson and with others of a more patriotic nature.

Although Puccini used *The Star-Spangled Banner* as a motto theme for the American Lieutenant Pinkerton in his opera *Madama Butterfly* (1904) it was not until 1931 that it became the official national anthem. Before then it shared the honour with *My country 'tis of thee*, a poem that Samuel Francis Smith (1808–95) wrote in 1831 to the tune of *God Save the King/Queen*. *Hail Columbia*, written in 1798 by Joseph Hopkinson to a tune known as *The President's March* by Philip Fyls (or Phile), was also popular as a patriotic song.

Before it became one of the United States in 1959 Hawaii used an anthem, *Hawaii ponoi*, the music and words of which are attributed to King Kalakana of Hawaii (1874–91). An earlier anthem, *He mele lahui Hawaii*, was written in 1868 by Queen Liliuokalani.

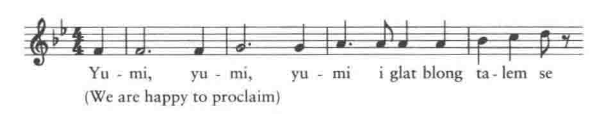
UPPER VOLTA. See Burkina Faso.

URUGUAY

Music by Francisco José Debali (1791–1859). Words by Francisco Acuña de Figueroa (1791–1862). Adopted in 1848.

Acuña de Figueroa also wrote the words for the national anthem of Paraguay.

BIBLIOGRAPHY



L. Ayestaran: *El himno nacional* (Montevideo, 1974)

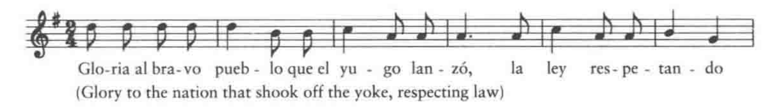
UZBEKISTAN

Music by Matal' Burkhanov (*b* 1916). Words, beginning 'Serquyāsh, hur olkam, elga bakht najāt' ('Stand tall, my free country, good fortune and salvation to you'), by Abdulla Aripova (*b* 1941).

VANUATU

Music and words by François Aissav (*b* 1955). Adopted in 1979.

Between 1906 and 1980, when the islands of Vanuatu were administered as an Anglo-French condominium, the British and French anthems were used.

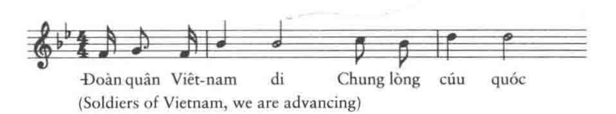


VATICAN CITY

Music by Charles Gounod (1818–93). Words by Antonio Allegra (1905–69). Adopted in 1950.

Gounod wrote the music as a *Marche pontificale* for the anniversary in 1869 of Pope Pius IX's coronation. With Allegra's words it replaced an anthem composed by Halmajr in 1857 and used until 1949.

VENEZUELA



Music by Juan José Landaeta (1780–1814). Words by Vicente Salias (1786–1814). Adopted in 1881.

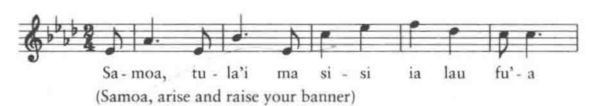
VIETNAM



Music and words by Van-Cao (1923–95). Adopted in 1946.

From 1948 to July 1976 the Republic of Vietnam (South Vietnam) used the anthem *Thanh nien Hanh khuc*, with music and text by Luu Huu Phuoc; slight alterations were made to the words after the partition of Vietnam and the signing of the Geneva Agreement in 1954.

WALES. See under British Isles.

WESTERN SAMOA

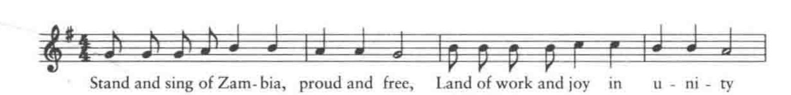
Music and words by Sauni Iiga Kuresa (1900–78). Adopted in 1962.

YEMEN

Music by Ayyūb Tarish (*b* 1943). Words, beginning 'Raddidī ayyatuhā 'l-dunyā nashīdī' ('Repeat my song, O world'), by 'Abdallah 'Abd al-Wahhāb Nu'mān (*c*1916–82). Adopted in 1990 when North and South Yemen were united.

This replaced a textless anthem by Juma' Khān adopted in 1967 by the People's Democratic Republic of Yemen (South Yemen) and an earlier anthem of the Yemen Arab Republic (see *Grove6*).

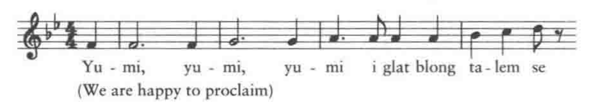
YUGOSLAVIA



Music traditional. Words by Samuel Tomašik (1813–87). Adopted in 1945.

This dates from about the middle of the 19th century, when it was used as a pan-Slavonic anthem. The music is similar to that used for the Polish national anthem. Yugoslavia's first national anthem, adopted in 1918, was a composite piece made up from parts of the anthems of the three main national groups, the Serbs, the Croats and the Slovenes. The Serbian anthem, *Bože pravde, ti, što spase*, was written in 1872 with music by Davorin Jenko (1835–1914) and words by Jovan Djordjevič (1826–1900). Jenko also wrote the music for the Slovene anthem, *Naprey zastava Slave* (see Slovenia). Before becoming part of Yugoslavia in 1918 Montenegro had its own national anthem with words by John Soundečić and music variously attributed to Schoules, Wirner, Jenko and Špiro Ognjenovič. Also used as a national hymn was *Onam, onamo! za brda ona*, written in 1867 by King Nicola and sung to music by Davorin Jenko.

ZAÏRE. See Congo, Democratic Republic of the.



ZAMBIA

Music by Enoch Markayi Sontonga (1860–1904). Adopted in 1964.

The music is that of the well-known Bantu song *Nkosi sikelel'iAfrika*, also used for the national anthem of Tanzania. The words of the Zambian anthem were chosen from six prizewinning entries in a competition organized by the Zambian government.

ZIMBABWE

Music by Fred Lecture Changundega (*b* 1954). Words by Solomon Mutswairo (*b* 1924). Adopted in 1994.

Until the unilateral declaration of independence in 1965 *God Save the King/Queen* (see British Isles) was in use in Southern Rhodesia, as the country was then named. Between 1974 and 1980, when southern Rhodesia became fully independent as Zimbabwe, the principal theme of the last movement of Beethoven's Ninth Symphony, arranged by Kenneth Macdonald, was sung as the national anthem to the words 'Rise, O voices of Rhodesia'.

National Arts Centre Orchestra. Orchestra established in OTTAWA, Canada, in 1969.

National Association for American Composers and Conductors. New York organization founded in 1933. *See* NEW YORK, §6.

National Association of Composers, USA. American organization. It was founded in 1933 as the National Association for American Composers and Conductors under the guidance of the composer and conductor Henry Hadley 'to arrange and encourage performances of works by American composers and to help develop understanding and friendly cooperation between composers and conductors'. To this end, regular seasons of concerts devoted to American music were for many years its major activity. The 5000 works presented during its first 40 years included 2000 premières and many performances of early works, some from the pre-Revolutionary period. In later years, under its president Leon Barzin, the final concert of each season was given by a full orchestra in Carnegie Hall as part of the American Music Festival mounted by the radio station WNYC. Other presidents over the years have included Lawrence Tibbett, Sigmund Spaeth and Robert Russell Bennett. The organization established an archive of American music at the New York Public Library and held an annual concert and reception at which the Henry Hadley Medal was awarded to individuals or institutions for 'distinguished services to American music'. It also co-sponsored the Lado Composition Competition and, in the 1950s, arranged orchestral 'reading concerts' for trial performances of works by member composers. At the height of its activities, the association had 1200 members in 48 states. It became considerably less active after the death in 1971 of Inez Barbour (Mrs Henry) Hadley, who had been the guiding spirit and benefactor since her husband's death in 1937. In 1975 the association was reorganized by John Vincent, professor of composition at UCLA, and changed its name to National Association of Composers, USA; it had about 600 members in 1998. It sponsors annual competitions for young composers and performers, as well as concerts in New York, Los Angeles and its regional chapter areas. The *Annual Bulletin* published by the earlier association between 1933 and 1970 was superseded by the quarterly journal *Composer/USA* in 1976. In 1994 this in turn was succeeded by the *Bulletin*, published three times a year and containing information on members' activities and opportunities for composers, as well as feature articles.

JOHN SHEPARD/R

National Endowment for the Arts [NEA]. An independent grant-making agency established in 1965 by the US Congress (together with the National Endowment for the Humanities) to foster excellence, diversity and vitality in the arts and to broaden public appreciation of the arts. The endowment provides funding to individuals and non-profit organizations in the categories of dance, design education, expansion arts (community centres etc.), folk and traditional arts, international arts, literature, media arts (radio, television, film), museums, music, musical theatre, opera, presenting, theatre, as well as the visual arts. The agency's programmes relating to music include fellowships; support for professional training and career development for musicians, music festivals and recordings; and funding for chamber, jazz, choral and orchestral ensembles. Many NEA grants require additional matching funds from local sources.

The endowment is headed by a chairman and the National Council for the Arts, comprised of 26 distinguished private citizens widely recognized in the appropriate disciplines. Both the chairman and the council are appointed by the President of the USA subject to Senate confirmation. Beginning in the 1980s political controversies surrounding a small number of projects partially funded by the NEA – notably an exhibition of photographs by Robert Mapplethorpe – undermined Congressional support for federal funding of the arts, and the agency's appropriation was greatly reduced.

□

National Endowment for the Humanities [NEH]. An independent grant-making agency established in 1965 by the US Congress (together with the National Endowment for the Arts) to promote scholarship in the humanities. Areas funded by the NEH include the history, criticism and theory of the arts; the study of language; linguistics; literature; history; jurisprudence; philosophy; archaeology; comparative religion and ethics; aspects of the social sciences; and the human environment, with particular emphasis on the relevance of the humanities to the current conditions of national life. Grants are awarded for independent study, summer research seminars, humanities projects in libraries and museums, youth activities in the humanities, scholarly publications, educational materials and many other projects. The endowment has four main divisions (Education Programs, Public Programs, Research Programs and Preservation and Access), as well as the Federal-State Partnership and the Office of Challenge Grants. Some of its grants require matching funds from other sources. Like the arts endowment, the NEH is headed by a chairman and the 26-member National Council for the Humanities; both are appointed by the President of the USA subject to Senate confirmation. The agency has published the journal *Humanitas* since 1969.

□

National Exhibition Centre. Birmingham exhibition complex, which includes an arena used for concerts. *See* BIRMINGHAM, §4.

National Federation of Music Societies. British organization based in London. It was formed in 1935 by George Dyson and the Carnegie United Kingdom Trust from previously established voluntary regional groupings. Its founding was in part motivated by the plight of professional musicians, whose earnings from work with amateur choral and orchestral societies had reduced sharply during the Depression. The federation's aim is to maintain, improve and advance education by promoting the art and practice and the public performance of music throughout the United Kingdom. Membership is open to all amateur performing and promoting music societies, though the main body of its membership is formed by over 300

orchestras, 300 concert promoters and 1000 amateur choirs. In the 1990s the federation's members were promoting about 7000 concerts every year, with about half of their annual spending of £13 million going to engage professional musicians. The federation also helps its members with financial services such as insurance and with legal advice, and produces information sheets on subjects ranging from appointing a new musical director to the national lottery. It has a programme of training in performance techniques, both choral and orchestral, and in arts marketing. It lobbies government bodies in cooperation with the Voluntary Arts Network and the National Music Council of Great Britain. It encourages high standards and adventurous programming, in part through its on-line Repertoire Sevice and *The Music Experience*, its training, outreach and programming incentive schemes

EDWARD McKEON

Nationalism. The doctrine or theory according to which the primary determinant of human character and destiny, and the primary object of social and political allegiance, is the particular nation to which an individual belongs. Nationalism is recognized by historians and sociologists as a major factor in European cultural ideology by the end of the 18th century, and it has been arguably the dominant factor in geopolitics since the end of the 19th. Its multifarious impact on the arts, and on music in particular, has directly paralleled its growth and spread.

Nationalism should not be equated with the possession or display of distinguishing national characteristics – or not, at any rate, until certain questions are asked and at least provisionally answered. The most important ones are, first, who is doing the distinguishing? and second, to what end? Just as there were nations before there was nationalism, music has always exhibited local or national traits (often more apparent to outsiders than to those exhibiting them). Nor is musical nationalism invariably a matter of exhibiting or valuing stylistic peculiarities. Nationality is a condition; nationalism is an attitude.

1. DEFINITIONS. Definitions of nationalism depend, of course, on definitions of nation. It is not likely that consensus will ever be reached on their precise meaning, since different definitions serve differing interests. One thing, however, has been certain from the beginning: a nation, unlike a state, is not necessarily a political entity. It is primarily defined not by dynasties or by territorial boundaries but by some negotiation of the relationship between the political status of communities and the basis of their self-description, whether linguistic, ethnic (genetic/biological), religious, cultural or historical.

Defining traits generally occur in combination rather than isolation; within communities there are likely to be tensions and disputes as to how the various factors promoting solidarity are to be ranked and valued. German-speakers, for instance, were (and are) divided by religion, Italian co-religionists by language. Nor can anyone really say what constitutes a shared 'historical experience' when that is proffered as a definition of nationhood, since the linguistically and religiously diverse subjects of the Austrian emperor or the Russian tsar surely had a history in common.

But none of these complications has deterred the growth of nationalism as a political movement with cultural ramifications or vice versa: indeed complications have acted as a spur, since vagueness is always a stimulus to theorizing. Modern political nationalism is most often defined as the belief that political divisions between states should accord with the ways in which populations define themselves as communities. Twice in the 20th century the map of Europe was redrawn according to these principles: in 1918–19 in the aftermath of World War I, which destroyed the multinational Austrian and Ottoman empires; and in 1989–92 in the aftermath of the collapse of the multinational Soviet empire. The same idea fuels today's separatist movements (e.g. Basque, Kurdish, Québecois).

But viewed from the standpoint of the *status quo*, separatists are minorities; and general theories of nationalism have always foundered on the minorities question, especially after minorities themselves caught the nationalist fever. The most conspicuous case has been that of Zionism, a movement that originated among affluent assimilated Jews of central and eastern Europe who, aping the bourgeois nationalism of their host cultures, claimed modern nationhood for a self-defined community that had never had a contiguous territory or a common vernacular in modern times. The unresolved and perhaps unresolvable questions Zionism has raised for assimilated diaspora Jews ever since was reflected in the small but significant repertory of Jewish nationalist music in the 20th century, torn between the reflection of contemporary 'reality' through local folklore and the construction of an artificial orientalist idiom to represent the once and future homeland (see Móricz, 1999).

In the modern historiography of Western art music, the commonly accepted definition of nationalism has been the one promoted by musicology's 'dominant culture', that of the German scholarly diaspora. Willi Apel, the editor of the *Harvard Dictionary of Music*, gave it a concise and comprehensive articulation in the 1969 edition. The origins of musical nationalism are there assigned to the second half of the 19th century, and the movement is characterized as 'a reaction against the supremacy of German music'. From this it followed that 'the nationalist movement is practically nonexistent in Germany, nor has there been much of one in France'. Italian music, too, is exempted, since Italy 'had an old musical tradition to draw upon and did not need to resort to the somewhat extraneous resources of the nationalist movement'.

Musical nationalism is hence cast willy-nilly as a degenerate tendency that represents 'a contradiction of what was previously considered one of the chief prerogatives of music, i.e., its universal or international character, which meant that the works of the great masters appealed equally to any audience'. And consequently, 'by about 1930 the nationalist movement had lost its impact nearly everywhere in the world'. One of the principal achievements of recent musical scholarship has been to discredit this definition and all its corollaries, themselves the product of a nationalist agenda.

2. ORIGINS AND EARLIEST MANIFESTATIONS. It has been argued that the fine art of music as a literate tradition in Europe owes its inception to nationalism, since the earliest musical notations, preserving the so-called Gregorian chant, were the by-product of a political alliance between the Frankish kings and the Roman church, the primary objective of which was the consolidation of the Carolingian Empire. The latter, however, as a dynastic, multi-ethnic entity, did not correspond to the modern definition of a nation. What cements social groups under nationalism is not social rank as instituted by men but 'higher', more 'universal' principles – blood, soil, language – that are regarded as coming from God or Nature, and to which all humans from the sovereign downwards are therefore subject. Nationalism was, at least originally, an inherently modernizing and liberalizing force driven by mercantilism and by the economic and political interests of the emergent bourgeoisie (see Greenfeld, 1992). Its origins are often associated with those of the 'early modern' period itself.

According to one influential recent theory (Anderson, 1983), the origins of nationalism are to be sought in the rise of 'print culture' and especially newspapers. These made possible an 'imagined community' that went beyond the literate individual's personal range of acquaintances to encompass a publication's entire potential readership. This theory links the advance of vernacular literature, and the greatly enhanced speed and range of its dissemination, with the inception of a properly so-called national consciousness.

The history of music offers at least one convincing correlate. The earliest musical genres to be disseminated primarily through print were the vernacular song genres of the early 16th century. Songbooks issued for the local trade, beginning with Petrucci's first book of frottolas (Venice, 1504) and continuing with Antico in Rome (1510), Öglin in Augsburg (1512) and Attaingnant in France (1528), were the chief moneymakers for all the early music printers.

Vernacular song genres differed markedly, like their languages, from country to country, in contrast with the international 'Franco-Flemish' idiom of sacred music. The most dramatic instance was the new 'Parisian' chanson style. During the 15th century, the word 'chanson' connoted an international courtly style, an aristocratic lingua franca. A French song in a fixed form might be written anywhere in Europe, by a composer of any nationality whether at home or abroad. The age of printing fathered a new style of French chanson – the one introduced by Attaingnant and associated with Claudin de Sermisy – that was actually and distinctively French in the way the frottola was Italian and the *Hofweise* setting (or Tenorlied) was German. Despite the fact that Sermisy was a court musician, the songs he composed for the voracious presses of Attaingnant were intended primarily as household music (and therefore bourgeois entertainment). The imagined community it served was not only a localized but also a significantly democratized community.

Yet as long as the French nation was symbolized by a dynastic sovereign who could say 'L'état, c'est moi', the modern notion of nationalism as a political ideal cannot be said to have taken hold. The first country where (or on behalf of which) such a claim could be made was Britain, where absolutism was literally dealt a death-blow in 1649. An island kingdom with incontestable natural boundaries, post-Restoration Britain was perhaps the earliest nation-state to consider itself a natural community as well as a political one, and to find ideological support for that self-image outside the person of a sovereign. England, the economically and culturally dominant portion of the British Isles, was consequently the earliest country in which the audience for music was a 'public' in the modern sense, and so it was in England that modern concert life – i.e. public, collective patronage of musicians – was born.

The zenith of that powerful island community's musical self-expression was the Handelian oratorio. Recent scholarship has brought into sharper focus the political subtexts that informed the genre, reflecting the surprising extent to which political debate in 18th-century England was carried on in the guise of Old Testament exegesis (see Smith, 1995). The basic premise, according to which Handel's portrayals of the biblical 'chosen people' and their triumphs were read as coded celebrations of their modern British counterpart, was from the beginning openly proclaimed. A letter to the editor of the *London Daily Post* following the first performance of *Israel in Egypt*, printed in the issue of 18 April 1739, is a superb early document of musical nationalism. After first marvelling at the spectacle of national unity – 'a crowded Audience of the first Quality of a Nation, headed by the Heir apparent of their Sovereign's Crown, sitting enchanted at Sounds' – it quickly proceeds to the inevitable reverse side of the coin:

> *Did such a Taste prevail universally in a People, that People might expect on a like Occasion, if such Occasion should ever happen to them, the same* Deliverance *as those Praises celebrate: and Protestant, free, virtuous, united Christian England, need little fear, at any time hereafter, the whole Force of slavish, bigotted, united, unchristian Popery, risen up against her, should such a Conjuncture ever hereafter happen* [italics original].

Thus self-definition is practically always accompanied, indeed made possible, by other-definition. Any act of inclusion is implicitly an act of exclusion as well. Nationalism, whatever its democratizing and liberalizing early impact, has always harboured the seeds of intolerance and antagonism. One senses the dark side, too, in the defensive insularity described a hundred years earlier by Athanasius Kircher, otherwise in many ways a forerunner of enlightened universalism, in *Musurgia universalis* (1650). 'The style of the Italians and French pleases the Germans very little', he noted, 'and that of the Germans hardly pleases the Italians or French'. He then attempted an explanation:

> I think this happens for a variety of reasons. Firstly, out of patriotism and inordinate affection to both nation and country, each nation always prefers its own above others. Secondly, according to the opposing styles of their innate character and then because of custom maintained by long-standing habit, each nation enjoys only its own music that it has been used to since its earliest age. Hence we see that upon first hearing, the music of the Italians, albeit charming, pleases the French and Germans very little, as being to their suffering ears an unusual style, contrary to themselves and of a particular impetuosity [trans. Margaret Murâta].

Because it was cast in national terms, and displayed a high awareness of differing national styles, the Querelle des Bouffons, the pamphlet war in which the defenders of the French *tragédie lyrique* faced off against the proponents of the Italian intermezzo, is sometimes also cited as an early manifestation of nationalism in music. But of course both sides in that quarrel were French. At issue

was not the superiority of this or that particular national character, but the success with which the Italians, in the eyes of Jean-Jacques Rousseau and those who agreed with him, were able to portray the universal human nature that it was every artist's common objective to depict. 'It is the animal cry of passion that should dictate the melodic line', said Diderot through his mouthpiece, 'Rameau's nephew'; and Frenchmen, Italians and the rest of mankind were all the same animal.

That, if anything, was the principal tenet of 18th-century Enlightenment, and it is reflected in J.J. Quantz's famous treatise on flute playing (1752), when the author reflects that the virtue of German taste lay in knowing 'how to select with due discrimination from the musical tastes of various peoples what is best in each' and blend it all into a higher unity. This definition, contrasting as it did with Kircher's, paid tribute to the aristocratic liberality of Quantz's employer and pupil, Frederick the Great, the quintessential enlightened despot, who not only patronized such taste but practised it as well. It was only later that this eclecticism could (and would) be taken, under the rubric of 'universality', to be a mark of German superiority.

3. Political nationalism. The 19th century, which saw the rise of nationalism to supremacy among ideologies, fostered it in both its progressive and reactionary guises, and in both its actively political and its passively 'cultural' forms. It is precisely because it was actively political that Italian musical nationalism has remained invisible to many observers. As an aspect of Risorgimento culture, Italian opera between the 1820s and the 1850s was stylistically unselfconscious but civically committed. One theory holds that the primary social aim of Risorgimento culture was to 'raise the level of aggression' in Italians (Peckham, 1985). This attitude is well corroborated by a contemporary witness, Stendhal, who in his *Vie de Rossini* tendentiously gave Napoleon the credit for stirring the Italian arts to life (see Walton, 2000). 'Music only became bellicose', wrote Stendhal, meaning that it only became genuinely romantic,

> in *Tancredi*, of which the first performance did not take place until a good ten years had elapsed since the miraculous feats at Rivoli and at the bridge of Arcola [i.e. Napoleon's defeat of the Austrians in Lombardy]. Before the echo of those tremendous days came to shatter the age-old sleep of Italy, war and feats of arms had no part to play in music, save as a conventional background to give still greater value to the sacrifices made to love [in *opera seria*]; for indeed, how should a people, to whom all dreams of glory were forbidden, and whose only experience of arms was as an instrument of violence and oppression, have found any sense of pleasure in letting their imagination dwell on martial images?

By the 1840s, the exemplary musical artefact of Italian nationalism was the big choral unison number that conveyed a collective sentiment in tones not drawn from the oral tradition but destined to become a part of it, the *locus classicus* being 'Va, pensiero', the chorus of slaves from Verdi's *Nabucco* (1842). It has been shown that a significant part of the chorus's nationalistic import was read back on it from the perspective of the united Italy of the 1860s, and that its legendary status proceeded in stages corresponding to that of the Verdi legend itself, which in turn reflected the growing mythology of the Risorgimento (Parker, 1997). And yet myth is not falsehood but an explanatory hypothesis. That Verdi followed up on the success of 'Va, pensiero' with similar choruses in his next two operas, *I Lombardi* and *Ernani*, shows at the very least that audiences were demanding them. The genre, at once popular and grand in a sense that had formerly connoted only regal pomp, never popular triumph, was as much a political as a musical novelty, and a momentous one for European music.

By comparison, stylistically selfconscious Italian colour was a paltry matter, remaining inconspicuous in Italian music until after 1870, when Verdi, reacting to Wagner, began touting Palestrina as the fount not of 'Renaissance' or religious style, but of Italian virtues. Budden (*GroveO*, iii, 1171) associates the Italian national (as opposed to nationalist) *tinta* with *verismo*, with Puccini and with *l'Italietta* (petty picturesque Italianism). Considering that fewer than half of Puccini's operas were actually set in Italy or derived from Italian sources, this seems more a commentary on values than on subject matter – and also, perhaps, a reference to Italy's diminished place in the operatic scheme by the end of the century.

4. Cultural nationalism and German Romanticism. With its celebration of difference or uniqueness in counterpoise to the Enlightened pursuit of universality, Romanticism was nationalism's natural ally and its most powerful stimulant. The key figure in forging this nexus was the Prussian preacher Johann Gottfried Herder, and the key document Herder's *Abhandlung über den Ursprung der Sprache* ('Treatise on the Origin of Language', 1772).

Briefly, Herder's argument ran as follows. It is language that makes humans human. But language can only be learnt socially, that is, in a community. Since there can be no thought without language, it follows that human thought, too, was a social or community product – neither wholly individual nor wholly universal. Herder insisted that each language manifested or (to put it biblically) revealed unique values and ideas that constituted each language community's specific contribution to the treasury of world culture. Moreover (and this was the most subversive part), since there is no general or *a priori* scale against which particular languages can be measured, no language, hence no language community, can be held to be superior or inferior to any other. When the concept of language is extended to cover other aspects of learnt behaviour or expressive culture – customs, dress, art and so on – those aspects will be seen as essential constituents of a precious collective spirit or personality. In such thinking the concept of authenticity – faithfulness to one's essential nature – was born. It became an explicit goal of the arts, not just an inherent property, to express the specific truth of the 'imagined community' they served, and assist in its self-definition.

It seems only natural that this theory should first have occurred to a German thinker, the German-speaking lands being then (and to a degree remaining even now) a political and religious crazy quilt. What united all Germans was their linguistic heritage and the folklore that gave that heritage its most autochthonous (or, to use Herder's word, *urwüchsig*), hence authentic, expression. What united the Germans, in other words, was the very thing that distinguished them from other linguistic communities, especially the great French monolith they feared, and in whose philosophy of universalism they read condescension. It was in that oppositional thinking that Herder's Romanticism metamorphosed into German political nationalism.

The romantic linkage of language and nation found immediate reflection in the German arts. The use of the term 'Nationaltheater' to designate a theatre where plays and operas were given in the vernacular language actually preceded Herder's treatise. It first appeared in Hamburg (then a free city without ties to any larger political entity) as early as 1767, and spread from there to Vienna (1776) and Mannheim (1778). The most significant change wrought by Herder was in the value placed on folklore and its artistic appropriation, nowhere more so than in music. *Volkstümlichkeit* ('folksiness') can be found in much 18th-century art music, especially in *opera buffa* and its French, English, German and (beginning in 1772) Russian vernacular imitations, where it was associated, like all local colour, with peasants or otherwise low-born characters. The use of various local styles for peasants but a musical lingua franca for other characters continued to reflect the old 'horizontal' view of society, in which class associations rather than national ones determined a sense of community among the cosmopolitan *gebildete Kreise* ('cultivated circles'). Even when stereotyped local colour found its way into instrumental music – Scarlatti sonatas, say, or the trio sections in Haydn's symphonic minuets – its association was to the peasantry, not to the nation, and it was essentially comic. This applies as well to the portrayal of Simon, Jane and Luke, the trio of rustics in Haydn's *The Seasons*, whose idiom is vaguely identifiable as *volkstümlich* but of indeterminate origin. They are representatives of no nation, but rather of a universalized class.

As soon as folklore was seen by the *gebildete* as embodying the essential authentic wisdom of a vertically defined linguistic community or nation, its cultural stock soared. It now began attracting artistic imitators interested not in generalization or universalization but in local specifics and idiosyncrasies. Herder himself became one of the earliest collectors of folklore. In his enormous comparative anthology of folksongs from all countries, *Stimmen der Völker* ('Voices of the Peoples', two vols., 1778–9), he actually coined the term *Volkslied* (folksong) to denote what had formerly been called a 'simple', 'rustic' or 'peasant' song. His collection was followed, and as far as Germany was concerned superseded, by the greatest of all German folksong anthologies, *Des Knaben Wunderhorn* ('The Youth's Magic Horn'), brought out by the poets Achim von Arnim and Clemens Brentano between 1805 and 1808. Verses from this book, which contained no original melodies, were set as lieder by German composers throughout the century and far beyond. Arnim and Brentano were followed by the brothers Grimm, whose collecting efforts, by the middle of the century, had been duplicated in virtually every European country.

The great explosion of published folklore and its artistic imitations did a great deal to enhance the national consciousness of all peoples, but especially those in two categories: localized minority populations, like the Letts (the original object of Herder's collecting interest), whose languages were not spoken across political borders; and (at the opposite extreme) large, politically divided groups like the Germans, whose languages were widely dispersed across many borders. The boundary between the collected and the created, or between the autochthonous and the artistic, or between the discovered and the invented, was at first a soft one, easily traversed. It was not always possible to distinguish between what was collected from the folk and what was contributed by the editors or their educated informants, most of whom were poets as well as scholars and did not distinguish rigorously between creative and scholarly practice.

The most illustrative case was that of the Kalevala ('Land of Heroes'), the national epic of the Finns, who in the early 19th century lived under Swedish and, later, Russian rule. First published in 1835, it was based on lore collected from the mouths of peasants but then heavily edited and organized into a single coherent narrative by its compiler, the poet Elias Lönnrot (1802–84). It never existed in antiquity in the imposing form in which it was published and which served to imbue the modern Finns – that is, the urban, educated, cosmopolitan classes of Finnish society – with a sense of kinship and national cohesion. Nor do the ironies stop there. The distinctively incantatory trochaic metre of the poem (the result of the particular accentual patterns of the Finnish language), when translated into English, provided the model for Longfellow's *Song of Hiawatha* (1855), which purported to provide the USA, a country of mixed ethnicity and less than a century old, with a sort of borrowed national epic that would lend it a sense of cultural autochthony, independent from Europe.

5. From national to universal. In some ways this 'discovery of the folk' was a recycling of an ancient idea, that of primitivism, the belief that the qualities of technologically backward or chronologically early cultures were superior to those of contemporary civilization; or, more generally, that it is those things that are least socialized, least civilized – children, peasants, 'savages', raw emotion, plain speech – that are closest to truth. The most dogmatic recent upholder of primitivistic ideas had been Rousseau, whose *Le contrat social* (1762) began with the ringing declaration that 'man was born free and is everywhere in chains'. No-one had ever more effectively asserted the superiority of unspoilt 'nature' over decadent 'culture'.

But, as we have seen, the Herder/Grimm phase did contain a new wrinkle, namely the idea that the superior truth of unspoilt natural man was a plural truth. The next step in the Romantic nationalist programme was to determine and define the specific truth embodied in each cultural community. Here is where the motivating resentment or inferiority complex finally began to break the surface of German nationalism. Not surprisingly, the values celebrated in the German tales – the 'Prince Charming' values of honesty, seriousness, simplicity, fidelity, sincerity and so on – were projected on to the German language community, which in its political fragmentation, economic backwardness and military weakness (its primitiveness, in short) represented a sort of peasantry among peoples, with all that that had come to imply as to authenticity. It alone valued *das rein Geistige*, 'the purely spiritual', or *das Innige*, 'the inward', as opposed to the superficiality, the craftiness and artifice of contemporary civilization, as chiefly represented by the hated oppressor-empire, France.

The same values of pure spirituality and inwardness were projected by German Romantics on music itself – or rather, on instrumental music, defined in opposition to aesthetically and morally depraved Italian opera – to whose essential nature (eventually encapsulated in Wagner's term 'absolute music') the German nation was consequently credited with possessing the key. The

rediscovery of Bach as mediated through Forkel's chauvinistic biography, to say nothing of Beethoven's colossal authority as mediated through the exegetical writings of E.T.A. Hoffmann (for whom instrumental music was 'the only genuinely Romantic art'), A.B. Marx and others had the effect of universalizing the values of German music (Pederson, 1993–4; Burnham, 1995). By the middle of the century, instrumental music was identified in the minds of many Europeans, not just Germans, as being (to quote the Russian pianist and composer Anton Rubinstein) 'a *German* art' (his italics).

Thus what began as a philosophy of diversity became, in the case of music, one of hegemony. The programme of German nationalism quickly metamorphosed, for music, into one of German universalism. In the history of no other modern art has nationalism been so pervasive – yet so covert – an issue.

6. Music and German nation-building: the Vormärz phase. The first nation-specific genre in German music was the lied, originally conceived (by J.F. Reichardt and others) as a setting of *volkstümlich* verse or imitation folk poetry, of which the most elaborate genre was the ballad, with an eye towards recapturing some of the forgotten wisdom that *das Volk* had conserved through the ages of cosmopolitanism, hyperliteracy and Enlightenment. It was a neat switch on the concept of the 'Dark Ages'. The dark, especially in its natural forest habitat, was in its mystery and intuitive 'second sight' now deemed light's superior as conveyor of lore – that is, nation-specific traditional knowledge.

But the specifically German tradition of the ballad was a fiction. The earliest examples were imitations of Herder's translations (in his *Stimmen der Völker*) of English and Scandinavian originals. Thus the great German ballads like Goethe's *Erlkönig* had no true German folk prototype; in this they resembled the Kalevala as contemporary creations manufactured to supply a desired ancient heritage.

The supreme popularity of *Erlkönig*, of which dozens of settings were made (see Gibbs, 1995), was no accident. The poem surrounds the horse and riders with a whole syllabus of Germanic nature mythology, according to which the forest harbours a nocturnal spirit world, invisible to the fully mature and civilized father but terrifyingly apparent to his unspoilt son. Thus the romantically nostalgic or neo-primitivist themes of hidden reality, invisible truth, the superiority of nature over culture (or, to put it Germanically, of *Kultur* over *Zivilisation*) are clothed in the imagery and diction of folklore to lend them supreme authority.

That stance of artlessness, always present in low comedy, gained a comparable prestige in opera when a Singspiel (albeit one billed as a *Romantische Oper*), Weber's *Der Freischütz* (1821), won wide acceptance, both at home and abroad, as the exemplary German opera, a mirror of the nation and an answer to the eternal question, 'Was ist deutsch?'. Peasants, until now visible on the operatic stage only as accessories (and, as always, representing their class, not their country), formed virtually the entire cast: not just sidekicks and comic relievers but heroes and heroines, villains and all the rest.

Weber's opera gained its great national significance in part from the circumstances of its première: it was the inaugural musical offering at the newly rebuilt Nationaltheater in Berlin, the Prussian capital. That signals an important theme: the role of reception, alongside or even before the composer's intentions, as a determinant of nationalist significance. It was the nation, not the composer, who made *Der Freischütz* a national opera, and it was this prior acceptance by the nation that enabled the more aggressive nationalists of the next generation to load the opera with a freight of ideology never envisaged by the composer.

First among them was Wagner, who, a struggling unknown in Paris in 1841, took the opportunity afforded by the French première of *Der Freischütz* to send a chauvinistic dispatch to the newspapers back home – one in which, significantly, Weber's name was never even mentioned, as if to cast the opera as the collective issue of the German *Volk*:

> O my magnificent German fatherland, how must I love thee, now must I gush over thee, if for no other reason than that *Der Freischütz* rose from thy soil! . . . How happy he who understands thee, who can believe, feel, dream, delight with thee! How happy I am to be a German!

In the aftermath of Napoleon's defeat, there were many who were now revelling in Germanness and looking forward to its becoming not only a cultural but a political reality. Music could play a part in the cultural unification of the German lands, now seen as the necessary prelude to political unification. Choral music, too, came into its own under the impetus of Romantic nationalism, enjoying a rebirth that contemporary musicians loved to compare with its original 'birth' for European music history as the continent-uniting music of the medieval Christian church. That implied trajectory, from Gregorian chant to lied and from church to folk, bespeaks the transformation Romanticism wrought not only in the way one thought about nation but also the way one thought about art. Both concepts were sacralized in the process of their Romantic redefinition.

Romantic choral music was associated in Germany not only with *Gemütlichkeit*, the conviviality of social singing embodied in *Männerchöre* (male choruses in *volkstümlich* style), but also with the mass choral festivals that provided German unificatory nationalism with its hotbed. First organized in 1814, the Rhine festivals had reached grandiose proportions by the 1830s, with throngs of performers holding forth before even bigger throngs of spectators. The primary musical conveyor of the new nation-building ideology, echoing its role in Augustan England, was the refurbished Handelian oratorio, now tellingly hybridized with the Bachian strain following the famous 1829 revival of the *St Matthew Passion* under Mendelssohn in Berlin.

The specifically Bachian element in the new oratorios was the use of chorales. But since the new oratorios, like Handel's and unlike Bach's, were secular works on sacred or sacralized themes rather than service music, the chorale now took on a new aspect associated with the nation rather than the Lutheran Church. The first composer to incorporate chorales into a Rhine festival oratorio was Carl Loewe, a Catholic, and the main site of the Lower Rhine Festival was Düsseldorf, a Catholic city only recently ceded from the Holy Roman Empire to Prussia in the post-Napoleonic settlement of 1815. In short, the Lutheran repertory of chorales was now, in apparent defiance of a sometimes bloody history, considered the common property of all Germans, irrespective of creed.

The most enduring of the new chorale oratorios was Mendelssohn's *Paulus*, performed to great acclaim at the Lower Rhine Festival of 1836. Its success cast a new light on the relationship between religious and national German culture as mediated by the oratorio, since (like St Paul himself) the composer was by birth neither Protestant nor Catholic but a Jew. Mendelssohn had already worked a chorale into his 'Reformation' Symphony, composed right after the Bach première on commission for the tercentenary of the Augsburg Confession. Now at the climax of the final chorus in *Paulus*, the Lutheran creed 'Wir glauben All' an einen Gott' – the Augsburg Confession itself, originally proclaimed in defiance of the 'universal' Catholic Church and the Holy Roman Emperor – is sung as cantus firmus. Thus what had originally been one of the most divisive texts in Reformation history was now enshrined in an oratorio given its first performance before an audience largely made up of Catholics, to consecrate a religious ideal of national union.

Through his ostensibly sacred work, Mendelssohn thus emerges as perhaps the 19th century's most important civic musician. He was duly recognized and rewarded as such. In 1833 he was appointed Catholic Düsseldorf's music director. Two years later he became chief conductor of the Leipzig Gewandhaus orchestra concerts, the most prestigious music directorship in all of Protestant Germany. In 1843, Mendelssohn added to his civic duties the role of director of the newly founded Leipzig Conservatory and also became director of the Berlin Cathedral Choir. He did more than any other individual to maintain the greatness of his country's musical life and its reputation as the 'music nation'.

7. After 1848. Yet less than three years after Mendelssohn's death, in September 1850, an article appeared in the *Neue Zeitschrift für Musik* – a journal published in Leipzig, Mendelssohn's own city – that set in motion a backlash against him from which his reputation has never fully recovered, and put a whole new complexion on the idea of German nationalism, indeed of nationalism as such. Signed K. Freigedank ('K. Free-thought'), the article, called *Das Judenthum in der Musik* ('Jewry in Music'), made the claim that Jews, being not merely culturally or religiously but racially – that is, biologically – distinct from gentile Christians, could not contribute to gentile musical traditions, only dilute them. There could be no such thing as assimilation, only mutually corrupting mixture. A Jew might become a Christian by converting (as Mendelssohn had done), but never a true gentile, hence never a German.

As long as nationalism was conceived in linguistic, cultural and civic terms, it could be a force for liberal reform and tolerance. To that extent it maintained continuity, despite its Romantic origins, with Enlightenment thinking. A concept of a united Germany could encompass not only the union of Catholic and Protestant under a single flag, but could also envisage civil commonalty with Jews, even unconverted ones, so long as all citizens shared a common language, a common cultural heritage and a common political allegiance. During the 1830s and 40s, the period now known to German historians as the Vormärz, German musical culture had proved the liberality and inclusiveness of its nationalism by allowing an assimilated Jew to become, in effect, its president.

Mendelssohn, for his part, was an enthusiastic cultural nationalist, even (like Schoenberg after him) something of a chauvinist, as his letters, with their smug if affectionate remarks about the musical cultures of England, France and Italy, attest. The libretto of *Paulus*, which begins with the story of the stoning by the Jews of St Stephen, the first Christian martyr, even betrays an anti-Judaic sentiment. But there is a profound difference between the anti-Judaism of the *Paulus* libretto and the sentiment displayed in *Das Judenthum in der Musik*, now called anti-Semitism. That difference, moreover, is directly congruent with the difference between the liberal or inclusive nationalism of the early 19th century and the racialist, exclusive nationalism that took its place in the decades following 1848. A religion may be changed or shed, as a culture may be embraced or renounced. An ethnicity, however, is essential, immutable and (to use the favoured 19th-century word) 'organic'. A nationalism based on ethnicity is no longer synonymous with patriotism. It has become obsessed not with culture but with nature, for which reason it bizarrely cast itself as 'scientific'.

Thus, for the author of *Das Judenthum in der Musik*, even Mendelssohn's undoubted genius could not save him from the pitfalls of his race. He could not 'call forth in us that deep, heart-searching effect which we await from Music', because his art had no 'genuine fount of life amid the folk', and could therefore only be 'reflective', never 'instinctive'. In sly reference to E.T.A. Hoffmann's bedrock romantic tenets, the author denied Mendelssohn, or any Jew, the ability to rise above mere glib, social articulacy and achieve the 'expression of an unsayable content' – in other words, the defining criterion of absolute music for which Germans alone possessed the necessary racial (implying moral) endowment. Finally, the author warned, Germany's acceptance of this musician as its *de facto* musical president was only the most obvious sign of the *Verjudung* ('be-Jewing') of the nation in the name of enlightened liberality. The Jewish influence had to be thrown off if the nation was to achieve organic greatness, its heroic destiny.

All in all, *Das Judenthum in der Musik* is the most vivid symptom to be found in musical writings of a change in the nature of nationalism that all modern historians now recognize as a major crux in the history of modern Europe. But of course its most immediately significant aspect was the fact, guessed by many readers in 1850 and admitted by the author in 1869, that 'K. Freigedank' was a pseudonym for Richard Wagner, then a political exile from Germany, who as a composer was just then on the point of the momentous stylistic departures that would make him in his own right one of the towering figures in music history. His mature works, particularly *Der Ring des Nibelungen*, would give direct and compelling artistic embodiment to a radiantly positive expression of the same utopian ethnic nationalism of which his political fulminations were the cranky negative expression. And in those same works, which transcended (or in dialectical terms, synthesized) the distinction between the spirituality (*Geist*) of absolute music and the sensuality (*Sinnlichkeit*) of opera, Wagner embodied and (in *Das Kunstwerk der Zukunft*) advertised the achievement by Germany of 'universal art'. By the end of the 1860s, as Carl Dahlhaus has observed, Wagner had become the 'uncrowned king of German music' (Dahlhaus, 1971). Comparison of that epithet with the one applied here to Mendelssohn – '*de*

facto president of German musical culture' – is suggestive of the trajectory along which the parallel histories of music and the German nation would proceed over the course of the 19th century.

Even before Wagner's mature operas were performed, his 'progressivist' politics had been adopted as a platform for universalizing German music – that is, for establishing its values and achievements as normative, hence (as a modern linguist would put it) 'unmarked'. This was in large part the achievement of Franz Brendel, the author of the century's most widely disseminated general history of music, the explicitly neo-Hegelian *Geschichte der Musik in Italien, Deutschland und Frankreich von den ersten christlichen Zeiten an bis auf die Gegenwart* ('History of Music in Italy, Germany and France from the Earliest Christian Times to the Present'), first published in 1852, which by 1906 had gone through nine editions.

It was already symptomatic not only of Brendel's version of European music history, but also of the one still current today, that its purview was limited to the richest and most powerful countries of western Europe, the ones with the longest histories of secular art patronage and hence the largest stockpiles of artworks in all media. This was already evidence of commitment to a view of history cast in terms of the progressive realization of an essential European spirit (Hegel's 'world soul') of which Italy, Germany and France were collectively the protagonist. Although no-one speaks today of the world soul, the notion of a musical mainstream is still a powerful regulative concept in music historiography, thanks to which composers active since the early 19th century are still classified into four categories: Italian, German, French and 'nationalist'.

Brendel's narrative also re-enacts within the musical sphere the Hegelian doctrine that all meaningfully or significantly 'historical' change – all change, in other words, that is worthy of representation in the dialectic – has contributed to 'the progress of the consciousness of freedom'. Beethoven, in his traditional role of musical emancipator, naturally formed the climax, and brought Germany to the fore as the protagonist of musical evolution. The most significant chapter of Brendel's book was the last, which maintained the narrative of progressive emancipation into the present. Brendel located the latest stage in both the consciousness of freedom and the attainment of organic unity in Liszt, then the court Kapellmeister at Weimar, who in his recently inaugurated series of symphonic poems had (according to Brendel) led music to the stage in which 'content creates its own form'.

What made it possible for Liszt, neither Italian nor German nor French, to assume historical leadership was not merely his temporary residence in Germany but a new doctrine of Germanness. In a famous speech delivered in 1859 and published in the *Neue Zeitschrift für Musik*, Brendel called for the abandonment of the much ridiculed term *Zukunftsmusik* in favour of the term *Neudeutsche Schule* ('New German School') to denote 'the entire post-Beethoven development'. Anticipating the obvious objection that the school's two elder statesmen, Berlioz and Liszt, were neither of them German, Brendel asserted that it was 'common knowledge' that these two had taken 'Beethoven as their point of departure and so are German as to their origins'. Warming to the subject, he continued:

> The birthplace cannot be considered decisive in matters of the spirit. The two artists would never have become what they are today had they not from the first drawn nourishment from the German spirit and grown strong with it. Therefore, too, Germany must of necessity be the true homeland of their works.

This remarkable pronouncement testified musically to the new conception of nationhood and nationalism that had arisen in the wake of the revolutions of 1848 among the 'Young Hegelians' with whom Brendel was allied. Germanness was no longer to be sought in folklore. One showed oneself a German not ethnically but spiritually, by putting oneself in humanity's vanguard. The new concept obviously made a far greater claim than the old. Germany was now viewed as the 'world-historical' nation in Hegelian terms, the nation that served as the executor of history's grand design and whose actions led the world (or at least the world of music) to its inevitable destiny.

In work that was in progress at the time of Brendel's writing, Wagner showed that the older ethnic nationalism could in fact easily co-exist with Brendel's vanguardism. Indeed *The Ring*, the Wagner work that was to become the greatest of all standard-bearers for the principle that content must create its own form, was also his most overtly racialist work, committed as it was to the principle of blood-purity as precondition for heroic deeds. And the work that most loudly proclaimed an emancipatory message, namely *Die Meistersinger von Nürnberg*, was also the work that ended with the exhortation, 'Ehrt euren deutschen Meister!' so that the national art may for ever be 'deutsch und echt'.

Nor was adherence to the New German School a prerequisite for aggressive nationalism, especially after the next watershed, that of 1870–71. Brahms, who had protested against Brendel's proclamation in 1859, composed a cantata 12 years later for performance at Karlsruhe, already a Wagnerian stronghold, in dual celebration of the Prussian victory over France and the proclamation of the united German Empire. The *Triumphlied* op.55, in three large movements, is despite its present squeamish neglect a major work by any standard, and during the composer's lifetime one of his most popular. Except for the *German Requiem* the longest of Brahms's choral works, it is by far the largest in terms of its sonorous forces, being scored for two antiphonal mixed choruses and the biggest orchestra Brahms ever employed. One of the factors contributing to its size is the use of three trumpets, playing in a style obviously derived from that of Bach's *Magnificat*, which shares the *Triumphlied*'s key of D major, thus putting the cantata squarely in the old Mendelssohnian (and, implicitly, anti-Wagnerian) line. But the text, selected by Brahms from *Revelations*, is the most blatant example of sacralized nationalism in the whole literature of German music. Not only does it compare Bismarck's *Reich* with God's, but it also manages, in an orchestral theme that fits the rhythm of an unsung portion of the biblical text, to identify defeated France with the Whore of Babylon – a greatly relished open secret.

8. The scene shifts. The next, and crucial, chapter in the history of musical nationalism was written by the defeated French, whose crisis of national identity in the aftermath of national humiliation was played out musically in a number of tellingly contradictory ways.

Before 1871 the only nation against which France had sought to defend itself musically was Italy, not so much in the overpublicized Querelle des Bouffons as in resistance to 'meaningless' and 'unnatural' instrumental music,

epitomized in Le Bovier de Fontenelle's battle-cry, 'Sonate, que me veux-tu?', supposedly uttered in the name of the Académie Royale des Sciences, of which Fontenelle was secretary from 1699 to 1741. The remark was popularized by Rousseau in his *Dictionnaire de musique* of 1768, whence it travelled widely in the literature and became an emblem of French rationalism.

After the Revolution, France defined itself musically in civic, generic or institutional rather than 'aesthetic' terms. Their sense of political and military supremacy, moreover, made the French singularly tolerant of foreigners in their midst. Frenchness was bigness, as variously embodied in the choral odes and rescue operas of the revolutionary period, the Parisian grand opera (to which Italians were welcome to contribute, and which reached its zenith in the work of Giacomo Meyerbeer, a German-born Jew), and the huge orchestral compositions of Berlioz. Vocal music, by now in pointed contrast to German taste, was still valued as self-evidently superior to instrumental: Berlioz justified his *Symphonie fantastique*, in the original version of the programme, as an 'instrumental drama' whose five movements corresponded to the five acts of a well-made play or grand opera in which the *idée fixe* was the leading lady. His *Symphonie funèbre et triomphale* was in similar fashion an instrumental enactment of a civic ceremonial, in which the voice of the trombone (in the central Adagio) was that of the featured orator.

Berlioz's later adoption by the New German School was thus a study in irony, as Berlioz himself was acutely and acerbically aware. (He responded to news of Brendel's famous speech with a resounding 'Non credo'.) But a greater irony by far was the first attempt, following the Prussian victory, to define musical Frenchness stylistically. No German writer can describe it without a show of glee, not even Dahlhaus, who noted that 'on February 25, 1871, a few days before the Prussian army marched down the Champs Elysées, Camille Saint-Saëns and some friends of his founded the Société Nationale de Musique; its motto, *ars gallica*, expressed a cultural self-confidence to counteract France's setbacks on the political and military fronts' (Dahlhaus, 1980, trans. 1989, p.283). Yet under that rubric, the society fostered the most thoroughgoing Germanification (or 'New-Germanification') French music ever endured. The matter of chief concern was to prove that the Germans, with their absolute music, had no lock on 'lofty musical aims', to cite the preamble to the society's by-laws. The means of proof was to produce a repertory of non-programmatic orchestral and chamber music to rival the German and even surpass it in its demonstrative profundity of content, realized by means of impressive feats of structure like cyclic form, which César Franck and his pupils Chausson and d'Indy elevated to a basic principle of design.

The resulting heaviness and stuffiness in the name of 'lofty' psychology and metaphysics, quickly stigmatized as Wagnerian, elicited a backlash that finally ensconced a lasting set of 'national characteristics' in French musical consciousness, to which the country's composers would (eventually) unanimously aspire. The 'national traditions' that embodied and guaranteed these characteristics, though touted as ancient, were only decades, not centuries, old. But they had been formulated in the course of reviving an 'ancient' heritage – that of *la musique classique française*, as pre-eminently exemplified by Rameau. And this made it possible to claim that the traditions were revived along with the repertory from which they were educed. The watershed event was the publication, under the general editorship of Saint-Saëns and the musicologist Charles Malherbe, of Rameau's *Oeuvres complètes* in 18 volumes, beginning in 1895, with musical texts prepared by a pleiad of eminent composers that included d'Indy, Dukas and Debussy in addition to Saint-Saëns.

As the last great composer of the *ancien régime*, Rameau was held to have been the last exemplar of those innate French qualities that had recently been obscured by Wagnerism and the unwittingly teutonizing work of the Société Nationale. A short list of these qualities, as described by all the editors (but most enthusiastically by Debussy) – *lumière*, *clarté*, *classicisme*, *goût* – easily reveals how deliberately they were constructed against the nocturnal Romantic virtues (virtues, above all, of unconscious 'lore') that were claimed by the Germans, thus presciently forging a link between French nationalism and what would later be known as neo-classicism (see Suschitzky, 1999).

Even before Rameau became its protagonist, in 1894, the new discourse of French purity had been applied by the founders of the Schola Cantorum – Charles Bordes, Alexandre Guilmant and d'Indy – to the most venerable of all Western musics, the Gregorian chant, just then being resurrected by the Benedictines of Solesmes. Of course, in laying claim to this body of music, which gave licence to employ pentatonic or 'modal' melodies in the name of France (harmonized using methods pioneered in Russia by Balakirev), the promulgators of plainchant-nationalism had to ignore a blatant paradox: according to the same theory that associated the chant with the Franks, and hence with France, the origins of the music were held to be Roman. But then (to quote Eric Hobsbawm's famous paraphrase of Ernest Renan), 'getting its history wrong is part of being a nation'; and anyway, whether French or Roman, Gregorian chant exemplified 'latinate classicism', another universalized discourse that could serve as a locus of covert nationalism.

9. The other Empire. It is already clear that, as a value-laden question posed within the cultivated or 'art' tradition, 'How German is it?' was an older question than 'How French is it?' or 'How Italian is it?'. Even more to the point: questions like 'How Russian?' or 'How Polish?' or 'How Czech?' or 'How Hungarian?' – and the list goes on, into Spain and Scandinavia, England and the Americas – are questions that not only arose later than 'How German is it?' (and in response to it) but also questions that were at least as likely to be asked by Germans, or by those otherwise committed to the Germanic 'mainstream', as by Russians or Poles etc.

The case of Russia makes an ideal counterpoint to that of Germany. Both nations conceived of their nationhood, in the modern sense of the word, at around the same time, even though the Russian empire had been for centuries as strong a political monolith as France. Modern national consciousness emerged in Russia, as it did everywhere else, as a consequence of the cosmopolitan thinking of the urban élite – that is (to give it its Russian name), out of 'westernization'. And therefore all participants in the development in Russia of music as a secular fine art, regardless of the manner or the vehemence with which they may have professed nationalism or patriotic chauvinism, were members of the 'westernizing' faction in the Russian cultural debate.

The first writer to define Russia as a nation in the modern sense – that is, as a concept organizing a linguistically defined society 'vertically' – was Antiokh Dmitriyevich Kantemir (1709–44), in his *Letter on Nature and Humanity*, where he asserted that all Russians, noble and serf alike, were united by 'the same blood, the same bones, the same flesh'. Not by accident, the Moldavian-born Kantemir, the first Russian belletrist in the modern Western sense, was a career diplomat. He spent the last dozen years of his life – his *Letter*-writing years – abroad as ambassador in England and France of the empresses Anne and Elizabeth; and it was Anne who inaugurated the history of music in Russia as a secular fine art when in 1735 she decided to import a resident troupe of Italian opera singers to adorn her court with exotic and irrational entertainments. That was the beginning in Russia of secular music as a continuous, professional and literate artistic tradition.

But Empress Anne's early patronage of art music as a foreign import set a precedent that would make for tensions later. One of the main tensions would be that between patriotism and nationalism, a conflict that had no counterpart in western Europe. Russian patriotism, as long as it was defined by the aristocracy, was not necessarily interested in fostering indigenous artistic productivity. It could be satisfied by foreign imports that enhanced Russia's self-esteem and prestige in the world.

Anne's original patriotic act in establishing an Italian opera theatre at her court was re-enacted on a much more public scale by Tsar Nikolay I in 1843, when he invited Giovanni Battista Rubini to assemble an all-star company that was to take over St Petersburg's largest theatre (and effectively banish indigenous Russian opera for a while to Moscow). At a stroke, Nikolay had made his capital one of the operatic centres of Europe, on a par with Paris, Vienna and London; and he had identified himself in the eyes of the world as an enlightened despot. 'Let's admit it', a prominent journalist wrote in enthusiastic endorsement of the tsar's initiative, 'without an Italian opera troupe it would always seem as if something were missing in the capital of the foremost empire in the world!'.

The institutional means for maintaining Russian productivity in instrumental music – a resident court-sponsored professional orchestra in St Petersburg (from 1859) and conservatories in St Petersburg and Moscow (1862, 1866) – were achieved through the heroic labours of one man: Anton Rubinstein, a world-class virtuoso and an astoundingly prolific composer who despite his colossal service to the cause of art music in Russia was rightly viewed by the musical nationalists of the next generation with a reserve, bordering on hostility, that has left its mark on his historiographical image.

And yet even if his motives are viewed as cynically as possible (for example, as currying favour with the tsarist court in compensation for his Jewish birth, or securing for himself the bureaucratic rank of 'free artist' with all the attendant rights and privileges), Rubinstein was able to succeed in his mission of professionalization because it was seen on high as a patriotic, prestige-enhancing manoeuvre. In that peculiarly Russian manner, Rubinstein's patriotic zeal, while genuine and passionate, was in no way nationalistic as the term is currently understood. In 1855, as part of his campaign, Rubinstein published a deliberately provocative article in the Vienna *Blätter für Theater, Musik und Kunst* called 'Russian Composers', in which he outlined a Peter the Great-like programme of importing German musicians and music teachers wholesale to colonize his native land. In the process he stigmatized existing amateur musical activity in Russia, including autodidact musical creativity, as so much contemptible dilettantism – a bold insult indeed to the one Russian composer, Glinka, who had succeeded by then in making an international reputation. It inspired at last a genuinely nationalistic backlash among the Russian composers of the next generation.

The best lens for viewing the backlash, and the schism it created between the 'national' composers of Glinka's generation and the 'nationalists' of Balakirev's, would be the creative appropriation of folksong. The Herderian tradition in Russia goes back to Nikolay Aleksandrovich L'vov (1751–1803), a noble landowner and world traveller with multifarious artistic and scientific interests. His supreme passion was collecting and imitating folklore. In 1790 he issued an epoch-making anthology of what he was the first in Russia to call *narodnïye pesni* (folksongs), directly translated from Herder's coinage, *Volkslieder*.

What was epoch-making was the fact that it included not just the texts but the tunes, all conventionally harmonized for piano by a hired assistant, Johann Gottfried Pratsch, a German-speaking Bohemian piano teacher from Silesia, who had settled in St Petersburg in the 1770s. These arrangements have come in for much criticism, by turns Romantic, scientific and Soviet, but they admirably served their Herderian purpose, which was not simply documentary but moral and aesthetic: to return what was the people's to the people by making the products of oral tradition available to the literate, thereby fostering the new, all-encompassing sense of 'the people' as the imagined community of all Russians.

This was far from Glinka's purpose. His loyalty was always to the international ('horizontal') cultivated tradition, and his career is instructive in the present context as an illustration of the way in which the new view of folklore could be accommodated to an old dynastic concept of nation that was infinitely stronger in Russia than it ever was in Germany.

Glinka's view of himself as a Russian was quite similar to Quantz's view of himself as a German: a 'universal' eclectic who was able to unite within himself the best of the rest. At a time when Germany defined itself musically as the nation of *Geist* as against Italy, the nation of *Sinnlichkeit*, and when it had the longstanding reputation of being musically the nation of brains versus beauty, Glinka – uniquely among European composers – decided consciously to acquire both beauty and brains, and to do it on location. From 1830 to 1833 he lived in Milan, where he hobnobbed with Bellini and Donizetti and under their supervision wrote creditable imitations of their work. Then he spent the winter of 1833–4 in Berlin under the tutelage of the famous contrapuntist Siegfried Dehn.

Thus doubly equipped, he returned to St Petersburg to write *A Life for the Tsar*, the first Russian opera that was truly an opera (not a vaudeville or a Singspiel), and one that showed its composer to be heir to, and master of, the full range of operatic styles and conventions practised in his day. The elaborate first-act cavatina, the multipartite ensembles in the third act, and the same act's monumental finale, all show his mastery of what Julian Budden has called the 'Code Rossini'. At the same time, the opera conspicuously exhibits features of the French rescue genre

– the genre of Grétry, Méhul and Cherubini, not to mention Beethoven – with its ample choruses, its reminiscence themes and its 'popular' tone. And as Berlioz was quick to notice, Glinka's operatic style was heavily tinged with 'the influence of Germany' in the prominence accorded to the orchestra, the spectacular instrumentation, and the 'beauty of the harmonic fabric'.

Of Russian folklore there is barely a trace, just enough to contrast with the far more explicitly pronounced Polish idiom of the second act and so realize the musical plan that motivated the opera: to represent the Russian–Polish conflict of 1612 by a clash of musical styles. Besides much modified quotations of two – perhaps three – Russian songs, there was an opening chorus cast in contrasting, accurately observed male and female styles of peasant singing; an imitation of balalaikas by the strings, pizzicato; and a girls' chorus in L'vov's favourite quintuple metre. Beyond these decorative touches, however, Glinka's *volkstümlich* style, even more than its German counterpart, was an invented rather than a discovered idiom.

His folk, moreover, remained the peasantry; and the sacrificial role in which Ivan Susanin, the peasant protagonist, is cast marked the opera as a document of the official nationalism (*ofitsioznaya narodnost'*) promulgated on behalf of Nikolay I by his minister of education, Sergey Uvarov, in 1833. Within this doctrine, *narodnost'* (nationalism) was the last in a list of three tenets all Russians were expected to espouse, the others being *pravoslaviye* (Orthodoxy) and *samoderzhaviye* (autocracy); the list was an explicitly counter-revolutionary answer to *liberté, égalité, fraternité* .

Even in the first half of the century, then, Russian nationalism was no politically progressive thing. Glinka's achievement was nevertheless musically progressive, in a manner best caught in a review by the composer's friend and fellow aristocrat, Prince Vladimir Odoyevsky. By 'proving' that 'Russian melody may be elevated to a tragic style', Odoyevsky declared, Glinka had introduced 'a new element in art'. Coming from the mouths of the main characters rather than (as in the earlier Russian Singspiel) from human props, furnishing the stuff of complex musical structures and expressing sentiments any nobleman would recognize as lofty, Glinka's ersatz Russian melodies were high art – 'ernste Musik' (serious music) – as no Russian music had been before. It was music Europe had to respect.

The greatest purely national significance attached itself to the 'hymn-march' or dynastic anthem with which Glinka brought the opera's jubilant epilogue to climax. It was in a recognizable period style, that of the so-called *kantï*, the homespun late 17th- and early 18th-century partsongs that were Russia's earliest indigenous repertory of 'westernized' literate secular music. They had nothing to do with peasant lore, and neither did Glinka's hymn. Its emblematic status arose not out of its musical essence but out of its reception; for as one modern commentator has put it, 'what is accepted as national is national, wherever its roots may be' (Oramo, 1997). Later ludicrous efforts, by Vladimir Stasov and others, to prove the anthem's stylistic authenticity valuably demonstrate another important nationalist principle: that reception is apt to be justified *ex post facto* by prevaricating claims about intentions.

Once only did Glinka manufacture a musical artwork exclusively out of authentic folk materials: *Kamarinskaya* (1848), one of his three *fantaisies pittoresques* for orchestra, of which the other two were based on Spanish themes. A brilliant set of ostinato variations with a slow introduction that unexpectedly returns, the work is fashioned out of two folksongs, which (as Glinka discovered while improvising at the keyboard) have a 'hidden' melodic affinity that could be exploited as a compositional tour de force. Glinka thought of the piece as a trifle; but in the wake of Rubinstein's sallies, his adherents Stasov and Balakirev touted it as a model for all authentically national Russian music. Stasov was able to do this only in loudly trumpeted words. Balakirev did it in musical deeds, and in the process created an object lesson in the difference between national and nationalistic art.

Balakirev's deeds took the form of two overtures on Russian themes (1858, 1864). In the first, the themes came from existing anthologies, including L'vov-Pratsch. The much more elaborate second was based on themes Balakirev himself had collected and was to publish two years later in an anthology that introduced a new style of 'modal' (or strictly diatonic) harmonization, wholly Balakirev's invention, that he and Stasov nevertheless touted as an authentic and autochthonous Russian national product. It was something the peasants never knew, but it achieved a distinctiveness and recognizability that led to its acceptance as generically Russian thanks to its widespread adoption by the more famous members of Balakirev's circle, the 'mighty kuchka' (Musorgsky, Borodin, Rimsky-Korsakov), and their many imitators. The opposition of Germans both at the St Petersburg Conservatory and abroad, like the Prague professor who in 1867 pronounced Balakirev's harmonizations 'ganz falsch', did its bit to lend them an aura of *Urwüchsigkeit* – in Russian, *svoyeobraznost'*.

That prestige and that air of authenticity notwithstanding, what distinguished Balakirev's overtures (especially the second, which was later twice renamed and reclassified as a symphonic poem), was the ironic fact that unlike *Kamarinskaya* they are cast formally not as one-off experiments but as orthodox symphonic allegros with introductions; in other words, they were to that extent 'German'. That gave them another sort of prestige. It took both kinds to achieve a 'Russian school' that could compete successfully on the world stage.

But it was only in these early works of Balakirev, the one Russian composer who might fit anyone's narrowest, most bigoted definition of a nationalist, that the two sources of prestige remained in a sort of idealized balance. Afterwards an inevitable entropy set in. Within Russia the folkloric style, becoming habitual, signified less and less. Composers began to find it more a constraint on their originality than a creative stimulus, and concert audiences under the post-Rubinstein dispensation became increasingly sophisticated and catholic in their tastes.

Musorgsky – swayed by the example of the embittered Dargomïzhsky, frozen out of the Imperial Theatres establishment by the Italians – subscribed to another kind of Russian self-definition vis-à-vis the West: that of jealous omnifarious rejection. Eschewing both Germanic brains and Italianate beauty, he and Dargomïzhsky settled on good character, becoming apostles of 'truth'. There is surprisingly little in Musorgsky's work, besides the folkish or churchly set pieces demanded by the settings of his historical operas, that is indicatively Russian in musical

style. The psychological realism at which he aimed transcended nation; his model became Russian speech, seen as a particular embodiment of universal human behaviour. (His re-embrace, in his last unfinished opera, *Sorochintsï Fair*, of what was by then an old-fashioned *Volkstümlichkeit* was as much an indication of a right-ward turn in his politics as it was an aesthetic reorientation.) Yet while not primarily folkloric, Dargomïzhsky's and Musorgsky's 'realism' was the product of a particular, very emphatic moment in Russian intellectual history.

The same can be said of Rimsky-Korsakov's later music, chiefly operatic and meant primarily for home consumption. Beginning with *Mlada* (1892), a mythological opera composed under the impact of the first complete Wagnerian *Ring* cycles to be performed in Russia, Rimsky-Korsakov found his true métier in fantasy and was increasingly preoccupied in later life with post-Lisztian harmonic explorations, often involving the 'tone-semitone' scale (commonly known today as octatonic).

Tchaikovsky paid *Kamarinskaya* his meed of tribute, both in word (calling it in his diary the acorn from which the oak of Russian music had grown) and in musical deed: the finale of his Second Symphony (1872), which has a first thematic group cast, like Glinka's *fantaisie*, as a set of ostinato variations on an instrumental folkdance tune (*naigrïsh*). This has led to the symphony's being received in the West, with manifest though condescending approval, as Tchaikovsky's 'most fully Russian' work (*Grove6*). Yet as this very example illustrates, Tchaikovsky, the very model of the post-Rubinstein composing professional, used folklore only where Brahms or Verdi might have used it (instrumental finales, operatic divertissements). His signal contribution to Russian musical life was the development, through his orchestral suites and his late ballets and operas, of what George Balanchine called the sumptuous 'imperial style', marked less with national colouring than by the trappings of dynastic majesty. But that was no less an authentic Russian colouring at a time when Russia was Europe's last great dynastic autocracy.

10. Tourist nationalism. Within the purview of German universalism, non-German 'nationalism' is received and valued as exoticism. This phenomenon has been aptly called 'tourist appeal' in a recent study of Chopin (Parakilas, 1992). It provides opportunities (as it surely did for Chopin who as an exiled patriot in Paris traded heavily on what Schumann called his 'Sarmatian physiognomy'), but it also fetters, thus creating the dilemma that all 'peripheral' composers have had to face since the establishment of Germanic musical hegemony (that is, the discourse of 'classical music'). It has led to the serious devaluing, or at least the distorted posthumous reception, of two composers in particular: Tchaikovsky and Dvořák. Their plights, in some ways complementary, can be regarded as emblematic.

Tchaikovsky's difficulties began in Russia, where he was regarded with envy and compensating disdain by the composers of the 'mighty kuchka'. The issue that divided them was not nationalism but professionalism. Native-born, conservatory-trained, full-time, Tchaikovsky was the first musician to achieve both an international reputation and a position of esteem in Russian society without the advantage of blue blood or a prestigious sinecure, and without being a performing virtuoso. The 'kuchkists', by contrast, all needed their day jobs and lacked his entrée to the court musical establishment. They were the last generation of gentry dilettantes, the class that had traditionally provided Russia with its composers.

So of course they created a mythos of authenticity that excluded Tchaikovsky, as it excluded his ethnically suspect mentor, Rubinstein. Stasov was its tribune at home, César Cui (a charter kuchkist despite having by his own admission 'not a drop of Russian blood') its propagator abroad. In *La musique en Russie* (1880), an outrageously partisan survey based on a series of articles for the *Revue et gazette musicale*, Cui characterized Tchaikovsky most unfairly as being 'far from a partisan of the New Russian school; indeed he is more nearly its antagonist'.

Playing as it did into Western prejudices about exotic group identities, this remark set the terms for the French (and to a lesser extent the German) reception of Tchaikovsky ever since. By 1903, the composer Alfred Bruneau (in *Musiques de Russie et musiciens de France*) could dismiss Tchaikovsky outright, despite his continuing pre-eminence at home, for not being Russian enough: 'Devoid of the Russian character that pleases and attracts us in the music of the New Slavonic school, developed to hollow and empty excess in a bloated and faceless style, his works astonish without overly interesting us'. Without an exotic group identity, a Russian composer could possess no identity at all. Without a collective folkloristic or oriental mask he was 'faceless'.

At the time of Tchaikovsky's invited appearance at the inaugural exercises for Carnegie Hall in 1891, he was repeatedly lauded in the American press as being, along with Brahms and Saint-Saëns, one of the three greatest living composers. But while his presence in repertory has remained ineradicable, the universalization of German taste, and the consequent insistence that music from the 'peripheries' justify its existence by virtue of exoticism, cast him posthumously into a critical limbo (or more precisely, a ghetto), the victim of a double bind. At its most extreme, this exclusion has taken a bluntly racialist form, as witness the complaint by his most recent British biographer that 'his was a Russian mind forced to find its expression through techniques and forms that had been evolved by generations of alien Western creators', a judgment mitigated only to the extent that 'a composer who could show so much resourcefulness in modifying sonata structure so as to make it more compatible with the type of music *nature had decreed he would write* was no helpless bungler' (Brown, 1991; italics added).

11. Colonialist nationalism. The case of Dvořák was in some respects even more keenly unjustified. Unlike the cosmopolitan Smetana, whose first musical allegiance was to 'New Germany' via Liszt, and who learnt Czech only as an adult and spoke it imperfectly, Dvořák grew up speaking the Slavonic vernacular and, until its latest phase, made his career entirely at home. Musically, however, he was fully at home with the Germanic lingua franca, fluent in both its 'classical' and its 'New German' dialects, and, in his symphonies, was one of its virtuoso exponents. His status as a 'nationalist' is at least as much one bestowed (or saddled) upon him from the outside as one that he sought to cultivate. He made his early (chiefly Vienna) reputation, it is true, with Slavonic Dances for piano four-hands and Moravian duets for women's voices, but in this he was acting on the advice (and following the example) of Brahms, who had made his early fame (and,

perhaps more to the point, his early fortune) with his Gypsy Songs and Hungarian Dances, spicy popular fare for home consumption. Dvořák's nonchalance with respect to the authenticity of his folkishness has been demonstrated by Beckerman, who compared Dvořák's settings of folksong texts with the original melodies and found that Dvořák not only spurned the latter but substituted tunes in a deliberately adulterated style calculated for a broader consumer appeal (Beckerman, 1993). He never sought to erect a monument to Czechness comparable to Smetana's *Má vlast* – or not, at any rate, until his last half-decade, when, already an international celebrity, he composed a cycle of symphonic poems on themes drawn from national folklore.

It was not because of his Czech nationalism but because of his being the master of the unmarked mother tongue that Dvořák was invited by Jeannette Thurber in 1892, shortly after Tchaikovsky's American visit, to direct her National Conservatory of Music in New York. After Dvořák's return home Brahms, on his deathbed, tried to persuade Dvořák to accept the directorship of the Vienna conservatory to prevent a Brucknerian takeover. That leaves no question about his insider status where 'greater Austria' was concerned. The 'tourist nationalism' that Dvořák practised (and preached to his American pupils) was a matter of superficially marking received techniques, forms and media with regionalisms (drones, 'horn' 5ths, polkas or *furianty* in place of minuets or scherzos), as one might don a native holiday costume.

The 'New World' Symphony, lately shown to be the remains of an unrealized project to compose an opera or oratorio on the subject of Longfellow's *Hiawatha*, was intended as a Herderian object lesson to the Americans on how they might achieve a distinctive 'school' of composition. As quoted by the critic Henry Krehbiel, Dvořák urged that they submit the indigenous musics of their country, namely native-American ('American Indian') melodies and 'plantation songs' (alias 'Negro spirituals'), 'to beautiful treatment in the higher forms of art'.

But of course higher forms that would justify and canonize the national were themselves covertly national, and Mrs Thurber's conservatory, like Rubinstein's (or any other 19th-century conservatory outside the German-speaking lands), was an agency of musical colonialism. Like other colonialisms, this one sought justification in the claim that it could develop local resources better than the natives unaided. Like other colonialisms, it maintained itself by manufacturing and administering ersatz 'national' traditions that reinforced dependence on the mother country. But 'colonialist nationalism', like tourist nationalism, was another double bind. Dvořák's Bohemianisms were at once the vehicle of his international appeal and the eventual guarantee of his secondary status vis-à-vis natural-born universals like Brahms. Without the native costume, a 'peripheral' composer would never achieve even secondary canonical rank, but with it he could never achieve more.

In Anglo-American music criticism, especially, Dvořák's ethnicity became a barrier to admission to the company of the great. Having asserted that 'Brahms is the greatest living composer', the editor of *The Outlook*, the organ of the Christian Union, a charitable organization based in New York, asked – in 1894, while Dvořák was living and working in that very city – on behalf of whom such an allegation might be challenged: 'Dvořák or Rubinstein? Possibly. But these composers, though doubtless very distinguished, reproduce too much of what is semi-barbaric in their nationalities to rival Brahms in the estimation of people of musical culture'. John F. Runciman, in a book of essays on music published in 1899, dismissed Dvořák, 'the little Hungarian composer', for an excess of 'Slav naïveté' that in his case 'degenerates into sheer brainlessness'.

If these strictures could be directed at the mentor, what sort of reception might await the Americans whose 'tradition' Dvořák purported to establish? That is why many Americans considered Dvořák's advice well meant but meddlesome, and resisted it. Among them was Edward MacDowell, an American of European stock who had had a thorough training under Raff in Frankfurt, and who resented the implication that he could achieve musical distinction or authenticity only by appropriating a non-European identity in whiteface. Even within the terms implied by Dvořák, however, there were distinctions to be drawn and preferences to be defended. While denying the necessity of a national 'trademark' for American composers, MacDowell nevertheless insisted that 'the stern but at least manly and free rudeness of the North American Indian' was in any case less undesirable than 'the badge of whilom slavery' (Gilman, 1908).

Amy Beach went further. She embarked on her first and only symphony almost immediately after hearing the Boston première of the New World Symphony. In place of the Indian and Negro melodies that Dvořák incorporated or imitated in his work, Beach based the middle movements of her symphony, as well as the closing theme of the first movement, on the melodies of what she called 'Irish-Gaelic' folksongs, for which reason the whole symphony bears the title 'Gaelic'. Thus Beach's symphony was both a declaration of affiliation with Dvořák's aims and a correction of his methods. 'We of the north', Beach wrote in a letter to the *Boston Herald* that took explicit issue with Dvořák's prescriptions, 'should be far more likely to be influenced by old English, Scotch or Irish songs, inherited with our literature from our ancestors.'

Like many Americans, living in an increasingly multi-ethnic 'society of immigrants' that could claim no single identity on the Herderian model, Beach identified culturally not with the country of which she happened to be a citizen, but the country from which she descended ethnically – a conviction reinforced for her, as for many other Bostonians as well as other members of the Daughters of the American Revolution, by the assumption that her 'Celtic' blood descent identified her as a sort of Ur-American, an American aristocrat.

12. 20TH-CENTURY AMERICANISM. It is all the more noteworthy then, if ironic, that the first composer to achieve a style that plausibly represented a generic 'America' to classical music audiences both at home and abroad should have been Aaron Copland (the pupil of a Dvořák pupil, Rubin Goldmark), a left-leaning homosexual Jew thus triply marginalized from the majority culture of the land. The style that he created for this purpose, while based to an extent on the published cowboy songs he began mining with *Music for Radio* (1937) and continued to employ in the ballets *Billy the Kid* (1938) and *Rodeo* (1942), was deeply influenced by the music he heard during his later student years in Paris as the pupil of Nadia Boulanger, in particular the 'neo-classical' music

of Stravinsky. His characteristically wide-spaced, transparently orchestrated 'polyharmonies', like the famous one at the beginning of the ballet *Appalachian Spring* (1943–4), were particularly indebted to Stravinsky's example. They set the tone for a distinctively Americanist pastoral idiom, shared by such other Boulanger pupils as Roy Harris, Virgil Thomson and the younger Elliott Carter.

That idiom, it should be stressed, was as much a personal composerly invention as Balakirev's manner of harmonizing Russian folksongs. What made it an authentic and sharable national expression was its reception by other composers and its recognition by audiences. (The same can be said of the somewhat earlier British pastoralism of Vaughan Williams and his generation: similarly stimulated, initially, by the example of folklore collectors, it was also, in its mature phase, the product of invented composerly techniques.) In more overtly patriotic wartime works like *A Lincoln Portrait* (1942) or the *Fanfare for the Common Man* (1943), Copland's Americanism was quite comparable to the patriotic works then being composed by Soviet composers under the rubric of Socialist Realism; indeed Copland's turn to an Americanist style can be seen as part of a widespread 'anti-fascist' response to the Soviet call for a 'popular front', in which composers with left-wing political sympathies in many countries abruptly turned from a more cosmopolitan modernism to a more specifically national idiom. 'Communism', the American popular-front slogan went (drawing on the 'revolutionary' founding myth of the USA), 'is 20th-century Americanism.'

Earlier, in works like *Music for the Theater* (1925) and his Piano Concerto (1926), Copland had sought to ground an Americanist idiom in jazz, but achieved no comparable resonance. The music was rejected by the high-culture audiences of that time for seeming to degrade the 'beautiful forms of art', as Dvořák had put it, with threatening infusions from a non-literate and racially alien domain. George Gershwin's much greater personal success around the same time with the similarly motivated *Rhapsody in Blue* (1924), Concerto in F (1925) and *An American in Paris* (1928), was at least partly due to the perception that its openly proclaimed 'sociostylistic' thrust was in the opposite direction: elevating the low culture rather than profaning the high. But while enduringly popular, Gershwin's jazz-inflected concert works had scarcely any more impact on the development of musical Americanism than Copland's. The dominant attitude in America towards the Americanization of 'classical music' remained more Rubinsteinian than Balakirevesque, with the transplanted Russian conductor Serge Koussevitzky, at the helm of the Boston Symphony Orchestra, playing a midwife's role somewhat comparable to that played in Russia between 1882 and 1903 by the timber-magnate maecenas Mitrofan Belyayev.

13. Export nationalism, neo-nationalism. The Belyayev School was the incubator of Stravinsky's early development. Its watchword was 'denationalization', which the Russian composers at the turn of century viewed as their generation's signal achievement on behalf of Russian music and the mark of its cultural maturity. But of course Stravinsky achieved fame as a composer, and became a force in European music, through Serge Diaghilev's Paris-based ballet enterprise, which obliged him to write – at first very much against his generation's principles – in a folkloristic vein. Thus if Chopin's mature mazurkas and polonaises can be described (after Parakilas) as 'tourist nationalism', the style of Stravinsky's music for Diaghilev was 'export nationalism'. For a while, the more cosmopolitan Stravinsky's career became the more Russian his music had to seem.

What saved it from the inauthenticity this paradoxical description might seem to imply was the novel nature of Stravinsky's musical nationalism, which was modelled more on the example of the painters who now surrounded him than on that of the Russian music in which he had been reared. Art historians call it 'neo-nationalism', and it received a classic capsule definition in the art critic Yakov Tugenhold's review of the *Firebird* ballet: 'The folk, formerly the object of the artist's pity, has become increasingly the source of artistic style'. Neo-nationalism was the catalyst of Stravinsky's international modernism.

Glinka, Balakirev, Rimsky and the rest, when writing in a folkloristic idiom, sought only thematic material in peasant music, as an academic painter might choose a subject from peasant life, and subjected it to an artistic treatment that was, as we have seen, basically (and increasingly) 'German'. Stravinsky was the first Russian composer, and the only important one, to follow the painters and use folk music as a means of liberating his music from academic routine. His example had little resonance in Russia, partly because his music, composed for Paris, was little played at home. But Stravinsky's success in achieving and authenticating his modern idiom through the use of folklore was a powerful inspiration to Bartók, who tended to exaggerate Stravinsky's reliance on genuine individual folk artefacts (just as Stravinsky, in later life, was mendaciously at pains to disavow it).

14. Musical geopolitics. Stravinsky was also an inspiration to the musicians of France, with the even more paradoxical result that the emphatic Russianness of his early ballets made him the uncrowned king of French music and its standard-bearer against Germany. Yet Stravinsky was as much co-opted by the French as exalted by them, assimilated to a longstanding French aesthetic (or political) project that eventually served as midwife to the birth of international neo-classicism out of the spirit of French nationalism. Stravinsky became the at first inadvertent, later very committed, protagonist of this evolution.

The first to apply to Stravinsky the discourse of *clarté* and *lumière*, and to adumbrate its metamorphosis into purism, was Jacques Rivière (1886–1925), editor of the aggressively nationalistic *Nouvelle revue française*, who as early as 1913 touted Stravinsky, fresh from the *succès de scandale* of *The Rite of Spring*, as an exemplary artist for France. While everyone else was exclaiming at the orgiastic dissonance of *The Rite*, its *âme slave*, its sublime terror, Rivière called it 'absolutely pure' and 'magnificently limited'. In contrast to Debussy (whose impressionistic murkiness was rejected as Germanic by the new avant garde), Stravinsky exemplified the age-old, lately forgotten values that the editors of the *Nouvelle revue française* insisted were essentially and inherently French. 'Stravinsky has not simply amused himself by taking the opposite path from Debussy', wrote Rivière:

> If he has chosen those instruments that do not sigh, that say no more than they say, whose timbres are without expression and are like isolated words, it is because he wants to enunciate everything directly, explicitly and concretely. . . . His voice becomes the object's

proxy, consuming it, replacing it; instead of evoking it, he utters it. He leaves nothing out; on the contrary, he goes after things; he finds them, seizes them, brings them back. He gestures not to call out, nor point to externals, but to take hold and fix. Thus Stravinsky, with unmatched flair and accomplishment, is bringing about in music the same revolution that is taking place more humbly and tortuously in literature: he has passed from the sung to the said, from invocation to statement, from poetry to reportage.

By adding objectivity to the list of Stravinsky's virtues, Rivière completed the list of attributes that a decade later would collectively define the aggressively cosmopolitan stance known as 'neo-classicism', associated with the 'retour à Bach'. But Rivière had asserted them as French traits, only by implication as classical ones, and presciently located their musical focal point not in Stravinsky's neo-classical work but in his great neo-primitivist ballet, with its magnificent rejection (to quote another Parisian celebrator of Stravinskian neo-classicism, the Russian émigré critic Boris de Schloezer) of all merely personal 'emotions, feelings, desires, aspirations'. Thus another 'universalist' stance, constructed in determined opposition to the German universalism of psychological profundity, assumed its place as a covertly expressed nationalist agenda.

The 'retour à Bach' by way of Russia was thus an attempt to hijack the father, to wrest the old contrapuntist from his errant countrymen who with their abnormal psychology had betrayed his purity, his health-giving austerity, his dynamism, his detached and transcendent craft, and restore him – and France – to a properly élite station.

The battle of covert nationalisms was very much an open secret. It is what Ravel had in mind (though he characteristically put the question of nationality behind a smokescreen) when he told an interviewer, as early as 1911, that 'the school of today is a direct outgrowth of the Slavonic and Scandinavian school, just as that school was preceded by the German, and the German by the Italian'. And it is what Schoenberg had in mind when he announced his invention of 12-note technique to Josef Rufer, in 1921 or 1922, by saying, 'today I have made a discovery that will ensure the supremacy of German music for the next hundred years'. For the next quarter-century, the world of music would be a battlefield in which two national discourses vied for supremacy under cover of universalism.

That the one represented Germany and the other France was never in doubt. Americans recognized this most clearly. Roger Sessions, writing in 1933, noted with satisfaction that since the Great War, the German music that had once been taken as 'the voice of Europe's soul' had degenerated into 'mere *Vaterländerei*', while the music that mattered internationally now emanated from France, where 'music began above all to be conceived in a more direct, more impersonal, and more positive fashion', marked by 'a new emphasis on the dynamic, constructive, monumental elements of music'. After World War II, Virgil Thomson, a Boulanger pupil who had remained in Paris until 1940, when he assumed the influential position of chief music critic of the *New York Herald Tribune*, offered the hope that the Parisian current would now assume the hegemony that had formerly been Germany's. 'The latter part of our century', he predicted, 'will see the amalgamation of all the modernist musical techniques into a twentieth-century classic style; such an evolution, indeed, has been in progress ever since the First World War.' And yet he foresaw with some foreboding the likelihood of a Germanic backlash: 'Whether any of the atonal ways, the most resistant of all to absorption, can be saved for posterity or whether, as many atonalists believe, this style must either kill off all others or wholly die is a matter of passionate preoccupation to musicians' (Thomson, 1951).

15. The last of the Herderians and the Cold War. By not-so-subtly casting the intransigent aspirations of the 'atonalists' in terms reminiscent of the Nazi drive for *Lebensraum*, Thomson was playing a dangerous, two-sided game. René Leibowitz, then (despite residence as a 'displaced person' in Paris) the most passionate advocate of Schoenbergian hegemony, struck out against the other side in similar vein in a notorious critique of Bartók, in which he accused the Hungarian composer, who in his last works had stepped significantly back from the modernist extreme, of 'compromise', using another war-tainted code word (Leibowitz, 1947).

This was a tragic outcome for the one major 20th-century composer whose folkloristic 'nationalism' had remained close to the accommodating and non-aggressive Herderian ideal, and who therefore had no need of cloaking it in a discourse of universality or purity. The most telling early symptom of the musical Cold War was the ruthless partitioning of Bartók's works, like Europe itself, into Eastern and Western zones. At home, and in the rest of the Soviet bloc, the works in which folklorism seemed to predominate over modernism were touted by the cultural politicians as obligatory models and the rest was banned from public performance (see Fosler-Lussier, 1999). The Western avant garde, meanwhile, made virtual fetishes out of the banned works (particularly the Fourth Quartet, read tendentiously as proto-serial: Leibowitz, 1947; Babbitt, 1949) and consigned the rest to the dustbin of history. Bartók's continued reliance on folklore as an expressive resource was now read as a refusal to participate in the tasks mandated by history.

This Cold War-mandated antagonism towards Bartók's (or anyone's) folkloric side, loudly abetted by Stravinsky (Stravinsky and Craft, 1959), had repercussions not only in criticism but in composition. The composers who (it seemed) unexpectedly embraced serial techniques in the 1950s – Stravinsky and Copland prominent among them – now appear to have been seeking sanctuary in the abstract and universal (hence politically safe) truth of numbers rather than the particular (hence politically risky) reality of nation. The situation seems especially clearcut and poignant in the case of Copland, who was targeted for political attack by the American Legion, blacklisted by *Red Channels* and alarmed when his friends and former associates were called before the House Committee on Un-American Activities between March and June of 1950 (Copland and Perlis, 1989; his own turn to testify, before Senator Joseph McCarthy's Permanent Subcommittee on Investigations, came in 1953), and who completed the Piano Quartet, his first 12-note composition, in the autumn of the same year.

The Cold War maintained in a perpetual tense stalemate, entirely comparable to that of the contemporary geopolitical scene, the rival discourses of national particularity (as opposed to 'formalism') on the one hand, governmentally sanctioned and occasionally enforced in the Soviet bloc; and on the other, what Olivier Messiaen ironically dubbed 'the international grey on grey', the

increasingly academic atonalist avant garde, maintained by the universities in the English-speaking countries and in western Europe by municipal, corporate and sometimes overtly political patronage. Prominent examples of the latter have included the Darmstadt Ferienkurse für Neue Musik, founded in 1946 ostensibly with the financial backing of the city government but, behind that, with the cooperation of the Allied Military Government (i.e. the American army of occupation) as channelled by Everett Helm, an American composer who served from 1948 to 1950 as the United States Music Officer for the German state of Hessen (see Beal, 2000); and the Institut de Recherche et de Coordination Acoustique/Musique (IRCAM), established in 1977 for Pierre Boulez by the government of President Georges Pompidou (see Born, 1995). Another significant means of support for stylistically 'unmarked' avant-garde composition in western Europe came from the state-subsidized radio, which established electronic music studios in Cologne and Milan.

Spokesmen for élite avant-garde composition promoted it, in terms strikingly reminiscent of the New German School a century before, as humanity's musical vanguard, obedient to the demands of history. Those demands emphatically no longer included *Volkstümlichkeit*, as unforgettably driven home by Elisabeth Lutyens, one of the earliest British serialists, who in a Dartington lecture contemptuously lumped together the musicians of the 'English Renaissance' as constituting the 'cow-pat school'. Meanwhile, the cultural politicians of the Soviet bloc insisted – in the words of the infamous Resolution on Music of the Central Committee of the All-Union Communist Party (Bolshevik), promulgated on 10 February 1948 – that composers of contemporary cultivated music were obliged to maintain a 'deep organic connection with the folk and its musical and vocal art'. Three months later, shortly after the Communist Party had taken power in Czechoslovakia, the same principle was asserted in even stronger terms in the Manifesto (drafted in German by Hanns Eisler) of the Second International Congress of Composers and Music Critics, held in Prague in May 1948. 'What is needed', this document declared, 'is a style that combines the highest artistic skills, originality and quality with the maximum *Volkstümlichkeit*.'

Debate about musical nationalism was thus turned topsy-turvy under pressure of postwar geopolitics. Particularly striking was the way in which political organs that based their authority on the writings of Karl Marx – of all 19th-century political theorists perhaps the most hostile to nationalism (regarding it as a false consciousness that served the class interests of the bourgeoisie) and who notoriously insisted that all meaningful social relationships were inherently horizontal and international (as in 'Workers of all countries, unite!') – were now imposing from above a theory of art that implied an insular and vertical ordering of society, with aesthetic value flowing upwards, by fiat, from below. Aesthetic debate had dissolved incoherently into the general geopolitical contest. Artistic nationalism, enforced on one side of the Cold War divide and anathematized on the other, could no longer be viewed in terms other than those of competition between hostile hegemonic world systems.

But the demand for *Volkstümlichkeit* within the encroaching Soviet bloc was subordinate to the general demand that art be universally accessible and 'infectious' – a demand that originated not in the theories of Marx, who was generally uninterested in aesthetics, but in the neo-Christian doctrines of Tolstoy, who had tried (in his tract *What is Art?*, 1898) to erase the distinction between aesthetics and ethics (see Taruskin, 1976). As adopted (and adapted) by the Soviets, Tolstoy's aesthetic ideas became an instrument for rendering the arts an effective delivery system for political propaganda. *Volkstümlichkeit* was further discredited in the Soviet Union by the promulgation, during what is now called the *zastoy*, the Brezhnevite 'stagnation', of the so-called *novaya fol'kloristicheskaya volna* (New Folkloric Wave). This was a sort of state-promoted neo-nationalism, widely read as an alternative modernism that allowed Soviet composers a certain stylistic leeway in return for a 'voluntary' eschewal of Schoenbergian atonality (i.e. serialism), tainted by the cosmopolitanism (i.e. the Jewishness) of its founder.

The end of the Cold War in Europe had not, by the end of the century, led to the resurgence or rehabilitation of musical nationalism. The vastly enlarged scope of repertory to which all musicians have access thanks to recording and communications technology has tainted purisms of all kind with a musty air and heightened the sense that the world's cultures are now 'an interconnected system' in which 'purely national cultures are nowhere to be found' (Toivanen, 1997). That may be read as a sign of postmodernity, as may the challenge to the prestige of what used to be called 'serious music' (after the German *ernste Musik*) and the concomitant boost in the intellectual prestige of what used to be called the commercial or entertainment genres (*Unterhaltungsmusik*) in the wake of the protest movements of the 1960s. Within the academy, the combined influence of post-colonial theory and multi-culturalism since the 1980s has led to a shift in the terms of the debate, with the dominant musical culture now increasingly identified as that of American popular music, maintaining hegemony through a global dissemination powered by the international market economy, and resistance identified increasingly in local rather than national terms (Frith, 1996; Taylor, 1997).

The arbiters of contemporary ('postmodern') music criticism are increasingly to be found within the world of ethnomusicology, which claims both a global perspective that supersedes the older eurocentric discourse and a critical awareness of local and idiolectal trends ('micromusics') that (as McLuhan predicted in the 1960s) now tend, in the sunset of print culture, to overshadow the older discourse of nation. To 'think globally and act locally', as the cultural-studies maxim would have it, is to destabilize the concept of nation as primary cultural unit. 'We are all individual music cultures', as one contemporary theorist puts it, co-existing now and in the forseeable future in a 'fascinating counterpoint of near and far, large and small, neighborhood and national, home and away' (Slobin, 1993). This may as yet be a wishful description, but the world it envisages is in any case a less bloody one than the one that nationalism has bequeathed to us.

RICHARD TARUSKIN

National Music Council. British organization, founded in 1953 by the government. It was originally conceived as the British representative on the International Music Council, but has become increasingly concerned with activities within Britain. In collaboration with other British arts councils, the British Council and its member organizations, it aims to promote and represent the interests of organizations working within music in the UK. In 1972 it initiated the Local Authority Award Scheme. □

National Opera Studio. London training school established in 1978 as the successor to the London Opera Centre; *see* LONDON (i), §VIII, 3(vi).

National School of Opera. London training school founded in 1948; its work was continued by the London Opera Centre from 1963 to 1978. *See* LONDON (i), §VII, 3(vii).

National Sound Archive [NSA]. One of the largest SOUND ARCHIVES in the world, based at the British Library, London. The archive was founded after World War II by Patrick Saul, who had visited the British Museum in the 1930s in search of an ex-catalogue record only to find that sound recordings were not preserved there at all – a situation he resolved to remedy. Institutional support was not forthcoming in the 1950s until Decca gave £500 and a Birmingham-based Quaker trust donated £2000. The archive opened as the British Institute of Recorded Sound (BIRS) in 1955 on British Museum premises in Russell Square. From 1961, following lobbying by musicians including Adrian Boult and Myra Hess, the government awarded the archive an annual grant-in-aid. In 1966 it moved to premises in South Kensington; it became part of the British Library in 1983 and in 1997 moved with the library to its new building in St Pancras.

The music collections of the NSA are divided into four sections (Western art music, popular music, jazz, and traditional and non-Western classical musics), each with its own curator. Copies are received of most commercially released British recordings, and the archive purchases recordings from throughout the world. It provides the only public access to the BBC Sound Archives and has itself recorded off-air from BBC networks since the early 1960s. The archive has also received donations from private collectors.

The earliest field recordings held in the NSA are the A.C. Haddon cylinders made in the Torres Straits in the 1890s. Other notable ethnographic collections include those of Jim Carroll and Pat Mackenzie in the UK, A.L. LLOYD in Europe, KLAUS WACHSMANN in Uganda, and Brian Moser and Donald Taylor in Canada. The archive also makes recordings of events including the WOMAD festival and jazz performances in London.

Besides its own catalogue and the catalogues of the BBC Sound Archives, the NSA holds a large collection of discographies, record catalogues and periodicals. Its publications include the *Bulletin of the British Institute of Recorded Sound* (1956–60) and the journal *Recorded Sound* (1961–84). □

National Training School for Music. London conservatory founded in 1873, replaced by the Royal College of Music in 1882. *See* LONDON (i), §VII, 3.

National Youth Orchestra of Great Britain. Orchestra founded in 1947 by Ruth Railton for children under the age of 20 with exceptional musical talent who were not in full-time musical education.

Native American Indian music. *See* AMERINDIAN MUSIC and UNITED STATES OF AMERICA, §II, 4.

Natra, Sergiu [Nadler, Serge] (*b* Bucharest, 12 April 1924). Israeli composer of Romanian birth. He studied at the Bucharest Academy of Music with Leo Keppler. In 1945 he won the George Enescu Prize for his March and Chorale (which was performed by the Palestine PO in 1947, 14 years prior to his immigration to Israel); he won the Romanian State Prize in 1951. In 1961 he settled in Tel-Aviv, where his music was soon recognized and performed at the Israel Festival by the Israel PO and Israel Chamber Ensemble. From 1975 to 1985 he taught at the Rubin Academy of Music at Tel-Aviv University. His Israeli honours include the Milo (1965), Engel (1970) and Prime Minister (1984) prizes for composers.

Natra's early works show the influence of Stravinsky, Prokofiev and Hindemith, composers whose music had been banned in Bucharest and played only by an orchestra of Jewish musicians who had been dismissed from other orchestras in the city. The same Jewish orchestra performed Natra's first works of 1943–4. Natra's style changed after World War II to incorporate more folk elements, but turned back to a sonorous atonal style in 1954. A perceived link with French atonality marginalized him during the 1970s. Typical of his compositions is a manipulation of short motives through developing variation, as in the Piano Trio (1971). The use of Hebrew and an attention to biblical themes is characteristic of dramatic vocal works such as the *Song of Deborah* (1967) and *'Avodat ha-qodesh* ('Sacred Service', 1976). His works for the harp, among them Sonatina (1969), *Prayer* (1970) and *Divertimento* (1976), have won him international recognition.

WORKS
(*selective list*)

Orch: March and Chorale, 1944; Sym. no.1, 1953; Toccata, 1963; Music for ob, str, 1965; Variations, pf, orch, 1966; Voice of Fire (ballet), 1967; Pages from a Composer's Diary, 1978; Concerto a quatro, cl, trbn, vc, org, str, 1993

Vocal: 4 Poems, Bar, orch, 1957; Song of Deborah, Mez, chbr orch, 1967 [from ballet Voices of Fire, 1967]; 'Avodat ha-qodesh [Sacred Service] (trad., Jewish liturgy), T, chorus, org, 1976; Hours, Mez, cl, vn, pf, slide projections, 1981; Ness-Amim Kantata, 1984

Chbr and solo inst: Music for vn, hp, 1960; Music, hpd, 6 insts, 1964; Sonatina, hp, 1965; Interlude, hp, 1968; Sonatina, tpt, 1969; Sonatina, trbn, 1969; Prayer, hp, 1970; Pf Trio, 1971; Divertimento, hp, str qt/str orch, 1976; Sonata, 4 hps, 1993; Sonata, hp, str qt, 1997

Principal publisher: Israel Music Institute

URI TOEPLITZ/RONIT SETER

Nattiez, Jean-Jacques (*b* Amiens, 30 Dec 1945). French musicologist and ethnomusicologist, active in Canada. He studied semiology with Georges Mounin and Jean Molino in Aix-en-Provence (1968–70), and took the doctorate in musical semiology under Nicolas Ruwet at the Sorbonne in 1973. He was appointed professor of musicology in 1972 at the University of Montreal, where he served as director of the Groupe de Recherches en Sémiologie Musicale, 1974–80. An internationally celebrated scholar, he was elected a Member of the Royal Society of Canada in 1988, awarded the Dent Medal of the Royal Musical Association in 1989 and appointed Member of the Order of Canada in 1990.

Nattiez's earliest book on the foundations of musical semiology (1975), which has never been translated, initiated a career during which he has written prolifically as a music theorist and historian. In addition to authoring studies of Wagner (1983, 1993), Nattiez has worked closely with Boulez, with whom he co-edited the series Musique/Passé/Présent and whose collected writings and letters (written to John Cage) he edited (1986, 1991). His *Musicologie générale et sémiologie* (1991), an outstanding exposition of post-structuralist musicological methodology, runs counter to most of the trends of the 'New Musicology' of the 1980s (a term which, according to Derrick Puffett, Nattiez was the first to use; see Puffet, 1994). Nattiez has also had a parallel career as an ethnomusicologist, conducting fieldwork in Uganda, and in the Arctic regions of Canada, northern Japan and Siberia with the Inuit, Ainu and Chukchi. He has won international recognition through his recordings (*Inuit Iglulik Canada*, 1993; *An Anthology of Music from Uganda*, 1996) and research in these areas. One of the first scholars to introduce semiotics into musical analysis, his scholarship is characterized by his diversity of interests, range of methodologies, and expertise in linguistics and music. His consistent focus on epistemological issues links him to the tradition of 18th-century French Encyclopedists, and his lifelong interest in music and literature is reflected in his book *Proust musicien* (1984) and his novel *Opéra* (Paris, 1997). His scholarly articles have been published in three collections (1988, 1993, 1999).

JONATHAN DUNSBY

Natural (Fr. *bécarre*; Ger. *Auflösungszeichen*, *Quadrat*; It. *bequadro*; Sp. *becuadro*). In Western notation the sign ♮, normally placed to the left of a note and thereby cancelling a flat or sharp that would otherwise affect that note (either as an accidental earlier in the same bar or as part of the prevailing key signature). The adjective 'natural' indicates a note that is neither sharpened nor flattened.

See also ACCIDENTAL and NOTATION, §III, 3, 4.

RICHARD RASTALL

Natural horn. Term applied to the many different types of valveless horn. *See* HORN, §2(i) and (iii).

Natural notes. The notes of the harmonic series of a brass instrument, particularly of a 'natural' instrument, i.e. one not provided with valves, slide or keys in order to change the tube length while playing, and therefore confined to one series of harmonics or to such other series that are made available by changes of crook. The French expression 'sons naturels' is also used in music for horn to countermand 'sons bouchés' ('stopped notes') and in music for violin, harp etc., to countermand playing in harmonics.

□

Naturhorn (Ger.). Hand HORN.

Nāṭyaśāstra. Sanskrit treatise on Indian dance, dramaturgy and music. *See* INDIA, §II, 2(i)(a) and MODE, §V, 2(ii).

Natzka, Oscar (*b* Matapara, 15 June 1912; *d* New York, 5 Nov 1951). New Zealand bass. He was at first a blacksmith, but in 1935 won a scholarship to study at Trinity College of Music in London with Albert Garcia.

In 1938 he was engaged to sing at Covent Garden, where he made his début as Wagner in *Faust* and later created the leading role of De Fulke in George Lloyd's *The Serf*. He also sang in *Rigoletto* and *Die Meistersinger*. After war service with the Royal Canadian Navy, he returned to sing leading bass roles at Covent Garden in 1947, notably Sarastro; the next year he made his début at the New York City Opera as Sparafucile in *Rigoletto*. Thereafter he sang widely in North America in opera and concerts, but in 1951 he was taken ill during a performance of *Die Meistersinger* in New York, and 13 days later he died. Possessor of an outstandingly powerful and resonant bass voice, he made a number of recordings of ballads and operatic arias in the late 1930s and the 1940s.

PETER DOWNES

Nau, Simon (*fl* 1638–42). English violinist, probably brother of STEPHEN NAU.

Nau [Naw, Noe, Nor], **Stephen** [Etienne] (*b* Orléans, *c*1600; *d* London, 13 March 1647). French composer, violinist and dancing-master. Little is known of him before he was given a post in the English court violin band by a patent dated 4 March 1627, back-dated to Michaelmas 1626. However, a virtuoso manuscript fantasia for solo violin (formerly in *PL-WRu*, now in *D-Ba*) is ascribed to 'Stephan Nau . . . der Princessin zu Heydelberg Dantzmeister', and he is recorded as 'Gallus Aureliensis' (a Frenchman from Orléans) at Leiden University on 11 June 1627. He was evidently back in England by Christmas, for, by a warrant dated 22 November 1628 back-dated to then, he inherited the post of composer to the violin band previously held by Thomas Lupo.

He was evidently highly valued at the English court, for he received the enormous salary of £200 a year (the same as the Master of the Music) on his arrival, and was made the effective leader of the violin band within the year. In the course of his duties he collaborated with Sebastian La Pierre in the production of dances for James Shirley's masque *The Triumph of Peace* (February 1634) and the Hampton Court production of William Cartwright's *Royal Slave* (January 1637). He served at court until the beginning of the Civil War in 1642, but he did not subsequently leave England as did most of the other French musicians. He was ill in 1644 (Sir Theodore Turquet de Mayerne's case notes are in *GB-Lbl*) and died on 13 March 1647 in the London parish of St Giles-in-the-Fields. He was survived by his wife Cornelia and eight children. The Simon Nau who served in the violin band from 1638 to 1642 was probably his brother.

Nau's music deserves to be better known. Only eight pieces survive in English sources (*GB-Ob*,*US-NH*; see *DoddI*), all in fragmentary form, but 14 complete four- and five-part dances apparently by him (*S-Uu*, ed. in MMS, viii, 1976) and a six-movement 'ballet' for five instruments (*D-Kl*, ed. J. Ecorcheville: *Vingt suites d'orchestre du XVIIe siècle français* Paris, 1906/*R*) also survive. In 1636 a book containing music by Nau was in the collection of William Cavendish, Duke of Newcastle. Although he restricted himself to the fashionable dance forms of the day, Nau was a composer of skill and imagination, with a feeling for string sonority and a fondness for quirky cross-rhythms and unpredictable harmonies.

PETER HOLMAN

Naudé, Gabriel (*b* Paris, 2 Feb 1600; *d* Abbeville, 30 July 1653). French bibliographer and composer. He studied medicine in Paris and Padua. In 1633 he received the honorary title of *médecin du roi*. As librarian to Cardinal Mazarin, he established in 1644 the first public library in France; the Fronde of the Paris *parlement* (1648–53) ordered that it be sold, and Naudé purchased many of the medical books. He then left for Stockholm, where he danced in the court entertainments of Queen Christina during the first half of 1653. His participation is documented by a piece by him headed 'Galliard Mons: Nau ae' [Naudé] (in a manuscript at *S-Uu*, ed. in MMS, viii, 1976). Other dances bearing the ascription 'Noë' are possibly by him or by Stephen Nau. He died on his way back to France. (J.J.S. Mráček: 'An Unjustly Neglected Source for the Study and Performance of Seventeenth-Century Instrumental Dance Music', *IMSCR XI: Copenhagen 1972*, 563–75)

JAROSLAV MRÁČEK

Naudot, Jacques-Christophe (*b* *c*1690; *d* Paris, 26 Nov 1762). French composer, flautist and teacher. He is sometimes erroneously referred to as Jean-Jacques. First heard of in 1719, when he was identified as a 'master of music' in a marriage document, Naudot published his first compositions in 1726. According to Quantz's autobiography, Naudot was among the flautists then active in Paris. He was described by Walther (1732) as a 'flourishing' French flautist, and in 1739 was one of three flautists (with Lucas and Michel Blavet) whose 'rare talent' for the flute caused the poet Denesle to dedicate his poem *Syrinx, ou L'origine de la flûte* to them. Although it seems clear that Naudot was well known in Paris as a player, it is not known where he played; perhaps it was mainly in private salons, for the dedications to many of his works show that he had a number of aristocratic and bourgeois pupils and patrons. He may have taught the hurdy-gurdy and musette as well as the flute. Naudot was a freemason, and on 7 May 1737 was elected 'superintendent of music' for the Coustos-Villeroy lodge; in the same year he brought out the earliest collection of masonic songs to appear in France. Between 1726 and 1742 he published a long line of compositions, principally for the flute; thereafter they appeared less regularly, and after 1752 he published no more. When he died in 1762, an official document described him as a 'master of flute and of music'. (Giannini mistranslates 'm.^{e}' in this document as 'merchant', and hence uses it as the basis for an unfounded hypothesis about Naudot's association with the flute trade.)

Among Naudot's compositions, of special importance are the flute concertos of op.11, probably published between 1735 and 1737, which were the second printed set of flute concertos to appear in all Europe (preceded

only by Vivaldi's *VI Concerti a flauto traverso*, op.10). In these concertos Naudot showed himself to be a master of the Italian concerto and of a technically advanced flute style full of rapid scalic runs and broken-chord figuration. Naudot's early solo sonatas for flute and continuo, generally in four movements, already showed a leaning towards this style. By op.9 he had developed a new type of moderate-tempo third movement, called 'Aria', which was adopted by his contemporaries Boismortier and Blavet. In his later flute works Naudot occasionally approached the *galant* style in his slow movements, and his fast movements became more clearly phrased, concise and lightly flowing. Most of his duet and trio sonatas are lighter in vein than the solo works, except for the last trios (op.15), three-movement works which contain elements of the Italian symphonic style (just beginning to be heard in Paris) as well as skilfully worked out fugues.

Apart from his flute works, Naudot produced a set of difficult sonatas for hurdy-gurdy and continuo (op.14) of which three exploit double stops more thoroughly than any other composer's works for the instrument, a set of concertos designed principally for a solo hurdy-gurdy or musette (op.17), dedicated to the hurdy-gurdy virtuoso Danguy *l'aîné*, and a number of lightweight pieces for hurdy-gurdies or musettes. He also published two books of simple pieces for two hunting horns or trumpets and, in his collection of masonic songs, two marches for hunting horns, flutes, oboes and continuo and his only known vocal work, a 'Duo pour les Francs-maçons'. Though Naudot wrote much music that was frivolous, his best works were important in contributing to the greater virtuosity the flute was gaining in French music in the 1730s and in helping to strengthen the role of the Italian style and of the solo concerto in French woodwind literature. They also comprise some of the most rewarding pieces produced by the French flute school. His works were reprinted many times and must have been well liked by the amateur players of his day.

JANE M. BOWERS

Naumann. German family of musicians.

(1) **Johann Gottlieb Naumann** (*b* Blasewitz, nr Dresden, 17 April 1741; *d* Dresden, 23 Oct 1801). Composer and conductor. He received his first musical training at the Kreuzschule in Dresden, and in May 1757 went to Italy as travelling companion of the Swedish violinist Anders Wesström. In Padua Tartini took an interest in him, as did Padre Martini in Bologna (1762) and Hasse in Venice. In 1762 he made his début in Venice as an opera composer with the intermezzo *Il tesoro insidiato*. At Carnival 1764 he collaborated with two other composers in the *opera buffa Li creduti spiriti*, and in the same year, on Hasse's recommendation, he was engaged as second church composer at the Dresden court. There he was promoted to church and chamber composer (1765) and then to Kapellmeister (1776). He made further visits to Italy (1765–8, 1772–4), where his operas were successful, as they were elsewhere in Europe (*Le nozze disturbate* was produced by Haydn in Eszterháza in 1780). His *Armida* on a libretto by Bertati was one of several spin-offs of a Durandi/De Rogatis composite making the rounds in Italy – this one with direct links to Haydn's opera of the same title.

In 1777, through the negotiations of Count Löwenhjelm, the Swedish diplomat in Dresden, Naumann was appointed to reform the Stockholm Hovkapell and assist

Title-page of the German edition of the vocal score of J.G. Naumann's 'Cora och Alonzo' (Leipzig, 1780); engraving by Geyser after Johann Eleazar Schenau

Gustavus III with his opera plans. His work there culminated in the operas *Cora och Alonzo*, performed at the inauguration of the new opera house in Stockholm in 1782, and *Gustaf Wasa* in 1786, based on an idea of the king's and long regarded as the Swedish national opera. In 1785–6 he was guest opera composer and conductor in Copenhagen, where he also reformed the Hofkapelle and improved the organization of the court opera. For Copenhagen he composed the tuneful and charming Danish opera *Orpheus og Eurydike* (1786). After refusing an offer to continue his reforms in Copenhagen, Naumann accepted a favourable lifelong contract as Oberkapellmeister in Dresden (1786). He also became a leading figure in the musical life of the city, conducting two concert series and directing performances of oratorios. He visited Berlin several times at the request of Friedrich Wilhelm II, and in 1788–9 he produced *Medea* and *Protesilao* at the Royal Opera House, Berlin, where he was guest conductor and composer. In 1792 he married Catarina von Grodtschilling, daughter of a Danish vice-admiral.

Naumann's extraordinarily large output includes about 25 stage works, one French and 11 Italian oratorios (most for the Catholic Hofkirche in Dresden), German choral cantatas, 21 masses and many other sacred pieces, Italian and German solo cantatas, lieder and a few instrumental works. He was the most important personality in the music history of Dresden between Hasse and Weber, as well as one of the most esteemed musicians in Europe in the late 18th century and one of the last German composers to study in Italy. His early operas were in the Neapolitan and neo-Neapolitan styles, but showed the influence of Hasse, Martini and the *buffo* art of Galuppi, Piccinni and Paisiello. This synthesis of styles was achieved in his festival opera *La clemenza di Tito* (1769), which established *opera seria* at the Dresden opera house, and in *Solimano* (Carnival 1773). But he gradually drew away from this starting-point and modelled his later operas, such as *Orpheus*, *Medea* and *Protesilao*, on the work of Gluck and the French operas with choruses and ballets. Naumann's most popular opera, *Cora*, is notable for its melodies, and quickly spread as a concert opera in German translation (see illustration); the overture presages *Der Freischütz*. Naumann considered *Gustaf Wasa*, with its popular march tunes and echoes of Baroque music, his best work. The operas of his last period in Dresden, such as *La dama soldato* (1791) and *Aci e Galatea* (1801), contain elements of *opera semiseria*. Together with the poet Gottfried Körner, he seriously put forward the idea of a German national opera.

Aware of the literary manifestations of the *Sturm und Drang*, Naumann used an extremely sensitive and intimate style representative of early Romanticism in his later works, above all in the church music, Italian solo cantatas and lieder. Particularly innovatory are the harmony, the recurring motifs, the cultivation of woodwind and the choice of texts, which increasingly emphasize nature worship and the cult of elevated friendship. His *Vater unser*, in the style of a lyrical choral cantata, was esteemed for many years beside Graun's *Tod Jesu* and Haydn's *Creation*. Naumann's songs, of which his masonic lieder were the most popular, are similar to those of Hiller and the Berlin lied composers. His early instrumental music is in the style of Tartini, but later he was influenced by the Viennese Classical style (for example, in the keyboard concerto). He also wrote several works, including a set of 12 sonatas, for the glass harmonica, in which he took such a strong interest from 1780, both as a solo instrument and in chamber groups, that he occasionally suffered nervous disorders from its effects.

Exercises, corrected by Tartini, *GB-Lbl*

(2) Emil Naumann (*b* Berlin, 8 Sept 1827; *d* Dresden, 23 June 1888). Scholar and composer, grandson of (1) Johann Gottlieb Naumann. A son of M.E. Adolph Naumann, a professor of medicine, he studied with Schnyder von Wartensee and Mendelssohn (1842–4) and received the doctorate from Berlin University in 1867. He was a composer and scholar in Bonn and later in Berlin, where he held the post of Hofkirchen-Musikdirektor from 1850 and edited a cycle of psalms for the church year in 1855. He moved in 1873 to Dresden, where he lectured

on music history at the conservatory and was appointed professor. He published numerous pamphlets on music aesthetics and music history, among them *Musikdrama oder Oper?* (1876), in which he turned against Wagner's Bayreuth productions. His *Illustrierte Musikgeschichte* (1880–85), which was translated into several languages and went through many editions, is his most widely known book. His compositions, reminiscent of the style of Mendelssohn and Spohr, include three stage works, sacred music, lieder, two overtures and a few other instrumental pieces. His sister, Ida Naumann Becker (*d* 1897), was a singer and lied composer.

WORKS

VOCAL

Sacred: Christus der Friedensbote (orat), 1847–8; Missa solennis, choir, orch, 1851; Die Zerstörung Jerusalem's durch Titus (cant., E. Schüller), 1855; 12 psalms in Psalmen auf alle Sonn- und Fest-Tage des evangel. Kirchenjahres, Musica sacra, viii–x, ed. Emil Naumann (Berlin and Posen, *c*1855); Dank- und Jubel-Cantate zur Feier der Siege Preussens im Jahre 1866 (Pss xxi–xxii), op.30 (Berlin, ?1867); at least 16 psalms pubd separately, opp.8–15, 17–20; liturgy, op.16

Stage: Judith (heroische Oper, 3, E. Naumann), Dresden, 1858; Die Mühlenhexe (Spl, 4), Berlin, 1862; Loreley (op, 4, O. Roquette), Berlin, 1889

Other works: lied collections, opp.2, 4, 6, 7, 21, 22, 26, 27, 29, 31, 2 others not numbered, most pubd in Berlin, *c*1850–67; separately pubd songs, opp.3, 28, 29, 2 others not numbered

INSTRUMENTAL

Sonate, pf, vn, op.1 (Leipzig, *c*1850); Concert-Ouverture zum Trauerspiel: Loreley, orch, op.25 (Leipzig and New York, 1864); Festmarsch zur Eröffnung der Subscriptionsbälle im königlichen Opernhause zu Berlin, pf (Berlin, 1865); Ouverture zu Käthchen von Heilbronn, orch, op.40 (Leipzig and Brussels, 1886); Fackeltanz zur Vermählung der Prinzessin Alexandrine (Berlin, n.d.)

(3) (Karl) Ernst Naumann (*b* Freiberg, 15 Aug 1832; *d* Jena, 15 Dec 1910). Scholar, editor and composer, grandson of (1) Johann Gottlieb Naumann and cousin of (2) Emil Naumann. He studied with Moritz Hauptmann and E.F. Richter in Leipzig and received his doctorate from Leipzig University in 1858. From 1860 to 1906 he was university music director, director of academic concerts and city organist in Jena, and he was appointed professor in 1877. He edited six volumes of Bach's cantatas and keyboard works for the Bach Gesellschaft's collected edition (after 1882), a nine-volume edition of Bach's organ works for practical use (1899–1904) and several of the first publications of the Neue Bach-Gesellschaft (*c*1901–3). His edition of Haydn's string quartets, planned for Mandyczewski's collected edition, was left incomplete. He also published arrangements of works by Beethoven, Handel, Mendelssohn, Mozart and Schumann. His compositions include chamber music, lieder and sacred pieces.

WORKS

published in Leipzig, n.d., unless otherwise stated

Vocal: lieder, opp.3, 11, 15; Salvum fac regem, TTBB, op.14; Ehre sei Gott in der Hohe, 4vv; 2 Psalms, Eng. trans. (New York, n.d.), cited in Pazdírek, doubtful

Inst: Sonata, va, pf, op.1; 4 Stücke, vn, pf, op.2; 3 Fantasiestücke, vc/va, pf, op.4; 3 Fantasiestücke, va/vn, pf, op.5; Str Qnt, 2 vn, 2 va, vc, op.6; Trio, pf, vn, va, op.7; 5 Impromptus, pf 4 hands, op.8; Str Qt, op.9, also arr. pf 4 hands; Serenate (Nonette), 2 vn, va, vc, b, fl, ob, bn, hn, op.10 (Berlin, n.d.); Str Trio, op.12, also arr. pf 4 hands; Str Qnt, 2 vn, 2 va, vc, op.13; Pastorale, small orch, op.16

DIETER HÄRTWIG/LAURIE H. ONGLEY (1), DIETER HÄRTWIG (2, 3)

Naumann, Siegfried (*b* Malmö, 27 Nov 1919). Swedish composer, conductor and teacher. After initial studies in the violin, theory and composition with his father, he studied the violin with E. Wolf and instrumentation with H. Myrtelius, also attending the Stockholm Musikhögskolan (1942–5) as a pupil of Melchers, Mann and Broström. He was conductor of the Örnsköldsvik Music Society (1945–9) and then studied composition with Pizzetti at

the Accademia di S Cecilia (1949–53), with Malipiero and with Orff; his later conducting studies were at the Salzburg Mozarteum and with Furtwängler and Scherchen. In 1950 he made his professional conducting début at Fylkingen and he made his first broadcast in that year. He then appeared with the Stockholm PO (1951), the Oslo PO (1958), and the Finnish RO (1962); in 1954–5 he was the conductor of the Gävleborg SO. In 1962 he founded the ensemble Musica Nova, with which he has made recordings and undertaken tours of Scandinavia, England and Germany. A cultured and sensitive conductor, with a wide repertory, he has made an important contribution to the furtherance of new music in Scandinavia. Between 1963 and 1983 he taught conducting at the Stockholm Musikhögskolan from 1976 as professor. In 1976 he also began teaching at Malmö Conservatory.

As a composer he began by working in a traditional style, and then – after a silence of eight years, during which he studied in Darmstadt and Paris – he initiated a new phase with *Ruoli* op.1 (1959), where aleatory episodes are introduced. The intense and richly ornamented *Il cantico del sole* brought him international renown when it was performed at the 1966 ISCM Festival. His music shows a strong feeling for sonority and pregnant rhythm, and utilizes the individual musician's capacities to listen and respond (notably in the orchestral pieces *Estate* and *Suoni esposti*). He has been able to combine the techniques of new music with a vital and organic musicianship.

WORKS
(selective list)

Orch: Trasformazioni, op.5, 1962; Spettacolo I, op.18, 1967; Estate (Sommar), op.21, 4 orch groups, 1969; Teatro strumentale, op.22, 19 solo insts, str, 1971; Suoni esposti (Ljudposter), op.23, 4 orch groups, 1970; Region-musik no.1, op.25, wind, kbds, perc, 1971; Materialstudier i improvisation, op.30, 1974; Ungdom, op.31, 4 inst groups, 1975; Fanfarer, op.25, wind orch, 1974–6; Ljudtrappa, op.38, wind, perc, 1982; Strutture, op.45, 1986; Marcia a Montecelio 1–2, opp.44a–b, wind, 1986, rev. 1987

ROLF HAGLUND

Naumbourg, Samuel (*b* 1815; *d* 1880). French composer and reformer of synagogue music. *See* JEWISH MUSIC, §III, 3(iv).

Nauru. *See* MICRONESIA, §VI.

Naushad [Ali, Naushad] (*b* Lucknow, 25 Dec 1919). Indian Hindi film music director. Naushad was among the most successful Hindi film music directors of the 1940s to 1960s, earning widespread fame as a composer of film songs based on Indian classical and folk traditions. As a young boy in Lucknow he spent many hours listening to the orchestra accompanying silent films in a nearby cinema, in defiance of his father's wishes. In his teens he formed a touring theatrical company with its own orchestra, which visited cities in Uttar Pradesh, Gujarat and Rajasthan. After this first experience as a composer, Naushad moved to Mumbai (Bombay) in 1937 seeking work in the Hindi film industry. For a short time he played piano in the orchestra at the Film City studio, Tardeo, but soon acquired work as assistant to music director Khemchand Prakash in Ranjit Movietone. His début as a single music director came in 1940 with Bhavnani Production's *Prem nagar*. When Naushad became music director at Kardar Studios in 1942, his popularity as a film song composer began to soar. He produced a succession of enormously popular songs in Kardar's films, including those based on his native Uttar Pradesh folksongs in *Rattan* (1944) and classically based tunes for the historically orientated *Shahjahan* (1946). A.R. Kardar granted Naushad permission to accept contracts outside the studio, which led to further hit songs in films such as Mehboob Studios' *Anmol ghadi* (1946) and *Andaz* (1949) and Wadia Films' *Mela* (1948), which greatly increased the films' box-office draw.

In the 1950s Naushad drew more heavily on Hindustani classical music, beginning with *Baiju bawra* in 1952. His film songs based on classical rāgas (such as *Tu ganga ki mauj* on rāga Bhairavī, *Insaan bano* on rāga Gujari Toḍī, and *Man tarpat Hari darshan ko aj* on rāga Malkauns from *Baiju bawra*) met with huge success among Indian audiences, and this use of rāgas as a base for film song melodies became a stamp of his musical style.

Naushad continued composing songs for Hindi films into the 1990s, although with increasingly fewer commitments. He has received numerous awards for his contributions to Hindi film music, from a Gold Medal presented by the Gramophone Company of India and Columbia Records in 1947 for the highest number of record sales in India and abroad to Best Music Director awards from Filmfare, the Indian Film Journalist Association, the Film Sansar League, the Bombay Youth Circle, and others. In 1977 he received the Maharashtra State Government Award and in 1982 the Dada Saheb Phalke Award (named after the first Indian silent film maker).

ALISON ARNOLD

Nauss, Johann Xaver (*b* *c*1690; *d* Augsburg, 15 Nov 1764). German composer, organist and teacher. He went as a young man to Augsburg, where he was twice married, in 1718 and 1742. He was an organist at the collegiate church of St Georg until 1727 and thereafter worked as a teacher until his appointment in 1734 as organist of Augsburg Cathedral. Two of his most important compositions are listed in the 1753 catalogue of the Augsburg publishing firm, J.J. Lotter. *Die spielende Muse, welche die Jugend in leichten Praeludien nach den Kirchen-Tönen eingerichteten Versetten, Fugen und Arien auf dem Clavier nach der kurtzen Octave übet*, a collection of easy pieces for beginners, was published in five parts by various firms, Lotter producing the last two (1748, 1752); in 1751 the same publisher issued a teaching manual written by Nauss, *Gründlicher Unterricht den General-Bass recht zu erlernen*.

ADOLF LAYER

Naust. French firm of woodwind instrument makers. It was founded by Pierre Naust (*b* ?La Couture, *c*1660; *d* Paris 1709). He probably worked for Etienne Fremont (*d* *c*1692), and on the latter's death succeeded him in the business. Naust's wife Barbe Pelletier Naust (*d* 1726), a relation of Fremont's, succeeded to the business on her husband's death and in 1719 formed a partnership with her foreman and son-in-law Antoine Delerablée. On her death she was succeeded by her daughter Jeanne and Delerablée. The firm was documented as 'maître faiseur d'instruments de la maison du Roy' in 1715, and in 1719 and 1721 supplied 'flûtes' to the Munich court. An invoice dated 20 December 1721 for a flute with three 'cors' (*corps de rechange*) is the earliest known reference to a four-piece flute with alternate joints; the transition from the three-piece Baroque flute to the four-piece model may have been accomplished in the Naust workshop; they are the only flute makers whose surviving instruments include both types (Giannini, 1993).

TULA GIANNINI

Nauwach, Johann (*b* Brandenburg, *c*1595; *d* ?Dresden, *c*1630). German composer. He went to Dresden as a choirboy about 1607 and spent most of the rest of his life there. In 1612 the Elector of Saxony sent him to Turin and to Florence, where he studied the lute with Lorenzo Allegri and became acquainted with the latest Italian vocal music. In 1618 he was back in Dresden, where five years later he described himself as a chamber musician. His second collection of songs in 1627 was occasioned by the same wedding festivities in Torgau as Schütz's opera *Dafne*.

Nauwach's two collections of songs are an important link between Italian monodies and the emerging German continuo lied of the 1630s. The Italian *Arie* (1623) are heavily influenced by Caccini, d'India and other monodists; as in *Le nuove musiche* there are through-composed madrigals (including an elaborately ornamented version of Caccini's own *Amarilli*) and strophic dance-songs in *AABB* form. The musically superior 1627 volume, the first German collection of continuo lieder, is an anthology of various italianate and older German song types and some immediate precursors of the mid-17th-century lied. It includes a set of strophic variations for two voices and continuo based on the romanesca, a madrigal-like lied with embellishments and a three-part villanella or strophic, syllabic dance-lied, all of them similar to Italian models. *Wer von Amor ist arrestirt*, a solo song, is a setting of a traditional strophic poem and except for the continuo part could belong to the solo lied tradition of the previous century. Nine poems, however, are reform verses by Opitz, and at least four look forward to those found in the continuo lieder of Albert and his imitators.

JOHN H. BARON

Navarra, André(-Nicolas) (*b* Biarritz, 13 Oct 1911; *d* Siena, 31 July 1988). French cellist. He received his early training at the Toulouse Conservatoire, where he was awarded a *premier prix* at the age of 13. In 1926 he graduated to the Paris Conservatoire as a pupil of Jules Loeb for cello and Charles Tournemire for chamber music; there he again won a *premier prix* (1927). From 1929 to 1935 he played with the Krettly String Quartet. His début as a soloist took place in 1931 at the Concerts Colonne in Paris, with Pierné conducting. He appeared in most European countries, in the USA, Canada, Mexico, Japan, the USSR, Australia and India. His British début was at the 1950 Cheltenham Festival, when he played Elgar's concerto, a work with which he was much associated; in 1957 he recorded it with Barbirolli and the Hallé Orchestra. Navarra taught at the Paris Conservatoire from 1949 to 1979, and he held other important teaching posts at the Accademia Musicale Chigiana, Siena, the Vienna Hochschule für Musik, and the Detmold Musikhochschule. He was an Officier of the Légion d'Honneur and Chevalier

of the Ordre des Arts et Lettres. Navarra's thoughtful, refined yet ardent playing was equally suited to solo work and chamber music.

Navarrini [Navarini], **Francesco** (*b* Cittadella, nr Padua, 26 Dec 1855; *d* Milan, 21 or 23 Feb 1923). Italian bass. He studied in Milan and made his début at Treviso (1878) in *Lucrezia Borgia*. After a season at Malta, he sang in various Italian cities, acquiring a large repertory and making his first appearance at La Scala in 1883 as Alvise in *La Gioconda*. His portrayal there of the Grand Inquisitor in the first Italian presentation of *Don Carlos* was highly praised and he soon took his place as the theatre's principal lyric bass. He sang Lodovico in the première of *Otello* (1887) and was the Pogner of the production under Toscanini of *Die Meistersinger* (1898). Abroad he appeared in London, Paris and Madrid, and from 1894 to 1912 was a favourite in Russia. At Monte Carlo his singing of the Slander Song in *Il barbiere di Siviglia* was a highlight of the 1900 season, and in 1902 he visited the USA as a member of Mascagni's touring company. His virtues as a singer are demonstrated in his 16 recordings of 1907: a fine, sonorous voice, evenly produced, and exemplifying the traditional graces of the best Italian school. (P. Padoan: 'Francesco Navarrini', *Record Collector*, xl, 1995, 53–69)

J.B. STEANE

Navarro, Fats [Theodore; Fat Girl] (*b* Key West, FL, 24 Sept 1923; *d* New York, 7 July 1950). American jazz trumpeter. As a youth he played the piano and the tenor saxophone, but by the age of 17 he was touring with black American dance bands as a trumpeter. Three years later, in 1943, he joined Andy Kirk's nationally known jazz band, which then included Howard McGhee. In January 1945 Navarro replaced Dizzy Gillespie in Billy Eckstine's band; as the principal trumpet soloist in this important group he was among the foremost players in the new bop idiom. In autumn 1946, however, physically unequal to the heavy touring schedule and restricted musically by the big-band format, he left Eckstine. He spent the remainder of his brief career working mostly with small bop groups in New York led by Kenny Clarke, Tadd Dameron, Coleman Hawkins, Charlie Parker and Bud Powell. He died of tuberculosis exacerbated by heroin addiction.

Navarro's recordings, especially those with Tadd Dameron (e.g. *Our Delight*, 1947, BN), reveal him to be the rival of Gillespie as the leading bop trumpeter of the 1940s. Gillespie was clearly one of his models, for Navarro used many of the older player's favourite phrases. Compared with that of Gillespie, however, Navarro's tone was sweeter and his style was also less dramatic, employing fewer passages of fast notes and fewer notes played in the upper register of the instrument. At times Navarro seemed to be more heavily influenced by the acknowledged leader of the bop school, Charlie Parker. Certain motifs in *Wail* (1949, BN; ex.1, marked s–z) were frequently used by Parker as building blocks for solo improvisations; the nearly continuous flow of quavers with an unpredictable sprinkling of accents between the beats was also typical of Parker. The effective recurrence of the motif 's', however, which connects by chromatic

Ex.1 Navarro's solo on B. Powell, *Wail* [3rd take](1949, BN); transcr. T. Owens

descent the 13th and raised 11th of each chord, is a characteristic Navarro touch, as is the scale passage that ends the phrase. Navarro's recordings are of a consistently high quality. *The Street Beat* and *Ornithology* (on *Charlie Parker in Historical Recordings*, Le Jazz Cool), made with Parker in 1950, are particularly intriguing: if discographers have dated these pieces accurately, Navarro, emaciated and gravely ill, made these fine recordings just weeks before he died.

THOMAS OWENS

Navarro, (Luis-Antonio) García (*b* Chiva, 30 April 1941). Spanish conductor. He studied the oboe at the conservatory in Valencia and at the Escuela Nacional de Música y Declamación in Madrid. He then moved to Vienna, where he studied conducting with Oesterreicher, Schmid and Swarowsky, and composition with Uhl. In 1966 he entered the conducting class of Franco Ferrara, and the following year won first prize at the Besançon Conducting Competition, leading to appointment as music director of the Valencia SO from 1970 to 1974, associate conductor at the Haarlem PO from 1974 to 1978, and from 1976 to 1978 music director of the Portuguese RSO in Lisbon. Navarro made his Covent Garden début in 1979 and served as director of the Teatro de S Carlos, Lisbon, from 1980 to 1982. In 1987 he became Generalmusikdirektor at the Württembergisches Staatstheater, Stuttgart, and in 1997 accepted a five-year appointment as music director of the restored Teatro Real in Madrid. He has appeared frequently as a guest conductor at the Teatro Colón and with orchestras including the Buenos Aires PO and the Orquesta Ciutat de Barcelona. Navarro's recordings include vibrant performances of Falla's *La vide breve*, *El amor brujo* and *Noches en los jardines de España*.

CHARLES BARBER

Navarro, Juan (i) (*b* Seville or Marchena, *c*1530; *d* Palencia, 25 Sept 1580). Spanish composer and singer. In 1549 he was a tenor in the choir of the Duke of Arcos at Marchena, which was directed by Cristóbal de Morales; he later sang at Jaén Cathedral. He joined the choir of Málaga Cathedral on 14 July 1553. This brought him once more under the direction of Morales, who, however, died suddenly some two months later. Navarro was a candidate for the vacant post of *maestro de capilla*, but he failed the tests on 9 February 1554. He continued to sing in the choir until 2 October 1555, when he resigned. On 28 September 1562 the chapter of the collegiate church at Valladolid appointed him *maestro de capilla* without the usual public competition; he held this post until 6 March 1564. On 7 February 1564 the chapter of Avila Cathedral decided to invite him to succeed Bernardino de Ribera as *maestro de capilla* and on 26 February seated him in a chaplaincy. At Avila he won the support and friendship of the bishop, Alvaro de Mendoza, a noted connoisseur of music. On 7 January 1566 Navarro was paid for a manuscript of 33 hymns. While at Avila he probably also taught Victoria just before he left for Rome. Navarro's reputation was soon such that on 27 September 1566 he was invited to become *maestro de capilla* of Salamanca Cathedral without the usual public trial of skill. The chapter of Avila Cathedral was anxious to keep him, but on 7 November 1566 he left for his new post. During his seven years at Salamanca, Francisco de Salinas was professor of music at the university. The two musicians experimented together with the enharmonic genus, and according to Espinel (1618) Navarro's choir served as a testing-ground for Salinas's theories. Navarro was constantly on the lookout for singers of high quality, but he also had considerable difficulties with certain recalcitrant members of the cathedral establishment, for example with the drunken organist Pedro Ricardo. To lessen his worries the chapter relieved him of the responsibility of instructing the choirboys. Continuing tension, however, made him increasingly difficult to handle, and matters came to a head on New Year's Eve 1573, when he struck the succentor Juan Sánchez 'a violent blow on the face, thereby causing a grave scandal'. He was promptly dismissed, and from 1574 to 1578 he directed the choir of the cathedral at Ciudad Rodrigo, a comparatively poor foundation, where the young Juan Esquivel Barahona was among his pupils. On 10 September 1578 he was appointed *maestro de capilla* of Palencia Cathedral, where the bishop was Alvaro de Mendoza, his friend from his time at Avila, who now secured for him the right to wear a canon's brocade, to occupy an important position in the choir and to receive substantial financial benefits, privileges that had not been granted to his predecessor, Pedro Ordóñez, and in consequence the cathedral prebendaries composed a written protest, dated 20 October 1578. On 22 May 1579 he and others petitioned the chapter to found a brotherhood devoted to the Virgin Mary and St Antoninus, the cathedral's patron saint. Though he was at Palencia for only two years, the chapter voted that he be buried in a privileged crypt of the cathedral.

Alone among Spanish Renaissance composers, Navarro was honoured by a posthumous publication, the *Psalmi, hymni ac Magnificat* (1590); it was paid for by Francisco Reinoso, a wealthy official of Palencia Cathedral who had been chief administrator to Pope Pius V in Rome. He chose as editor Francisco Soto de Langa (whom Navarro had unsuccessfully attempted to attract to Salamanca Cathedral as a singer in 1572). The publication was one of the two most popular collections of vespers music in Spain, Portugal and Mexico; the extant copies all show signs of considerable use, and many manuscript copies were made up to the 18th century. The volume includes settings of many of the texts found in Guerrero's *Liber vesperarum* (1584), and also contains revised versions of some of the hymns that Navarro presented to Avila Cathedral in 1565; comparisons of the two collections reveal more refined part-writing in the later reworkings, so that the inner parts in particular are more active and melodically attractive. Nearly all the pieces in both collections involve the alternation of plainsong and four-part polyphony. Navarro's polyphonic textures invariably quote a plainsong in at least one voice, always in a skilful and subtle manner. Canons are to be found in ten of the 28 hymns, in the final 'Gloria Patri' of each of the first eight *Magnificat* settings (where the interval of the canon corresponds to the number of the tone) and occasionally elsewhere; they are always unobtrusively introduced. In the preface Soto praised Navarro for supreme erudition blended with 'incredible sweetness'. Aguilera de Heredia, in his *Canticum Beatissimae Virginis deiparae Mariae* (1618), may have outdone Navarro in the ingenuity of his tone-number canons, but no later Spanish composer of vesper music excelled him in appealing, as Soto put it, to 'that larger general public which will in the future have an opportunity of hearing these works sung'.

ROBERT STEVENSON

Navarro, Juan (ii) (*b* Cádiz, *c*1550; *d* ?Mexico, *c*1610). Mexican composer of Spanish birth. He worked in the Mexican province of Michoacán as a Franciscan priest, confessor and choir singer. In 1572 the Bishop of Michoacán, Juan Diego de Rinćon, took possession of 100 copies of a *Passionario*, elaborately printed in Mexico City, which contained plainsong music for the St John Passion. Somewhat later, Navarro set out to compose plainsong settings for all the Passion narratives and various other readings, thus providing music for the entire Holy Week. He completed his work in 1601, and was granted a printing licence with exclusive privileges for 12 years, but his book, *Liber in quo quatuor Passiones Christi Domini continentur ... octo Lamentationes, oratioque Hieremie Prophete*, was not published until 1604 (by Diego López Davalos, Mexico City). The earliest book of music both composed and printed in America, it contains, as the title shows, music for the four Passions, eight Lamentations and the Prayer of Jeremiah, on 105 numbered leaves. Navarro's settings are responsorial and resemble a somewhat individualized plainchant; they are largely syllabic but use occasional melismas for dramatic emphasis. In an effort to secure the financial success of his book among clergy of the various orders, Navarro added letters of approval from Dominican and Augustinian authorities, as well as from the archbishop and from the viceroy, to the printed Franciscan recommendations. The book used to be attributed to Juan Navarro (i); the correct attribution was established by Chase.

ALICE RAY CATALYNE/MARK BRILL

Navarrus, Martinus. *See* AZPILCUETA, MARTÍN DE.

Navas, Juan Francisco de (*b c*1650; *d* Madrid, 1719). Spanish harpist and composer. His father, Juan Gómez de Navas, was from 1654 a singer (and in 1684 temporary *maestro de capilla*) in the Spanish royal chapel; his brother Ignacio de Navas, was also a musician in the royal service. Juan Francisco began his service in the royal chapel in 1669 and was a pupil of the harpist and composer Juan Hidalgo. After Hidalgo's death in 1685 he became principal harpist at court for both sacred and secular music. According to archival documents (*E-Mp*), Navas was selected by Hidalgo himself. He was a natural choice because his abilities as harpist and continuo player were matched by his talent as a composer. As a composer of theatrical songs, *tonos* and *tonadas* for the court and villancicos, Navas was said by contemporaries to have preserved the precepts of musical style and text setting developed by Hidalgo. In fact, his music shows slightly more modern traits, with longer and more ornamented vocal phrases and the incorporation of obbligato instrumental lines that interact with the vocal line.

By 1694, not quite ten years after Hidalgo's death, Navas had composed music for at least nine court plays and described himself as the principal composer of theatrical music at court. By 1700 he had composed for four more court plays, making a total of 13. His songs and musical scenes for five *comedias* and zarzuelas survive as a significant contribution to the extant repertory. By far his most important extant work is the score to the three-act zarzuela *Destinos vencen finezas* (text by Lorenzo de las Llamosas), performed on 6 November 1698, with nearly 50 musical numbers, including solo songs, three sections of recitative, ensemble songs, choruses and valuable instrumental parts for violins, 'viola de amor', viols, oboes, bassoon, *clarines* and basso continuo. Two exemplars of the printed score survive (in *E-Mn* and *F-Dm*). This was the first zarzuela to be printed as a musical score, issued in a luxury edition in 1699 by Imprenta de Música in Madrid, under the auspices of Miguel Martín (a singer in the royal chapel), Pedro París (also of the royal chapel) and the composer Joseph de Torres.

LOUISE K. STEIN

Navoigille, Guillaume [*l'aîné*] (*b* Givet, *c*1745; *d* Paris, Nov 1811). French violinist and composer, brother of JULIEN NAVOIGILLE *le cadet*. The only information regarding his origins and early life comes from a fanciful and thoroughly unreliable article by J.B.B. Roquefort which relates that his real surname was Julien and that he was adopted by an expatriate Venetian noble named Navoigille, who settled in France about 1750. Although this story is implausible, no better information has come to light. The Navoigille who obtained a printing privilege in Paris on 6 March 1749 could not have been Guillaume; perhaps it was his father, for Guillaume signed his six

trios op.1 (1765) 'Navoigille *fils*', implying that his father was also known in musical circles.

The dedication of op.1 – the earliest reliable document of Navoigille's career – to Baron de Bagge reveals that he had been in the baron's service since about 1760. Between 1765 and 1777 he published all his principal compositions; they are mostly sonatas, trios and symphonies in a highly conventional style. During the same time he was employed in the orchestra of the Duke of Orléans. Twice in 1778 symphonies by Navoigille were heard at the Concert Spirituel. He seems to have been a competent but unremarkable violinist; the newspapers often reported his participation in concerts, but seldom offered any evaluation of his playing.

After about 1780 Navoigille turned his attention to directing and teaching. By about 1783 he was conductor of the Concert de la Loge Olympique (formerly the Concert des Amateurs) and at the same time he became a violin professor at the Lycée des Arts, a free school for talented young musicians, where Alexandre Boucher, having been admitted on his recommendation, was his pupil. During the Revolution Navoigille remained active as a conductor and even composed several Revolutionary songs, of which two have survived. He did not, however, compose the *Marseillaise*, as Fétis once claimed. About 1805 he and his brother went to the Netherlands to play in the royal orchestra under Plantade. On the unification of France and the Netherlands (1810) they returned to Paris.

JEAN HARDEN

Navoigille, Julien [*le cadet*] (*b* Givet, *c*1749; *d* ?Paris, after 1811). French violinist and composer, brother of GUILLAUME NAVOIGILLE *l'aîné*. He was known as a violinist in Paris by about 1773 and was active thereafter as teacher, player, director and composer. It is difficult to separate his activities from those of his brother, for each is usually called simply 'Navoigille' in newspaper accounts. According to Roquefort, Julien was deputy leader and later director of the private orchestra of the Count of Provence (later Louis XVIII) from 1789 to 1792. Subsequently he directed at the Théâtre de la Pantomime (later Théâtre de la Cité), for which he wrote *La naissance de la pantomime* and *L'héroine suisse, ou Amour et courage.* He was in the Netherlands with his brother from 1805 to 1810, after which he returned to Paris.

Navoigille's nephew Joseph (Giuseppe) Navoigille published two works, *Sei alletamenti da camera* (Paris, n.d.) and *6 trietti* (Paris, 1778), both for two violins (or flutes) and bass. Julien's daughter (name unknown) received favourable reviews as a harpist in 1798.

WORKS

STAGE

first performed at the Théâtre de la Pantomime, Paris; all lost

Les honneurs funèbres, ou Le tombeau des sans-culottes (Ducray-Duminil), 1793
L'orage, ou Quel guignon (oc, 1, J.-G.-A. Cuvelier de Trie), 1793
L'héroine suisse, ou Amour et courage (Cuvelier de Trie and J.-B.-A. Hapdé), 1798
La naissance de la pantomime (Cuvelier de Trie and Hapdé), 1798
Empire de la folie, ou La mort et l'apothéose de Don Quichotte (pantomime, 3, Cuvelier de Trie), 1799, collab. J. Baneux

INSTRUMENTAL

published in Paris unless otherwise stated

Symphonie concertante, 2 vn, orch (n.d.), lost
Chbr: 6 trios, 2 vn, b/va (*c*1771); 6 quatuors concertants, op.1 (1773); 6 quatuors, op.2 (1773); 6 Quartettos in the Comic Stile, op.2 (London, 1779); 6 quatuors concertants, op.3 (n.d.); 6 romances et 6 rondeaux, pf, 2 vn ad lib, op.4 (1786); 6 sonates, op.5 (1788), nos.1–5, pf, acc 2 vn, no.6, pf, acc. ob/cl

Naxhe, Hubertus. *See* NAICH, HUBERT.

Nāy. *See* NEY.

Naylor. English family of musicians.

(1) John Naylor (*b* Stanningley, nr Leeds, 8 June 1838; *d* at sea, 15 May 1897). Organist and composer. He was organist and choirmaster at St Mary's, Scarborough, then, after gaining two Oxford Music degrees (BMus 1863, DMus 1872), at All Saints, Scarborough, and at York Minster. His works, primarily choral, show originality: in the cantatas *Meribah* and *Manna* the voice of God is sung by three voices in harmony, and in the anthem *Know ye not that there is a prince?* he introduced bagpipes. He championed a diversity of unfamiliar music ranging from Bach to Wagner.

(2) Edward (Woodall) Naylor (*b* Scarborough, 9 Feb 1867; *d* Cambridge, 7 May 1934). Organist, composer and writer on music, son of (1) John Naylor. Having learnt much as a child from his father, he studied at Cambridge (BA 1887, MusB 1891, MusD 1897) and at the RCM with Stanford and Frederick Bridge. He held appointments as organist of St Michael's, Chester Square (1889–96), and St Mary's, Kilburn (1896–7), before returning to Cambridge as organist of his old college, Emmanuel, where in 1904 he was appointed lecturer. His most important compositions are vocal. *The Angelus*, winner of the Ricordi prize for an English opera, was produced at Covent Garden in 1909 and broadcast in 1923. His extensive output of church music incorporates

elements from the 16th to the 20th centuries. A leading authority on Shakespeare and music, he was an early exponent of greater musical authenticity.

(3) **Bernard Naylor** (*b* Cambridge, 22 Nov 1907; *d* Bassenthwaite, Cumbria, 19/20 May 1986). Composer, organist and conductor, son of (2) Edward Naylor. He studied with Vaughan Williams, Holst and Ireland at the RCM (1924–7) as organ scholar, then went to Exeter College, Oxford (BMus 1930), where he conducted the university opera club. In 1932 he moved to Winnipeg, Canada and became conductor of the Philharmonic Choir, the Male Voice Choir and the Winnipeg SO. He returned to England to take an appointment as organist and director of music at Queen's College, Oxford (1936–9), but in 1940 he was back in Canada, where in 1942 he formed the Little SO of Montreal. He returned to England to teach at the universities of Oxford (1950–52) and Reading (1953–9). In 1959 he settled permanently in Canada, in Victoria, British Columbia, and gave his attention to composition. As the *Missa sine Credo* and the *Magnificat and Nunc dimittis* illustrate, his music is fastidious and emotionally restrained, combining the use of canon and inversion with melodies that often move by step or in minor 3rds. The *Stabat Mater*, first performed at the 1964 Three Choirs Festival, exhibits characteristic passages in contrary motion. His musical idiom, marked by sensitive text setting, scrupulous craftsmanship and graceful chromatic counterpoint, and exemplified by his Nine Motets, had individuality but little influence on other composers.

Nayo, Nicholas Zinzendorf (*b* Baika, 14 April 1922; *d* Baika, 15 March 1993). Ghanaian composer. Following tuition on the harmonium from his father, he developed his musical skills and directed fife bands and a choir at the Presbyterian Teacher Training College at Akwapim-Akropong. Nayo entered the music school of Achimota College in 1949, studying with Amu, and became a Licentiate of the Royal Schools of Music in 1953. After some years as a school music teacher, he studied with Nketia at the University of Ghana, Legon, gaining the Diploma in African Music (1964), then attended Boston University (MMus 1970). As the first director of the National Academy of Music, Winneba (1973–5), Nayo encouraged his students to explore 20th-century harmonic vocabularies; *Mawu xo Mia 'Kpedada* (1973) was a demonstration piece for this purpose. He was a lecturer at the University of Ghana (1975–9) and a senior lecturer (1979–84) then professor (1986) at the University of Lagos.

Nayo's early works show the influence of Amu in their imitative techniques, simple harmony, duple time signatures and reliance on indigenous musical themes. The completion of a thesis on the Anlo-Ewe composer Vinoko Akpalu encouraged Nayo to intensify southern Ewe musical elements in such works as the *Volta Symphony* (1988). Nayo's middle period is marked by atonal tendencies, unresolved 7th chords, the adoption of 6/8 time signatures and the use of extended forms and the orchestral medium. On his appointment as director of the Ghana National SO (1987–93), the government's stated aim of cultural self-reliance prompted a major shift in his compositional techniques. *Fontomfrom Prelude* (1989) and *Mandela Overture* (1991) are examples of his conscious reliance on indigenous musical instruments, themes and performance practices. His writings include educational books on music.

DANIEL AVORGBEDOR

Nazareth [Nazaré], **Ernesto (Júlio de)** (*b* Rio de Janeiro, 20 March 1863; *d* Rio de Janeiro, 4 Feb 1934). Brazilian composer and pianist. He studied the piano with his mother, with Eduardo Madeira and with Lucien Lambert, who gave him an intimate knowledge of Chopin's music, which became influential on his own work. By 1877,

when the polka *Você bem sabe* was published by Artur Napoleão, he had begun to compose in the current popular dance genres, and as a pianist he worked exclusively in light music. From 1919 he was employed by the publishing house of Carlos Gomes (later Carlos Wehrs), performing scores for clients, and he played daily in the Odeon cinema (1920–24), where Villa-Lobos had worked a few years earlier as a cellist, and for which he wrote the famous tango *Odeon*. Nazareth won wide popularity in the 1920s and toured the states of São Paulo and Rio Grande in 1921 and 1932. The tangos established him as the most influential Brazilian popular composer of the 20th century; Villa-Lobos praised him as 'the true incarnation of the Brazilian soul'. Nazareth was responsible for producing national types of such dances as the polka and the tango, and for creating a model for the *maxixe*. His waltzes and tangos were sources of inspiration for numerous composers, including Milhaud, Villa-Lobos, L. Fernandez, Mignone and Gnattali. His music enjoyed great success in the late 20th century, and by the 1970s had been recorded and published in Europe and the USA.

GERARD BÉHAGUE

Nazario, Lelo (*b* São Paulo, 15 July 1956). Brazilian composer and pianist. He began his piano studies at the age of four, later studying with Menininha Lobo. He worked as a musical assistant for Radio e TV Cultura in São Paulo (1974–5). At that time, he joined the Hermeto Pascoal group, also playing with such jazz musicians as Marcio Montarroyos, Roberto Sion, Mauro Senise and Hector Costita. In 1977 he formed and made three recordings with Grupo Um, one of the first ensembles to combine traditional Brazilian and contemporary styles. At the same time, he led the Symetric Ensemble (two pianos and bass). He toured Europe in 1980 with Symetric and in 1983 with Grupo Um. Nazario has written avant-garde works and music for different formations, including music for piano, ensembles and orchestras, as well as electroacoustic, film and dance music. In 1988 he joined the group Pau Brasil, touring Europe and the United States several times, recording three albums and winning the Sharp Prize (for the best instrumental group) in 1996. For the same group in 1992, he composed an opera in collaboration with other composers, *Opera dos 500*, sponsored by the city of São Paulo to celebrate the 500 years since the discovery of America. In 1989 he formed the Duo Nazario with the drummer Zé Eduardo Nazario. For this group he wrote *Limite* and *Aurora*, both performed with the Banda Sinfonica do Estado de São Paulo in Brazil and abroad.

IRATI ANTONIO

Nazaykinsky, Yevgeny Vladimirovich (*b* Novaya Malïkla, Ulyanovsk province, 12 Aug 1926). Russian musicologist. He studied at the Gnesin Music Teachers' Training College (1950–55) and graduated in musicology under Skrebkov; he also completed his postgraduate studies there in 1958 and obtained the *Kandidat* degree in 1967 with a dissertation on tempo. After working in the acoustics laboratory of the Moscow Conservatory (1952–62), he began teaching music analysis in 1962 at the conservatory, where he became a senior lecturer in 1970 and professor in 1976. In 1970 he also organized and headed a department for music teachers at higher educational institutes and he was head of the music theory department, 1974–96. He took the doctorate in 1973 with a study on the psychology of music perception.

Besides traditional music theory, Nazaykinsky's diverse scholarly publications include writings on music psychology, axiology and acoustics. On the basis of precisely defined tempos and rubatos in performances by well known performers, he suggests solutions to questions of tempo in various works; he examines how rubato segments can unify a composition, the specific features of rubato and tempo in different sections of a musical form, and the interaction of rubato with other musical elements. In his later writings Nazaykinsky has examined the general principles that govern the unfolding of a musical composition in time and how these principles relate to theories in psychology (1982); he has also investigated the properties of musical sounds by contrasting sounds in speech, nature and the environment, and he has examined aesthetic problems in the perception of music (1988).

The author of more than 100 publications, Nazaykinsky is known as editor of the series Muzïkal'noye iskusstvo i nauka ('Musical Art and Science'). He has taken part in conferences world-wide and lectured at Russian conservatories, the Cologne Hochschule für Musik and the Mozarteum, Salzburg. As a member of the ISME, he has delivered reports in Japan and Canada; he has also long been involved with examination boards for higher education in Russia and is co-chairman of the commission for the history of art and culture and chairman of the commission for doctoral students at the Moscow Conservatory.

TAT'YANA S. KYUREGYAN

Nazism. The doctrines of the National Socialist German Workers' Party (NSDAP) that dominated Germany's government from 1933 to 1945. Nazism superimposed an ideology of nationalism and racism on all areas of culture, but although Nazi ideologues expounded on various notions of a musical ideal, the movement never articulated its designs for promoting or implementing a particular musical aesthetic. Many of the features of German musical life one might associate with Nazism, such as mass participation, folk culture, nationalism, anti-Semitism and arch-conservatism, had strong currents in German musical life long before Hitler came to power. Rather, the greatest impact of Nazism on music lay in more tangible policy measures of the Hitler regime: reforming music professions, restructuring musical organizations and purging German musical life of Jews and political opponents.

Music was unquestionably central to Germany's cultural identity, and Nazi bureaucrats recognized its importance for maintaining Germany's reputation and dispelling foreign perceptions of Nazi philistinism. They saw that in order to preserve Germany's envied position as the centre of high musical achievement, it was necessary to guarantee social and economic security for musicians and composers. The situation of creative artists had been in gradual decline since the turn of the century, and a multitude of musicians' and composers' lobbying groups had fought for professional and economic safeguards. The Nazi government, unlike previous systems in Germany, centralized the administration of cultural affairs. Through the establishment of the Reichskulturkammer and its music division, the REICHSMUSIKKAMMER, it was possible to respond to musicians' demands for professional and economic security. The Reichsmusikkammer, presided over first by Richard Strauss and then by Peter Raabe, became the obligatory union for practitioners in all facets of music-making and the music industries. Within a relatively short time, the Reichsmusikkammer managed to set wages for professional musicians, regulate certification and restrict amateurs from performing for money, introduce examinations and training courses for private music instructors, and establish an old age pension plan for artists. By requiring proof of Aryan lineage for membership, it also served to exclude Jews from taking part in German musical life.

The Nazi government also placed a high priority on preserving Germany's musical institutions and lavished support on several that found themselves in serious financial straits by 1933. For instance, the Berlin PO, after years of unsuccessful negotiations with Reich and Prussian bureaucrats before the Nazi takeover, came under the full protection of the Nazi Propaganda Ministry, was designated an official Reich Orchestra, and secured the highest pay scale ever for its musicians. The Bayreuth Festival also profited from Nazi government sponsorship. Hitler's admiration for Wagner and his close ties with the family prompted him to rescue the festival from its financial difficulties, guaranteeing its growth from a biennial to an annual event from 1936, subsidizing new productions and averting its closure during the war. Some Nazi leaders saw this form of government sponsorship as an invitation to assume direct involvement in artistic matters: Hermann Göring exercised his authority in choosing artistic personnel for the Prussian State Opera in Berlin in his capacity as Prussian prime minister.

Nazi administrators recognized music's potential to rally enthusiasm, enhance education and instil national pride. Rather than introducing widespread reforms in the schools, they concentrated on music-making in adult education, youth organizations, the military and official ceremonies. High culture was made accessible to the working class through large Nazi subscription services. The Nazi party had also established its own Reich Symphony Orchestra in 1931 which, alongside some of the more famous orchestras, appeared at numerous official events. The Hitler Youth expanded pre-existing youth music groups by establishing a multitude of choirs, bands and other ensembles within the organization. The military, too, enlarged its musical activities through the Waffen-SS. The ceremonial function of music was given priority and amateurs were encouraged to learn brass instruments and take part in ceremonial music-making. The organ,

touted since the 1920s as the quintessential German instrument, was also promoted for inclusion in official ceremonies and party rallies.

In an effort to increase awareness and appreciation of Germany's musical legacy, the Nazis gave unprecedented support to the field of musicology. The Education Ministry centralized all major research activities in Berlin, and the Propaganda Ministry appointed Hans Joachim Moser to oversee the reworking of texts in the standard repertory rendered politically problematic by virtue of content or Jewish authorship. The musicologist Herbert Gerigk, working for the chief Nazi ideologue Alfred Rosenberg, enlisted colleagues to evaluate literature, compile a music lexicon conceived in the Nazi *Weltanschauung*, plan a Nazi elite university and appraise goods plundered in the military occupation. The scientific branch of Himmler's SS subsidized musicological publications and funded large-scale field research in the folk music of Germanic populations.

Beyond these administrative, social and institutional reforms, Nazi leaders had little impact on musical standards, partly because those dictating the cultural agenda had little interest in music. Hitler was known to be thoroughly consumed with Wagner, even modelling the title of his autobiography *Mein Kampf* on Wagner's *Mein Leben*. Yet knowledge of the Führer's musical tastes did nothing to reverse the steady decline in Wagner's popularity that had set in by the 1920s. The Nazi ideologue Alfred Rosenberg and the Propaganda Minister Joseph Goebbels paid homage to Wagner, but they focussed their energies much more on education, the visual arts and the media.

Lacking clear directions from leaders, music critics and publicists espousing a so-called Nazi musical aesthetic took their cue from existing popular trends in musical thought, embellishing them with rabid nationalism and anti-Semitism. Some of their ideals came from the conservative nationalists typified by Hans Pfitzner, who bewailed the decline of German musical greatness at the hands of American and 'Jewish influences' (i.e. jazz and the Second Viennese School). At the same time, an alternative consensus influencing Nazi thought was the campaign to eliminate the virtuosity and individualism associated with the Romantic era (similarly denigrated as 'Jewish') and to promote music for the folk that could educate and elevate the German nation. This last component of Nazi propaganda shared much with the musical ideals of both the workers' movement and the conservative middle-class youth movement (*Jugendbewegung*). All of them encouraged mass participation and harboured the belief that music could instil a sense of community (*Gemeinschaft*), an idea easily adapted to the Nazi conception of the *Volksgemeinschaft*.

These varied and sometimes contradictory trends can all be detected in the rare official statements on music issued by National Socialist leaders. The largest musical gathering of the 12-year regime, the Reichsmusiktage in Düsseldorf in 1938, supposedly displayed a German musical ideal with performances, speeches and conventions. Yet at the event Goebbels, the masterful orator, was strikingly vague in spelling out Nazi musical goals. In his 'ten commandments' for German musical creation, he proclaimed that the nature of music lies in melody; all music is not suited to everyone; music is rooted in the folk, requires empathy rather than reason, deeply affects the spirit of man and is the most glorious art of the German heritage; and musicians of the past must be respected. The accompanying exhibit on 'Degenerate Music', a potential tutorial in recognizing and rooting out allegedly destructive musical influences, was comparably incoherent. It vilified prominent Jewish composers, conductors, critics and their associates, and attacked jazz, operetta and atonal composition; but it neither provided consistent guidelines for music practice nor reflected current or future music policy. Jazz actually enjoyed increasing success in Nazi Germany, especially during World War II. The exhibit's more focussed criticism against the 'destroyers' of 'Germanic' tonality were largely *ad hominem* attacks on Schoenberg and his school, but atonal and serial works actually continued to be heard and created in the Third Reich.

Thus although some general guidelines were sketched, specific musical standards were never implemented in any systematic way. Part of this failure was due to a lack of organization and a profusion of in-fighting among officials responsible for musical regulation. This proved especially capricious in determining the careers of prominent composers and performers. A classic example was Paul Hindemith, who, with the support of the conductor Wilhelm Furtwängler, had convinced both Hitler and Goebbels of his potential as a model composer and music educator for the new Reich with his opera *Mathis der Maler* and his plans for music education reforms. In the meantime, Alfred Rosenberg had been passed over as head of culture when the Propaganda Ministry was established. Looking for any signs of ideological transgressions by Goebbels, Rosenberg used Hindemith as a pawn in his crusade and cited Hindemith's earlier works as 'degenerate'. Rosenberg successfully undermined Goebbels's approval of Hindemith, and the composer emigrated. The success or failure of all composers and performers was unpredictable and depended more on personal and political alliances than on racial pedigree or adherence to any aesthetic ideals. Guidelines were so loose and controls so lax that even a few select Jews managed to lead successful careers well into the late 1930s.

The other obstacle to control was the impracticality of music censorship. Anyone serious about rooting out allegedly destructive musical influences would have to contend with the wealth of musical outlets lying beyond government or police controls: amateur activities, recordings and radio. Even though radio came under government supervision, 'degenerate' music such as jazz ultimately survived on the air waves to appease soldiers and to discourage Germans from tuning into foreign broadcasts. Music censorship as such consisted of little more than a few lists issued by the Reichsmusikkammer proscribing the works of certain non-Aryans (Mendelssohn was not among them) and a ruling that dealers and publishers receive permission before disseminating the works of émigrés, but there was no mechanism to implement these measures. During the war, bans were more strictly enforced, mainly targeting foreign works from enemy countries.

The Nazi phenomenon left perhaps its most indelible mark on German musical life in the massive purge of Jews and other outcasts active in performance, composition and music education. While the eradication of 'undesirable' music proved ill-advised, if not impossible, the

eradication of 'undesirable' personnel was carried out aggressively. The Nazi purge affected Gypsies, non-whites, and political, social and sexual 'deviants', but most attention was focussed on the Jews. Their exclusion was carried out first by the public ostracism of prominent figures such as Schoenberg, Bruno Walter and Otto Klemperer, and then through bureaucratic means: by 1935, all non-Aryans were excluded from the Reichsmusikkammer, and in 1937 Jews were officially banned from attending public cultural events (this could be enforced only after 1941, when every Jew was required to wear a yellow badge).

The list of music personnel who fled Germany in the first three years of the Nazi regime is long and includes such names as Adolf Aber, Theodor Adorno, Willi Apel, Paul Bekker, Paul Ben-Haim (Frankenburger), Rudolf Bing, Manfred Bukofzer, Paul Dessau, Alfred Einstein, Hanns Eisler, Emanuel Feuermann, Hans Gál, Szymon Goldberg, Berthold Goldschmidt, Herbert Graf, Jascha Horenstein, Erich von Hornbostel, Leo Kestenberg, Otto Klemperer, Erich Korngold, Fritz Kreisler, Lotte Lenya, Edward Lowinsky, Ernst Hermann Meyer, Hans Nathan, Paul Pisk, Hans Redlich, Franz Reizenstein, Curt Sachs, Hermann Scherchen, Arnold Schoenberg, Leo Schrade, William Steinberg, Fritz Stiedry, Ernst Toch, Bruno Walter, Kurt Weill and Stefan Wolpe. Many more composers, directors and performers fled German-occupied countries in the course of the World War II, especially from Austria, Hungary and Czechoslovakia.

Jews left behind and forced out of their jobs and businesses had to be dealt with in some manner, however. Recognizing the serious economic implications of this sudden increase in unemployment, and also acknowledging the public relations value of giving an impression of providing for the Jewish community, the Nazi government allowed the Jews to set up the Jüdischer Kulturbund to conduct cultural programmes for their own audiences. Its musical activities were initially rich and varied, but the repertory decreased as the regime sought to disassociate 'German' art from 'Jewish' art (for example, Jews were prohibited from performing or listening to Beethoven after 1937 and Mozart after 1938). The Jüdischer Kulturbund shrank in size and activity as more Jews emigrated or were deported to concentration camps, and it was shut down by the Gestapo in 1941. Music was an organized activity in the concentration camps as well, where ensembles of inmates were used for daily activities to entertain SS troops with waltzes, lieder and symphonies, as well as to torture and humiliate inmates, serve as a background for gruelling labour and drown out screams during executions. The number of promising musicians who perished in the camps is impossible to enumerate.

An impressive list of composers, performers, conductors and academics flourished under Hitler and continued their successes without interruption after World War II (e.g. Herbert von Karajan, Karl Böhm, Wilhelm Backhaus, Elisabeth Schwarzkopf, Walter Gieseking, Friedrich Blume, Heinrich Besseler, Werner Egk and Carl Orff, to name a few). Given the climate of denial in the era of denazification and the Cold War politics that ensued, details of the role of music and musicians in the Third Reich were suppressed for many years, giving rise to a number of misconceptions. One was that Nazism, not unlike Stalinism, imposed aesthetic guidelines for music and took complete control over all facets of musical production and consumption. Another myth was that the majority of musical personnel were forced to cooperate with the Nazi regime against their will, when in fact many of the measures instituted by the Nazi regime were welcomed by the musical community. Finally, the impossible task of rationalizing Germany's rich cultural past with the atrocities of the Nazi era led to a tendency to divorce the 12-year Reich from the rest of Germany's history. However, even the nationalist and anti-Semitic elements of Nazi music policy had their roots in earlier movements, and many prominent personnel in Nazi Germany continued to influence German musical life after 1945.

N'Dour, Youssou (*b* Dakar, 1959). Senegalese musician. A Wolof singer with a remarkably flexible voice and a wide range, Youssou N'Dour began singing with Sine Dramatic at the age of 12, and by the age of 15 he was a star, singing with Super Diamono. Several years later he joined the Star Band in Dakar. N'Dour formed Étoile de Dakar in 1979, a group that went on to tour Europe before reforming as Super Étoile de Dakar in 1981. In 1983 he opened his own club in Dakar, the Thiosanne, a venue he used to perfect his craft. He is perhaps the best known performer of MBALAX, a distinctive Senegalese music based on the rhythm produced on the *mbung mbung* drum. His home concerts appeal greatly to elegantly dressed Wolof women who perform the *ventilateur* dance during concerts in which they expose their legs, dancing wildly in their floor-length *boubous*. N'Dour toured the world as part of the 'Human Rights Now!' 1988 tour. He owns and operates a recording studio and record label in Dakar, promoting local talent.

GREGORY F. BARZ

Ndubuisi, Okechukwu (*b* Ozu-Idem, 6 July 1936). Nigerian composer. A member of the Igbo people, he received early training in music and co-founded the Enugu Operatic Society in 1960. In 1961 Ndubuisi began composition studies with Wishart at the Guildhall School of Music, then returned to teach at the University of Nigeria, Nsukka. The folksongs which he collected from different ethnic groups became the basis of his arrangements for voices and small ensemble, most of which are sung in their original languages. His approach to harmony, melody and rhythm reflect both indigenous practices and his background in jazz bands. The influences of Vaughan Williams and Ivor Gurney are prominent in Ndubuisi's original works, while his percussive approach to the piano displays his endorsement of Akin Euba's concept of 'African pianism'. Further information is given in B. Omojola: *Nigerian Art Music* (Ibadan, 1995).

DANIEL AVORGBEDOR

NEA. *See* NATIONAL ENDOWMENT FOR THE ARTS.

Neaga, Gheorghe (*b* Bucharest, 19 March 1922). Moldovan composer, son of STEFAN NEAGA. He studied the violin at the Bucharest Academy of Music with Constantin Nottara (1937–40) and then with B. Kuznetsov at the Moscow Conservatory (graduating in 1948) where he also undertook postgraduate studies (1949–52). He later studied composition with Gurov and then Leyb at the Kishinev Conservatory (1953–8) where he subsequently taught the violin and was later appointed professor of string studies. He has received a number of official awards including the State Prize for the Arts (1967) for his Second Symphony and Honoured Representative of the Arts of the Moldavian SSR (1979). As a composer, he is drawn to chamber genres and works for stringed instruments unsurprisingly dominate his output. Although he does not use actual folk melodies, his language has its roots in Moldovan folklore as many themes in his Second Symphony demonstrate. Neo-classicism is often combined with Impressionist and folkloristic techniques – as in the Quartet for flute, violin, cello and piano (1984) – while ironic paradox, polystylism and collage are features of many other works, such as the Piano Trio (1976). He is particularly attracted to suite forms which provide opportunities for juxtaposing varied and contrasting material.

IRINA SUKHOMLIN

Neaga, Stefan (*b* Cişinău, 24 Nov/7 Dec 1900; *d* 29 May 1951). Moldovan composer and pianist. Brought up in a musical family, he studied the piano with Yuly Guz at a music school in Cişinău (1912–18) and then at the Conservatory of Music and Dramatic Art in Bucharest where his teachers were Emilia Saegiu (piano) and Castaldi and Cuclin (composition). He then attended the Paris Conservatoire where he studied with Nadia Boulanger (composition), Alfred Cortot (piano) and Charles Münch (conducting). In the 1920s and 30s he gave concerts with

the violinist Grigoras Dinicu and, after a spell teaching at the Moscow Conservatory evacuated to Saratov during World War II, in 1946 he joined the staff of the conservatory at Kishinev, where he also conducted the Moldovian State Philharmonia. He became the president of the Moldovan Composers' Union in the same year. He is possibly the most important figure in Moldovan music of the first half of the 20th century. He combines late Romanticism and Impressionism with aspects of Moldovan folk music in an output that spans most non-dramatic genres. He received the George Enescu prize twice (1934 and 1936) and the State Prize of the USSR (1950), in addition to various other awards and medals.

ION PĂCURARU

Neale. Irish family of music publishers, instrument makers and concert promoters. John Neale (or Neal; *d* after 1739) was active in Dublin musical circles from about 1714. In 1721 he described himself as an instrument maker in Christ Church Yard and was selling violins and imported printed music. By 1723 he was organizing weekly concerts at 'Mr Neal's Musick Room in Christ Church Yard' and in the same year was elected president of a social and musical club which later moved to the Bull's Head Tavern in Fishamble Street near Christ Church, subsequently becoming the Charitable and Musical Society. His son William (*d* 1769) was also active in the Charitable and Musical Society which, in October 1741, while William was treasurer, opened the New Musick Hall in Fishamble Street where in 1741–2 Handel gave concerts including the first performance of *Messiah* (13 April 1742).

An advertisement in 1723 establishes John Neale as the first known violin maker in Ireland. At the end of the same year, together with William Neale, he published his first collection of music, described as 'the first ever done in this Kingdom [i.e. Ireland]'. John and William Neale together published at least 18 musical volumes between 1723 and 1733, after which William published about ten further volumes up to 1744, the last few issued jointly with William Manwaring of College Green.

Copies of only 16 of the Neales' publications survive; 12 more are named in advertisements or in the three surviving catalogues. One of the most important volumes was *A Colection of the most Celebrated Irish Tunes proper for the Violin German Flute or Hautboy*; the collection was dated *c*1721 by Bunting (*A Collection of the Ancient Music of Ireland*, 1840) though in fact it was published in 1724. It is the earliest collection known to contain works of Turlough Carolan and also includes one tune 'improved with diferent divitions after the Italian maner with A bass and Chorus by Sigr. Lorenzo Bocchi'. Another collection (defective) of Carolan tunes in the National Library of Ireland has been confused with this; it dates from after 1743 and is not connected with the Neales.

LASAIRÍONA DUIGNAN/BARRA R. BOYDELL

Neaman, Yfrah (*b* Sidon [now Saïda], 13 Feb 1923). British violinist of Palestinian birth. He studied at the Paris Conservatoire and subsequently with Flesch, Thibaud and Rostal. He made his Paris début in 1937 and his London début with the LSO under Fistoulari in 1944 and from this time toured as a soloist throughout Europe, the USA and India. He played in duos with the pianists Howard Ferguson and David Wilde, and in a piano trio with Lamar Crowson and Eleanor Warren (cello). An admired and influential teacher, he has given masterclasses throughout the world, and has taught the violin at the GSM, London, since 1958, from 1964 as head of the string department. Neaman's other appointments include artistic director of the Carl Flesch International Violin Competition (1970–88) and of the London International String Quartet Competition. His repertory ranges from the Baroque to contemporary music, and he gave the first performances of numerous works, including Gerhard's Chaconne, Michael Blake Watkins's Violin Concerto (1978) and Michael Berkeley's Sonata, all of which are dedicated to him. His recordings include works by Gerhard, Banks, Fricker and Ireland. Neaman's playing was stylish and elegant, with all the hallmarks of the French school. He played a 'Golden Age' Stradivarius dated 1724. He was made a Freeman of the City of London in 1980 and was created an OBE in 1983.

MARGARET CAMPBELL

Neander, Alexius (*b* Kolberg, Pomerania [now Kołobrzeg, Poland], *c*1560; *d* between Würzburg and Rome, in or before 1605). German composer. In 1580 he enrolled at the University of Frankfurt an der Oder. He entered the seminary at Würzburg on 26 April 1590 and was ordained on 21 September 1591. He then became music prefect at the Collegium Kilianum at Würzburg. He died while on a journey to Rome. His four printed volumes, consisting entirely of motets, were brought out after his death by his pupil Wolfgang Getzmann.

WORKS

Liber primus [30] sacrarum cantionum, 4–8, 12vv (Frankfurt, 1605); 4 in *D-Mbs*, 1 in *Rp*

Liber secundus [32] sacrarum cantionum, 4–24vv (Frankfurt, 1605); 6 in *Mbs*

AUGUST SCHARNAGL/CLYTUS GOTTWALD

Neander, Joachim (*b* Bremen, 1650; *d* Bremen, 31 March 1680). German theologian, poet and composer. He grew up in his native city and attended the Gymnasium Illustre, where he studied Calvinistic theology. In 1670 he was converted to Pietism by the Pietist revivalist Theodor Undereyck, the pastor of St Martini, Bremen, who obtained for him a private tutorship at Frankfurt. From there he went on to the University of Heidelberg with several of his pupils. From 1673 he was again in Frankfurt where he was in personal contact with Philipp Jakob Spener, the leading Pietist of the day, and also with the Pietist lyric poet J.J. Schütz. In 1674 he became headmaster of the Calvinist school in Düsseldorf, where he worked successfully until he got into difficulties in 1676 over his support for Pietist conventicles. He was first of all forbidden to preach and in 1677 evaded his dismissal from office only by signing a new school agenda, which he had fiercely attacked before. In 1679 he obtained another position, as morning preacher at St Martini, Bremen; he died there ten months later.

Neander published an extremely influential work: *Joachimi Neandri Glaub- und Liebesübung: aufgemuntert durch einfältige Bundeslieder und Danck-Psalmen: neugesetzt nach bekant- und unbekandte Sang Weisen: . . . zu lesen und zu singen auff Reissen, zu Hauss oder bey Christen-Ergetzungen im Grünen* (Bremen, 1680, lost; 2/1683 and several later editions); in addition to the later editions of the whole work, the *Bundeslieder* (covenant songs, named after the covenant of God with Man) were adopted, complete or in part, as a self-contained section in the hymnbooks of many established churches.

With F.A. Lampe and Gerhard Tersteegen, Neander contributed significantly to the demise of the exclusive use of Calvinist hymns in Low Germany; although in the first place his songs were certainly not intended for community singing, they were soon put to this use, especially as most of them were written in the verse forms of the Genevan Psalter and could thus be sung to the corresponding tunes. He intended his 58 original melodies (with continuo) only as an alternative. The most popular of his hymns, which is still used today, is *Lobe den Herren, den mächtigen König der Ehren*, his melody for which is based on an earlier tune. *Wunderbarer König*, which is also still sung today, has an even finer text and melody. After Neander's death his poetry was repeatedly provided with new melodies, of which the 66 with continuo that G.C. Strattner published in 1691 are particularly outstanding.

WALTER BLANKENBURG/DOROTHEA SCHRÖDER

Neander, Valentin (i) (*b* Treuenbrietzen, nr Berlin, *c*1540; *d* probably at Treuenbrietzen, after 1583). German composer, writer on music, schoolmaster and civic official, father of VALENTIN NEANDER (ii). From 1553 to 1557 he attended the Gymnasium in the Old Town at Magdeburg, where he was taught music by Martin Agricola. Between 1557 and 1559 he lived at Lüneburg and became acquainted with Lucas Lossius. In October 1559 he matriculated at the University of Wittenberg, where he got to know Melanchthon (who died within a few months) and later the poet Paul Eber, author of many lieder, who wrote a prefatory poem for his *Cantiones sacrae*. After his studies he returned to Treuenbrietzen, where he became schoolmaster and later town clerk too. The chief source of biographical details about him is his book *Elegia de praecipuis artificibus et laude musices* (Wittenberg, 1583), in which he treated of the divine destiny of music. His only printed musical work is *XII sacrae cantiones*, for four to six voices (Wittenberg, 1567); an expanded edition, *Cantiones sacrae* (Wittenberg, 1584, 2 ed. in *Michael Praetorius: Gesamptausgabe*, 1928–40/*R*, vol. vi), including Eber's preface, is very probably an unaltered reprint of the now lost edition of 1569, the year of Eber's death. The later edition is more than double the size of the first and consists of 21 Latin and four German pieces. Various emblems to be found in it show that Neander must have had a strong grounding in humanism. There are two manuscript works by him, *Missa super 'In honore Christi'* (in *D-LÜh*) and a motet (in *D-Bsb*), both for five voices.

WALTER BLANKENBURG

Neander, Valentin (ii) (*b* ?Treuenbrietzen, nr Berlin, ?1575–80; *d* after 1619). German composer, son of VALENTIN NEANDER (i). He matriculated at the University of Frankfurt an der Oder in 1597 and was a pupil of Bartholomäus Gesius in that town. He published *Newe christliche Kirchen Gesänge, die man Introitus, Prosas, Responsoria und Hymnos nennet ... auff die Melodeyen des Lobwassers Psalmen ... gerichtet* (Frankfurt an der Oder, 1619; ?lost), which consists of 89 four-part pieces. It provides interesting evidence of the penetration of the Huguenot manner of psalm setting into Lutheran north Germany, a development that may have been encouraged by the decision of the Elector Johann Sigismund of Brandenburg in 1613 to adopt Calvinism as his faith (see Bohn). According to Grimm, Neander had earlier published *Neue geistliche Lieder* for four to eight voices (Frankfurt an der Oder, 1601), and he also seems to have written *Cantio nuptialis sumpta ex psalmo CXII* for eight voices (Wittenberg, 1607), for the wedding of the Duke of Saxony; both are lost.

WALTER BLANKENBURG

Neapolitan school. A term sometimes used to describe a group of primarily operatic composers active in Naples in the 17th and 18th centuries. *See under* NAPLES.

Neapolitan sixth chord. The first inversion of the major triad built on the flattened second degree of the scale; in C major or minor, F–A♭–D♭. It usually precedes a V–I cadence and it functions like a subdominant (in German chord analysis it can be described as the *Leittonwechselklang* of the minor subdominant). It is associated with the so-called 'Neapolitan school', which included Alessandro Scarlatti, Pergolesi, Paisiello, Cimarosa and other important 18th-century composers of Italian opera; but it seems to have been an established if infrequent harmonic practice by the end of the 17th century, being used by Carissimi, Corelli and Purcell. It was also a favourite idiom among composers in the Classical period, especially Beethoven, who extended its use to root-position and second-inversion chords (examples include the opening of the String Quartet op.95 and the second movement of the Hammerklavier Sonata).

WILLIAM DRABKIN

Neary, Martin (Gerard James) (*b* London, 28 March 1940). English organist and choirmaster. A chorister at the Chapel Royal and organ scholar of Gonville and Caius College, Cambridge, he also studied privately with Geraint Jones, André Marchal and Sir Adrian Boult, coming to notice as a prizewinner at the 1963 St Albans International Festival. During his first post, as organist and choirmaster at St Margaret's, Westminster (1965–71), he founded and conducted the Martin Neary Singers. He was appointed organist and master of the music at Winchester Cathedral in 1972, where his fine choir became noted for its championship of the works of Jonathan Harvey and John Tavener, for its many overseas tours and for its broadcasts and recordings. Under Lorin Maazel the choir gave the première of Andrew Lloyd Webber's *Requiem* in New York in 1986. Neary subsequently conducted the first British performance in Westminster Abbey, where he became organist and master of the choristers in 1988. At Westminster he consolidated the achievements of his Winchester years, contributing two notable broadcast concerts to the Purcell centenary year in 1995 and commissioning new works from such composers as Francis Grier. In 1994 the Westminster choir under Neary became the first foreign ensemble to perform within the Kremlin, and in 1997 he devised and directed the music at the funeral of Diana, Princess of Wales. He left the Abbey in 1999 to pursue a freelance career.

Neary has a considerable reputation as a recitalist in Europe and the USA, where he has given first performances of many contemporary British works. He is also a notable exponent of Messiaen and has made editions of early French organ music. He was president of the Royal College of Organists from 1988 to 1990 and was invited back for a second term in 1996.

STANLEY WEBB/PAUL HALE

Neate, Charles (*b* London, 28 March 1784; *d* Brighton, 30 March 1877). English pianist and cellist. He received his early musical education from James Windsor and afterwards from John Field, with whom he had formed a close friendship. Field also joined him as a student of the cello under William Sharp. He first appeared as a pianist at Covent Garden Theatre at the Lenten Oratorios in 1800, and soon established a reputation as an excellent performer. He studied composition under Woelfl, and in 1808 published his first work, a piano sonata in C minor. In 1813 he was one of the original members of the Philharmonic Society, of which he was for many years a director, and often performed, and occasionally conducted, at its concerts.

Neate is remembered for his friendship with Beethoven, whom he met in Vienna in May 1815, after having studied counterpoint under Winter in Munich for three months. He spent about eight months in almost daily contact with Beethoven, at Baden and Vienna, although Beethoven declined to accept him as a pupil and referred him instead to Förster. Neate also arranged for the purchase by the Philharmonic Society of three overtures and some other pieces which had been offered to George Smart the previous March; he acted as Beethoven's agent after his return to England, and in December 1824 tendered the Society's offer of 300 guineas for Beethoven to come to London and conduct his works. Thayer, in 1861, relied on him for information about Beethoven's English dealings, though Neate's recollection may have been coloured by his failure ever to sell any of Beethoven's music to publishers.

Neate was long esteemed as one of the best performers on and teachers of the piano in London. He composed a quintet for piano and wind, two trios for piano and strings, two sonatas and many other works for piano solo and duet, and wrote *An Essay on Fingering* (London, 1855), which contains a catalogue of his published works to op.40.

Nebel [nevel] (Heb.). Ancient Jewish instrument, possibly a lyre. *See* BIBLICAL INSTRUMENTS, §3(vii).

Nebendreiklang (Ger.). Minor TRIAD.

Nebenklang (Ger.). *See under* KLANG (ii).

Nebenlinie (Ger.). *See* LEGER LINE.

Nebennote (Ger.). *See* NON-HARMONIC NOTE.

Nebensatz (Ger.). Second SUBJECT GROUP.

Nebenstimme (Ger.: 'subsidiary part'). *See under* HAUPTSTIMME.

Nebentonarten (Ger.: 'secondary keys'). With reference to a given tonality, keys other than the tonic, dominant and subdominant. Those most frequently encountered are the submediant, mediant and supertonic.

Nebra (Blasco), José (Melchor de) (*b* Calatayud, bap. 6 Jan 1702; *d* Madrid, 11 July 1768). Spanish composer and organist. Born to a family of musicians, he began his musical training under his father José Antonio Nebra (*b* La Hoz de la Vieja, bap. 23 Nov 1672; *d* Cuenca, 4 Dec 1748), who had settled in Cuenca as cathedral organist and teacher of the choirboys (1711–29) and later became *maestro de capilla* (1729–48). His two brothers were also musicians: Francisco Javier (*b* Calatayud, 16 April 1705; *d* Cuenca, 4 July 1741) was organist at La Seo, Saragossa (1727–9), and then in Cuenca (1729–41); Joaquín (*b* Calatayud, bap. 21 May 1709; *d* Saragossa, 16 Aug 1782) was organist at La Seo from 1730 until his death.

José de Nebra soon moved to Madrid. In 1719 he is mentioned as organist of the Descalzas Reales convent, where the *maestro de capilla* was José de San Juan, author of *Arte de canto llano* (Madrid, 1694). In 1722 Nebra worked in the chapel of the noble household of Osuna together with such composers as Antonio Literes and Antonio Duni, and at this time he began also to compose music for the commercial theatres in Madrid. On 22 May 1724 he was appointed organist of the royal chapel in the place of one of the musicians who accompanied Felipe V to San Ildefonso after his abdication in favour of his son, Luis I. When Felipe resumed the throne on 31 August that year Nebra was made supernumerary organist, with the right of promotion to first organist when the vacancy arose. In 1738 he was offered the post of *maestro de capilla* at Santiago Cathedral and in 1741 that of organist at Cuenca, both of which he declined. On 5 June 1751 he took up a new post as *vicemaestro* of the royal chapel in Madrid and assistant head of the *Colegio de niños cantores* (the royal choir school); he and Antonio Literes were put in charge of organizing a new and substantial repertory of church music to replace that lost in the fire at the royal palace in 1734. Nebra suggested the purchase of works by Neapolitan composers, including Alessandro Scarlatti, Leo and Sarro, and temporarily abandoned his theatre activites almost completely to dedicate himself to composing sacred music, most of which is still in the archives of the royal palace in Madrid.

Nebra was an excellent organist; in 1749 he was charged with supervising the restoration of the organ at the Jeronimos convent and in 1756 his advice was sought on the organ for the chapel of the new royal palace by Fernández Dávila. He taught the organ at the Jeronimos convent, where his pupils included Antonio Soler, for whose *Llave de la modulación* (Madrid, 1762) he wrote a preface. Another pupil was José Lidón, later organist and *maestro* of the royal chapel. On 25 May 1761 Nebra was appointed harpsichord teacher to Prince Gabriel, and Nebra's nephew Manuel Blasco de Nebra (*b* Seville, 2 May 1750; *d* Madrid, 12 Sept 1784), later organist of Seville Cathedral and author of *Seis sonatas para clave, y fuerte piano* (Madrid, *c*1775), was also taught by him from 1766 to 1768. Nebra's own works for harpsichord and organ, which survive only in copies made after his death, are similar in style to those of José Elías, Domenico Scarlatti and Sebastián Albero y Añaños. Like them, he developed the model of the bipartite sonata, made known primarily through the works of Scarlatti.

In 1728 Nebra served as joint composer, alongside Facco and Falconi, in providing the music for the melodrama *Amor aumenta el valor*, performed in Lisbon to celebrate the marriage of the Prince of Asturias (later Ferdinand VI) to the Portuguese princess Maria Barbara. Nebra's importance as a theatre composer, however, derives from his work for the public theatres in Madrid, where he worked with the most prominent playwrights of the time (Cañizares, González Martínez). He was responsible for inaugurating new houses to replace the traditional open-air theatres. In 1737 his *Más gloria es triunfar de sí: Adriano en Siria* initiated the first season by a Spanish company at the Coliseo de la Cruz, and 1745 saw the inauguration of the Coliseo del Príncipe with *Cautelas contra cautelas y el rapto de Ganímedes.* From 1723 to 1751 (except for the period 1731–6) Nebra consistently wrote works in most of the theatrical genres of his time: zarzuelas, *comedias* and *autos sacramentales* and he also composed various minor works such as *loas, sainetes* and *entremeses* which accompanied the main plays. In these pieces, in which speech and singing alternated freely, Nebra used traditional Spanish musical forms (*seguidillas* and *coplas*), together with da capo arias popular in Italian opera of the time, often writing a trio or quartet in da capo form to end each *jornada* or act of a zarzuela. His orchestra (depending on the resources of the particular theatre) included violins and violas, and often oboes and flutes (played probably by the same instrumentalists) as well as horns and trumpets.

Despite his success in public theatres, Nebra's participation in court plays was fairly limited after his 1728 collaboration in Lisbon. At a time when opera was largely commissioned from Italian composers and performers, we know only of his participation on the harpsichord in some of the operas performed at the Spanish court in Madrid, such as *Farnace* (1739) and *Achille in Sciro* (1744), both with music by Courcelle, and of his instrumental arrangements and additions for two plays by Calderón and Cañizares revived for the marriage of Maria Luisa and the Great Duke of Tuscany on 14 February 1764.

Nebra began composing sacred works in 1747, and his production increased after his appointment as assistant *maestro* to the royal chapel in 1751. The music reflects the needs and personnel of this institution (an eight-part choir and a broad variety of instruments). He also composed works for Cuenca Cathedral, where he had family contacts, and sent others to Santiago de Compostela and the Seo church in Saragossa, and there are copies of his religious works in various Spanish and Latin American archives. In 1758 he composed a requiem for Queen Maria Barbara, and this continued to be sung at Spanish royal family funerals until the beginning of the 19th century. In 1759 he sent his *Vísperas del común de los santos y de la Virgen* to Pope Clement XIII for performance in the papal chapel. After 1761 his sacred output decreased.

JOSÉ-MÁXIMO LEZA CRUZ

Neck (Fr. *manche*; Ger. *Hals*; It. *manico*). An essential feature of all string instruments classified as lutes, open harps or harp-lutes, serving to extend the length of the strings beyond the resonating body of the instrument. It may be fitted with a fingerboard (as in the case of the violin family). Distinctions are made between 'long-necked lutes', particularly those of the Arabic and Persian regions and India, and 'short-necked lutes' such as the Arabic 'Ūd, the European classical lute and instruments of the violin and viol families. The former type tend to carry only one or two melody strings (e.g. the Turkish saz and the Indian sitār) and have a playing technique involving only one or two fingers and much linear movement of the hand along the neck. Short-necked lutes are characterized by a 'tiered array' of strings, calling for wide necks and little linear hand movement but considerable lateral finger movement across the neck.

The necks or handles of spike lutes (e.g. the Indonesian *rebab* and the Japanese shamisen), sometimes little more than sticks in the case of folk instruments, pass diametrically through the body of the instrument, projecting from the lower end as a spike or stub which in turn serves

usually as an attachment point for the strings. Other necks are joined to the body with nails or glue or both (as on the violin), while yet others are made by extending and tapering the body of the instrument (e.g. the rebec, the Greek lyra, the Bulgarian gadulka and the sitār). Some necks are hollow and continue into a deep pegbox, allowing sympathetic strings to be threaded under a fingerboard (if present) and attached to lateral pegs on the pegbox or along the side of the neck itself (e.g. the Indian sāraṅgī).

The zoomorphism and anthropomorphism implicit in the term 'neck' is emphasized in some instrument types by carving the end of the neck into the shape of a human or animal head. Particularly striking examples of these are 19th-century ivory-necked harps of the Zande and Mangbetu peoples of Central Africa (*see* CONGO, DEMOCRATIC REPUBLIC OF THE), the South Indian *sarasvatī vīṇā* (*see* VĪṆĀ, fig.5), the Mongolian *morin khuur* and a number of 18th-century viols and violas d'amore.

See also FINGERBOARD and PEGBOX.

PETER COOKE

Nectoux, Jean-Michel (*b* Le Raincy, 20 Nov 1946). French musicologist. After studying law at the University of Paris (1964–8), he studied musicology with Yves Gérard and musical aesthetics with Vladimir Jankélévitch at the Sorbonne (1968–70). He subsequently took a course in librarianship at the Ecole Nationale Supérieure des Bibliothéques (1969–70). He has successively held the post of head librarian at the Bibliothéque Municipale de Versailles (1970–72), the music department of the Bibliothéque Nationale de France (1972–85), the Musée d'Orsay (1985–97) and from 1999 the newly created Institut National d'Histoire de l'Art. Additionally, from 1997 to 1999 he was deputy music director of Radio France.

Nectoux was secretary of the Répertoire International de Littérature Musicale (RILM) for France (1972–85) and assistant editor of the *Revue de musicologie* (1979–82). In 1980 he founded the musicological series *Harmoniques*. He has undertaken research mainly in French music, literature and the arts from 1850 to 1925, studying in particular Proust, Mallarmé, Fauré, Debussy, Ravel, the Ballets Russes and Stravinsky. He is considered to be the foremost authority on Fauré, the subject of his doctoral thesis (1980).

JEAN GRIBENSKI

Nedbal, Oskar (*b* Tábor, 26 March 1874; *d* Zagreb, 24 Dec 1930). Czech composer, conductor and viola player. He studied the violin with the *regens chori* Endler in Tábor and then with Bennewitz at the Prague Conservatory (1885–92), where he was also a pupil of Filip Bláha (trumpet and percussion) and Dvořák (composition). With Vitezslav Novák and Suk he was one of Dvořák's most successful pupils. He played the viola in the Czech Quartet (1891–1906), in which Suk was the second violinist, and was often also heard as the group's pianist. This ensemble raised the standards of Czech chamber playing to an international level and appeared all over Europe in a repertory based, during Nedbal's time, on Beethoven, Schumann, Brahms, Smetana and Dvořák.

Nedbal was equally successful as a conductor. With the Czech PO, which he conducted from 1896 to 1906, he undertook his first major tour outside Austro-Hungary, to England in 1902. He also appeared as a guest conductor throughout Europe, displaying his temperamental, accomplished technique in works by Mozart, Beethoven, Berlioz, Brahms, Tchaikovsky and Czech composers: Smetana, Dvořák, Fibich, Novák and Suk. Subsequently he settled

Oskar Nedbal pen and ink drawing by Dr Desiderius

in Vienna, where he founded and conducted the Tonkünstlerorchester (1907–18). He returned to Prague after the formation of the Czech Republic and conducted the Šak PO (1920–21), but in the strained postwar nationalist atmosphere he was not favourably received, and he left for Bratislava, where he became a leading light in the musical life of Slovakia. He was head of opera at the newly established Slovak National Theatre, director of the Bratislava radio station and a reader at both the university and the music academy. He also conducted concerts for the Cultural Union for Slovakia. His work at the National Theatre included giving the premières of Bella's *Wieland der Schmied* (1926) and Figuš's *Detvan* (1928). In 1930 he committed suicide by jumping from an upper window of the Zagreb Opera House.

As a composer Nedbal achieved world renown for his operettas, written to Viennese librettos and in the fashion of Vienna and Berlin. He enlivened his skilled technique with an almost Dvořákian invention and made use also of the fresh rhythms of Czech, Polish and Yugoslav folkdance. His one attempt at opera, however, met with little success. In style he developed from the Dvořák-dominated atmosphere of late Czech Romanticism. His inclination towards salon-music sentimentality, shown primarily in the instrumental works, at first had close parallels with Suk's style. Although his predilection for operetta was, from the point of view of the development of Czech music, something of a regression, he did create works of lasting value in ballet and pantomime, works that continue to display the taste and liveliness of his operettas.

His nephew Karel Nedbal (*b* Dvůr Králové, 28 Oct 1888; *d* Prague, 20 March 1964) was also a conductor, working at the Vinohrady Theatre (1914–20), and then becoming chief conductor at Olomouc (1920; 1941–5), Bratislava (1928–30), Brno (1938–40) and at the Prague National Theatre (1945–7).

WORKS
(*selective list*)

Opera: Sedlák Jakub [Peasant Jacob] (L. Novák, after F. Lope de Vega), 1919–20, Brno, 13 Oct 1922, rev., Bratislava, 15 Dec 1928

Operettas: Die keusche Barbara (R. Bernauer and L. Jacobson), Vienna, Raimund, 7 Oct 1911; Polenblut (L. Stein), Vienna, Carl, 25 Oct 1913; Die Winzerbraut (Stein and J. Wilhelm), Vienna, An der Wien, 11 Feb 1916; Die schöne Saskia (A.M. Willner and H. Reichert), Vienna, Carl, 16 Nov, 1917; Eriwan (F. Dörmann), Vienna, Komödienhaus (Colosseum), 29 Nov 1918; Mamselle Napoleon (E. Golz and A. Golz), Vienna, Hölle, 21 Jan 1919, rev. Prague, Kleine Bühne, 17 May 1928; Donna Gloria (V. Léon and Reichert), Vienna, Carl, 30 Dec 1925

Ballets: Pohádka o Honzovi [Legend of Honza] (F.K. Hejda), 1902, Prague, National, 24 Jan 1902; Z pohádky do pohádky [From Fairy Tale to Fairy Tale] (L. Novák), 1908, Prague, National, 25 Jan 1908; Princezna Hyacinta (L. Novák), 1911, Prague, National, 1 Sept 1911; Des Teufels Grossmutter, 1912, Vienna, Hof, 20 April 1912; Andersen (L. Novák, J. Kvapil), 1912, Vienna, Ronacher, 1 March 1914

Orch: Scherzo caprice, op.5, 1892

Inst: Variations on a Theme of Dvořák, op.1, pf; Lettres intimes, op.7, pf; 4 Pieces, op.8, pf; Vn Sonata, op.9; 2 Pieces, op.12, vc; Pohádka o smutku a štěstí [Fairy Tale about Grief and Joy], pf, 1906

Principal publishers: Bosworth, Eibenschütz, P. Neldner (Riga), Schlesinger, F.A. Urbánek, Mojmír Urbánek

OLDŘICH PUKL

Nederlands Kamerkoor. Dutch ensemble, founded by FELIX DE NOBEL.

Nederlands Philharmonisch Orkest. Orchestra formed in 1985, based in Amsterdam. *See* AMSTERDAM, §3.

Nederveen, Cornelis (Johannes) (*b* Schiebroek, Netherlands, 31 July 1932). Dutch physicist and acoustician. At Delft University he obtained a degree in technical physics (1956) and took the PhD (1969). The major part of his professional career has been spent at TNO (Netherlands Organization for Applied Scientific Research). He is an accomplished jazz clarinettist. His most important contribution has been to the fundamental acoustics of woodwind instruments. In aiming to find more rational design procedures, he has made a comprehensive theoretical analysis of the resonance of tubes, incorporating the effects of side holes, bends, mouthpieces and reeds. This allows detailed calculations to be made of the hole positions in a woodwind instrument and predictions to

be made about aspects of tuning and tone quality. His findings are presented in *Acoustical Aspects of Woodwind Instruments*, which has become a standard text for designers of woodwind instruments.

MURRAY CAMPBELL, CLIVE GREATED

Needler, Henry (*b* ?1685; *d* London, 8 Aug 1760). English amateur violinist and music copyist. He was first a pupil of his father and later, it is said, of Purcell (presumably Daniel) and the younger John Banister. He is reputed to have been the first person in England to perform Corelli's concertos and was a prominent figure in London musical life, active both in aristocratic circles and in concerts such as those of Thomas Britton in Clerkenwell. He was a member (and later a director and leader of the orchestra) of the Academy of Ancient Music from 1728 until his death. His antiquarian interests are evident in his work as a copyist, most notably in a series of 27 volumes (*GB-Lbl*), the first transcribed from various sources at Oxford. 15 volumes consist almost entirely of 16th-century English and Italian vocal music, the others mainly of works by 18th-century composers, including Handel, who is said to have been a personal friend. A civil servant by profession, Needler entered the Excise Office as a young man, becoming an accountant general in 1724.

H. DIACK JOHNSTONE

Neefe, Christian Gottlob (*b* Chemnitz, 5 Feb 1748; *d* Dessau, 26 Jan 1798). German composer. He received his initial musical education from Wilhelmi, city organist of Chemnitz, and C.G. Tag, Kantor of Hohenstein. He was composing at the age of 12, and partly educated himself from the textbooks of Marpurg and C.P.E. Bach. From 1769 to 1771 he studied law at Leipzig University, and then continued his musical training under J.A. Hiller, whom he replaced as music director of Seyler's theatre troupe in 1776. He joined the Grossmann-Hellmut troupe in 1779 and moved to Bonn, where, perhaps as early as 1780, he began teaching the young Beethoven the piano, organ, thoroughbass and composition, acquainting him also with Bach's *Das wohltemperirte Clavier* and C.P.E. Bach's *Gellert-Lieder*. From 1782 he served as court organist (Beethoven occasionally deputized for him in this post); he also substituted for Lucchesi as court Kapellmeister during the latter's Italian journey of 1783–4. With the death of the Elector Max Friedrich in 1784 Neefe's financial situation deteriorated considerably. The Grossmann theatre was closed and his salary as organist reduced, and he was forced to depend on an income from private teaching. Shortly before the French invasion in 1794 the court disbanded, leaving Neefe unemployed; the occupying French forces allowed him only a minor official post. He became music director of the Dessau theatre at the end of 1796, but fell seriously ill and died soon afterwards.

Neefe was important both as a composer of lieder and Singspielen and as a teacher. While a student he became acquainted with Hiller's efforts at a comprehensive music pedagogy, which later influenced his teaching at Bonn. Hiller also stimulated Neefe's interest in music theatre, and as early as 1771 commissioned him to compose ten songs for *Der Dorfbalbier*. In these, as in his later work, Neefe showed a particular gift for writing in smaller forms. His theatrical works (the most popular being *Adelheit von Veltheim*, based on Turkish exoticisms similar to those in Mozart's *Die Entführung aus dem Serail* of two years later) reveal attractive melodic writing and character realization. For dramatic climaxes he occasionally made use of melodrama, as previously developed by Benda, and he composed a full monodrama *Sophonisbe* on Benda's models. To help disseminate Mozart's operas he prepared vocal scores of five of these works for the publisher Simrock.

Neefe's lieder show an unmistakable inclination towards dramatic effects, especially in the *Serenaten* of 1777, whose texts are probably his own. These works show great variety of form, and turn away from the folk style of the Berlin school towards cantata-like ballades. The Klopstock odes similarly reflect Neefe's efforts to create novel forms, and his prefaces to the three editions of them (1776–*c*1785) touch on the then progressive issues of the relation of words to music and the singer's understanding of the text. The elaborately varied strophic songs of Neefe's later years foreshadow the lieder of the Romantic period, above all those of Schubert.

WORKS

printed works published in Leipzig unless otherwise stated

STAGE

Der Dorfbalbier (comische Operette, 1, C.F. Weisse, after M.-J. Sedaine: *Blaise le savetier*), Leipzig, Rannstädter Thore, 18 April 1771; rev. version (2), Leipzig, Rannstädter Thore, 1 Aug 1771, vs *B-Bc*, vs (1771) [10 nos. by Neefe, 13 by J.A. Hiller]
Die Apotheke (comische Oper, 2, J.J. Engel), Berlin, Behrenstrasse, 13 Dec 1771, *Bc*, *D-Bsb*, *Dl*, *SWl*, vs (1772)
Amors Guckkasten (Operette, 1, J.B. Michaelis), Leipzig, 10 May 1772, *B-Bc*, *D-Mbs*, vs (1772), ed. G. von Westermann (Munich, 1922)
Die Einsprüche (comische Oper, 1, Michaelis), Leipzig, Rannstädter Thore, late 1772; rev. as Die Einsprüche (1), Berlin, Behrenstrasse, 16 Oct 1773, *B-Bc*, *D-Bsb*, *Mbs*, vs (1773)
Zemire und Azor (komische Oper, 4, M.A. von Thümmel, after J.F. Marmontel), Leipzig (Koberwein company), 5 March 1776; music re-used by G.F.W. Grossmann for Was vermag ein Mädchen nicht!, Frankfurt, 18 May 1787
Heinrich und Lyda (Drama, 1, B.C. d'Arien), Berlin, Döbbelins, 26 March 1776, *A-Wn*, *B-Bc*, *D-Bsb*, vs (Naumburg and Zeitz, 1777)
Sophonisbe (musikalisches Drama mit historischen Prolog und Chören, 1, A.G. Meissner), Leipzig, 12 Oct 1776, *A-Wgm*, vs (1782)
Die Zigeuner (Lustspiel mit Gesang, 5, H.F. Möller, after M. de Cervantes: *Preciosa*), Frankfurt, Nov 1777, *Bsb*
Adelheit von Veltheim (Schauspiel mit Gesang, 4, Grossmann), Frankfurt, Junghof, 23 Sept 1780, *Wgm*, *D-Dl*
Der neue Gutsherr (3, J.G. Dyck [dialogue] and J.F. Jünger [arias], after P.C. de Chamblain de Marivaux: *Le paysan parvenu*), unperf., vs, Acts 1 and 2 (1783–4)

OTHER WORKS

Other vocal: Freimaurerlieder (1774); Lieder mit Klaviermelodien (Glogau, 1776); [13] Oden von Klopstock mit Melodien (Flensburg and Leipzig, 1776/*R*, enlarged 3/*c*1785/*R*), 1 chorus (Das grosse Hallelujah) ed. in Denkmäler rheinischer Musik, xii (Düsseldorf, 1965); Serenaten beym Klavier zu singen (?Neefe) (1777/*R*); Lieder für seine Freunde und Freundinnen nebst einer Ballade (1784); Bilder und Träume (Herder) (1798/*R*); 21 lieder in Vademecum für Liebhaber des Gesangs und Klaviers (1780); motet, 4vv, *Bsb*; Lateinisches Vaterunser, lost
Kbd: 12 Klaviersonaten (1773), ed. in Denkmäler rheinischer Musik, x–xi (Düsseldorf, 1961); 6 neue Klaviersonaten (1774) [incl. 2 sets of variations in suppl.]; Pf Sonata, 6 polonaises, 6 minuets in Vademecum (1780); 2 sets of variations (Bonn, 1793); 6 pièces

d'une exécution facile tirées de ... Die Zauberflöte, pf/hpd 4 hands (Bonn, 1793); Fantasia, hpd (Bonn, 1797); miscellaneous smaller works, incl. 2 early sonatinas, in J.A. Hiller: *Wöchentliche Nachrichten* (1768, 1770)

Other inst: Conc., hpd (Mannheim, 1782); Partita, 1774, *SWl*, ed. in Denkmäler rheinischer Musik, i (Düsseldorf, 1951); 6 sonatas, pf, vn acc. (Glogau, 1776); Vn Sonata in Vademecum (1780); 6 vn sonatas, 2 partitas listed in Breitkopf catalogues, 1772–81

Vocal scores of W.A. Mozart: La clemenza di Tito, Così fan tutte, Le nozze di Figaro, Die Entführung aus dem Serail, Don Giovanni; also works by Paisiello, Salieri and others, see Leux, 116

LOTHAR HOFFMANN-ERBRECHT

Neel, (Louis) Boyd (*b* Blackheath, London, 19 July 1905; *d* Toronto, 30 Sept 1981). English conductor. A naval officer who became a doctor and then a professional musician, he was educated at the Royal Naval College, Dartmouth; he studied medicine at Cambridge and in London and music theory at the GSM. In 1932 he founded the Boyd Neel Orchestra, which made its début at the Aeolian Hall, London, on 22 June 1933. Drawn from the best young string players, the orchestra quickly formed a distinctive style and repertory. Britten composed his Variations on a Theme of Frank Bridge for them, which they played at the 1937 Salzburg Festival, so establishing Britten's international reputation and their own.

As well as string works by Elgar, Holst, Vaughan Williams, Britten, Dvořák, Grieg, Tchaikovsky, Bloch (Concerto grosso) and Stravinsky (*Apollon Musagète*), the orchestra was particularly associated with the revival of Baroque string music, then little known or played by too cumbersome an orchestra. Based on 18 players, the group developed a true and lively chamber character, well suited to the music of such composers as Torelli, Vivaldi and Geminiani, and the concertos of Mozart (often with Kathleen Long or Frederick Grinke). Neel had an instinctive gift for tempos and clean textures in Bach and Handel: among the orchestra's fine recordings, those of Handel's Grand Concertos op.6, pioneering when they were made, still held their own when they were reissued in the more critically informed 1970s. Under Neel the orchestra toured widely: in Britain and Europe, in Australia and New Zealand in 1947, and in Canada and the USA in 1952.

During World War II Neel returned to medicine but also entertained the forces and performed at the National Gallery Concerts in London; Britten wrote his Prelude and Fugue for the orchestra's tenth anniversary. Neel then conducted the Sadler's Wells Opera (1945–6), the D'Oyly Carte Opera (1948–9) and the Robert Mayer Children's Concerts (1946–52).

In 1953 he was appointed dean of the Royal Conservatory of Music and head of the music faculty of Toronto University. His academic duties centred on the teaching of orchestral conducting and planning the new Edward Johnson Building, opened in 1962. He formed in 1954 the Hart House Orchestra, the Canadian counterpart of the Boyd Neel Orchestra, which toured North America, and appeared at the Stratford Festival (Ontario) in 1955, the Brussels World Fair in 1958 and the Aldeburgh Festival in Britain in 1966. Neel retired as dean in 1971, having substantially raised the prestige of music in the university. He continued as musical director of the Hart House Orchestra and director of the Sarnia (Ontario) Light Opera Festival. He was made a CBE in 1953 and an officer of the Order of Canada in 1972.

DIANA MCVEAGH, EZRA SCHABAS

Neele, Perrot [Peron, Peros] **de.** *See* PERROT DE NEELE.

Nees, Vic (*b* Mechelen, 8 March 1936). Belgian composer and conductor, son of Staf Nees. He studied at the Antwerp Conservatory with Marcel Andries, Renaat Veremans, Mortelmans and Decadt, and he won the De Vleeshouwer Prize in the composition class of Flor Peeters. He then specialized in choral conducting with Kurt Thomas in Hamburg. From 1961 to 1970 he worked as a producer for choral music with Belgian Radio and Television (BRT). He was the conductor of the BRT Choir from 1970 until his retirement in 1996. In 1994 he became a member of the Belgian Royal Academy. Both as a conductor and a composer he exerted great influence on Flemish choral music, conducting all over the world and winning many composition prizes. His works consist almost completely of vocal music. Already in his earliest works he broke consciously away from the Flemish Romantic tradition and based his approach on German 20th-century choral music and Renaissance and early Baroque vocal music, particularly the works of Schütz. Nees composes in a pictorial and expressive way, using key words in the text as his starting-point. Traditional means are combined with innovations such as repetitive elements (*Lesbia*), clusters (*Rachel*) and complex rhythms (*Looft de Heer*).

WORKS
(*selective list*)

Sacred: Rachel (cant., A. Boone), solo vv, children's choir, SATB, insts, 1970; Anima Christi (Boone), orat, T, Bar, reciter, SATB, 8 insts, 1988–9

Acc. vocal: Mammon, S, 2 reciters, SATB, 7 insts, 1972; Birds and Flowers (Nees) SATB, fls, 1973; Aurora lucis (M. Martens), children's choir, youth choir, str, 1978–9; Tweeklank van aarde en water (Martens), equal vv, gui, 1981; Gloria Patri, 1987, 6vv chorus, bell; Regina Coeli – Blue be it (G.M. Hopkins) S, 5vv chorus, cel, 1987

Unacc. choral (mixed vv unless otherwise stated): Aloeëtte voghel clein (medieval), 1959; Kleine geestelijke triptiek (Bible: *John*), 1960; Looft de Heer in zijn heiligdom (Ps cl), 1963; 5 Motetten (liturgical text), 1964; Vigilia de la Pentecosta (liturgical text), 1972; Als een duif op een dak (ps texts), 1974; Lesbia (liturgical text), 1978; Mag, 1980–81; Gisekin-Triptiek (J. Gisekin), 1981–2; Memoria justi (Bible: Lat. texts), S, equal vv, 1989; Emmanuel (Bible: Lat. texts), equal vv, 1992; E cantico canticorum fragmenta (Bible: *Song of Songs*), equal vv, 1993–4; 4 chansons de Flandre (M. Elskamp), 1994

YVES KNOCKAERT

Nef, Isabelle (Lander) (*b* Geneva, 27 Sept 1898; *d* Bossy, nr Geneva, 2 Jan 1976). Swiss harpsichordist and pianist. After training as a pianist with Marie Panthès at the Geneva Conservatoire, she continued her studies in Paris with Isidor Philipp and also took courses in composition under d'Indy at the Schola Cantorum. In 1923 she became a harpsichord pupil of Landowska under whom she worked for 12 years, and with whom she often gave performances of Bach's concertos for several harpsichords. She gave concert tours throughout western Europe, in North and South America, and in Australia, and was the first modern harpsichordist to play in the USSR and South Africa. In 1936 she became the first professor of harpsichord at the Geneva Conservatoire. Nef's repertory was very extensive, taking in the principal works for harpsichord as well as a number of contemporary concertos. Malipiero's *Dialogue* no.6 and Martin's Concerto were written for her. She made many recordings, including the first complete recording on the harpsichord of Bach's '48'. Her playing was marked by the rhythmic precision and colourful registration associated with the Landowska school.

HOWARD SCHOTT

Nef, Karl (*b* St Gallen, 22 Aug 1873; *d* Basle, 9 Feb 1935). Swiss musicologist. After his schooling in St Gallen, he studied at Leipzig Conservatory and later with Kretzschmar at Leipzig University, where he took the doctorate in 1896 with a dissertation on collegia musica in Switzerland. In 1900 he completed the *Habilitation* at Basle University with a study of German 17th-century instrumental music; he was appointed reader at Basle in 1909 and full professor in 1923. From 1897 to 1925 he was music critic of the *Basler Nachrichten* and from 1898 to 1909 he edited the *Schweizerische Musikzeitung*. He helped found the Schweizerische Musikforschende Gesellschaft and later served as its president (1932–5). Local and national music history was the subject of Nef's work from his dissertation onwards; his important writings, which became models of Swiss music-history research, place him with Edgar Refardt and Peter Wagner among the founders of musicology in Switzerland. Under Nef, Basle became the centre of Swiss musicology; his pupils included Jacques Handschin, Ernst Mohr and Arnold Geering.

His brother, Albert Nef (*b* St Gallen, 30 Oct 1882; *d* Berne, 6 Dec 1966), was a conductor and musicologist. After studies in Leipzig and Berlin he became the first conductor of Berne Opera in 1913, later becoming acting director of opera and drama at the Berne Stadttheater (1935–58) and director (1958–9). His writings include *Das Lied in der deutschen Schweiz Ende des 18. und Anfang des 19. Jahrhunderts* (Zürich, 1909) and *Fünfzig Jahre Berner Theater* (diss., U. of Berlin, 1906; Berne, 1956).

JÜRG STENZL

Nef, Walter (Robert) (*b* St Gallen, 8 April 1910). Swiss musicologist, nephew of KARL NEF. He studied musicology at Basle, under Karl Nef, Handschin and Merian, at Berlin, under Schering, and at Paris, under Pirro, as well as continuing practical studies at the Basle Conservatory. After obtaining the doctorate at Basle University in 1934 with a dissertation on Fridolin Sicher's tablature, he became a teacher and assistant to the director of the Schola Cantorum Basiliensis, of which he was deputy director (1954–64) and director (1964–70). In 1954 he began teaching at the Basle Conservatory; he lectured in the history of instruments at Basle University (1960–68), and in 1960 he took charge of the collection of musical instruments at the Basle Historical Museum. As one of the leading Swiss authorities on early instruments he has played a vital part in enlarging the Basle collection and attached particular importance to the historically accurate restoration of its items. His main teaching subject was organology. Many of his writings are concerned with the Basle instrument collection; of these his dissertation (which includes a thematic catalogue) is particularly valuable.

JÜRG STENZL

Neglia, Francesco Paolo (*b* Enna, 22 May 1874; *d* Intra, 31 July 1932). Italian composer and conductor. A pupil of Guglielmo Zuelli at the Palermo Conservatory, he began his career as an orchestra conductor. In 1901 he moved to Hamburg, where he founded and directed a conservatory. He also conducted opera at the Stadtstheater (with Weingartner) and orchestral concerts. At the start of World War I he returned to Italy, where in spite of the interest taken in him by M.E. Bossi and Puccini, he could find no work as a musician. He became a teacher in an elementary school, but towards the end of his life opened a music school in Legnano. He composed an opera, *Zelia*, posthumously performed, an operetta (unperformed), a *missa brevis*, a mass and other sacred works, two symphonies and other orchestral and band works, a string quartet, a piano quartet, a piano trio, pieces for the violin, viola and piano and songs. His orchestral music is in a typical late Romantic vein, but his chamber and sacred works are more original.

SERGIO MARTINOTTI

Negra (Sp.). *See* CROTCHET (quarter-note); *semiminima* is also used. *See also under* NOTE VALUES.

Negrea, Marţian (*b* Vorumloc, Sibiu district, 29 Jan 1893; *d* Bucharest, 13 July 1973). Romanian composer. He studied theory and harmony with Popovici at the Andreian Seminary, Sibiu (1910–14), and continued his education at the Vienna Music Academy (1918–21) under Mandyczewski (harmony, counterpoint and history) and F. Schmidt. After returning to Romania, he taught harmony at the conservatories of Cluj (1921–41) and Bucharest (1941–63). Although his output was not large, he made a reputation for his high standard of achievement in all genres. A lyrical composer *par excellence*, he successfully evoked the Romanian landscape in an atmosphere of reverie and meditation, particularly in such instrumental works as the *Simfonia primăverii*, the piano *Impresii de la ţară* ('Notes from the Countryside') and the orchestral *Poveşti din Grui* ('Grui Tales'). The pastoral quality is heightened by the use of folk materials, which Negrea knew from his upbringing in rural Transylvania, and the music is often picturesque, or even programmatically descriptive of village life. The prevailing idyllic character is suffused with melancholy, which is expressed primarily through the use of harmonies ranging from late Romantic tonality to folk modality or dodecaphony.

WORKS
(*selective list*)

Op: Marin Pescarul [Marin the Fisherman] (2, Negrea, after M. Sadoveanu: *Păcat boieresc* [A Boyar Custom]), op.12, 1933, Cluj, Romanian Opera, 3 Oct 1934

VIOREL COSMA

Negri, Cesare ['Il Trombone'] (*b* Milan, *c*1535; *d* ?Milan, after 1604). Italian dancing-master. His important treatise on dance, *Le gratie d'amore* (1602), is dedicated to Philip III of Spain, then ruler of Milan, but most of it was written during the long reign of Philip II, who died in 1598. This treatise gives the most comprehensive picture in a single source of social and theatrical dance and dance music of the late Renaissance; it reveals the great geographic spread of Italian dancing-masters, dances and techniques to many courts of Europe and testifies to the existence of a fully professional class of virtuoso male dancers. Taken together with Fabritio Caroso's works, *Il ballarino* (1581) and *Nebiltà di dame* (1600), it provides

a colourful context for the social dances of the Italian upper classes.

Negri's treatise is in three sections (*trattati*). The first section provides information about the author's professional life; Negri is unique in supplying enough autobiographical detail to give readers some idea of the life of a successful dancing-master of the period. His annotated list of Italian dancing-masters includes his teachers, colleagues and disciples along with their specialities and locales. The lists of his titled students during his 40-year career in Milan are organized under the successive governorships of Milan, making it reasonable to date the dances he dedicated to some of these pupils later in the book. His citations (with dates) of important events in Italy and Spain in which he participated as performer or director between 1555 and 1600 make his work a summation of styles and techniques of northern Italy during the second half of the 16th century. He is, furthermore, the only authority to include detailed descriptions of various allegorical processions which involved dancers and musicians, together with the precise instrumentation employed, as well as the identification of the characters portrayed.

The treatise's second section includes some advice on ballroom etiquette, but is primarily devoted to the steps and combinations of many complex and highly competitive galliard variations for men (*see* DANCE, fig.8); these include such feats as multiple capers (*capriole intrecciate* or *entrechats*), and double turns (*salti tondi* or *tours-en-l'air*). It is apparent that the principle of improvised variation in music was applied to dance as well, although the exact relationship between improvised dances and their improvised musical variations is difficult to determine from Negri's treatise since, unlike Arbeau's, it does not use dance notation which precisely correlates steps and music. Nevertheless, Negri did give the precise number of leg gestures within a fixed span of time (for example, 'this variation is done quickly, and has 25 strokes in four musical measures'), thus making it possible to establish norms of tempo. However, the final choice of tempo for a given variation depends as much on its physical requirements as on the size, skill and elevation of the dancer.

In the third section of the treatise Negri gave a set of rules for steps, which appears to be largely taken from Caroso's *Il ballarino*; but most of the section is devoted to directions for 43 dance choreographies, by himself and others, with their music printed in lute tablature and mensural notation. Many of the dances are both more difficult and more interesting than those supplied by Arbeau and Caroso. A considerable number are figure dances for two couples, a type not found elsewhere, and there are also figure dances for four couples which employ figures similar to those in English country dances and American square-dances and reels. Some of the dances, such as *La Corrente* and *Alemana*, are the only Italian version of their types to appear in a 16th-century source.

The musical significance of Negri's dance collection is considerable, even though much of it is composed by means of a pasticcio technique in which pre-existing melodic or rhythmic cells are united and reunited to fit the music to the dance. The music is simple, homophonic and repetitive. Popular *bassi ostinati* of the period appear, for example the canary and passacaglia (*La Catena d'Amore*). One-movement dances have from one to three

294 Le Gratie d'Amore,

Mutatione della ſonata.

VNDECIMA PARTE.

QVello, che guida, piglia la mano della ſua ninfa, e fa quattro .S. e quattro .SP. paſſando nel mezo delle due file, & andando in capo, e poi tornando à piè del ballo. nel medeſimo tempo l'vn Paſtore con gl'altri due voltano alla ſiniſtra, e tornano à piè del ballo; le ninfe anch'eſſe nel medeſimo tempo ſi voltano alla deſtra, e tornano parimente à piè d'eſſo ballo. pigliano poi le mani, e ſeguitano quello, che guida'l brando conducẽdo ogn'vno la ſua ninfa al ſuo luogo. poi fanno le .R. inſieme finendo'l brando con gratia, & decoro.

La Muſica della ſonata con l'Intauolatura di liuto del Brando, fatto da quattro paſtori, e quattro ninfe, la prima parte ſi fà tre volte, la ſeconda tre volte, la terza due volte, la quarta due volte, la quinta due volte, la ſeſta che è la gagliarda, ſi fà due volte, poi ſi torna à fare la prima parte due volte, e la ſeconda due volte, e la terza vna volta ſola, la quarta due volte, e la quinta due volte, la ſeſta due volte, l'vltima parte ſi fà vna volta ſola, e poi ſi finiſce il brando.

Directions and top line of music for the end of 'Brando detto Alta regina', from Negri's 'Le gratie d'amore' (Milan, 1602); the lute part is on the facing page

strains, each made up of two- or four-bar phrases. Most of the ballettos, which dominate the collection, are in several movements which may be musically related, with different mensurations and varying instructions as to the repetition of sections. They give valuable information about the variation suite and its performing practice. Most begin with an unnamed movement in duple metre, similar to a figured pavan, followed by a galliard (so-named in source); the piece may close with a return of the first movement or sometimes with a canary in rapid triple metre. Some dances are set to popular and pre-existing vocal pieces by such composers as Orazio Vecchi or Gastoldi (e.g. Vecchi's *So ben mi ch'a buon tempo*), showing how such music could be choreographed, adapted or supplemented to suit the choreographers' purposes. Negri's specific rubrics for the musical paths to be followed by the musicians reveal a complexity in combining musical strains with choreography which is not evident when looking at the music alone. Those dances specifically designed for the stage typify what contemporary composers such as Monteverdi would have expected for their staged balli. The *Brando detto Alta regina*, for four shepherds and four shepherdesses (see illustration), is an elaborate finale to a set of *intermedi* of 1599 that included the Orpheus myth.

JULIA SUTTON

Negri, Francesco (*b* Verona, ?*c*1609; *d* after 1635). Italian composer. For a time he was *maestro di cappella* of S Bernardino, Verona. In 1635 he was a canon of S Pietro, Guastalla. As a composer he is known only by *Arie musicali … a una e doi voci, con alcune cantate in stille recitativo*, op.1 (Venice, 1635); he stated that some of the texts were by Prince Vincenzo Gonzaga, the dedicatee. The three 'cantatas' are in fact long recitatives, the first a lament for a pet, the second a scena for an enraged lover, the third a setting of a madrigal text. The music is unremarkable, as is that of the seven short strophic arias. The most interesting music occurs in two of the other three pieces in the book. One is a setting of two ottavas, the music of the first of which is by another, anonymous composer and is in a simple, unadorned style, quite different from Negri's own music for the second ottava, which is extravagantly ornamented. The other more interesting piece is the only duet in the volume, *Ginevra, ah nò*, which is not only founded on the same chaconne bass as Monteverdi's duet *Zefiro torna* (first published in 1632) but also looks as if it was influenced by that great work; Negri may have deliberately chosen a sonnet as his text the more closely to emulate Monteverdi. It says something for Negri that his piece is not completely outclassed in comparison.

NIGEL FORTUNE

Negri, Gino (*b* Perledo, nr Como, 25 May 1919; *d* Montevecchia, nr Como, 19 July 1991). Italian composer and critic. He studied at the Milan Conservatory, where his teachers included Renzo Bossi. He taught at the Scuola del Piccolo Teatro in Milan from 1954 to 1959 and later at the Nuova Accademia, Milan. He was music critic of *Panorama* until 1984 and also worked for the RAI. In 1967 he was awarded the Premio Italia for his radio opera *Giovanni Sebastiano*.

Negri composed almost exclusively for the theatre, particularly works for small forces, which he found most congenial. The first, *Divertimenti di Palazzeschi* (composed 1943), for soprano, tenor and eight instruments, from Palazzeschi's *Visita alla contessa* and *Lasciatemi divertire*, exemplifies his surreal and abrasive irony. The characteristic form of Negri's 'chamber theatre' was developed in a series of one-act operas. In *Vieni qui, Carla* (1956) Negri used an idiom based on 12-note technique to treat a morally dubious episode from Alberto Moravia's *Gli indifferenti*. *Massimo* and *Il tè delle tre* (both 1958) tend towards an often bitter social satire and a striking juxtaposition of educated and working-class speech suggestive of Kurt Weill's musical theatre.

Negri's fairly limited orchestral, vocal and chamber output dates mostly from the period when he first came to attention immediately after World War II. In particular, his *Antologia di Spoon River* for solo voices, chorus and orchestra (1946), on texts by Lee Masters, had a certain resonance at the time. An interest in poetry was a constant feature of Negri's work and reappeared in *Sangue tuo nelle mie vene* (1977), on texts by Montale. His non-stage works display an eclectic, independent style, though less original than that of his chamber dramatic pieces.

RAFFAELE POZZI

Negri [Negro], **Giulio Santo Pietro de'** [Del Negro, Giulio Santo Pietro] (*b* Milan; *fl* 1607–20). Italian composer. He seems to have spent most of his life in Milan, though he may briefly have lived at Lecce, at the opposite end of Italy, since his op.5 includes an occasional piece celebrating an event there. He was probably of independent means and, as a composer, an amateur. However, he may have had advice from Ghizzolo, who worked in Milan from 1610 to 1613: certainly the two men seem to have moved in similar circles, for they dedicated individual songs to the same men, for one of whom, a bass, Negri wrote two florid songs headed 'basso alla bastarda' (they are in op.5). His op.11 suggests that he belonged to an academy.

Negri is one of the most interesting minor composers of vocal chamber music in early 17th-century Italy. At least five volumes of his music are lost, but from what survives it is clear that by 1613 he had enthusiastically embraced the new monodic and concertato styles, and three of his publications proclaim in their titles the word 'moderna'. In the madrigals of his opp.5 and 8, which form the bulk of their contents of 29 monodies, 25 duets and six trios, he displayed the dilettante's typical disregard of convention and at the same time some uncertainty in handling the unconventional progressions he clearly sought. Yet a number of dissonances and surprising harmonic juxtapositions, prompted by the words, are very effective: there are good examples in *Langue e spira* and *Tu vai? tu fuggi* (in op.8). He also shows a strong sense of tonality, especially through the use of sequences, as in *A voi, rosa vermiglia* (in op.5), and there are several passages of fine declamation, e.g. the opening of *Ove ne vai, cor mio* in op.8. His light strophic songs are less rewarding, though *Ama, pur, ninfa gradita* (op.5) is notable for an early use of a refrain. His choice of texts is refreshingly original: possibly he wrote some himself, and others may have been by dedicatees (one of whom wrote two commendatory poems for op.8). He re-used for *Non più star muta* (op.8) the music of the *scherzo Vago augel* in op.5.

NIGEL FORTUNE

Negri, Ippolito Chamatterò di. *See* CHAMATERÒ, IPPOLITO.

Negri, Marc'Antonio (*b* Verona; *d* Veglia [now Krk, Croatia], Oct 1624). Italian composer. He was appointed a singer and *vicemaestro di cappella* at S Marco, Venice, on 22 December 1612 with a salary of 80 ducats. In 1616 the doge appointed him abbot of a monastery at Veglia, off the Dalmatian coast, after which he was excused from attendance at S Marco on ferial days and lesser festivals; he resigned his position there on 30 April 1619. Before arriving in Venice he published two books of *Affetti amorosi* (Venice, 1608; 1611/*R* 1986 in ISS, v), the first for three voices, the second for one, two and five voices, both with continuo. Negri enthusiastically embraced the poetry of Giambattista Marino; all but two texts in his second publication can be ascribed to this author. Negri's music for solo voice contains occasional affective chromaticism and extended cadential embellishments within an overall canzonetta-like style in which the bass and vocal lines tend to move together; the rhythmic motifs are similar to those found in polyphonic canzonettas of the era rather than in the declamatory monodies issuing from Florence. In his five-part madrigals Negri effectively exploited solo and duet textures made possible by the sustaining continuo. Included in the second book of *Affetti* are three sonatas for two violins and continuo and five sinfonias, with the same scoring, which punctuate a pastoral dialogue. These are contrapuntal and harmonically simple; the final sonata, employing ornamented triadic motifs and reiterated semiquavers over static harmony, is reminiscent of *battaglia* pieces of the previous century. Negri also published two books of sacred music, *Il primo libro delli salmi a sette voci* (Venice, 1613), and *Cantica spiritualia in missis, et vesperis solennibus* (Venice, 1618). In his treatment of *cori spezzati* in the former work Negri followed the example of Viadana's *Salmi* (Venice, 1612), in which a choir of solo voices contrasted with a ripieno second choir with more than one voice to a part. This procedure coincided with standard performing practice at S Marco.

ROARK MILLER

Negri, Maria Caterina (*b* Bologna; *fl* 1719–45). Italian contralto, sister of MARIA ROSA NEGRI. She studied under Pasi and made her first known stage appearance at Bologna in Bononcini's *Camilla*, after which she sang in Modena (1720), Florence (1721), Livorno (1722), Milan (1722 and 1723), Faenza (1723) and Ferrara (1724). During the period 1724–7 she was attached to the company of Antonio Denzio at the theatre of Count Sporck in Prague, where she sang Alcina in Antonio Bioni's *Orlando furioso*. She appeared in three operas by Vivaldi in Venice in 1727–8, then found engagements at Forlì and Livorno (1729), Genoa (1730) and Naples (1733), where she appeared in Pergolesi's *Lo frate 'nnamorato*. From November 1733 until summer 1737 she was a member of Handel's company in London, singing in 11 of his operas, the serenata *Parnasso in festa*

and a number of pasticcios and oratorio revivals, including *Deborah* (Sisera), *Esther* (Mordecai) and probably *Il trionfo del tempo*. In 1735 she appeared in *Aminta, a Pastoral Opera* in Dublin. After leaving London she sang in Florence (1737–8), Lisbon (1740–1), Parma (1743), Rimini (1744) and Gorizia (1745). The parts Handel composed for her – Carilda in *Arianna*, Polinesso in *Ariodante*, Bradamante in *Alcina*, Irene in *Atalanta*, Tullius in *Arminio*, Arsace in *Berenice* and Cloride in *Parnasso in festa* – suggest a singer of moderate competence, though an occasional aria demands an agile technique. The compass is *a* to *e″*. She often played male roles.

She should not be confused with the singer Caterina Bassi Negri (*fl* 1734–46), known as Caterina Bassi before her marriage to the singer Giovanni Domenico Negri in 1739 or 1740.

WINTON DEAN, DANIEL E. FREEMAN

Negri, Maria Rosa [Risack, Rosa Negri] (*b* Bologna, *c*1715; *d* Dresden, 4 Aug 1760). Italian mezzo-soprano, sister of MARIA CATERINA NEGRI. She was engaged for Dresden in 1730 and accompanied her sister Caterina Negri to London in 1733. She sang in four Handel operas, all revivals, during the period 1733–6, and probably in the 1734 revival of *Deborah*. Handel wrote the part of Euterpe in *Parnasso in festa* for her, and probably the original role of Dalinda in *Ariodante*, although this was altered for soprano before performance. She was in Dublin with her sister in 1735–6. In Dresden she sang in a series of operas by Hasse, including *Cajo Fabricio* (1734), *La clemenza di Tito* (1738), *Arminio* (1745) and *La spartana generosa* (1747). In 1743 she appeared with her sister at Parma as Rosa Negri Risack. Handel appears to have thought little of her; the parts of Melo in *Sosarme* (1734), Eurilla in *Il pastor fido* (1734) and Morgana in *Alcina* (1736) were much shortened and simplified for her. Their compass is *a* to *f″*; her Hasse parts are more rewarding and call for expressiveness, fluent if limited coloratura and a compass *b* to *g*♯″.

An Anna or Antonia Negri, known as La Mestrina, sang frequently at Venice (1728–42), as well as at Parma, Modena and elsewhere, and married the tenor Pellegrino Tomj. According to Fürstenau she was a sister of Maria Rosa and was engaged for Dresden at the same time, but no parts sung by her at Dresden have been discovered, and there may be confusion with another singer. (*SartoriL*)

WINTON DEAN

Negri, Massimiliano. *See* NERI, MASSIMILIANO.

Negri, Vittorio (*b* Milan, 16 Oct 1923). Italian conductor and musicologist. His studies of violin, composition and conducting at the Milan Conservatory were interrupted by a serious illness and by World War II. After it ended, he studied at the Salzburg Mozarteum with Bernhard Paumgartner, whose assistant conductor he became in 1952. A few years later, while preparing an edition of Vivaldi's 'Four Seasons' for I Musici in Amsterdam, the producer fell ill and Philips, the recording company, asked Negri to replace him. This was the start of a 25-year period as a producer for that company, overseeing recordings of orchestral and chamber music; he also made a large number of recordings as a conductor (chiefly with the Dresden Staatskapelle and the Berlin Chamber Orchestra). In this capacity he concentrated on Venetian Baroque composers, and in particular on Vivaldi, editing and directing a large number of his works including concertos, the complete sacred choral works (then largely unknown), the oratorio *Juditha triumphans* and the opera *Tito Manlio*. He discovered Cimarosa's Requiem in G minor in Einsiedeln Abbey, conducted the first modern performance of it at the Montreux Festival, and with it won a Grand Prix du Disque Lyrique in 1970 (the first of several such awards). Ten years earlier he had formed his own chamber orchestra in Perugia, where he taught at the conservatory; he also formed the Italian Society of Musicology. In 1980 he moved away from record producing in order to concentrate on conducting, and subsequently appeared at the Orange and Versailles festivals, at La Scala and with the Boston SO.

LIONEL SALTER

Negrilla (Sp., from *gente negra*: 'black people'). A villancico depicting the music, song and dance of black people. It is often, more specifically, a *canario* (villancico from the Canary Islands, which served as an assembly station for Spanish slave traders during the 16th to 18th centuries). The form is characterized by the following features: a strongly syncopated sesquialtera rhythm, the frequent use of a narrative text, leaps in the dance, and parody of African slaves speaking in Spanish (confusion between vowels, a reversal of genders of nouns and adjectives, lack of agreement of gender, confusion of singular and plural, and failure to distinguish between certain consonants). *Negrillas* were at times sung by choirboys with blackened faces at Matins on saints' days, which may account for the very high tessituras of the voice parts.

Neher, (Rudolf Ludwig) Caspar (*b* Augsburg, 11 April 1897; *d* Vienna, 30 June 1962). German stage designer and librettist. He was a schoolfellow of Brecht's and studied art in Munich. His first work in opera came with his designs for *Palestrina* at Essen in 1927, although he had worked on *Don Giovanni* in Berlin in 1926 and created the projections (a medium in which his work was famous) at Baden-Baden in 1927 for the *Mahagonny Songspiel*; other Brecht-Weill designs include *Die Dreigroschenoper* (1928, Berlin; later in New York and London), *Aufstieg und Fall der Stadt Mahagonny* (1930, Leipzig; later in Paris) and the *ballet chanté Die sieben Todsünden* (1933, Paris and London). He worked for the Kroll Opera in Berlin, 1928–31, with Klemperer, where his designs included *Carmen* and *From the House of the Dead*; in 1929 came the first of his seven productions of *Wozzeck*, at Essen. His collaborations with Carl Ebert in Berlin brought him into the operatic mainstream, and their great Verdi productions (*Macbeth*, 1931; *Un ballo in maschera*, 1932; he later designed both at Glyndebourne) did much to provoke the German revaluation of the composer. Neher remained in Germany during the Hitler years but maintained his artistic independence,

continuing his 'heterodox and subtly subversive work with Wagner-Régeny' (Drew), with whom he collaborated as librettist in the 1930s and 40s. He worked frequently with O.F. Schuh (beginning with *La traviata*, 1940, Vienna), at the Deutsches Theater in Berlin and with Noller at Hamburg. He worked much at Zürich in the immediate postwar period and from 1947 with Schuh and von Einem (*Dantons Tod*, 1947, and several Mozart operas). He was principal stage designer at Cologne, with Schuh, from 1959 to 1962.

Neher was an immensely intelligent designer with a true genius for the theatre; his importance within 20th-century stage design has still to be assessed. His work was characterized by minimal elaboration, the telling use of light, rigorously selected painted props and a controlled palette, establishing a stage picture in which the singers existed convincingly in an emotional and historical atmosphere, suggested rather than imposed. Most of his designs are in the Österreichisches Theatermuseum, Vienna.

WORKS

Librettos: *Die Bürgschaft*, Weill, 1932; *Der Günstling*, Wagner-Régeny, 1935; *Die Bürger von Calais*, Wagner-Régeny, 1939; *Johanna Balk*, Wagner-Régeny, 1941; *Persische Episode* [*Der Darmwäscher*] (komische Oper, with B. Brecht), Wagner-Régeny, 1963 (comp. 1940–50)

MARINA HENDERSON/DAVID J. HOUGH

Neidhardt, Johann Georg (*b* Bernstadt, *c*1685; *d* Königsberg, 1739). German theorist and composer. After early training at Altdorf and Wittenberg, Neidhardt matriculated as a theology student at Jena, where he produced his first treatise on temperament and apparently continued his musical training. It is likely that he studied with the university organist, J.N. Bach, who knew him well enough to allow him to try one of his temperaments on the new organ at the city's central church; Bach's tuning, however, was found more singable. Between 1710 and 1720, when he was appointed Kapellmeister at Königsberg, Neidhardt was again in Bernstadt as well as in Breslau, where he is known to have lectured on composition. He then remained at Königsberg until his death, teaching organ and versification to the university students in addition to his writing and official duties.

Along with Werckmeister, Neidhardt perfected the art of practical temperaments in the early 18th century. An advocate of circulating temperaments (those intended to be most consonant in the more frequently used keys, and progressively less so in the remoter ones), he wanted his more than two dozen temperaments to be flexibly applied, as may be judged from his recommendation of specific temperaments for a village, a town, a city, and the court (the last assigned an equal temperament). He was apparently an active composer throughout his life; his few extant works include chorale settings (*RUS-KA*), and some published psalm settings and sacred songs.

CECIL ADKINS

Neidhart [Nîthart] **'von Reuental'** ['der von Riuwental'] (*b* ?*c*1190; *d* after 1236). German Minnesinger. The only indisputable fact about Neidhart's life – his social origins are unknown – is that he sang in Vienna for Duke Friedrich II 'der Streitbare'. He was probably active before this in Bavaria. Reference in his songs to the arrival of Emperor Frederick II in Vienna (1236/7) provide one unequivocal date. The first mention of 'Her Nîthart' is in Wolfram von Eschenbach's epic *Willehalm* (dated 1210–20; line 312,12). Contemporaries did not call him 'von Riuwental'; this is the allegorical name (meaning 'vale of tears') of the impoverished knight whose identity Neidhart convincingly portrayed. In the begging songs (he asked the duke for a house in Lengenbach, near Vienna) Neidhart presumably identified completely with his role. Generally, the songs suit urban tastes – prosperous peasants and their rivals, the rural noblemen, are satirized equally. This may explain why a tradition of 'Neidhart' songs (some of them original), plays and comic texts (*Schwänke*) remained popular into the 16th century. Their association with dance may also have been a factor.

Neidhart's songs fall into two types, representing psychological extremes. In the *Sommerlieder*, 'der von Riuwental' is a powerful figure who can realize his male fantasies on the dance-floor; the scathingly self-ironic *Winterlieder* analyse the frustrations of impoverished knighthood using a pastiche of courtly Minnesang. Both types are also musical types. The *Sommerlieder* (called *reien* in the sources; *see* REIGENLIED) simulate May dance situations and must have been based to some degree on the peasant dances they evoke; the indoor *Winterlieder* adopt a contrasting, declamatory style (canzone form, often with unusually long *Stollen*) that uses free, open-ended melodic phrases (for example in *Sumer unde winder*; *Nû klag ich die bluomen*) alongside the clearly-defined pentatonic units that are a general feature of the songs.

Some 55 melodies (more than for any other Minnesinger) survive to texts ascribed to Neidhart, but 38 of these are excluded from the standard edition by Haupt, as they are not attested before 1400. Some of the 'pseudo-Neidhart' texts must be genuine; musically, the groups are indistinguishable. Unfortunately only five melodies survive in a 14th-century source, the Frankfurt fragment (*D-F* germ.oct.18). The other sources, *D-Bsb* Mgf 779, *A-Wn* s.n.3344, *I-STE* and *D-Mbs* Cgm 4997, are from the 15th century. Comparison of the three melodies preserved in both the Frankfurt fragment and *D-Bsb* 779 shows a reasonably close correspondence between the

Neidhart von Reuental miniature from Manessische Liederhandschrift

two versions, but the former favours greater melismatic variety, wider ambitus and more diverse finales. Rhythmically, two of the three songs (*Sinc an, guldîn huon!*, v.12; *Mirst von herzen leide*, v.10) appear to be intended for performance in triple (? dance) time in *D-Bsb* 779, but for a freer, more text-orientated performance in the Frankfurt fragment. Melodic phrasing corresponds particularly well with text syntax in this source (*Sumer unde winder*, all stanzas). In one song, *Nû klag ich die bluomen*, the pitch of the second *Stollen* diverges widely from that of the first; editors have tended to dismiss this and similar divagations as scribal errors, though they may reflect expressive intentions, or a conception of melodic identity in which pitch intervals played a secondary role.

If the other melodies of 'genuine' songs preserved in *D-Bsb* 779 and the other late manuscripts have been adapted in similar ways, the information they can provide about the function of 13th-century melodies is limited. These sources are best approached as 15th-century corpora, though some recurring melodies do strongly resemble those found in the Frankfurt fragment (cf *Ich wen ein zagen*, *Owê dirre nôt* and *Nû klag ich die bluomen*). Others belong stylistically to a later period: those of *Winter nu ist dein zeit* and *Urlaub hab der winter* both resemble the anonymous autumn song *Iam en trena plena* (*I-STE*, ff.35*v*–36*r*; ed. Röll, 70–80).

MICHAEL SHIELDS

Neidlinger, Gustav (*b* Mainz, 21 March 1910; *d* Bad Ems, 26 Dec 1991). German bass-baritone. He studied in Frankfurt with Otto Rottsieper and made his début in 1931 at Mainz, where he remained until 1934, taking supporting *buffo* bass roles. After an engagement in Plauen (1934–6) he joined the Hamburg Staatsoper, where his roles included Kecal, Bartolo and van Bett in *Zar und Zimmermann*. In 1950 he moved to the Württembergisches Staatsoper, Stuttgart, where his roles included Leporello, Iago, Falstaff, Ochs, Faninal, Barak and Kaspar in Egk's *Der Zaubergeige*. He appeared at Bayreuth from 1952 to 1975 as Alberich, Kurwenal, Klingsor, the Nightwatchman, Hans Sachs and Telramund. He sang with the Stuttgart company at the Royal Festival Hall, London, in 1955 as Pizarro and Kurwenal, and at the 1958 Edinburgh Festival as Lysiart (*Euryanthe*) and Kurwenal. In 1963 he made his Covent Garden début as Telramund. He did not sing in New York until 1972, when he appeared at the Metropolitan as Alberich. He was a guest at most European opera houses during the 1950s and 60s, appearing regularly at the Vienna Staatsoper from 1956. His Alberich, which he recorded

under both Böhm and Solti, was sung with a smoothness and even beauty of tone quite unusual in the part.

HAROLD ROSENTHAL/R

Neighbour note. *See* AUXILIARY NOTE.

Neighbour, O(liver) W(ray) [Tim] (*b* Merstham, Surrey, 1 April 1923). English bibliographer and musicologist. In 1946 he joined the department of printed books at the British Museum. He studied modern languages at Birkbeck College (BA 1950), and joined the museum music room staff in 1951. He succeeded Alec Hyatt King as British Library Music Librarian in 1976; he retired in 1985.

Neighbour's contributions to musical scholarship have been diverse. Many of his writings relate to his work at the British Library and are concerned with source evaluation and music bibliography. In collaboration with Alan Tyson he provided a useful bibliographical tool on the dating of 19th-century English music. His other main areas of research are the music of two very different composers: Byrd and Schoenberg. In the 1950s he argued convincingly against the then prevalent view of Schoenberg's 12-note music as an intellectual exercise in rejection of tradition. His study of Byrd's instrumental works is an impressive model of historical criticism which combines manuscript studies with sensitivity to musical style and formal evolution, to deal with the many problems of chronology and authenticity. During this time at the British Library, he made many notable additions to the collections and was much concerned with the preparation of the *Catalogue of Printed Music in the British Library* (London, 1981–7).

ROSEMARY WILLIAMSON

Neikrug, Marc (Edward) (*b* New York, 24 Sept 1946). American composer and pianist. From 1964 to 1968 he studied with the opera composer Klebe at the Hochschule für Musik in Detmold. Subsequently he attended SUNY, Stony Brook (MM in composition, 1971). He has received two awards from the NEA and commissions from, among others, the Houston SO, the St Paul Chamber Orchestra, the Berlin Deutsche Oper, the Pittsburgh SO and the Aldeburgh Festival. He has served as a contemporary music consultant for the St Paul Chamber Orchestra (1978–85) and as the founder and director of Melbourne Summer Music in Australia from 1986.

Whether writing in an atonal or a chromatically tonal idiom, Neikrug is above all a harmonist. His orchestral works, which move in long, carefully orchestrated chordal blocks punctuated by virtuoso, repetitive fragments of melody, reveal the influence of the composer Nørgård. Attacks of acoustically based harmonies and chord clusters lend his duo sonatas their rhythmic drive. Among his best-known works is the theatre piece *Through Roses* (1979–80), which dramatizes the nightmares of a Jewish violinist who survived in a concentration camp by playing for members of the SS; the film version received prizes at both the Besançon Film Festival (1981) and the International Film and Television Festival, New York (1982). His opera, *Los Alamos* (1988), the first American work to be commissioned by the Deutsche Oper, states its antinuclear position by juxtaposing commentaries on the 'star wars' programme and rituals practised by the Pueblo Indians. Pueblo culture also inspired Neikrug's *Pueblo Children's Songs* for soprano and piano (1995).

As a pianist, Neikrug has appeared in a duo with the violinist Pinchas Zukerman – they gave the first performance of Neikrug's Duo and the *Sonata concertante* – and was the soloist in the first performance of his Piano Concerto. He has conducted a number of performances of his works by American and European orchestras.

SEVERINE NEFF

Neill, Ben (*b* Winston-Salem, NC, 14 Nov 1957). American composer and trumpet player. He studied at Youngstown State University (BM 1980, MM 1982), the Manhattan School of Music (DMA 1986) and with La Monte Young, whose meditatively long-toned brass music was a primary influence. He also played the guitar with Rhys Chatham, later following him as music curator of The Kitchen, New York (1992–8). Neill's performing and composing careers

have centred on the Mutantrumpet, a three-belled instrument of his own invention with pressure-sensing pads that connect it to MIDI controller. Using this instrument, Neill has triggered sound-transforming computer sequences during performance, a technique that shares characteristics with the music of David Behrman, with whom he has worked closely.

Neill's computer installations have developed from both pitch and rhythmic manifestations of the overtone series. *678 Streams*, for example, unleashes computerized beats in patterns of six against seven against eight. Works such as *Green Machine* exist not only as performances, but also as ambient installations. The theatre pieces *ITSOFOMO (In the Shadow of Forward Motion)* and *Downwind* exhibit liberal political views. Heavily beat-oriented, his music has gained a considerable following of ambient rock fans; the rhythmic complexity of his works has also made him a seminal figure in the 1990's Totalist movement in Manhattan.

KYLE GANN

Neischl. *See* NEUSCHEL family.

Neithardt, Heinrich August (*b* Schleiz, 10 Aug 1793; *d* Berlin, 18 April 1861). German conductor and composer. His early musical studies were interrupted by military service, which lasted through the campaigns of 1813–15. This led to his joining the newly formed Garde-Schützen-Battaillon (1816–22), and from 1822 to 1840 he was master of the band of the Kaiser Franz Grenadiers and did much to improve military music. In 1839 he was made royal music director and in 1843 he was appointed assistant director of music at Berlin Cathedral, where he founded a regular choir of about 80 singers by uniting the scholars and seminarists who sang the ordinary cathedral service with the smaller court chapel choir. In 1845 he was promoted to director of music at the cathedral. In order to study Russian and Italian choral singing he took the choir to St Petersburg in 1846 and Rome in 1857; in 1850 they visited London, where their refined performances made a strong impression, and from 1852 to 1856 he led them on tours of several German cities. Neithardt was an able conductor and trainer. In over 20 years as a military musician he developed his bands to a high standard and produced skilled performances of popular functional music. The high reputation of the Berlin choir rested on his work and he was indefatigable in training the choir and providing it with music of all types, some of which was edited by him in a continuation of Commer's *Musica sacra*. In addition to his military and sacred music compositions, he also wrote horn trios and quartets, piano works, organ music and an opera, *Manfred und Julietta* (*Die schöne Dalmatinerin*), produced in Königsberg in 1834. He is best remembered as the composer of the Prussian anthem *Ich bin ein Preusse, kennt ihr meine Farben?* (1826).

GEORGE GROVE/MICHAEL MUSGRAVE

Nejedlý, Vít (*b* Prague, 22 June 1912; *d* Dukla, 1 Jan 1945). Czech composer, son of ZDENĚK NEJEDLÝ. He studied with Ladislav Svěcený and Otakar Jeremiáš, and later with Talich (conducting) at Prague University, where he gained a doctorate in musicology in 1936 with a dissertation on contemporary Czech harmony. He became répétiteur and conductor at the theatre in Olomouc (1936–8) before emigrating to the USSR in 1939, where he worked in radio and composed film music. In 1943 he joined the Red Army; he died of typhoid at the Czechoslovak front. Nejedlý's music is marked by a strong political commitment, particularly evident in the symphonies inspired by the Spanish Civil War, and his occasional pieces for workers' festivals.

GRACIAN ČERNUSAK/R

Nejedlý, Zdeněk (*b* Litomyšl, Bohemia, 10 Feb 1878; *d* Prague, 9 March 1962). Czech musicologist, politician and writer. Son of the music teacher and composer Roman Nejedlý (1844–1920), he received an all-round musical education which culminated in lessons with Fibich in Prague. At the same time he studied under Jaroslav Goll (history) and Hostinský (aesthetics) at Prague University, where he took the doctorate in 1900 with a dissertation on the mission to the Hussites of the Italian preacher Giovanni Capistrano. He completed his *Habilitation* with the first volume of his work on Hussite and pre-Hussite song. He worked at the National Museum, later at the university as reader (1908) and professor (1919) of musicology (the first incumbent of a Czech chair of musicology). A most influential teacher, his aggressive polemics and his passionate championship of Smetana made Nejedlý one of the most dynamic and colourful figures in pre-war Czechoslovakia. During this period he became increasingly prominent as a Communist sympathizer and activist, founding his own political journal (*Var*, 1921–30). His membership of the Czech Communist party was later backdated to 1929. At the Nazi occupation he fled to the USSR, returning after the war as a member of the government and of the party's Central Committee. He was twice minister of education (1945–6, 1948–53) and held many other official posts, including the life presidency of the Czechoslovak Academy of Sciences (from 1952).

Nejedlý's early training as a historian is evident in his many biographical studies, not only of musicians but also of Czech literary and national figures (Božena Němcová, Palácký, Jirásek, F.X. Šalda) and politicians (Masaryk, Lenin). In his musical writings he emphasized the socio-political and patriotic aspects of Czech music, notably in his studies of Smetana and of Hussite music. Ironically, his own political commitments prevented his completing more than four volumes of a proposed 11-volume biography of Smetana. Despite this and other unfinished projects his writings come to over 4000 items, including 200 books. A collected edition of his writings (initiated in 1948) ran to 62 volumes.

Nejedlý, for all his historical training, was essentially a polemicist, aided by a fluent and readable style and a genius for clear, if over-schematic, organization. With his wide cultural range and interests and his espousal of 'progressive' causes he appeared to be the successor of his teacher Hostinský, though with his intolerance and clear-cut ideological stance he soon acquired a distinctive profile. He saw the evolution of Czech music in the line Smetana–Fibich–Foerster–Ostrčil and publicized this view, notably in the periodical *Smetana* (1910–26), which he and his adherents founded for the purpose. His attitude to other figures in Czech music – Dvořák, Janáček, Suk and Novák – who did not belong to this succession was wholly negative. Dvořák, for example, the major Czech composer of operas between Smetana and Janáček, was omitted from his book on Czech opera after Smetana (1911) except for a few dismissive comments. Such an attitude might have been considered merely eccentric and ultimately irrelevant (public opinion has gone in a different direction) were it not for the immense power that Nejedlý wielded. In the early 1950s he had become the object of a cult, exemplified by the periodical *Hudební rozhledy*, which in 1953 ran a regular feature entitled 'We will learn from the works of Zdeněk Nejedlý', and by the foundation that year of the 'Cabinet of Zdeněk Nejedlý', whose object was to 'research the rich materials about [Nejedlý's] life and work so as to acquaint all Czech and Slovak people still further with his great personality and work' (*ČSHS*); dogmatic opinion had now become state dogma. Although in the 1970s and 80s the Czechs began to take issue with Nejedlý's opinions and facts, his strategic view of Czech music history continued to underpin the organization and assumptions of much Czech musicology, effectively inhibiting research in areas of which he disapproved (e.g. Smetana's lesser contemporaries, ballet and operetta). Particularly reprehensible was the personal score-settling such as the imprisonment of his rival medievalist Josef Hutter and the blighting of the later career of the conductor Václav Talich.

JOHN TYRRELL

Nelbeland. *See* NEWELAND.

Nelepp, Georgy (*b* Bobruika, Ukraine, 20 April 1904; *d* Moscow, 18 June 1957). Russian tenor. He studied at the Leningrad Conservatory and made his début, as Lensky, with the Kirov in 1930, remaining with the company until 1944. In that year he moved to the Bol'shoy, where he had his most significant success. Nelepp possessed a lyric-dramatic tenor capable of an amazing range and intensity of expression, making him an ideal exponent of such roles as Florestan, Gustavus III, Manrico, Radames, Don José, Sobinin (*A Life for the Tsar*), Dmitry (*Boris Godunov*), Golitsïn (*Khovanshchina*), Yury (*The Enchantress*), Hermann, Andrey (*Mazepa*) and Sadko, several of which he recorded. He sang in approximately 20 complete opera sets, among which his agonized portrayal of the obsessive Hermann in the Melodiya recording of *The Queen of Spades* is an unrivalled achievement.

ALAN BLYTH

Nelhybel, Vaclav (*b* Polanka nad Odrou, Czechoslovakia, 24 Sept 1919; *d* Scranton, PA, 22 March 1996). American composer of Czech birth. He studied classics and musicology at Prague University and conducting and composition at the Prague Conservatory. In 1942 he continued his musicological studies at Fribourg University in Switzerland, where he taught music theory from 1947. He also held conducting positions with Radio Prague and the Stadttheater (1939–42), the Czech PO (1945–6), Swiss Radio (1946–50) and Radio Free Europe (1950–57). In 1957 he emigrated to the USA, becoming an American citizen in 1962. He taught at the University of Lowell, Massachusetts (1978–9) and the University of Scranton, Pennsylvania (1994–6), where he co-founded the World Premiere Composition Series.

Nelhybel's many wind and band works are designed for young performers. Synthesizing several musical styles by incorporating various elements from existing systems, his music demonstrates a linear-modal orientation in which functional tonality does not apply. An interaction of autonomous melodic lines and complementary rhythmic patterns creates a vigorous drive that is the hallmark of his style. This whirlwind propulsion is the result of a generation of tension through the accumulation of dissonance; increases in textural density; and the use of a wide range of dynamics and timbres. Thematic material was often borrowed from his Czech heritage. The *Music for Orchestra and Woodwind Quintet* (1987), for example, quotes his favourite Slovak folksong and a well-known Bohemian chorale.

WORKS

Stage: Morality e feux (ballet), 1942; Cock and the Hangman (ballet), 1946; In the Shadow of a Lime Tree (ballet), 1946; Legend (op), 1954; Everyman (op), 1974; Station (op), 1978
Vocal: Cantata pacis, 6 solo vv, chorus, wind, perc, org, 1965; Epitaph for a Soldier (W. JAMES P. CASSARO

Nelli, Herva (*b* Florence, 1909; *d* Sharon, CT, 31 May 1994). American soprano of Italian birth. She was taken by her parents to the USA when she was 12 and trained at Pittsburgh. Her earliest appearances were with the Salmaggi Company at the Brooklyn Academy in 1946, where she sang Norma, Leonora (*Il trovatore*) and Aida. Then she sang with La Scala company of Philadelphia (1946–7), adding Santuzza and Gioconda to her repertory. She was introduced to Toscanini by Licia Albanese and he immediately cast her as Desdemona for a concert performance of *Otello*. This was recorded, as were her subsequent performances with Toscanini in *Aida*, *Falstaff* (Alice Ford), *Un ballo in maschera* and Verdi's *Requiem*. Nelli made her Metropolitan début, as Aida, in 1953 and appeared there until 1961. She also appeared in Verdi roles at San Francisco, New Orleans and Chicago. In 1948 she sang Gioconda in Genoa and Aida at La Scala, following her appearance there with Toscanini in a concert to mark the reopening of the house. She possessed

a firm, technically secure, if not strikingly individual, spinto voice; under Toscanini's tutelage, her interpretations were often shapely and eloquent.

ALAN BLYTH

Nelson, John (Wilton) (*b* San José, Costa Rica, 6 Dec 1941). American conductor. He studied in Orlando, Florida, at Wheaton College, Illinois, and with Jean Morel at the Juilliard School, New York, where he won the Irving Berlin Award for conducting. He made his opera début in *Carmen* for New York City Opera in 1972, organized and conducted a complete concert version of *Les Troyens* at Carnegie Hall that year, and made his Metropolitan Opera début in that work in 1973. He was music director of the Indianapolis SO from 1976 to 1987, and of the Caramoor Festival from 1983 to 1990. His broad operatic repertory ranges from Monteverdi and Handel to Janáček and Britten, whose *Owen Wingrave* he conducted at Santa Fe in its first American production. In Europe he gained distinction as a Berlioz conductor at Lyons, especially in *Benvenuto Cellini* in 1989; he has also appeared frequently as an opera conductor in Geneva, Rome and Chicago. From 1981 to 1991 he was music director for the Opera Theatre of St Louis, where he added to the company's reputation with conducting of dramatic flair and musical weight. Since 1991 he has continued his association with St Louis as principal guest conductor. Nelson has been much praised for his vital, stylish recordings of Berlioz's *Béatrice et Bénédict* and Handel's *Semele*. He is also an enthusiastic advocate of Shostakovich and of contemporary composers including Takemitsu (of whose *I Hear the Water Dreaming* he conducted the première in 1987), Górecki and Paul Schoenfield.

MICHAEL WALSH, NOËL GOODWIN

Nelson, Sydney (*b* London, 1 Jan 1800; *d* London, 7 April 1862). English composer and publisher. The son of Solomon Nelson, his early musical abilities led him to be adopted by a gentleman who ensured he received a good education, which included tuition from Sir George Smart. He sang at Philharmonic Society concerts in 1821 and 1822, but in the early years teaching was his main occupation. By the 1820s he was composing songs including the popular *The Pilot*, but his most prolific period dated from the 1830s, when he began an association with Charles Jefferys (1807–65), who wrote the words for many of Nelson's songs. These were predominantly drawing-room ballads in a Bellinian bel canto style; among the most popular were *Mary of Argyle* and *The Rose of Allendale*, and a good number also found favour in the USA. Nelson made occasional contributions to the stage, including music for the operetta *The Middle Temple* (1829), the burletta *The Grenadier* (*c*1830) and the afterpiece *The Cadi's Daughter* (1851); a full-scale opera *Ulrica* was rehearsed but never performed.

Jefferys started a music publishing business in about 1835, catering mostly for the drawing-room market (it lasted until 1904, having been continued after his death by his widow and others). He was in partnership with Nelson from about 1840 to 1843 as Jefferys & Nelson. The firm was one of the first to use lithographic illustration in both black-and-white and colour, and its most spectacular publication was the musical and poetic annual *The Queen's Boudoir* (1841–54). After the partnership was dissolved Nelson set up briefly on his own as a publisher, but was unsuccessful and gave it up in 1847. He then devised a musical and dramatic entertainment with which he toured the USA, Canada and Australia, before returning to England. He continued to compose songs until his death, claiming a lifelong total of around 800.

PETER WARD JONES

Nelson, Willie (Hugh) (*b* Abbott, TX, 30 April 1933). American singer and songwriter. His mother bought him his first guitar when he was six and his grandparents nurtured his interest in music. At the age of seven, and inspired by what he heard on the 'Grand Ole Opry' radio show, he began writing his own songs. By the early 1950s, discharged from the US Air Force and out of the college where he had briefly studied agriculture, Nelson was playing in Texas clubs and bars. Two years later he began broadcasting and, like Waylon Jennings, also tried his hand as a DJ. It was not until 1960, however, that he arrived in Nashville with a portfolio of songs. His first songwriting success came a year later when his *Crazy* was a major hit for Patsy Cline, subsequently becoming a country classic. In 1962, he released his debut album, . . . *And Then I Wrote* (Liberty) but it took several further albums before he achieved a breakthrough with *Shotgun Willie* (from *The Troublemaker*, Atlantic, 1970). By then Nelson had left Nashville because 'there are elements [there] I couldn't combat, set ways I wanted to change' (*Music City News*, 1973).

Jennings's popular brand of 'outlaw music' inspired Nelson to record *Red Headed Stranger* (Columbia, 1975): with just voice, piano and guitar, it was totally against the Nashville grain but inaugurated a string of successful albums. Alert to a new trend, RCA teamed Nelson with Jennings on *Wanted: the Outlaws* (1975), the first of several collaborations which later also included Kris Kristofferson and Johnny Cash. Fearlessly eclectic, he has since worked with such diverse artists as Ray Charles, Emmylou Harris, George Jones and Julio Iglesias. Nelson's 1993 album *Across the Borderline*, featured contributions from Paul Simon and Bob Dylan among others.

One of the most significant figures in modern country, Nelson has made few concessions to showbusiness, even as he played its Las Vegas stages, and was a catalyst in breaking the Nashville establishment's hold over country music. A writer of often mournful ballads, he has noted that 'the best songs come out of the hardest times'.

LIZ THOMSON

Nelsova [Katznelson], **Zara** (*b* Winnipeg, 23 Dec 1918). American cellist of Canadian birth and Russian parentage. She began lessons in early childhood and moved with her family to London, where she studied at the London School of Violoncello and privately with its principal, Herbert Walenn. She was heard by Barbirolli and introduced by

him to Casals, from whom she received additional lessons. In 1932 she gave a London début recital and appeared as a soloist with Sargent and the LSO, playing Lalo's Concerto. Later she joined her two older sisters, a violinist and a pianist, and as the Canadian Trio they toured extensively in Britain, Australia and South Africa. She made her American début in 1942 at Town Hall, New York. From 1949 she was based in London, and introduced to Britain new works by Barber, Hindemith, Shostakovich and Bloch, who dedicated to her his three suites for unaccompanied cello; later, she gave the première of the concerto by Hugh Wood at the 1969 Promenade Concerts. In 1955 she took American citizenship, and in 1963 married the pianist Grant Johannesen, with whom she gave numerous duo recitals. In 1966 she became the first American cellist to tour the USSR. Although noted as an interpreter of the contemporary cello repertory, Nelsova also excelled in Romantic works, compensating for some lack of force with a sensitive feeling for melodic phrase and formal development. Among her recordings are Elgar's Concerto, and Beethoven piano trios with Glenn Gould and Alexander Schneider. In 1960 she was bequeathed a Stradivari cello, the 'Marquis de Corberon', dated 1726.

NOËL GOODWIN

Nembri, Damianus [Octavianus] (*b* Lesina [now Hvar], bap. 20 Dec 1584; *d* Venice, 1648/9). Dalmatian composer. He entered the Benedictine monastery of S Giorgio Maggiore, Venice, about 1594 and received his education there, adopting the name Damianus in place of his baptismal name Octavianus. After his 18th birthday he took his monastic vows, on 21 December 1602. Eitner's statement that he was at Monte Cassino is incorrect. In 1622 he was apparently transferred by his order to the monastery of St Chrysogonus at Zara (Zadar), Dalmatia, to be its prior. In 1637 he was recalled to S Giorgio Maggiore in a similar capacity. The approximate date of his death derives from the will of his brother Joannes Andreas, who was for many years a canon of Lesina Cathedral and at an advanced age retired as a layman to S Giorgio Maggiore. Nembri's only extant music is *Brevis et facilis psalmorum modulatio* (Venice, 1641), a collection of vesper psalms for four voices with organ continuo, together with a *Magnificat*. The collection belongs to the tradition of Venetian early Baroque *vesperae*: the solo parts are in concertato style and the tuttis are usually in the *stile antico*. Walther cited a collection of masses for three to eight voices by him, published in Venice in 1640, but it has not survived.

DRAGAN PLAMENAC/ENNIO STIPČEVIĆ

Nemescu, Octavian (*b* Paşcani, 29 March 1940). Romanian composer. After attending the Music Lyceum in Bucharest he studied composition with Jora and Constantinescu at the Bucharest Academy (1956–63). In 1978 Nemescu obtained the doctorate from the Cluj Academy under the supervision of Toduţă with the thesis *Capacităţile semantice ale muzicii* ('The semantic capacity of music', Bucharest, 1983). He taught at the Bucharest Arts Lyceum no.3, Braşov University and the Enescu Lyceum in Bucharest before gaining a post teaching composition at the Bucharest Academy in 1990. In 1994 he became secretary of the symphonic and chamber music section of the Union of Romanian Composers and Musicologists. His awards include the Aaron Copland Prize (1970) and the prize of the International Confederation of Electro-Acoustic Music in Bourges (1985).

Receptive to the full range of compositional possibilities, Nemescu creates innovative and intensely vibrant music. From a neo-romantic stylistic basis he began to experiment with polyrhythm in *Triunghi* (1964), with spectral composition in *Illuminaţii* (1967) and with processes of structural disintegration and renewal in the series *Memorial* (1968–70); he returned to the forms of traditional music with *Curcubee* (1975). Polyrhythmic devices have remained a vital characteristic of Nemescu's scores. In his works of the 1990s an exploration of temporal elements and an increasing textural refinement becomes evident.

OCTAVIAN COSMA

Németh, Maria (*b* Körmend, 13 March 1897; *d* Vienna, 28 Dec 1967). Hungarian soprano. She studied in Budapest and Naples, and with Giannina Russ in Milan. She made her début in Budapest in 1923 as Sulamith (*Die Königin von Saba*). From 1924 to 1946 she was a member of the Vienna Staatsoper, where her voice and temperament enabled her to sing Puccini, Verdi, Mozart and Wagner with equal success. She was considered a superb Turandot, a role she sang at Covent Garden in 1931. She also appeared in Italy, and as Donna Anna at the Salzburg Festival. Her last appearance was as Santuzza in 1946. Her recordings show the inherent beauty of her voice and the security of her technique, most notably in the roles of Sulamith, Turandot and Leonora in *La forza del destino*. (*GV*; L. Riemens; R. Vegeto)

HAROLD ROSENTHAL/ALAN BLYTH

Nemirovich-Danchenko, Vladimir Ivanovich (*b* Ozurgeti, Georgia, 11/23 Dec 1858; *d* Moscow, 25 April 1943). Russian theatre and opera director, and playwright. He began as a drama critic and playwright in Moscow. He

supervised the drama course at the Moscow Philharmonic Society, 1891–1901. In 1897 he met Konstantin Sergeyevich Stanislavsky and they founded the Moscow Art Theatre where their experiments in naturalist and symbolist theatre were internationally influential. Both directed productions; Nemirovich-Danchenko was primarily responsible for the repertory and other literary activities. He looked for and encouraged many Russian playwrights, including Chekhov.

After the 1917 Revolution the government proposed that the experimental studios set up at the Moscow Art Theatre should be organized for opera. Stanislavsky's Bol′shoy Opera Studio applied his new ideas of theatrical ensemble and 'Method' acting to opera production. Nemirovich-Danchenko's Moscow Art Theatre Musical Studio, founded in 1919, was more avant-garde and revolutionary. While he shared his old colleague's basic concern for rhythm and internal truth in theatrical production, Nemirovich-Danchenko held no brief for psychological realism. He banished all traditional conventions of dramatic and operatic staging. Employing exercises and rehearsal techniques inspired by Jaques-Dalcroze's eurhythmics, he created a stylized performance known as the 'synthetic theatre' and promoted the ideal of the *poyushchiy aktyor* ('singing actor'). All stage movement sprang directly from the music. Steps and gestures were devised in the strictest synchronization with the music and were executed in abstract, spatial settings devoid of realistic trappings. The company was composed of very young singers. Roles were rotated, and no personality or voice was ever permitted to stand out. The repertory was varied, including both opera and operetta.

Nemirovich-Danchenko was particularly eager to stimulate new works; among the group's productions was Shostakovich's *Katerina Izmaylova*, on 24 January 1934, two days after its Leningrad première as *Lady Macbeth of the Mtsensk District*. Productions of standard works were notoriously controversial. Librettos were often completely rewritten and scores too were frequently altered. In *Carmen* (1924), for example, the role of Micaëla was eliminated, and in *La traviata* (1934) a new chorus provided a running social commentary on Violetta's tragedy.

Under Isaak Rabinovich's artistic direction, these productions were among the landmarks of Constructivist stage design. The operas were usually mounted on unit sets consisting of platforms and towers of various levels connected by ramps and stairs. Light was selectively used to define acting areas, as well as to create specific moods. Costumes were characteristically stylized and exceedingly colourful. Both in Russia and abroad on tour these productions were acclaimed for their imaginative daring and high standards of acting and staging. At the same time, critics found the musical standard low and altered scores intolerable. Although the studio's name was changed in his honour to the Nemirovich-Danchenko Musical Theatre in 1926, his influence at home was limited by Stalin's conservative taste. In the West, however, he has proved to be an important contributor to the development of modern opera production. His memoirs, *Iz proshlovo*, were published in Moscow in 1936, and also in an English translation, *My Life in the Russian Theatre* (London, 1936).

PAUL SHEREN

Nemtin, Aleksandr Pavlovich (*b* Perm′, 13 July 1936; *d* Moscow, 3 Feb 1999). Russian composer. He graduated in 1960 from the Moscow Conservatory where he studied compostition with Chulaki, and from 1965 divided his time between mathematical research (number theory) and composition. His output is mostly instrumental; the one-movement symphony *Voyna i mir* ('War and Peace') for organ and orchestra occupies a central place in his development.

A follower of Skryabin's musical and philosophical concepts, Nemtin worked on a reconstruction of Skryabin's project for a *Misteriya* ('Mysterium') for more than 20 years. On the basis of existing poetical text, brief musical sketches and fragments from Skryabin's opp.66, 68, 73 and 74, the monumental *Predvaritel′noye deystvo* ('Prefactory Action') came into being. Scored for organ, piano, soprano, mixed choir and lighting, it consists of three integrated symphonies: *Vselennaya* [Universe], *Chelovechestvo* [Humanity] and *Preobrazheniye* [Transfiguration]. Nemtin developed the harmonic and orchestral style of late Skryabin, creating a work in which artistic and philosophical concerns of the early 20th century found a new interpretation on the threshold of the new millennium. The three parts of this work were performed separately: part 1 under the direction of Kondrashin (Moscow, 1973), part 2 under Aleksandr Dmitriyev (St Petersburg, 1996) and part 3 under Ashkenazy (Berlin, 1996).

Nemtin has also written an operatic scene based on Skryabin's sketches for *Keystut i Birute* and has composed a ballet *Nyuansï* ('Nuances') around material from Skryabin's late piano works. Both were completed in 1974. Nemtin's orchestration textbook is considered revelatory and has received genuine approval through its use in training.

WORKS

Stage: Keystut i Birute [Kestut and Birute] (op. scene, A. Skryabin), 1974, after Skryabin's sketches; Nyuansï [Nuances], 1974 (ballet) based on Skryabin's late piano pieces
Choral orchestral: Predvaritel′noye deystvo [Prefactory Action]: I Vselennaya [Universe], chorus, pf, org, orch, lighting effects, 1970–2; II Chelovechestvo [Humanity], S, chorus, pf, org, orch, lighting effects, 1980; III Preobrazheniye [Transfiguration], S, chorus, pf, org, orch, lighting effects, 1981–96
Orch: Pf Conc., 1956; Sym. no.1, 1958; Iz srednikh vekov [From the Middle Ages], suite, 1965; Org Conc., 1968; Sym. no.2 'Voyna i Mir' [War and Peace], org, orch, 1974; Sinfonietta, str, 1978
Choral: Tili-Tili, 8 songs, children's choir, chbr ens, 1976; Luteranskiye psalmï [Lutheran Psalms], 1992
Vocal: romances (Russ. poets), 1v, pf, 1949–53; Song cycle (S. Petöfi), Bar, pf, 1957; Pionerskiye pesni [Pioneer Songs] (medieval poets), T, chbr ens, 1965
Pf: 10 poèm [Ten Poems], 1956–94; Sonata no.1, 1959; Sonata no.2 'Irlandskaya' [The Irish], 1961; Starinnaya syuita [Old Suite], 1964; Detskiye p′yesï [Children's Pieces], 1975
Elec. music, 1961–8

ALLA VLADIMIROVNA GRIGOR′YEVA

Nenia [naenia; exequiae, exsequiae] (Lat.; Ger. *Nänie*). Funeral song in ancient Rome in praise of a dead person, analogous to the Greek THRĒNOS (threnody). It was generally sung by *praeficae* (professional female mourners) or by female relatives of the dead person, to the accompaniment of one or more tibiae, or to the lyra; the tuba and cornu were also used for funeral music, often as purely instrumental music. The *praeficae* with their assistants probably sang the *nenia* in the manner of a litany; it may have consisted of traditional formulae. Others present might also have taken up the song. The *nenia* was intended to banish the maleficent influence of the spirits of the underworld; in this sense it is said to survive today in remote parts of Italy. The term was also used in antiquity for the ending of a song or poem.

The word 'nenia' was revived in a humanistic spirit by Erasmus in his *Naenia in Johannes Ockeghem musicorum principem* (set to music by Johannes Lupi), and later in a more general sense, that is, not in commemoration of an individual, in the *Nänie* by Schiller (set by Goetz, 1874; Brahms, op.82, 1880–81; and Orff, 1956). The term 'exequiae' was used in the title of the *Musicalische Exequien* (Dresden, 1636) by Schütz; this is a setting of various German texts used in funeral rites, to commemorate Heinrich von Reuss.

GEOFFREY CHEW/THOMAS J. MATHIESEN

Nenna, Pomponio (*b* Bari, bap. 13 June 1556; *d* ? Rome, before 22 Oct 1613). Italian composer. He was the son of Giovanni Battista Nenna (1508–after 1565), author of a treatise on nobility and a city official of Bari. The Emperor Charles V, at his coronation at Bologna in 1530, had given the elder Nenna the Order of the Golden Spur, with its hereditary title of 'Cavaliere di Cesare', which Pomponio put on title-pages of his publications. Nenna's teacher was probably Stefano Felis; he may have been taught by Giovanni Jacopo de Antiquis, Giovanni de Marinis and Rocco Rodio, who were in Bari when he was growing up. His first printed works were four villanellas in collections of 1574 edited by Antiquis. His first book of five-voice madrigals (1582) is dedicated to Fabrizio Carafa, Duke of Andria (murdered by Gesualdo in 1590), who had nominated Nenna as governor of Andria, near Bari. Micheli stated that he met Nenna when the latter was in Gesualdo's service in Naples (*c*1594–9). It has often been supposed that Nenna taught Gesualdo and that – because of publication dates and similarities in style and the coincidence of some phrases in their madrigals – Gesualdo was influenced by him and borrowed from him. Three points argue that, on the contrary, it was Nenna who was influenced by, and borrowed from, Gesualdo, though because his second and third books of five-part madrigals are lost the question cannot be settled definitively. First, if Giovanni Pietro Cappuccio's dedications of Gesualdo's fifth and sixth books (both 1611) are to be believed, Gesualdo composed the works in them as early as 1596, on his return from Ferrara, but kept them from widespread circulation. Second, Nenna borrowed from at least one other composer (Caccini), and throughout his career he adapted his madrigal style to prevailing tastes. Third, his treatment of parallel passages of text is less vivid than Gesualdo's. Salvio reported that in 1606 Nenna took part in chess games and social gatherings at the home of Don Ferrante di Cardona in Naples. Judging from the dedications of his madrigal books, he remained in Naples until 1607 and was in Rome by 1608. Nicola Tortamano's dedication of Nenna's book of four-voice madrigals, dated 22 October 1613, speaks of honouring his memory, so he probably died shortly before this.

Through the three style periods of Nenna's madrigals – those defined by his early works, his earlier years in Naples and his later Neapolitan and Roman years – certain trends are discernible: they become shorter and more imitative while using phrase repetition more often. The most striking feature of the first five-voice book is what may be called 'cadence ostinato': a cadence-like pattern of chords is repeated up to ten times at regular intervals of two to four semibreves, sometimes produced by motifs repeated at identical pitch levels by different voices. Two-thirds of the madrigals open with this technique. The effect is similar to that produced by echoes in the works of Andrea and Giovanni Gabrieli for *cori spezzati*. Nenna's fourth and fifth five-voice books and his four-voice book are Neapolitan in style: they contrast *durezze e ligature* with rapid imitated motifs often doubled in 3rds and 10ths in many different combinations, but the former are less original and extended, and the latter less often stretched out of shape, than in the works of Gesualdo. The fifth book is only the second collection to use a sizable number of texts by Marino: seven pieces are settings of him. The four-voice madrigals published in 1613 were probably composed much earlier; two of them appeared in 1604 in a book of madrigals by Alessandro di Costanzo (this edition is lost but a later one, RISM 1616[13], is extant). Nenna's last three books share several stylistic features: they are less chromatic and dissonant than the earlier books; text declamation is quicker and repetition commoner than in contemporary Neapolitan madrigals; there is more frequent counterpointing of two motifs with differing texts in a single point, a characteristic of the Roman madrigal. The seventh book was particularly popular, for it was reprinted four times up to 1624 and was copied in the 17th century with English words (in *GB-Ob* Tenbury 1015). Ferdinando Archilei assembled Nenna's eighth book in 1618 and included in it works by Gesualdo and Gervasio Melcarne; it also contains a madrigal from Macque's sixth book (1613) but without attribution to him. Nenna's two books of responsories have fewer harmonic, textural and rhythmic contrasts than his madrigals.

WORKS

SECULAR

Il primo libro de [20] madrigali, 5vv (Venice, 1582[12]); ed. in PIISM, *Monumenti*, ii (1942)
Il quarto libro de [20] madrigali, 5vv (Venice, 2/1609) [1st edn. lost]; ed. in PIISM, *Monumenti*, ii (1942)
Il quinto libro de' [20] madrigali, 5vv (Naples, 1603), ed. in *Girolamo Frescobaldi Opere Complete*, v (Milan, 1996), 102
Il sesto libro de [19] madrigali, 5vv (Naples, 1607) [incl. 2 villanellas]
Il settimo libro de [20] madrigali, 5vv (Naples, 1608)
Il primo libro de [21] madrigali, 4vv (Naples, 1613, inc., repr. 1621 with bc) ed. in Pompilio [incl. 2 previously pubd in Alessandro di Costanzo: Il primo libro de' madrigali, 4vv, Naples, 1604, 2/1616[13]]
L'ottavo libro de [14] madrigali, 5vv, ed. F. Archilei (Rome, 1618[11])
Madrigal, 6vv, 1585[23]; madrigal, 5vv, S. Felis: Il primo libro de madrigali, 5vv (Venice, 2/1585, lost); 2 madrigals, 5vv, S. Felis: Il

quinto libro de madrigali, 5vv (Venice, 1583, lost); 4 villanellas, 3vv, 1574[5], 1574[6], ed. in PIISM, Antologie, i (1941); ricercare, 2vv, 1590[19]; spiritual canzonetta, 2vv, *I-BRq*, inc.

SACRED

Responsorii di Natale e di Settimana Santa, 4vv (Naples, 1607, inc., repr. 1622[7] with bc)
Sacrae Hebdomadae responsoria, 5vv, bc (Rome, 1622)
Psalm, 4vv, in Salmi delle compieta, ed. M. Magnetta (Naples, 1620)

KEITH A. LARSON

Nenning, Johann. *See* SPIRIDION.

Nenov, Dimitar (*b* Razgrad, 1 Jan 1902; *d* Sofia, 30 Aug 1953). Bulgarian composer and pianist. Between 1920 and 1927 he studied architecture at the Technische Hochschule in Dresden, took a doctorate in art history and attended the Dresden Conservatory where he studied the piano with Karl Fehling and theory with Theodor Blumer and Paul Bitner. From 1927 to 1930 he worked in Bulgaria as an architect. After further studies in Zakopane (Poland) with the pianist Egon Petri he embarked on a career in music. He was founder and director of the music section at Sofia radio (1935–7), for which he made a number of folk song arrangements, and from 1937 was professor at the State Academy of Music. A co-founder of the Bulgarian Composers' Society (1933), in the 1930s he took part in the debate on the Bulgarian national style, and in furtherance of this published several articles.

Nenov was a gifted pianist and interpreter of Beethoven, Liszt and Skryabin. A successor to the Liszt–Busoni–Petri tradition, he developed the contemporary approach towards playing that combined artistry with great technical skill. As a composer, he was an outstanding representative of the Bulgarian school. The originality of his work is apparent in miniatures as well as the symphonic works, which contain complex musical ideas and an impressive dramatic quality. The Romantic expression and moments of ecstasy, for example in *Vazhdeleniye* ('Aspiration') and *Kopnezh* ('Desire'), betray the influence of Skryabin. An integral style is reached in works which draw on the melodic and rhythmic characteristics of archaic Bulgarian folk music. In the symphonic works, the folk influence is evident in the way melodies are constructed; in the use of variation as a principle of development; and in his choice of modes, many of which are symmetrically formed and bear resemblance to the octatonic scale. His rich, sumptuous musical language relies on a functional type of harmony based on modes, while his masterful orchestrations frequently call for large wind sections and a number of unusual percussion instruments. His greatest achievements are the Piano Concerto and *Rapsodichna fantazia*.

MARIYANA BULEVA

Neo-classicism. A movement of style in the works of certain 20th-century composers, who, particularly during the period between the two world wars, revived the balanced forms and clearly perceptible thematic processes of earlier styles to replace what were, to them, the increasingly exaggerated gestures and formlessness of late Romanticism. The history and evolution of the term in all its aspects have been traced by Messing. Since a neo-classicist is more likely to employ some kind of extended tonality, modality or even atonality than to reproduce the hierarchically structured tonal system of true (Viennese) Classicism, the prefix 'neo-' often carries the implication of parody, or distortion, of truly Classical traits. The advent of postmodern sensibilities since the 1970s has made it possible to see neo-classicism not as regressive or nostalgic but as expressing a distinctly contemporary multiplicity of awareness. It is therefore difficult and even artificial to regard neo-classicism and postmodernism as separate except in historical sequence, with the former the preferred term for the period from World War I to the 1950s.

In architecture, painting and sculpture, the movement most widely designated 'neo-classical' coincided in part with the Viennese Classical period in music, during the later 18th and early 19th centuries, though the term has also been applied to the work done in the 1920s by such painters as Matisse and Picasso. In Germany, during the same decade, the term 'neue Sachlichkeit' (new objectivity) was employed to denote the work of artists of all kinds who appeared to reject the more expressionistic tone of

the immediate past and to exploit the postwar need for economy of means and incisiveness of expression to positive ends.

As a generic term for specific stylistic principles, 'neo-classical' is notably imprecise and has never been understood to refer solely to a revival of the techniques and forms of Haydn, Mozart and Beethoven. Insofar as the movement had a slogan, it was 'back to Bach'; yet it was less significant for its revival of traditional procedures than for the strength of its reaction against the more extreme indulgences of the recent past. It was the result of anti-Romanticism or anti-expressionism, yet the aim was not to eliminate all expressiveness but to refine and control it: as Keller said of Stravinsky's *Symphony of Psalms* (1930), it is 'expressive through the very suppression of expressionism'. This suppression is what is most likely to add a degree of astringency to a neo-classical work, and such a work is most likely to seem unsuccessful when it dilutes rather than idiosyncratically concentrates that essence: for example, many of Hindemith's later compositions by contrast with his *Kammermusik* series (completed in 1927).

The term was first applied to Stravinsky in 1923 and has special relevance to his music from *Pulcinella* (1919–20) to *The Rake's Progress* (1947–51), even though such compositions as Prokofiev's Symphony no.1 (the 'Classical', 1916–17), and Satie's *Sonatine bureaucratique* (1917), with its use of a piece by Clementi, had already shown the wit, economy and allusion to, or quotation of, pre-Romantic composers that are the most commonly accepted hallmarks of neo-classicism. Evans, among others, saw the essence of Stravinsky's originality in terms of a 'general historical awareness', which extends beyond the traditionally labelled Classical composers to Tchaikovsky and Webern and hence beyond tonality itself. By contrast, Taruskin equated neo-classicism with 'its collateral descendant, the "historical performance" movement', as 'a tendentious journey back to where we had never been'.

The characterization of virtually the whole of the significant compositional achievement of the period from 1918 to 1945 (with Varèse perhaps the only major exception) as neo-classical is common among more recent writers who believe that before 1945 there was a general failure (which not even the later Webern wholly escaped) to profit from the profound innovations of the expressionist years. The Stravinsky–Craft conversations equate neo-classicism with the 'period of formulation' following the period of exploration which culminated in 1912 and identify three neo-classical 'schools', those of Stravinsky himself, Hindemith and Schoenberg, including in the last those 12-note works which, even if classified as atonal, relate to the Baroque and Classical periods in their texture and formal outlines: for example, the dance movements of the Piano Suite op.25 (1921–3) and the sonata-form first movement of the Wind Quintet op.26 (1923–4). Boulez has asserted that 'Stravinsky's and Schoenberg's paths to neo-classicism differ basically only in one being diatonic and the other chromatic. ... Both composers adopt dead forms, and because they are so obsessed with them they allow them to transform their musical ideas until these too are dead'.

Schoenberg's 12-note works may make considerable use of 'dead' forms and textures; but they also embody, in a remarkable synthesis, a continuation of the forceful expression and complex motivic coherence of his most characteristic expressionist works, the Five Orchestral Pieces op.16 (1909) and *Pierrot lunaire* (1912). During the 1920s, in particular, Schoenberg saw himself as a direct opponent of Stravinsky and gave caustic expression to his hostility in the short cantata of 1925, *Der neue Klassizismus* op.28 no.3. This broadside was directed against 'all who seek their personal salvation along a middle way – the pseudo-tonalists – those who pretend they are trying "to-go-back-to"'. Schoenberg evidently felt able to distinguish between what was, to him, the distorting mimicry of tradition by such as 'der kleine Modernsky' and his own organic continuation of tradition: the former was mere parody, the latter positive transformation. But to regard both as neo-classical, and to propose the sub-categories 'tonal neo-classicism' and 'atonal neo-classicism', is to risk appearing to extend the term to embrace all composers who seem at a given point to have a greater concern with continuing a renovated tradition than with radical innovation. So all-inclusive a definition solves many problems, such as the need to decide whether there is a sense in which, while Prokofiev's 'Classical' Symphony is neo-classical, his Fifth and Sixth Symphonies are not. But with many composers, from Berg and Bartók to Lutosławski, Elliott Carter and Davies, it is notably unrewarding to attempt to separate what is innovatory (and a continuation of expressionism) from what is more obviously 'traditional'. And there is always the probability that composers who seem radically expressionistic today will seem neo-classical tomorrow.

These difficulties of definition are reflected in the problems that neo-classical music presents to the analyst. Attempts have been made to use various foreground–background techniques to separate elements belonging directly to a historical model from modern modifications: Austin has offered a hypothetical Classical version of the Gavotte from Prokofiev's 'Classical' Symphony; Cone has contrasted the first movement of Stravinsky's Symphony in C (1938–40) with Classical models; Van den Toorn and Taruskin have focussed on Stravinsky's use of octatonic scales. Yet the dangers of unproductive over-simplification are probably greater than for any other style or period, and the most valuable approach so far has been that of such analysts as Salzer, whose often very substantial modifications of Schenkerian principles can at least indicate the extent to which certain works may properly be defined as 'tonal' at all. The term 'neo-classical' is unlikely to become a useful analytical concept but will doubtless survive as a conveniently adaptable literary formula.

ARNOLD WHITTALL

Néocor. A valved brass instrument seen as a member of a family comprising *cornet à pistons*, néocor and CLAVICOR.

Neo-Gallican chant. Chant composed for the neo-Gallican liturgical movement in France from the second half of the 17th century to the first half of the 19th. For non-metrical texts a pseudo-Gregorian style was usually adopted; for metrical texts (hymns, sequences etc.) tonal melodies were composed.

The bull of Pope Pius V, *Quod a nobis* (9 July 1568), gave to all churches whose liturgical use was demonstrably more than 200 years old the right to retain their liturgies. The Roman *Breviarum Pianum* (1568, rev. 1602 and 1632) and the *Graduale ... Medicaea* (1614–15) were not universally adopted. Most French chapters stood firmly for their customs, and only prelates such as the unscrupulous François de Harlay (Bishop of Rouen, 1614–51), ambitious for a cardinalate, were able to impose a Romanized liturgy on their dioceses. However, the idea, borrowed from Rome itself (witness the controversial breviary of Cardinal Quiñonez of 1535), that reforms and modifications were permissible, eventually took root and by the mid-17th century the tide had turned in favour of 'correction'.

The main aesthetic notions that guided the reform were that texts of doubtful authenticity, which as far as chant was concerned meant any non-biblical text, should be suppressed, Holy Scripture alone being deemed worthy to be chanted (this had been a characteristic of the Lyons liturgy and that of the Carthusians for many centuries); and that religious songs such as hymns and sequences should be revised along classicizing lines, their metres adjusted and so on. These ideas found expression in such publications as P. Clairé's *Hymni ecclesiastici novo cultu adornati* (1676), the new breviary of Henri de Villars (Bishop of Vienne, 1662–93, and primate of Gaul) of 1678, compiled with the aid of the Jansenist Sainte-Beuve, and the breviary (1680) and missal (1684) of François de Harlay (Archbishop of Paris, 1671–95, and nephew of the François mentioned above), prepared by a committee including two other Jansenists. The breviary had a musical supplement by Claude Chastelain which gave a system of psalm tones with neo-Greek names. Even more than these books, it was the breviary of Cluny (1686), a completely new composition, that influenced many French churches to rewrite their books in the first quarter of the 18th century.

The movement had always been as much a matter of ecclesiastical politics as liturgical taste, and reform was but one aspect of the whole relationship between France and Rome. The increasingly independent attitude of Louis XIV (1643–1715) led eventually to a particularly fierce dispute during the reign of his successor; in 1728 Pope Benedict XIV tried to enforce the observance of the feast of St Gregory VIII, instituted in 1584 by Gregory XIV (who had been a bitter opponent of Henri IV of France), where the Office contained a lesson offensive to French pride. It is not surprising that the next new breviary and missal prepared in Paris, under Guillaume de Vintimille (archbishop, 1729–46), did not receive papal approbation: these appeared in 1736 and 1737 respectively and were largely the work of the Jansenists François Mesenguy and Charles Coffin. At the time of the Revolution, 80 French dioceses were using neo-Gallican liturgies. In 1814 Louis XVIII and Paris returned to Roman use; but not until the 1840s did the rest of France begin to follow suit – Orleans, in 1875, was the last.

As a representative example of neo-Gallican use, the Proper of the 3rd Mass of Christmas Day as found in the *Graduel de Paris* of 1754 may be cited. The introit is *Parvulus natus est nobis*: the text of the Gregorian *Puer natus* has been brought into line with the Vulgate, and a completely new 1st-mode melody composed. The offertory *Hostias et oblationes* and the communion *In hoc apparuit caritas Dei* are new compositions, again in pseudo-Gregorian style. The gradual *Recordatus est Dominus ... viderunt omnes* enlarges the traditional text, from the Vulgate; its melody is an unhappy attempt to strengthen the 'G major' element in the Gregorian melody, mostly by transposition of phrases such as the opening F–A–C figuration up to G–B–D; but 'F major' phrases uncomfortably remain. The *Alleluia, Verbum caro* is likewise a reworking of the Gregorian *Alleluia, Dies sanctificatus*. While all these pieces date back to the François de Harlay missal of 1684, the sequence dates from 1737. Earlier books had used the sequence *Laetabundus* (the Roman restriction to five sequences was not observed in France, where 17th- and 18th-century books usually contained sequences for Christmas, Easter, Whitsuntide, Corpus Christi, the Blessed Virgin and patronal feasts, with a small 'common' supplement); here the sequence is *Votis Pater annuit* (C.U.J. Chevalier: *Repertorium hymnologicum*, ii, Leuven, 1897, no.22173; for the first verse see illustration).

Although neo-Gallican pieces such as these may seem clumsily derivative to the connoisseur of restored plainchant, subtle and sophisticated performance, with sympathetic organ accompaniment, no doubt made them worthy embellishments of the liturgy. In better-endowed establishments the chant might, from the end of the 17th century, have been decorated with improvised polyphony, *chant sur le livre*. This was usually in three parts, basses (perhaps reinforced by an instrument such as the serpent) singing the chant in strictly equal notes, with tenors and countertenors adding parts above them. Another method of performance, known as *chant figuré*, also involved measured chant with ornamentation, especially by soloists. Lebeuf and La Feillée gave instructions on this complex technique: La Feillée's treatise has examples of a complicated notation with signs for ornaments, and simple polyphonic compositions that could have been improvised.

More non-traditional chant is found in the repertory of PLAIN-CHANT MUSICAL. In this movement, the leading spirit of which was Guillaume-Gabriel Nivers, reformed and newly composed chant was sung to a harmonic organ accompaniment.

Sequence 'Votis Pater annuit', 3rd Mass of Christmas Day, from the 'Graduel de Paris' (1754)

The advanced taste of the late 19th century, moulded by such proselytizers as Dom Guéranger of Solesmes, favoured a return to ancient usage. The French church followed Roman acceptance of the restored Gregorian chant, although there are still in some French parish churches examples of a 19th-century book containing neo-Gallican chants (including a sequence) for the Mass of the patron saint. By comparison with the intense research made into medieval chant books, neo-Gallican chant is practically unstudied.

DAVID HILEY

Neo-romantic. (1) The term is used to refer to the return to emotional expression associated with 19th-century Romanticism. In 1923 Schloezer used it to contrast Schoenberg's expressiveness with Stravinsky's neo-classicism. In works such as Hindemith's *Mathis der Maler* (1934–5), 'neo-romantic' refers to the composer's return to tonality as a structural and expressive element. In the 1940s, composers such as those of La Jeune France conceptualized their music as neo-romantic to suggest a rupture with modernist tendencies. As Baudrier put it, they wished to 'create a new language . . . based on no classicism, no pre-existent structures'. They addressed 'aesthetic problems from the social rather than individual perspective'.

Since the mid-1970s, neo-romantic has become synonymous with neo-conservative post-modernism, especially in Germany, Austria and the USA. The Horizons '83 and '84 concerts sponsored by the New York PO drew public attention to the aesthetic. Unlike works of the 1960s that cite older traditions (Kagel), neo-romantic works appeal directly to the emotions. In their Third String Quartets, for example, Rihm uses the expressive gestures of late Romantic music, 'though with a structural thinking entirely typical of the 20th century' (La Motte-Haber), while Rochberg writes 'a music of remembering' like that of Beethoven and Mahler; its movements 'could almost be mistaken for discoveries from the past' (Rockwell). Others, like del Tredeci and Zwilich, incorporate tonal harmony, tunefulness and forms rooted in the 19th century. By pleasing the ear, using standard orchestral forces and writing operas and symphonies embodying this aesthetic, neo-romantics have succeeded in attracting large audiences.

(2) The word is also used to describe the revival of folk culture in England from the early to the mid-20th century, including the 'folk-inspired emancipation of English music from German hegemony' (Trentmann). It refers to the movement's critique of modernity, obsession with nature and emphasis on community, the unconscious and pantheism. What made the return to traditional Romantic elements new in the work of such composers as Vaughan Williams, Holst, Delius and later Tippett, was their interest in communitarian ideals rather than solitary transcendentalism.

JANN PASLER

Nepal, Kingdom of (Nep. Nepal Adhirajya). Country in Asia. It extends from the peaks of the high Himalaya in the north to the plains of the Terai in the south, bordered by India and Tibet. There are three major ethnic groups: the Indo-Nepalese, the Tibeto-Nepalese and the indigenous Nepalese, composed of peoples such as the Newars, Gurung, Tamang etc. Although Nepal is the only official Hindu state in the world, there is a strong Buddhist presence, which is often reflected in an intermingling of beliefs and practices. The physical and cultural geography of the country is extremely varied, and communication between areas is often made difficult by the topography, leading to great cultural diversity even between adjoining valleys.

I. Music in the Kathmandu Valley. II. Indo-Nepalese music. III. Traditional music outside the Kathmandu Valley.

I. Music in the Kathmandu Valley

1. History. 2. Newar music: (i) General features (ii) Castes, genres and instruments (iii) Dance. 3. Classical music. 4. Popular music.

1. HISTORY. One of the most complex musical cultures in the Himalayan region is that of the Newars of the Kathmandu Valley, who speak a Tibeto-Burman language. Over a period of two millennia the Newars developed an elaborate civilization based on agriculture and on trade with India, Tibet and China. Buddhism, Hinduism and many other cultural elements were adopted from neighbouring India but re-shaped according to local needs. The influx of Buddhist and Hindu refugees from northern India following the Muslim conquests of the 12th–13th centuries was an important stimulus to Newar culture. Newar civilization flourished under the Malla kings (13th–18th centuries), whose rival kingdoms of Kathmandu, Patan and Bhaktapur competed in architectural, artistic and cultural splendour; several rulers themselves excelled as musicians, dancers, composers, poets and art patrons, particularly Jagajjyotīr Malla (reigned 1613–37) and Bhūpatindra Malla (1696–1722) of Bhaktapur, and Pratāp Malla of Kathmandu (1641–74). Newar autonomy was brought to a sudden end by Prithvī Nārāyaṇ Shāh of Gorkha, who conquered the valley in 1768–9, setting up his capital in Kathmandu. His successors hold the Nepalese throne to this day, but from 1846 to 1951 the Rāṇā prime ministers were *de facto* rulers and wealthy patrons of classical music. Since 1769 the Indo-Nepalese have constituted the politically dominant group in the valley (see §II below), but the Newars maintain many aspects of their culture, including an elaborate round of urban rituals in which music and dance play a large part.

2. NEWAR MUSIC.

(i) General features. Contemporary pressures inevitably ensure that traditional Newar culture is undergoing rapid change and decline, but in 1987 a survey of the Newar town of Bhaktapur (70,000 inhabitants) identified 220 music and dance groups still functioning. Performance in Newar culture serves a variety of ritual and entertainment functions. Thus a Navadurgā masked dance enacts an awesome cosmic drama in which the deities themselves participate, but it is also an occasion for spectacle, humour and festive enjoyment (Levy, 1990). Such performances establish intimate connections between ritual, space, time and society, and between the material and spiritual realms. Each genre is performed at specific ritual occasions, in specific places (temple, street, public square, river crossing), at ritually determined times (according to the lunar and solar calendars) and by specific castes (*jāti*) and associations (*guṭhī*) in honour of one or more specific gods, goddesses, Bodhisattvas etc.

A universal feature is the worship of the god of music and dance, Nāsaḥdyaḥ, by all Newar communities (Wegner, 1986, 1992; Ellingston, 1990). He resides in aniconic shrines and in musical instruments. Offerings to him, accompanied by special music (*dyaḥlhāygu*), must precede and conclude any music or dance performance or any period of musical apprenticeship. Nāsaḥdyaḥ is a god of unseen forces, who is manifested not only in music but also in geomantic lines of power that transect the urban landscape.

Many performances serve to articulate ritual and urban space. Annual dance performances of the Navadurgā mark the centre and boundaries of each quarter of the town of Bhaktapur. Each quarter has its own Nāsaḥdyaḥ shrine, at which local inhabitants are initiated into musical performance. A temple courtyard may have specific spaces reserved for different musical genres. Groups of performers tend to belong to the same locality, from which they set out in procession at festival time. The destination of such processions may be a series of Hindu or Buddhist shrines or a cremation-ground, and the way is marked with special music for each shrine passed or stage of the journey completed. In such ways the urban landscape functions not only as a stage, but also in an almost prescriptive manner analogous to a musical score (see Wegner, 1988).

Newar music and dance are performed almost exclusively by men. Women are excluded from the performance of all genres except rice-sowing songs and Buddhist devotional songs of the *bhajan* type. Apart from the Jugī tailor-musician caste, performers are not musicians or dancers by profession. Some genres or instruments are restricted to members of a particular caste, but performance may require inter-caste cooperation, as for example when Jugīs are required to provide melodic accompaniment on shawms for Jyāpu drum or dance performances. Many performance types are organized by societies (*guṭhī*), a pervasive institution in Newar culture deriving from the ancient Indian craft-guilds (*goṣṭhī*). Thus a particular *guṭhī* may be responsible for providing daily music at a particular temple. A land holding, sometimes

a royal donation, would have provided the *guṭhī* with income for the maintenance of instruments, copying of song-books and other expenses, but these holdings have now been abolished by the central government, and the surviving music *guṭhī*s are impoverished. Each *guṭhī* comprises members of a particular caste, from a particular quarter of a town, worshipping at a particular Nāsaḥdyaḥ shrine.

Indian influence on Newar music is manifest in the use of rāga and tāla names for melodic and rhythmic structures respectively (*see* INDIA, §III, 2 and 4). In religious vocal genres the melody (*lay*) of each song (*me*) is attributed to a specific *rāg*, introduced by a short, non-metrical exposition called *ālāp*, *rāg kāyegu* ('taking up the rāga') or simply *rāg*. In some cases these rāgas have specific functions, as Mālaśrī for the autumn Dasaĩ festival, or Dīpak (the fire rāga) for funeral music. Most rāgas are diatonic heptatonic or anhemitonic pentatonic in structure. Modes with augmented 2nds, used in Indian classical music since the 16th century, are absent, and the frequent absence of a drone accompaniment in Newar music allows an ambiguity of tonal centre that the drone of Indian classical music tends to eliminate. The melodic structure of individual rāgas is somewhat variable from town to town or temple to temple.

Metrical structure (*tāl*) is articulated by cymbals of various types, often played by the singers themselves in vocal genres. Metres of four, five, six, seven beats and their multiples are employed. A single *tāla* normally persists throughout each musical item, but the *tāla* and/or tempo may change during the course of some *dāphā* songs, *cacā* dances and *navabājā* drum compositions (change of tāla was a feature of some medieval Indian *prabandha*). The playing of drums, either as an instrumental item or as accompaniment to melodic music or dance, is the most elaborate element of Newar music today. Each of about 15 different drum types has its own complex, pre-composed repertory (or repertories), used for specific functions by particular social groups. Each drum repertory is encoded in an oral notation, in which a large variety of drum sounds are represented by corresponding syllables, selected according to phonetic principles that also underlie Indian drum notations (Kölver and Wegner, 1992). Similar notation is used for the long, straight natural trumpets (*pvaṅgā*, *pāytā*) employed in some religious vocal music and dance.

(ii) Castes, genres and instruments. One of the oldest surviving repertories of Newar ritual music and dance is that performed by the Buddhist priests (*Vajrācārya*). Called *cacā* or *caryā*, it is believed to perpetuate the medieval *caryā prabandha* practised in eastern India by Buddhist mystics of the 11th century and earlier. *Cacā* songs have texts in esoteric Sanskrit and are set in supposedly ancient rāgas and tālas. A performance begins and ends with a short *ālāpa*, and a verse describing the iconographic attributes of the rāga may also be recited (*see* INDIA, §I, 3(iii)(c)). A group of priestly singers accompany themselves on small cymbals (*tāḥ*), and the meaning of the words may also be conveyed through dance. This performance, which normally occurs only in the secrecy of the tantric shrine and in the context of highly potent rituals, is a form of meditation in which the singer or dancer invokes the deity to take up residence within himself; *cacā* is therefore held to confer magical powers on the performer. At particularly important festivals, the *cacā* dance is accompanied by an ensemble of drum (*pañcatāla*), cymbals and five pairs of trumpets (*pāytā*). Similarly constituted ensembles accompany Hindu tantric dance forms established during the Malla period (*navadurgā pyākhã*, *devī pyākhã*, *bhaila pyākhã*, *jala pyākhã*, *gã pyākhã*, *katī pyākhã*, *dyaḥ pyākhã* etc.).

Contrasting with the refined and cloistered tradition of *cacā* are public musical performances of the Newar Buddhists, which reach a climax in the processional month of Gũlā (July/August). Daily processions to the Buddhist shrines are accompanied by ensembles of valve trumpets and clarinets (for the high-caste gold- and silversmiths) or shawms and fipple flutes (*bāẽca*) for the low-caste oilpressers. These wind instruments are played not by the Buddhists themselves but by Hindu tailor-musicians (Jugī). At the same time the oilpresser children play three varieties of goat- and buffalo-horn (*ghulu*, *cāti*, *titītāla*), and the adults play drums of ten different types, cymbals and natural trumpets. Each Buddhist relic or shrine is saluted with a deafening invocation. The use of these instruments is prescribed in the *Svayambhūpurāṇa* (*c*1550).

The Newar butcher caste (Nāy) play their drum, the *nāykhī*, to accompany funeral processions to the cremation ground. En route their drum patterns reflect their passing of every street corner and every stone related to the spirit world, ceasing at the moment when the pyre is ignited. They also play during other ritual processions, always indicating with their drum patterns the nature of the ritual and the phases of the procession.

The Jugī are believed to be the descendants of a sect of Indian mystics, the Nāth or Kānphaṭā Yogins, who settled in the Kathmandu Valley during the late 17th or early 18th century. They took up the profession of tailoring and of playing shawms and trumpets in temples. They are the only players of shawms (originally five different types) among the Newars, providing musical services on this instrument to other castes. Today they also play valve trumpets and clarinets in Indian-style wedding bands.

The large, middle-caste, mixed Hindu and Buddhist community of farmers (Jyāpu, Mahārjan) constitutes a veritable repository of Newar musical and other traditions. Several types of devotional music are performed in temples, of which the oldest, *dāphā*, is believed to date from the 17th-century heyday of Newar civilization. In Bhaktapur there remain some 60 *dāphā* groups attached to different shrines and deities. Song texts in Sanskrit, Newari and Maithili, many ascribed to Malla royal authors, are contained in manuscript song-books that specify the rāga and tāla for each. The songs are performed by two antiphonal choruses, accompanied by cymbals, natural trumpets (*pvaṅgā*) and barrel drum (*khĩ*). The most complex Newar tāla structures are those of *dāphā* – especially the songs known as *gvārā*, in which the tāla periodically changes – and the most elaborate drum repertory is that of the *khĩ*. The *dāphā* repertory includes the *Gīta-govinda*, a famous collection of Sanskrit poems on the erotic and mystical relationship between Kṛṣṇa and Rādhā, composed in the 12th century by the eastern Indian writer Jayadeva. This work has been known in Nepal since at least the 15th century.

In Bhaktapur, eight of the ritually most important *dāphā* groups were expanded (beginning with a royal donation in the early 18th century) to include sets of nine different drums (*navabājā*). These are played at festival

times by a master-drummer in a three-hour sequence of contrasting drum solos, accompanied by the shawms of the Jugī and interspersed with *dāphā* songs.

More recent types of religious group singing with drum accompaniment include the Indian-style Hindu *bhajan* (with harmonium, *tablā* and Indian tāla), and its Buddhist equivalent called *jñānmālā bhajan*. Intermediate between these and the older *dāphā* stands *dhalcā bhajan*, using *dhalak* instead of *tablā* and Newar instead of Indian tālas.

Processional music of the farmers, bricklayers and potters is played during civic and family rituals. These are ensembles of cylindrical drums (*dhimay*, *dhā̃*) accompanied by cymbals, or of transverse flutes (*bā̃surī*, up to 20 per group) accompanied by drums and cymbals (and sometimes augmented by violins and harmonium). The flutes play the melodies of folksongs related to seasons or types of agricultural work (*sīnā jyā*, *puvājyā*, *silu*, *ghātu*, *byaculi*, *mārsi* etc.). The origins of such processional traditions may be very early: a 7th-century inscription at Baḍikhel testifies to the existence of a contemporaneous music *guṭhī* (Sharma and Wegner, 1995).

(iii) Dance. Two types of Newar sacred dance can be distinguished. In one the dancers become possessed by the gods, who take up residence in the dancers' heavy, elaborately painted masks (*navadurgā pyākhā̃*, *jala pyākhā̃*, *pacāli bhairav*, *gā̃ pyākhā̃*, *dyaḥ pyākhā̃*). All such dances include ferocious goddesses of vital importance in Newar religion, and are performed by particular castes, often low in social status. Typical of this type is the *navadurgā* dance of Bhaktapur, performed by members of the gardener caste, whose annual cycle of performances in every quarter of the town and surrounding countryside ensures the blessings of the gods – and especially goddesses – for the current year. The dance and its accompanying music (played on drum and cymbals) are but one element in a complex of rituals including the making and painting of the masks, their destruction by cremation at the end of the annual cycle and frequent blood sacrifices.

Dances of the second type, though often superficially similar, are performed mainly for entertainment (*mahākālī pyākhā̃*, *kha pyākhā̃*, *katī pyākhā̃*, *bhailā pyākhā̃*). The enactment of religious narratives connected with festivals may bring merit to the participants and observers, but the dancers are not possessed by the deities they represent. During the Festival for the Dead (Sāpāru, August) in Bhaktapur, about 60 different dances and other entertainments are performed, including a stick dance (*ghẽtāgisi*), using face paint instead of masks, masked dances of the tantric gods and goddesses (*bhailā pyākhā̃*), acrobatic entertainment (*khyāḥ pyākhā̃*) and cabaret with political themes (*khyālāḥ*).

The Buddhist tantric *cacā* dance belongs to the first type, since the dancer seeks possession by the deity or Bodhisattva represented. In recent years attempts have begun to bring elements of *cacā* dance on to the public stage as a form of Nepalese 'classical' dance. In its gesture language it appears to be related to some of the classical dances of India (e.g. *Bharata-nāṭyam*).

3. Classical music. Rulers of the Kathmandu Valley patronized the classical music of north India from Malla times onwards. The Newar kings promoted the performance of elaborate dramas, involving music and dance, on the model of Indian classical drama. A number of Indian music and dance treatises were known – some of the oldest (14th-century) manuscripts of the *Nāṭyaśāstra* survive in Kathmandu – and new treatises were composed, in Sanskrit and Newari, especially during the reign of Jagajjyotīr Malla of Bhaktapur (1613–37), who also patronized a local tradition of *rāga-mālā* painting (*see* India, §II, 3(iii)). By the 18th century, and probably earlier, Muslim musicians from India were at the Kathmandu court. Although banished by Prithvī Nārāyaṇ Shāh (reigned 1768–75), Indian musicians returned under his successors and flourished under the Rāṇā prime ministers (1846–1951). Leading musicians (including the singer Tāj Khān, the sarod player Na'matullah Khān and his two sons Keramatullah and Asadullah 'Kaukabh' Khān) were attracted from Banaras, Lucknow, Calcutta, Rampur and other Indian centres, and were appointed tutors to the Nepalese aristocracy. With the fall of the Rāṇās most of these musicians returned to India, though some of their descendants and pupils remain. Although classical music (*śāstrīya saṅgīt*) is nominally supported by the monarchy (HM Queen Aishvarya holds an MA in *sitār*), there is now little state, public or media patronage for it, partly owing to the rival attractions of local traditional and popular music.

4. Popular music. Although it is heard throughout Nepal, modern popular music is performed and recorded mainly in Kathmandu and transmitted largely via national radio. Radio was banned during the Rāṇā regime but developed rapidly after 1951, followed by 78 r.p.m. and 33 r.p.m. records in the 1960s, indigenous films from 1973 and cassettes from 1980. Until the 1980s these media were government sponsored, and they remained under government supervision thereafter. Indian films (*see* India, §VIII, 1) have dominated the film market since the 1950s, but radio has been the more important medium in Nepal. The employment of Nepalese artists by radio broadcasters has ensured the development of indigenous genres of popular music despite competition from Indian film music. The principal genres are the 'folksong' (*lok gīt*) and 'modern song' (*ādhunik gīt*).

'Folksongs' were first collected (from various regions of Nepal) and popularized by Dharma Raj Thapa (*b* 1924) in the 1950s. Among later singers, Kumar Basnet (*b* 1943) is known especially for Tamang songs, and Jhalakman Gandharwa (*b* 1935) for the songs of his own Gaine musician caste (see §II below). *Lok gīt* performances tend to combine elements such as instrumentation from different ethnic groups and from the 'modern song'; the language is usually Nepali.

'Modern songs' also began in the 1950s, with the Newar singers Nati Kazi (*b* 1925) and Shiva Shankar (*b* 1932). They drew on Nepalese folksong idioms, to which Ambar Gurung (*b* 1937) added elements of Indian rāgas and Western harmony (Grandin, 1989). The texts are composed by the singers themselves or drawn from contemporary Nepalese poetry. The standard format is a refrain (*sthāyī*) alternating with verses (*antarā*). *Tablā* or *mādal* supply the rhythmic accompaniment using repetitive patterns borrowed from the 'light classical' tradition of north India or from the local repertory. Melodic accompaniment employs a variety of instruments, including not only Nepalese flute and *sāraṅgī* but also Indian *sitār*, *santūr*, *jaltaraṅg* and harmonium, and Western guitar, mandolin, saxophone, clarinet and electronic keyboard. Melodies are derived from rāgas, local songs or are freely composed, and they employ diatonic

A damāī bājā (instrumental ensemble)

heptatonic scales, with some chromatic alteration and added harmonies. The metre is usually 6/8 or 4/4. Vocal production is based on Indian popular styles and local practice. All these elements are assimilated into a highly successful genre that permeates life in Nepal wherever there is electricity. Many 'modern songs' have been adopted enthusiastically by young people in the hills, who sing them, along with traditional songs, as their evening entertainment.

Since the early 1960s love and patriotism have been the only acceptable themes for popular songs transmitted through the official media, and in 1965 Nepali was imposed as the only permitted language, in the interests of national integration. The situation has altered little even following the restoration of democracy in 1990. Some artists, such as Prem Dhoj (*b* 1939) and Narayan Gopal (*b* 1914), have therefore remained independent of official institutions, disseminating their songs via stage performances and cassette recordings; these songs express social concerns and employ regional languages as well as Nepali. Such songs are musically similar to 'modern songs' and 'folksongs', but employ a smaller ensemble suited to stage performance.

II. Indo-Nepalese music

Indo-Nepalese society is organized according to a strict hierarchy of castes. The caste system is thought to have been introduced to Nepal by high-caste immigrants from north India who, fleeing from Muslim oppression, made their homes in the Himalayan foothills and soon became the dominant group. With them came low-caste artisans, including musicians. Indo-Nepalese professional musicians comprise the lowest strata of society, together with other low castes. Among them number the *damāī* tailor-musicians, *gāine* minstrels, *huḍkī* hour-glass drummers and *bādi* (ex-)prostitute-musicians. These groups have affinities with professional musician castes in north India.

Damāī, meaning 'kettledrum player' are tailors and musicians (see illustration). The kettledrums (*damāhā*) are usually played in pairs, with paired shawms (*śahanāī*), small kettledrum (*ṭyāmko*), cymbals (*jhyālī*), barrel drum (*ḍholakī*) and paired c- or s-shaped horns (*narsiṅga*). This ensemble, known as *pañcai bājā*, has a ritual function and is an essential accompaniment to any Indo-Nepalese procession, life-cycle rite, festival or sacrifice. Its broad repertory includes ritual and seasonal items, wedding tunes, folksongs and modern songs. Western band instruments are popular and may complement a traditional *pañcai bājā*.

In far west Nepal *damāī* play in large orchestras of kettledrums led by a master drummer and accompanied by shawm (*śahanāī*), cymbals (*jhyālī*) and horn (*narsiṅga*). The musicians wear ceremonial white robes and turbans and perform circle dances as they drum. The repertory includes a number of responsorial drumming pieces, the master drummer sounding a call to which the other kettledrums respond.

Damāī are employed at temples to sound a large kettledrum (*nagarā*) during daily rituals. The kettledrum may be accompanied by shawms and a variety of trumpets and horns, notably one in the shape of a serpent (*nāgbelī bājā*). In far west Nepal the kettledrum has retained its ancient function of signaller.

Far west Nepal is the home of the *huḍki(ya)*, a *damāī* sub-caste whose members play the pitched hourglass

drum, *huḍkā*, to accompany ballads, songs and dances, in addition to playing kettledrums. The *huḍkā* is used as a mirliton during unaccompanied passages of song, the musician holding the drum to his cheek so that the skin vibrates in sympathy with his voice. A metal tray (*thālī*), played with two sticks, is sometimes used as an accompanying instrument. *Huḍkī* are particularly important as singers of ritual ballads (*bhārat*, *jāgar*) during trance-inducing ceremonies and heroic ballads (*bharau*) at life-cycle rites.

Gāine are itinerant singer-musicians. Traditionally they serve their patrons by singing their blessings or devotional songs on their behalf, receiving foodstuffs in return. Prior to the advent of Radio Nepal, *gāine* also had the duty of disseminating news and government messages. Their vocal style combines declamation and singing. The main accompanying instrument is the *sāraṅgī*, a bowed fiddle with four strings (*see* INDIA, §III, 6(i)(c)). Their other instrument, a long-necked plucked lute called *ārbājo*, is all but obsolete. Both instruments are carved from single pieces of wood and have four strings, tuned upper fifth–tonic–tonic–lower fifth. The rhythmic articulation achieved through bowing the *sāraṅgī* is heightened by little bells attached to the bow. The *ārbājo* is held horizontally, both hands plucking the strings to produce a rhythmic drone. Today *ārbājo* may occasionally be heard at *gāine* weddings, played in ensemble with a *sāraṅgī*.

The *gāine* repertory comprises heroic ballads (*karkhā*), sacred and auspicious songs (*maṅgal gīt*), wedding songs, patriotic songs and 'sung messages' for the army (*lāhureko sandeś*), social commentaries and folk songs (*jhyāure gīt*). Some of the songs they sing pertain to particular festivals or seasons and are played by the *damāī* too. The *gāine* tradition is in decline, many *gāine* now making instruments for sale to tourists rather than performing.

Most *bādi* have abandoned their traditional professions of musical performance and the prostitution of their women. Formerly, *bādi* women (*bādinī*) sang and danced for money, accompanied by their men on small barrel drums (*ḍholakī*, *mādal*), sometimes with harmonium. These days *bādi* earn a living from drum-making, tanning and labouring rather than music-making. In far west Nepal *bādi* substitute for *gāine*, singing and playing a Rajasthani-style *sāraṅgī*, called a *maśak sāraṅgī*, with a rectangular body, four melody strings and a variable number of sympathetic strings.

In addition to the music of the musician castes, other Indo-Nepalese castes enjoy recreational and devotional music-making. Playing the small barrel drum (*mādal*) is not caste restricted, and it is used across the country to accompany traditional songs and dances. Blacksmiths (*kāmī*) make instruments for the *damāī*, but they have their own musical tradition. They make iron jew's harps and entertain themselves with traditional, film and radio songs.

The Nepalese court employs 16 pure-caste women as ritual singers (*maṅgalinī*). It is their duty to sing during daily rituals, royal life-cycle rites and festivals. The *maṅgalinī* ('auspicious women') have a repertory of nine sacred songs, each of which has a specific ritual function. They accompany themselves on harmonium and *tablā*. Brahmin priests sound conch (*śaṅkha*) and bell (*ghaṇṭā*) during temple rites. During festivals they sing responsorial invocations of a deity's name (*bālan gan*) and other devotional songs (*bhajan*), accompanying themselves with a small frame drum and finger cymbals.

Indo-Nepalese traditional music is characterized by two metres, 4/4 (*khyālī*) and 6/8 (*jhyāure*), and by melodies based on a pentatonic scale, sometimes with additional notes in descent. The seasonal and ritual repertories of the professional musician castes employ a variety of metrical structures, including rhythmic cycles of five, seven and nine beats. Similarly the melodies of these repertories are based on a range of scales, including several heptatonic scales with third, fourth and/or seventh degree raised in ascent and flattened in descent. Much of this musical tradition is in a state of decline, however, due to the influence of radio and film music.

A genre of national light music is broadcast by Radio Nepal to promote national integration. This music combines Indo-Nepalese elements, such as pentatonic melodies and traditional instrument accompaniments, with Western and South Asian pop elements, including orchestral backings, *tablā* and synthesized sound effects. The songs, sung in Nepali and concerned with love themes, are widely popular.

III. Traditional music outside the Kathmandu Valley

Hardly any of the music cultures of the 30 or so ethnic groups living outside the Kathmandu Valley have been studied. Religious rituals, oral narratives and festivals have been investigated as if they were silent, ignoring music which plays an essential part in them.

The mountainous topography has kept local cultures relatively isolated from each other. The caste hierarchy (officially banned in 1951) into which ethnic groups are included as castes (*jāti*) has supported the distinctiveness of music cultures. In an attempt to raise their status, people belonging to a lower caste may, however, adopt songs, among other cultural practices, from upper castes. The development of mass media, particularly Radio Nepal with its nationalist politics, has been one of the major factors in musical change in rural areas. Authentic recordings of minority musics are not played on the radio. Nepalese and Hindi popular tunes are adopted into local repertories, and songs in a similar style are composed.

Among the northern Sino-Burman ethnic group, anhemitonic pentatonic melodies sung with slight variations in a heterophonic and sometimes melismatic manner dominate. In the south, among the dominant Indo-Aryan group, melodies are based on heptatonic scales, and singing may be more unified but also more melismatic. The rhythmic accompaniment is rich and varied, and most of the music is combined with dance. These generalizations, however, do not give justice to the vast variety of local musics.

In addition to the music of mass media adopted by rural people, some musical genres, such as the *jhyāure* dance, are known all over Nepal. A song duel, *dohorī gīt*, in which individuals or groups compete in invention of new verses, is also popular. The improvised verses are usually followed by refrains sung by people listening to the competition.

Most of the music in villages is made by ordinary people during their leisure time and while working it is conceptualized as being collective and reciprocal. Only singing and playing in a group for an audience (visible or invisible) is regarded as music: songs sung alone or in groups while working are not regarded as music but as an inseparable part of the work at hand. Musical roles

are divided according to gender, and even though women take part in some musical genres (such as the *rateulī* dance at weddings), their music-making is limited after they marry.

Religious beliefs relate to much of the music; religious authorities have their own repertory connected with rites after death and other rituals. Music performed both by shamans and laymen is used as a medium to communicate with the gods, local deities and ancestors. The beating of drums accompanies the spiritual journeys made by shamans and by the spirit possessions of ordinary people. Various animistic, Buddhist and Hindu rites (for purifying the house, blessing the first-born son etc.) and numerous religious festivals consist of, or at least include, music; perhaps the best known is the *mānī-rimdu* festival of the Sherpas. The singing and dancing of Hindu epics belongs to some ethnic repertories (such as the Gurung version of the story of Lord Kṛṣṇa, and the *nachang* of the Magars, based on the Hindu epic of Rāma and Sītā).

Musical instruments include a wide range of membranophones, most popular of which is the wooden cylindrical drum (the *mādal*), bamboo flutes (*bā̃surī*), cymbals (*jhyālī*), trumpets made of animal horn, oboes and jew's harps, while string instruments are more rare. The harmonium is also used in villages. Many of the instruments originate from India. A variety of names and pronunciations for the same kind of instrument and the same kind of music are used; the same name may also be used to describe different kinds of musical practices.

The most traditional dances may imitate working movements (such as the *wass* dance of the Khaling, connected with earth worship in May), or animals (for example the Limbu dance *ke-lang*, the parts of which are named after various animals that were originally imitated). Men may dance female roles, and women dancing in male costumes may perform in contemporary dances.

Music-making, and to some extent the musical repertory, is related to the agricultural cycle of the year. The gods are honoured with music in the hope of a good crop and to celebrate the auspicious occasion of eating from the new harvest (such as *chhonam* of the Chepang). When work in the fields allows leisure time, musical performances are arranged.

The musical repertory of the Gurung of mid-Nepal consists of traditional genres, such as the *ghā̃ṃṭu* and *soraṭhī*, more recent genres relating to the Hindu tradition (the Kṛṣṇa *carītra*), popular pan-Nepalese dances and contemporary music in adopted popular styles. The latter are performed in the dance theatres and 'cultural clubs' of the young, as well as in the *rodī*, an institution for the evening gatherings of young people. Nowadays only old people in a few villages know secular songs in the Gurung language. Almost all Gurung music (excluding singing while working) is combined with dancing.

Most of the music made by the local shamans (*poju*, *khlevri*) and lamas relates to death rites. The funeral/cremation ceremony, as well as the guiding of the soul to heaven, include dances and songs (such as the *serga*) performed by laymen to the soul of the deceased. The older genres of the Gurung repertory, the *ghā̃ṃṭu* (the *ghā̃ṃṭu* of the Magars differs considerably from that of the Gurung) and the *soraṭhī* are shamanic. The gods are asked to bless the performances, sensitive listeners may fall into a trance owing to the gods' presence, and in the *kusuṇḍā* part of the *ghā̃ṃṭu*, the dancers become possessed by the spirits.

The most traditional genres are based on pentatonic melodies that are slightly varied through heterophonic singing technique, possibly embellished with undulating voice formation produced by vibrating the jaw. The result is a continuously flowing complex musical texture. Performances other than those of the shamans are accompanied by *mādal* drums. The drum accompaniment is based on rhythmic patterns called *parka* (also called *tāls*), which are varied. Newer music, including the *Kṛṣṇa līlā*, is diatonic and sung in a unified manner to the accompaniment of *mādal* and *harmoniyam*.

The political changes of 1990, when King Birendra relinquished absolute power following pro-democracy demonstrations, altered the status of ethnic groups. The promotion of diverse ethnicities is now officially allowed, and minority musics have gained new roles in maintaining and supporting minority cultures and identities. However, the impoverishment of rural areas reduces the frequency of long-lasting, costly musical performances. Gradual modernization has decreased the importance of musical genres related with the shamanic belief system and traditional way of life.

RECORDINGS

Musik der Nevārī-Kasten, rec. F. Hoerburger, Berlin Staatliche Museen KM003 (1971) [incl. notes by F. Hoerburger]

GERT-MATTHIAS WEGNER, RICHARD WIDDESS (I), CAROL TINGEY (II), PIRKKO MOISALA (III)

Nephelius, David. *See* WOLKENSTEIN, DAVID.

Nepomuceno, Alberto (*b* Fortaleza, 6 July 1864; *d* Rio de Janeiro, 16 Oct 1920). Brazilian composer and conductor. His father was his first teacher. His formal education took place in Recife, where at 18 he was already conducting the concerts of the local Carlos Gomes Club. He moved to Rio de Janeiro in 1884 and continued his studies while teaching the piano at the Beethoven Club. A trip to Europe, begun in 1888, took him to the most celebrated music schools: the Accademia di S Cecilia in Rome, the Akademische Meisterschule, the Stern Conservatory in Berlin, and the Paris Conservatoire, where he studied the organ with Guilmant. He returned to Rio de Janeiro in 1895 to teach the organ at the conservatory. In 1896 he took on the directorship of the Sociedade de Concertos Populares, and in 1902 that of the conservatory, but only for a few months. He became director of the institute again in 1906, and began to promote the recognition of Brazilian music and composers, by establishing a campaign against the germanophile music critic Oscar Guanabarino, by including Brazilian works in the programmes of his concert association, and by supporting the performance of the music of popular composers, such as Catulo da Paixão Cearense. Having succeeded in transferring the institute to its modern quarters he resigned as its director in 1916. In 1910 Nepomuceno travelled to Europe to conduct at the Brussels Exposition Universelle, and to

present works of his own and other Brazilian composers at Paris and Geneva.

As a composer Nepomuceno played a major role in the emergence of musical nationalism in Brazil. His extensive production reveals his eclecticism. He wrote in most of the traditional musical forms or genres: art songs, with Portuguese, French, Italian, Swedish and German texts; sacred music, including a Mass and a *Tantum ergo*; secular choral music, including *As Uyaras*, based on an Amazonian legend; many piano and organ pieces; four string quartets and a trio; operas and lyrical comedies; a symphony, several tone poems, and three suites for orchestra. Of these the *Série brasileira* and the prelude *O Garatuja*, both for orchestra, the String Quartet no.3, the piano pieces *Dança de negros*, *Galhofeira* and *Brasileira*, and numerous art songs present folk or popular material or simply draw directly upon popular music.

The Quartet no.3, written in Berlin in 1891, carries the title *Brasileiro* and is one of the earliest works showing a nationalist tendency. Rhythmic figures very common in urban popular music of the time (in the first and third movements) and folklike thematic material are the only local elements, indicating a rather slight national characterization. However, the piano piece *Galhofeira*, which is the last of *Quatro peças lyricas*, reveals the composer's knowledge of urban popular forms. The first three pieces of this group are conventionally written within a strictly Romantic style, but *Galhofeira*, using the *maxixe* and the *chôro* as its essential elements, is based on a syncopated accompaniment pattern found in most urban popular forms and the improvisatory aspect of the *chôro*.

In 1897 Nepomuceno presented in a concert at the Rio de Janeiro Conservatory his most recent symphonic works, including the *Série brasileira*. This work was his first symphonic attempt to depict some typical aspects of Brazilian life. The last movement, 'Batuque', which exploits the rhythmic elements of the Afro-Brazilian dance *batuque*, became the composer's most popular piece. The last section ('doppio movimento') of the movement makes the most of the *batuque*'s frenzied lack of melodic characterization. The piece is indeed symptomatic of the discovery of the rhythmic primacy of popular music.

Nepomuceno's vocal works include some 50 songs with Portuguese texts; the national character of these songs however is rather limited. *Xácara* (op.20 no.1), for example, recalls the *modinha* sentimental song genre of the 19th century, while *A jangada* is perhaps the most nationalist of all, because of its rhythmic and harmonic elements: the syncopation of the accompaniment and the harmonic progressions imitating the guitar in conjunct descending motion.

Nepomuceno's four theatrical works, including the one-act opera *Artemis* (1898) and the three-act opera *Abul*, first performed in Buenos Aires in 1913, made no attempt to create a national opera. Nevertheless he has been proclaimed the 'father' of Brazilian music because he was one of the first art music composers in Brazil to draw on native elements.

WORKS
(*selective list*)

printed works published in Rio de Janeiro unless otherwise stated

Stage: Electra (incid music, C. Chabault, after Sophocles), 1894; Artemis (op, 1), Rio de Janeiro, 1898; Abul (op, 3), 1899–1905, Buenos Aires, 1913, vs (Milan, *c*1906); A cigarra (comedy, 3), 1911

Orch: Prière, 1887, str; Rapsodie brésilienne, 1887; Série brasileira, 1892, pf score (*c*1930); Scherzo vivace, 1893; Sinfonia, g, 1894 (1938); 6 valsas humoristicas, pf, orch, 1903; O Garatuja, prelude, 1904; Romance e tarantella, vc, orch, 1908 (*c*1908)

Chbr and inst: Str Qt, g, op.6, 1889; Str Qt no.1, b, 1890; Str Qt no.2, E♭, 1890; Str Qt no.3 'Brasileiro', d, 1891; [6] Fôlha d'album, pf, 1891; 4 peças lyricas, op.13, pf, 1894: Anhelo, Diálogo, Valsa, Galhofeira; Tema e variações, A, pf, 1902 (*c*1910); Variações sôbre um tema original, pf, 1902 (*c*1910); Ofertorio, org, 1912 (Paris, *c*1912); Pf Trio, f♯, 1916 (*c*1916); Devaneio, vn, pf, 1919

Vocal: Ave Maria, female vv, 1887; Canto fúnebre, chorus, 1896; Hino ao trabalho (O. Bilac), 1896; As Uyaras (M. Morais Filho), S, female vv, orch, 1896; Panis angelicus, 2vv, org, 1909; Ecce panis, 2vv, org, 1911; O salutaris hostia, 4vv, org, 1911; Tantum ergo, chorus, org, 1911; Oração à pátria (Bilac), 1914; Missa, chorus, org, 1915; Ode a Oswaldo Cruz (O. Duque Estrada), 4vv, 1917, ed. H. Villa-Lobos as Invocação a Cruz (*c*1930)

over 80 songs incl.: Canção da ausência (H. Fontes), 1915; Canção do amor (Amadei), 1902; Cantilena (Coelho Neto), 1902; Cativeiro, lira cearense (J. Galeno), 1896; Coração indeciso (F. Pessoa), 1903; Coração triste (M. de Assis), 1903; A jangada (Galeno), 1920; Medroso de amor, moreninha (Galeno), 1894; Numa concha (O. Bilac), 1914; Olha-me (Bilac), 1914; Philomela (R. Correia), 1903; Saudade (G. Dias), 1906; Trovas tristes (Duque Estrada), 1905; Xácara (O. Teixeira), 1902

GERARD BÉHAGUE

Nepotis [De Neve]. Surname of three South Netherlandish musicians of successive generations, perhaps related, who served the Habsburg rulers of the Netherlands in the 15th and 16th centuries.

(1) Govard [Godefroid, Gomar] **Nepotis** (*b* *c*1450; *d* Antwerp, 1499). Priest and organist. Active at the church of Our Lady, Antwerp *c*1485, he served as organist to the court of Philip the Fair at Mechelen from November 1492 to April 1496. During this period he taught Philip's younger sister Margaret of Austria to play 'many musical instruments'.

(2) Florens [Fleurquin] **Nepotis** (*b* Mechelen, *c*1495; *d* before 15 March 1537). Organist, son of *maître* Cornelis Nepotis and possibly a nephew of (1) Govard. According to Margaret of Austria, he was 'raised and taught music and other studies' at her court in Mechelen. In 1514 he was a 'young singer' in the chapel of Archduke Charles; in 1515 he became assistant to the court organist Bredemers and Margaret's private organist. In 1515–16 he was a student at the University of Leuven. In 1518 the archduke sought to have Florens transferred to his own service, much to Margaret's annoyance. In 1520 Albrecht

Dürer, then visiting her court, drew a portrait of Florens, which has unfortunately been lost.

Florens's duties at Margaret's court, where he held the title of 'varlet de chambre', included giving her jester lessons in singing and in playing the clavichord, a task he found distasteful. In 1522 he entered Charles V's service, but he returned to Margaret in 1525. After Margaret's death in 1530, he passed to the service of her successor, Mary of Hungary. Charles V knighted him in 1530, and he is again listed among the members of Charles's chapel in 1532.

Florens, often called 'Fleurquin', is sometimes confused with Fleurquin de la Grange (*d* before Jan 1501), who in 1497 succeeded Govard Nepotis as organist to Philip the Fair, serving until July 1500.

(3) **George Nepotis** (*b c*1530; *d* after 1567). Singer, possibly a nephew of (2) Florens. In 1540 he was a choirboy in the imperial chapel of Charles V and in 1555 an adult singer there. In 1556 he accompanied the emperor to Spain and into retirement at Yuste. After Charles's death in 1558, he entered the chapel of Philip II, where he served until at least 1567.

Nera (It.). *See* CROTCHET (quarter-note); *semiminima* and *croma* are also used. *See also* NOTE VALUES.

Nercom [Nercome, Nercum], **Daniel.** *See* NORCOMBE, DANIEL.

Neri, Filippo (*b* Florence, 21 July 1515; *d* Rome, 26 May 1595). Italian saint and religious leader. He pursued his early education in Florence, partly at the Dominican friary of S Marco. By 1534 he was a pupil in Rome, but within a year he abandoned his studies to devote his life to prayer and charitable works. In 1548 he founded the Confraternita della SS Trinità to assist needy pilgrims who flocked to Rome. In 1551 he entered the priesthood; within a year he began to attract a small group of laymen who met daily at his living quarters at S Girolamo della Carità to discuss religious topics and to pray together. By 1554 attendance at these gatherings had become so great that they were transferred to the church loft which was remodelled as an *oratorio* (oratory or prayer hall). In the informal spiritual exercises held there Neri introduced the singing of the *lauda spirituale* (*see under* LAUDA). In 1575 Pope Gregory XIII recognized Neri's group as an official community, the Congregazione dell'Oratorio, and granted them the old church of S Maria in Vallicella, soon replaced by the Chiesa Nuova. Towards the end of Neri's life as many as 3000 people would attend the spiritual exercises which had become an important aspect of the Catholic reform movement in Rome, and Neri was widely regarded as a living saint. He was beatified on 25 May 1615 and canonized on 12 March 1622.

Neri's importance for the history of music lies in his emphasis on the *lauda* for both solo and congregational singing and in the stress he placed on music as a means of attracting people to his oratory services. The earliest *maestro di cappella* for Neri's oratory was Giovanni Animuccia; Palestrina and Victoria probably participated in its music. Francesco Soto de Langa was *maestro di cappella* from 1571 to 1596 as well as a composer and compiler of *laude* collections published for the oratory's use.

HOWARD E. SMITHER

Neri [Negri], **Massimiliano** (*b* ?Verona, *c*1621; *d* Bonn, 1666 or after 1670). Italian organist and composer. He was the son of Giovanni Giacomo Negri (*fl* 1609–1643) and Caterina Hennes. His father was a musician known to have served at courts at Munich, Neuburg and Düsseldorf. His mother was a harpsichord teacher. Massimiliano Neri arrived in Venice while still a child, probably about 1631; his organ and composition teachers have not been determined. He served as first organist of S Marco, Venice, from December 1644 to 1664. He was also organist of SS Giovanni e Paolo (1644–6 and 1657–64) and S Caterina (1658). In 1648 Giacomo Soranzo, the dedicatee of his op.1, endowed him with a lifelong pension that was roughly equal to his earnings at S Marco. In 1658 he was tried before the Council of Ten for permitting Vespers at S Caterina to continue until an hour beyond 'midnight' (i.e. until 8 p.m.), but acquitted on account of conflicting obligations at S Marco. He may have been the teacher of Carlo Grossi, who succeeded him at SS Giovanni e Paolo. Neri was raised to the nobility by the Habsburg Emperor Ferdinand III in 1651, when he seems also to have visited Vienna, possibly for the emperor's wedding (Neri was absent from Venice for three months from mid-April). In 1655 he was appointed *maestro di musica* at the orphanage of the Ospedaletto (or Derelitti) in Venice. He travelled to Cologne in the spring of 1663, and in the summer of 1664 entered the service of the elector there as organist and Kapellmeister. He was in search of a new position at Bonn (where his brother, Giuseppe, was a canon) when he died, previously thought to have been in 1666. However, recently discovered Venetian documents report that Neri was still in the employ of the Elector of Cologne in 1670.

Even though most of Neri's works lack some parts, it is clear that his achievement as a composer of instrumental music was considerable. The sonatas and canzonas of his op.1 are distinguished by lively fugal writing and virtuoso passage-work as well as by slow movements of grace and substance. The op.2 sonatas are more enterprising and are scored for several different instruments, including cornetts, recorders, bassoons, trombones, theorbos and

bowed instruments of all sizes. In his works for a large ensemble Neri united elements of Giovanni Gabrieli's polychoral canzonas and Dario Castello's ornamental *sonate concertate*; short ritornellos and concertino passages for two and three instruments of similar timbres occur in several of them. These features and his close attention to motivic detail make Neri's later sonatas noteworthy precursors of Venetian concertos of the early 18th century.

The innovations of scoring for selected ensembles and obbligato parts for such instruments as theorbo reflect the different institutions and locales that Neri's music represents. While its debts to Venetian practice are clear, the musical cultures of patrons in Verona and Vienna, and an exposure to music in various German courts, may have prompted some of Neri's stylistic characteristics. In Venice alone Neri had to respond to the diverse needs of the ducal Basilica di S Marco, the parish and monastic churches of S Caterina and SS Giovanni e Paolo respectively, the celebrated Ospedaletto and private patrons, for example Giacomo Soranzo. Such varied demands were unusual for a composer of instrumental music of the time.

Neri Bondi, Michele (*b* Florence, 16 Oct 1750; *d* Florence, *c*1822). Italian composer. His original name was Michele Neri, but in 1773, owing to the presence in Florence of a singer with the same name, he changed his surname to Neri Bondi (sometimes mistakenly listed as Bondi Neri) while the singer let himself be known as Michele Angiolo Neri. After Ferdinando Rutini, Neri Bondi was the most prolific late 18th-century Florentine composer of comic operas. His most successful, *I matrimoni in cantina*, was heard twice in both Florence and Bologna, and also in Pisa, Lucca, Rome, Ravenna, Siena and Palermo; most of his other works were composed for and performed only in Florence. His forte was the composition of musical entertainments for those Florentine theatres (the Cocomero, Intrepidi, Piazza Vecchia, S Maria and Borgo Ognissanti) that, following government regulations, performed prose tragedies and comedies with incidental music as their principal fare. Only one of his comic operas, *La locandiera*, was performed at the Teatro di via della Pergola.

Between 1779 and 1790 Neri Bondi was prominent as a music director, arranger and first harpsichordist in the small theatres, especially the Intrepidi, directing works by Andreozzi, Borghi, Cimarosa, Moneta and Valentini, as well as his own. Finally, in the carnival of 1790 for the grand reopening of the refurbished Pergola, he directed *Amleto*, with music by Luigi Caruso, afterwards remaining as music director. In the 1793 summer season he became the impresario of the S Maria, directing there in the summer and at the Pergola in the spring and autumn seasons. During carnival he simultaneously directed opera at the Pergola and served as impresario at the S Maria, but he resigned from the latter after one year. He opened a school of music in Fiesole in January 1796 and about the same time became *maestro di cappella* at S Maria de' Candeli (his sacred works date from this period), but continued as first harpsichordist at the Pergola until at least autumn 1822, when he was replaced by the second harpsichordist, Luigi Barbieri.

WORKS

OPERAS

all first performed in Florence

Infedeltà delusa (dg, 2, M. Coltellini), Piazza Vecchia, carn. 1783
Le serve in contesa (int, 2, F. Casorri), Intrepidi, aut. 1783
Ogni disugualianza amore aggualiga (int, 1, Casorri), S Maria, carn. 1784, *I-Tf*
Il ripiego improvviso, ovvero Quel che l'occhio non vede, il cor non crede (int, 1, Casorri), S Maria, 26 Dec 1784
L'amor rusticale (int, Casorri), S Maria, carn. 1785
I mietitori, ovvero L'amante dispettosa (int, 1, ?Casorri), S Maria carn. 1785, *Tf*
I matrimoni in cantina (La finta nobiltà; I viaggiatori) (dg, 2, G. Bellentani), Intrepidi, 8 Nov 1785, *Tf*
La locandiera, o sia Da ultimo è bel tempo (dg, 2, D. Poggi, after C. Goldoni), Pergola, 2 June 1786, 2 arias *Tf*
Le spose provenzali (dg, 2), Intrepidi, spr. 1787
Il maestro perseguitato (int, 1), Cocomero, Sept 1787
Tizio, e Sempronio (int, 1, Casorri), S Maria, 26 Dec 1787
La bella incognita, o siano I tre amanti delusi (int, 1, C. Giotti), Intrepidi, carn. 1788
Quello che può accadere (int, 1), S Maria, carn. 1788
L'autunno (int, 1, D. Somigli), Cocomero, 19 Sept 1788
La pianella persa (L'inverno) (farsetta, 2, ? P. Andolfati), Cocomero, 14 March 1789, *Fc*
I vendemmiatori, ovvero I due sindaci (farsetta, 1, ?Andolfati), Cocomero, 18 May 1789, *Fc*
Gli amori d'estate o sia Il mulinaro e la pescatrice (farsetta, 1, ?Andolfati), Cocomero, spr. 1789
La villa (farsetta, 1, Casorri), Piazza Vecchia, carn. 1790, *Fc*
Il mondo della luna (farsetta, Somigli, after Goldoni), S Maria, 28 Dec 1790, rev. as Il finto astronomo, o sia il mondo della luna (farsa), Piazza Vecchia, 26 Dec 1791, *Fc* [wrongly attrib. G. Moneta], *PAc*
Il vecchio speziale deluso in amore (farsa, Casorri), Piazza Vecchia, 28 Dec 1790
La fata Urgella, o sia Quel che piace alle donne in ogni tempo (farsa, 2, G. Squilloni, after C.-S. Favart: *La fée Urgèle ou Ce qui plaît aux dames*), Borgo Ognissanti, 26 Dec 1791
La cameriera raggiratrice, o sia La guerra aperta (int, 2, Somigli), Cocomero, 26 Dec 1793
Il concistoro delle donne, ossia La bizarrie d'amore (int), Piazza Vecchia, 26 Dec 1793
Untitled farsa, Borgo Ognissanti, 26 Dec 1793
Il rivale di se medesimo (dg, 1, after P.-G. Nivelle de la Chausée: *Le rival de lui-même*), Cocomero, 27 Dec 1795
Gli artigiani (ob, 1), Borgo Ognissanti, carn. 1798, *PAc*
La villanella rapita, 1798

Arias and arrs. of opera excerpts in *D-Hs*, *F-Pn*, *US-Wc*

ROBERT LAMAR WEAVER

Neri de' Soldanieri, Niccolò di. *See* SOLDANIERI, NICCOLÒ.

Neriti da Salò [Nerito], **Vincenzo** (*b* Salò; *fl* 1593–9). Italian composer. He is described on the title-page of his *Canzonette ... libro primo* (1593) as chaplain and musician to Emperor Rudolf II, and on that of the *Magnificat* settings published in the same year as 'capellanus et sacellanus' at the Carmelite monastery, Mantua, and as an imperial musician. He was *maestro di cappella* at the Chiesa Maggiore, Salò, when his second and third books of canzonettas were published, and presumably spent the intervening years there. (His name was not found in the archives by Guerrini, whose reliability, however, has been questioned by Sartori.)

It is significant that Neriti's sacred works are omitted from the list of music books in the Chiesa Maggiore drawn up by Alessandro Savioli in 1615 (now in the Archivio del Comune, Salò). Neriti seems to have had close contacts with the Gonzaga family; the first book of canzonettas is dedicated to Enea Gonzaga and the other two books each contain pieces addressed to Francesco Gonzaga, Marchese of Castiglione delle Stiviere, whom Neriti might have met at the imperial court in Prague in 1587. His most popular works appear to have been the *Magnificat* settings and the first book of canzonettas; extracts from both were reprinted in anthologies and copied into manuscripts in Italy and northern Europe.

WORKS

Magnificat VIII, primi chori per omnes tonos, 4vv (Venice, 1593[1])

Canzonette ... libro primo, 4vv (Venice, 1593)
Il secondo libro di canzonette, 4, 8vv (Venice, 1595)
Il terzo libro di canzonette, 4, 7, 8vv (Venice, 1599), inc.

IAIN FENLON

Nero, Emperor of Rome [Claudius Caesar Drusus Germanicus] (*b* 15 Dec 37 CE; ruled 54–68 CE; *d* 9 June 68 CE). Roman ruler and musician. Our knowledge of his passionate concern with music comes from Tacitus (*Annals*, xiii–xvi), Suetonius (*Nero*) and Dio Cassius (lxi–lxiii). While still a boy he showed a dilettante's interest in musical performance, which had reached remarkable heights of technical perfection during this period. Immediately upon his accession, and encouraged by his tutor Seneca, he began studies with the famed kitharode Terpnus and undertook a severe regimen of dieting and purges, even wearing lead plates to strengthen his chest. So great was his commitment that six years passed before he would take part in a public musical competition. There is much testimony, moreover, to his elaborate and unfailing observance of every tiny detail of professional etiquette, carried out with the greatest apparent diffidence.

After predictable triumphs at Rome, he ventured to make appearances elsewhere, eventually in Greece itself. His repertory consisted principally of kitharoedic *nomoi* and lyric excerpts from tragedy; the latter he delivered in full costume and masked (as the blinded Oedipus, for example, or a woman in the pangs of childbirth), with appropriate miming. Such extravagances, it has been suggested, gave rise to the rumour noted by Tacitus (*Annals*, xv.39.3) that during the great fire of 64 CE he celebrated the catastrophe by singing *The Destruction of Troy*, possibly one of the *nomoi*. Suetonius (*Nero*, 38) and Dio Cassius (lxii.18.1) reported the rumour as fact, and Dio added that the emperor put on a kitharode's costume. He seems to have practised the composition of both poetry and music extensively; a collection of his works existed after his death.

Nero's voice was husky and lacked fullness (Suetonius, *Nero*, 20). Nothing indicates that his pretensions to professional competence were justified. He nevertheless believed in his talent to the end: *qualis artifex pereo* – 'What an artist dies in me!' – were his last words.

WARREN ANDERSON/THOMAS J. MATHIESEN

Néron, Louis (*fl* early 18th century). French organist and composer. Described on the title-pages of his compositions simply as *organiste et maître de musique*, Néron's talents as a performer must have been of a high order. He was organist at the Merci Church in Paris, and in 1726 was invited, together with Dandrieu and Daquin, to judge between Corrette, Toutain and Thomelin for the position of organist at Ste Marie-Madeleine. His only compositions were a few *airs* published in Ballard's *Recueils*, a musette and some cantatas. The latter are typical examples of the French form at that time.

WORKS

Airs in Ballard's Recueils d'airs sérieux et à boire (Paris, 1718, 1729, 1731)
Cants.: Le papillon (Paris, 1716); Les charmes de la voix (Paris, 1717); Diane et Actéon, 1720, *F-Pn*; Orithie, 1720, *Pn*
Reveillez-vous, ma musette, musette, in *Mercure de France*, June 1726

DAVID TUNLEY

Neruda. Moravian family of musicians.

(1) Josef Neruda (*b* Mohelno, Moravia, 16 Jan 1807; *d* Brno, 18 Feb 1875). Organist. He is not to be confused with the teacher and composer Josef Neruda (1804–76). He received his musical education at the Benedictine monastery of Rajhrad. While an assistant teacher at Náměšť nad Oslavou, he also played in Count Haugwitz's military band (1825). He taught the piano at Olomouc (1825–32), and was choirmaster (1832) and then organist (1836–45) of Brno Cathedral; there is no evidence to

support the frequent assertion that he later returned to the cathedral post. He moved to Vienna with his talented family, wishing them to have the advantages of the capital's educational opportunities and general musical activity. His eldest daughter (2) Amálie Nerudová was a pianist, another daughter, (3) Wilma Neruda, became a celebrated violinist and his youngest daughter Marie (Arlbergová) (*b* Brno, 26 March 1840; *d* Stockholm, 1922) was also a violinist; his sons Viktor (*b* Brno, 1836; *d* St Petersburg, 1852) and (4) Franz Neruda were cellists. In 1848–9 he travelled with Amálie, Wilma, Marie and Viktor to various German cities, Belgium, the Netherlands, England, Poland and Russia (on another Russian tour, Viktor died at St Petersburg). He played in a string quartet with Wilma, Marie and Franz until Wilma's marriage in 1864, and took his family again to Russia in 1860 and to Poland and Germany in 1861. During 1861 to 1863 they toured Scandinavia, giving 20 concerts in Stockholm and 39 in Copenhagen.

(2) **Amálie Nerudová** [Wickenhauserová] (*b* Brno, 31 March 1834; *d* Brno, 24 Feb 1890). Pianist and teacher, daughter of (1) Josef Neruda. She took part in the family's European concert tours from 1848 and, with her sister Wilma and her brother Viktor, made frequent piano trio appearances until 1852 (the year of Viktor's death). In her native town she became a leading musical personality, performing six times at the Czech Beseda concerts. Between 1877 and 1879 she held chamber concerts at which she played in the piano quintets of Schumann and Brahms, in a Dvořák trio and partnered the young Janáček in works for two pianos. She was also active as a teacher, and Janáček benefited from her advice, particularly after he became conductor of the Beseda concerts.

(3) **Wilma Neruda** [Vilemína (Maria Franziška) Nerudová; Wilhelmina Neruda; Wilma Norman-Néruda; Lady Hallé] (*b* Brno, 21 March ?1838; *d* Berlin, 15 April 1911). Violinist, daughter of (1) Josef Neruda. She was taught the violin by her father at a very early age and by Leopold Jansa in Vienna; Hanslick was impressed by her playing in 1846. She performed in Prague with her sister Amálie in December 1847, went with the family on her first important concert tour, visiting Leipzig, Berlin, Breslau and Hamburg in the following year, and in 1849, after numerous appearances in London, she played a De Bériot concerto at the Philharmonic concert on 11 June. In 1863, at the end of her family's highly successful Scandinavian tour, the King of Sweden appointed her chamber virtuoso, and a year later she triumphed in Paris. She married the Swedish composer and conductor Ludvig Norman in 1864; they separated five years later. From 1867 to 1870 she was professor of violin at the Swedish Royal Academy of Music. Her annual visits to London for the winter and spring seasons began in 1869, and in 1876 she was given a magnificent Stradivari (1709) by the Duke of Edinburgh (later Duke of Saxe-Coburg) and the earls of Dudley and Hardwicke. As Mme Norman-Néruda she frequently deputized for Ludwig Straus as leader of his quartet (the other players were Ries, Zerbini and Piatti), and she appeared regularly in Charles Hallé's recitals from 1877; she was also a popular soloist in all the principal musical centres of Europe. Three years after Norman's death in 1885, she married Sir Charles Hallé. In 1896, a year after Hallé's death, the Prince of Wales (later Edward VII), supported by the kings of Sweden and Denmark, inaugurated a public subscription in appreciation of Lady Hallé's work. She left London in 1898 and two years later settled in Berlin, where she continued to teach (at the Stern Conservatory) and give concerts. The title of violinist to Queen Alexandra was conferred on her in 1901.

(4) **Franz** [František] (**Xaver Viktor**) **Neruda** (*b* Brno, 3 Dec 1843; *d* Copenhagen, 20 March 1915). Cellist and composer, son of (1) Josef Neruda. Like his brother and sisters, he first learnt music from his father, beginning with the violin, and taught himself the cello in 1852 after his brother Viktor's death. He studied the cello with Březina in Brno, and for six months with the Belgian cellist Servais in Warsaw in 1859. In 1860 he played (with his sisters Amálie and Wilma) at the first Czech Beseda concert in Brno. In 1861 he went on a long Scandinavian tour with his sisters Wilma and Marie which met with particular success at Copenhagen in 1862–3. He settled in the Danish capital in 1864 and became a member of the royal orchestra. Four years later he was one of the founders of the Chamber Music Society and its string quartet, whose other members were Tofte, Schiørring and Holm. In 1874 he visited London, Manchester and Liverpool, and he lived in England periodically from 1876 to 1879. Returning to Copenhagen, he founded the Neruda Quartet, which also included Anton Svendsen, Nicolai Hansen (later Holger Møller) and Christian Pedersen; for a decade it was Denmark's leading ensemble. In 1889 Anton Rubinstein chose him to succeed Davïdov as professor at the St Petersburg Conservatory. In Copenhagen again from 1891, he became conductor of the Music Society, a post he held until his death; during these years he also conducted the Music Society in Stockholm and was highly esteemed as a piano teacher. His compositions, a number of them published in Copenhagen and other cities, show Czech folk influence and include five cello concertos, a set of orchestral pieces entitled *Fra Bøhmerwald*, chamber music for strings, works for cello and piano and many piano pieces. His manuscripts and letters are now in the Royal Library and Musikhistorisk Museum in Copenhagen.

JOHN CLAPHAM

Neruda, Alois (*b* Kostelec nad Labem, 20 June 1837; *d* Prague, 25 Jan 1899). Czech cellist. He was the son of the teacher and composer Josef Neruda (*b* Svémyslice, nr Čelákovice, 14 Nov 1804; *d* Vodolka, 8 April 1876) – not to be confused with the organist Josef Neruda (1807–75) – who after studying at Prague taught at Všetaty (1822–4), Kostelec nad Labem (1824–38) and Vodolka

(1838–73), and whose outstanding pupils were the opera singers Teresa Stolz and her sister Ludmila Ricci-Stolz; he was also one of the earliest composers of polkas. Alois studied from 1849 to 1855 at the Prague Conservatory, where he was a pupil of Goltermann, and afterwards played in the theatre orchestra at Temesvár (1855–8). Following military service, in 1866 he became principal cellist of the Provisional Theatre, Prague, and continued in a similar position at the National Theatre from its inauguration in 1881 until 1892. He became well known as a chamber music player, and took part in the first performances of several of Dvořák's works and Smetana's string quartet *From my Life*. After a brief period in Budapest, in 1892 he moved to Vienna, where he remained for six years and was active among the Czech community. He published a concise cello tutor (Prague, 1886) in collaboration with Josef Srb-Debrnov. His brother Josef was a choirmaster at Kostelec nad Labem, and his sister Marie was a singer.

JOHN CLAPHAM

Neruda, Johann Baptist Georg [Jan Křtitel Jiří] (*b* ?Rosice, *c*1711; *d* Dresden, 11 Oct 1776). Czech composer, active in Germany. He trained as a violinist and cellist, and was for several years a member of a theatre orchestra in Prague. In 1741 or 1742 he entered the service of Count Rutowski in Dresden, and by 1750 he was a violinist in the court orchestra. He remained in Dresden until his death.

Neruda is known to have composed at least 97 works, although many are now lost. In the 18th century copies of his works were disseminated throughout Bohemia, Germany and Sweden; the Breitkopf catalogue advertised 68 works between 1762 and 1771. His music shows clear signs of Italian influence, although in his use of dynamics he was evidently also influenced by the Mannheim School. The melodic style harks back to the Baroque principle of *Fortspinnung*, though this is modified by the use of regular phrase lengths. The textures are mostly homophonic, often with figured bass. The violin works make great demands on the performer.

Neruda was also active as a teacher; two of his sons, Ludwig (Ludvík) and Anton Friedrich (Antonín Bedřich), became accomplished violinists and were members of the Dresden court orchestra. According to Dlabač, Neruda was a brother of Jan Chryzostomus Neruda (*b* Rosice, 1 Dec 1705; *d* Prague, 2 Dec 1763), who after a short period as a violinist at a Prague theatre entered the Premonstratensian monastery of Strahov in 1726, becoming succentor in 1733 and cantor and choirmaster ten years later.

WORKS

thematic catalogue in Pilková (1990)

Vocal: Les troqueurs (op), lost; 2 sacred works
Orch: 36 syms., incl. 1, A, ed. in The Symphony 1720–1840, ser. C, x (New York, 1984); 10 vn concs.; Bn Conc.; Hn Conc., E♭, ed. M. Sommerhalder (Edinburgh, 1992)
Chbr: 33 trio sonatas, most for 2 vn, bc, 6 pubd (Leipzig, 1764); Sonata, a, vn, bc, ed. S. Gerlach and Z. Pilková, *Böhmische Violinsonaten*, i (Munich, 1982); dances

ZDEŇKA PILKOVÁ

Nerval, Gérard de [Labrunie, Gérard] (*b* Paris, 22 May 1808; *d* Paris, 26 Jan 1855). French poet, writer and occasional librettist and music critic. He was perhaps the most musically orientated of the Romantic circle. In writings that are halfway to autobiography, he describes the place of music in his childhood: the songs his father sang to him are connected with the tragedy of his mother's early death (*Promenades et souvenirs*), and when he lived with his uncle Antoine Boucher the house was 'full of melodious voices' (*Chansons et légendes du Valois*). His taste for Renaissance poetry (*Choix de poésies de Ronsard, Du Bellay, Baïf*, 1830) led him to conceive of a close link existing between music and poetry. His career as a journalist and theatrical critic also allowed him to attend performances of opera, especially when he fell in love with Jenny Colon, a singer at the Opéra-Comique. It was at this time that he began to work with Dumas; they had a unique arrangement where each alternately claimed authorship of a libretto written in collaboration. In this way their first opera, *Piquillo*, appeared over Dumas' signature although it was Nerval who prepared the text. Nerval also collaborated with the Marquis de St Georges on *La reine de Saba*. In all, Nerval produced ten librettos between 1835 and 1850, for Elie Elwart and Limnander as well as Monpou. Berlioz used Nerval's 1827 translation of Goethe's *Faust* in parts of *La damnation de Faust*, which led Nerval to express rare displeasure: 'Had he applied to me in 1846 I would have prepared verses which were more suitable to lyrical setting; however he preferred to solve the problem in the usual way, setting anything, something like the *Gazette de Hollande*, to music'.

Nerval's music criticism was also largely collaborative. He worked mostly with Théophile Gautier on *La presse* and it is possible that the articles signed 'G' were by Gérard rather than Gautier, particularly those on German music; he also contributed articles on music to *Le messager* and *L'artiste*. His music criticism is of value as he was one of the few Romantic writers on the subject who remained within the confines of music. He was perceptive in anticipating musical trends: ten years before Baudelaire's championship of *Tannhäuser* he gave a glowing review of *Lohengrin* at the Weimar Festival of 1850 and wrote a classic essay in music appreciation; he was the first to focus attention in France on Liszt's prowess as a composer at a time when the latter was world famous as a virtuoso pianist; and the first to introduce ballet as an integral part of the dramatic action, in *L'imagier de Harlem* (1851) with music by de Groot. In addition he was an innovator in making a serious attempt to collect the folksongs of France, particularly those of the Valois which he remembered from his childhood, in *Chansons et légendes du Valois*; these were published under various titles, *Vieilles ballades françaises, Vieilles légendes* etc., and in several newspapers between 1842 and 1852. Songs

were also integrated with their texts in *Sylvie*, in *Angélique*, and finally in the 'Mémorables' which conclude *Aurélia*. Prose and verse merge in a subtle harmony of a kind seldom achieved, while music gives a depth of rhythm to the text.

Nerval was unfortunate in the fruitlessness of his collaborations with the leading composers of the day. *La reine de Saba*, now lost, was supposed to have been set by Meyerbeer; Liszt was to write the music for *Les deux Faust*, which never materialized; and Berlioz was reluctant to acknowledge Nerval as the official librettist for *La damnation de Faust*. The only operas to survive more than one performance, *Piquillo* (Monpou, 1837) and *Les monténégrins* (Limnander, 1849), were failures.

A. RICHARD OLIVER/BÉATRICE DIDIER

Nervius, Leonardus [Musel, Corneille; Mussele, Corneille] (*b* at or nr Tournai, *c*1585; *d* before 1652). Flemish composer. On 25 October 1594 he went to Madrid, under his baptismal name, to become a choirboy in the Flemish chapel, where he studied with George de la Hèle. He left on 12 October 1600 and became a student at Douai. On 13 April 1604 he took his vows and entered the Capuchin monastery there; it was then that he took the name Leonardus Nervius. Catullius mentioned him alongside Pierre Maillart and Ghersem as one of the famous composers from Tournai. He is known to have published seven volumes of church music, but the five that have survived are all incomplete, thus making it difficult to evaluate his achievement.

WORKS

HENRI VANHULST

Nes, Jard van (*b* Zwolle, 15 June 1948). Dutch mezzo-soprano. She studied at the conservatory in The Hague with Herman Woltman (1973–8) and made her concert début in 1975 at the Holland Festival, where she later created the title role in Theo Loevendie's *Naima* (1985). She made her opera début at the Netherlands Opera as Bertarido (*Rodelinda*) in 1983, and her other operatic roles have included Magdalene (*Die Meistersinger*) and Brangäne (*Tristan und Isolde*). At her Salzburg Festival début in 1990 she sang the Third Lady in *Die Zauberflöte*, conducted by Solti, but her main career has been in concerts. Van Nes has appeared regularly with the Royal Concertgebouw Orchestra in works ranging from Bach to Mahler, whose second and third symphonies she has recorded with Haitink, and has performed regularly with other major orchestras in Europe and the USA. Her recordings include works by Bach and Handel, Brahms's Alto Rhapsody and music by Berio, but her grave, finely moulded singing is perhaps heard at its best in the works of Mahler.

ALAN BLYTH

Nesbet [Nesbett], **John** (*d* ?1488). English composer. He was a member of the Confraternity of Christ Church Cathedral Priory, Canterbury, and master of the Lady Chapel choir there, in succession to William Corbrand, from 1475 to 1488. In 1480 he received a payment from John Stone, the chronicler, 'for his labour doyng a masse for seint Richard'. His two known surviving compositions are a five-voice *Magnificat* in the Carver Manuscript (*GB-En*; also in the Eton Choirbook, but there incomplete, see MB, xii, 2/1973, pp.xiii, 63) and a three-voice *Benedicamus Domino* in *GB-Cmc* Pepys 1236 (ed. in CMM, xl, 1967, p.160).

PAUL DOE

Nesenus, Johann (*b* Bergen; *d* Göttingen, 1604). Norwegian composer, active in Germany. Like CASPAR ECCHIENUS, he is one of the earliest Norwegian composers known by name. When he published a piece called *Gott der Herr sprach* (Helmstedt, 1594; inc.) he was described on the title-page as 'artium studiosus' from Bergen, Norway. He became a Kantor at Celle in 1597 and at Göttingen in 1598. He died of wounds received from a sword in the hands of a furious colleague. He published a collection of ten secular songs (eight four-part villanellas, one 'Baurliedlein' for five voices and another for eight) under the title *Liebgärtlein* (Mühlhausen, 1598; inc.). None of Nesenus's music seems to have survived World War II intact, but the villanella 'Ach, woher kumpt mein Hertzen', no.5 of the *Liebgärtlein*, has been published by O. Gaukstad (Oslo University Library: Norsk Musikksamlung Publikasjon, vii, 1971) from an earlier copy made by Teschner in the Deutsche Staatsbibliothek.

JOHN BERGSAGEL

Neser, Johann (*b* Windsbach, nr Ansbach, *c*1560; *d* Heilsbronn, nr Ansbach, 29 March 1602). German composer. At the age of nine he went to Ansbach to become a chorister at the court of Margrave Georg Friedrich of Brandenburg; until 1572 he was taught music there by the Kapellmeister, Jacob Meiland. The margrave later gave him a scholarship to study at the University of Wittenberg, which he did from 1576 to 1582. He then became Kantor at the Fürstenschule, Heilsbronn, and it was as a result of his work in this post that he wrote his most important work, *Hymni sacri* (Wittenberg, 1600), which comprises 30 four- and five-part Latin hymns

notated in open score and written mainly in a syllabic style using speech-rhythms (one four-part hymn is in *Handbuch der deutschen evangelischen Kirchenmusik*, iii/2, Göttingen, 1935, p.148). The great popularity of this collection in the Lutheran grammar schools of southern and central Germany opened the way to further, enlarged editions: 2/1619 (32 compositions), 3/1620 (32 Latin compositions and 14 German, including three by Erhard Bodenschatz, six by Mauritius Cnod and two by Johannes Eccard) and 4/1681. In addition Neser wrote an eight-part epithalamium (in 1581) and *Cantiones quatuor* for five, six and eight voices (Wittenberg, 1596), in which the influence of Lassus, Meiland and Lechner can be traced; a five-part motet survives in manuscript in the Dekanatsarchiv at Hof (ed. in H. Kätzel: *Musikpflege und Musikerziehung im Reformationsjahrhundert, dargestellt am Beispiel der Stadt Hof*, Göttingen, 1957)

FRANZ KRAUTWURST

Neseritis, Andreas. *See* NEZERITIS, ANDREAS.

Nešić, Vojna (*b* Sarajevo, 6 Oct 1947). Serbian composer. She studied composition with Josif at the Belgrade Academy of Music and later with Komadina in Sarajevo. In 1977 she was appointed to teach at the music school in Kragujevac, and in 1993 she joined the arts faculty of the University of Priština. She has composed for a variety of forces, including solo flute, brass band and children's chorus. Her music is strongly polyphonic and freely atonal. In several works she has experimented with 12-note serialism and aleatory techniques.

WORKS
(*selective list*)

Ouverture solennel, brass, 1979; Sonnets, fl, 1985; Deca sa glasovima cvrčaka [Children with Voices of Crickets], spkr, S, children's chorus, chorus, fl, tpt, perc, str, 1986; Alkar, sym. poem, orch, 1988; Rondo in modo barbaresco, cl, pf, 1988; Dyptych, str qt, 1989; Impressions, brass, 1989; Blue Bird, spkr, Mez, chorus, pf, 1995; Fl Sonata, 1995; Liturgy of Presanctified Gifts, chorus, 1996

MELITA MILIN

Nessi, Giuseppe (*b* Bergamo, 25 Sept 1887; *d* Milan, 16 Dec 1961). Italian tenor. He studied at the Istituto Musicale G. Donizetti, Bergamo, and made his début at Saluzzo in 1910 as Alfredo. After a short career as a lyric tenor he began to specialize in character roles and became the leading Italian comprimario of his time. From 1921 to 1959 he sang regularly at La Scala, where he created Pong in *Turandot*, Gobrias in Boito's *Nerone*, Dona Pasqua Polegana in *Il campiello* and roles in operas by Pizzetti and Malipiero among others. Two of his most notable parts were Bardolph in *Falstaff*, which he sang at Salzburg (1935–9), and Malatestino in *Francesca da Rimini*. He appeared frequently at Covent Garden (1927–37) and was the first London Pong and the first Covent Garden Trabuco (*La forza del destino*) in 1931. He appeared in most leading Italian opera houses and his repertory included Goro, Spoletta, Missail (*Boris Godunov*) and Vašek. He was a master of make-up and a gifted comic actor. He sang several of his comprimario roles in recordings associated with La Scala. His last appearance was as Pinellino (*Gianni Schicchi*) at La Scala in 1959.

HAROLD ROSENTHAL/R

Nessler, Viktor E(rnst) (*b* Baldenheim bei Schlettstadt, Alsace, 28 Jan 1841; *d* Strasbourg, 28 May 1890). Alsatian composer. The son of a Protestant pastor, he studied theology in Strasbourg. His musical inclinations displeased his university teachers, however, and they expelled him. After the staging of his first opera, *Fleurette*, in Strasbourg (1864), he began musical studies with Maurice Hauptmann in Leipzig, which led to a lifelong connection with that city. He directed male-voice choirs (for which he wrote 'volkstümlich' partsongs) before becoming chorus master at the Leipzig Stadttheater; he was later conductor at the Carola Theater and then director of the Leipzig choral society. Nessler was known for his fairy tale operas inspired by the sentimental poetic romances of J.V. von Scheffel and his imitator Julius Wolff, widely read in mid-19th-century Germany. The particularly successful *Der Rattenfänger von Hameln* (1879), derived from Wolff, was soon performed in English translation in Manchester and London in 1882 and 1884 respectively. The popularity of Nessler's conservative style, relying on a succession of simple melodies and some recurring motivic material, waned in his lifetime (critics were to scorn his librettos as fake-Gothic or 'Butzenscheibenromantik'). He nevertheless enjoyed the influential support of the Austrian impresario Angelo Neumann, who encouraged Nessler to devote himself to composition. *Der Trompeter von Säkkingen* (1884), after Scheffel, achieved startling success in over 900 performances in north Germany; it was translated into five languages and inspired Arthur Nikisch to compose an orchestral fantasy on its themes.

WORKS
(*selective*)

STAGE

Fleurette (komische Oper, 2, E. Feberel), Strasbourg, Municipal, 15 March 1864
Dornröschens Brautfahrt (romantische Oper, 3, R. Bunge), Leipzig, Privat-Theater Thalia, 13 March 1867
Die Hochzeitsreise (Operette), Leipzig, March 1867
Am Alexandertag (komische Oper, 1, L. Julius), Leipzig, Stadt, 17 Dec 1869
Nachtwächter und Student (Operette, 1, E. Engelhand, after T. Körner), Leipzig, Stadt, 10 June 1871
Irmingard (grosse Oper, 5, Bunge), Leipzig, 19 April 1876
Der Rattenfänger von Hameln (grosse Oper, 5, F. Hofmann, after J. Wolff), Leipzig, 19 March 1879
Der wilde Jäger (romantische Oper, 4, Hofmann, after Wolff), Leipzig, 11 Dec 1881
Der Trompeter von Säkkingen (prol., 3, Bunge, after J.V. von Scheffel), Leipzig, 4 May 1884
Otto der Schütz (romantische Oper, Bunge, after G. Kinkel), Leipzig, 15 Nov 1886
Die Rose von Strassburg (4, F. Ehrenburg), Munich, Hof, 2 May 1890

PETER FRANKLIN

Nesterenko, Yevgeny (Yevgen'yevich) (*b* Moscow, 8 Jan 1938). Russian bass. He studied in Leningrad, making his début at the Maliy Theatre in 1962 as Gremin. He sang there and at the Kirov until 1971, when he joined the Bol'shoy; his roles include Dosifey, Khan Konchak, Ruslan, Kutuzov, Salieri and Boris, in which role he made

his débuts with the Bol'shoy at La Scala (1973), the Vienna Staatsoper (1974) and the Metropolitan (1975). He made his Covent Garden début in 1978 as Don Basilio, later singing Ivan Khovansky (1982) and Méphistophélès (1983). At La Scala his roles included Massimiliano (*I masnadieri*), Rossini's Mosè, Colline, the Grand Inquisitor and Philip II, which he also sang at Munich, San Francisco, Savonlinna and Orange (1990). He sang Zaccaria (*Nabucco*) and Attila at Barcelona (1984) and Bartók's Bluebeard at Budapest (1988), a role he recorded successfully. On the concert platform he is noted for his interpretations of Musorgsky and Shostakovich, and has made much-admired recordings of the latter's Fourteenth Symphony and Suite (op.145) on poems of Michelangelo. His voice has a typically Russian timbre, full and resonant, and he is a powerful actor. Nesterenko has written a book, *Razmïshleniya o professii* ('Thoughts on my Profession', Moscow, 1985), and has been involved in a complete edition of Musorgsky's works. He taught at the Moscow Conservatory, 1975–93, and in 1993 was appointed to the Vienna Conservatory.

ALAN BLYTH

Nestorian rite, music of the. *See* SYRIAN CHURCH MUSIC.

Nestroy, Johann Nepomuk (Eduard Ambrosius) (*b* Vienna, 7 Dec 1801; *d* Graz, 25 May 1862). Austrian playwright, actor, director and singer. He studied law at the University of Vienna (1817–22), but left without a degree in order to devote himself to singing. At the age of 17 he had sung solo bass in a public performance of Handel's *Alexander's Feast*, and on 24 August 1822 he made his début as Sarastro at the Court Opera (Kärntnertortheater). He was a member of the company until August 1823, singing ten roles in works by Paer, Rossini, Grétry, Gyrowetz and others, including Don Fernando in *Fidelio*. He then joined the German Theatre at Amsterdam, where in two years he built up his repertory to include Kaspar and Ottokar in *Der Freischütz*, Publius (and later Annius) in *La clemenza di Tito*, Masetto (and later Don Giovanni), Papageno, Pizarro, Adam in Schenk's *Der Dorfbarbier*, and numerous Rossini roles. Towards the end of his Dutch engagement comic character parts begin to figure prominently, a tendency increasingly marked during his *Wanderjahre* (1825–31) as actor and singer at Brno, Graz, Pressburg (Bratislava), Klagenfurt, Vienna and Lemberg (L'viv). He joined Karl Carl's Theater an der Wien in the autumn of 1831, by when he had played 450 different parts. Although he occasionally sang Adam until near the end of his life, and throughout his career nearly all his roles included songs, he had discovered his métier as a comic actor well before he resettled in Vienna; and he had also tried his hand as dramatist.

Nestroy was the last and greatest figure in the long line of Viennese popular actor-dramatists; his repertory included both traditional personae from the mid- and late 18th century (Kasperl, and Singspiel comic basses) and Offenbach roles when, late in his career, he helped introduce the Parisian operetta to Vienna. His most characteristic parts, however, are those he wrote for himself in his own plays, over 80 in all (in his whole career he played no fewer than 880 different parts). He was a brilliant satirist, and among his most successful stage works are parodies of Isouard's *Cendrillon* and Rossini's *Cenerentola* (*Nagerl und Handschuh*, 1832, music by Adolf Müller), Meyerbeer's *Robert le diable* (*Robert der Teuxel*, 1833, music by Müller), and *Tannhäuser* (1857, music by Karl Binder); the *Lohengrin* parody (1859, music by Binder) was only moderately successful, and the parodies of *Zampa* (1832) and *Martha* (1848) were failures. During most of his career Nestroy recalled his youthful operatic experiences, incorporating witty allusions and quotations in his quodlibets and often referring in more or less disparaging terms to the world of opera.

Music played a very important part in Nestroy's plays. Until *Das Mädl aus der Vorstadt* of 1841, his 43rd play, the average number of songs, ensembles and choruses is ten or 11, plus instrumental numbers. His next, *Posse*, *Einen Jux will er sich machen* of less than four months later, has a mere three songs, all intended for Nestroy himself. With the exception of the later operatic parodies and his very last stage work, *Häuptling Abendwind* (1862; an adaptation of *Vent du soir*, given with Offenbach's original music), he limited the use of song in his plays almost entirely to his own roles, eliminating choruses and ensemble finales. The reason is not clear – neither professional jealousy nor economic considerations were responsible, and it is probably most likely that the change was due to a desire to restrict vocal music to the critical, equivocal *couplets* that he wrote for his own roles.

Adolf Müller wrote the music for 41 of Nestroy's plays between 1832 and 1847, including *Lumpacivagabundus* (1833), *Der Talisman* (1840), *Das Mädl aus der Vorstadt* (1841), *Einen Jux will er sich machen* (1842) and *Der Zerrissene* (1844). Michael Hebenstreit wrote the music for ten Nestroy plays from 1843 to 1850, including *Die schlimmen Buben in der Schule* (1847) and *Freiheit in Krähwinkel* (1848); Carl Binder for seven (1851–9); C.F. Stenzel for three; Franz Roser for two; A. Scutta and A.M. Storch for one each. Authorship of some of the lost scores is disputed. For performance outside Austria new scores were sometimes provided, e.g. by Lortzing for *Der Zerrissene*, and songs for *Lumpacivagabundus* and *Einen Jux will er sich machen*. 20th-century operatic adaptations of Nestroy's plays include Sutermeister's *Titus Feuerfuchs* (1958, based on *Der Talisman*) and von Einem's *Der Zerrissene* (1964). The new historical-critical edition contains reductions of the original music of all the plays, including Binder's music for the *Tannhäuser* parody.

PETER BRANSCOMBE

Nest'yev, Izrail' Vladimirovich (*b* Kerch', Crimea, 4/17 April 1911; *d* Moscow, 19 April 1993). Russian musicologist. He graduated from the faculty of theory at the Moscow Conservatory (1937) and completed his postgraduate studies there under V.Ye. Ferman (1940). He defended his *kandidat* dissertation on Prokofiev in 1945 and was awarded the degree in the following year. After serving in World War II (1941–5) and acting as a correspondent for a Soviet army newspaper, he was the chief editor of music broadcasting for the All-Union Radio (1945–8) and then worked in the editorial office of the journal *Sovetskaya muzïka* (1949–59), from 1954 as deputy editor. From 1956 he was associate professor, later professor (from 1974), at the department of foreign music at the Moscow Conservatory. He became a senior research fellow in 1960 at the Institute of Art History (now the State Institute of Artistic Studies of the Ministry of Culture of the Russian Federation), where from 1974 to 1991 he was head of the department for the history of the music of the peoples of the USSR. He was elected a member of the Russian Composers' Union in 1940.

Nest'yev had a broad range of scholarly musical interests, including music both Classical and contemporary, and wrote many monographs, articles and essays on prominent Russian and western European composers. He became a foremost authority on Prokofiev following the publication of his first book on Prokofiev (1946) and later the more detailed biography (1973), which is one of the most well-documented studies of the composer. He also made a special study of Bartók, gaining the doctorate in 1970 for a dissertation on his life and work, and continued his interest in the musical culture of eastern Europe with studies of Janácek, Eisler, and the collaboration of Brecht and Weil. He was in addition the author of the first study in Russian musicology of Puccini (1963), and his book on Dyagilev and the music theatre (1994) marked a renewal of interest by Russian musicologists in the history of their musical culture. Another distinguishing area of interest was the music of everyday life in Russia during the 1920s and variety performers. His monograph *Zvyozdï russkoy ėstradï* ('The Stars of Russian Variety Art', 1970) was the first to provide portraits of such artists of the pre-revolutionary period. Like the work of many Russian musicologists, Nest'yev's research, particularly his evaluation of contemporary music, was restricted by the ideological dogmas within the cultural policy of the Soviet government. His work, however, remains valuable for its lively feeling and enthusiasm for music, its professionalism and for its solid foundation in documentary evidence.

YURY KELDÏSH/NELLI GRIGOR'YEVNA SHAKHNAZAROVA

Nest'yeva, Marina Izrailevna (*b* Moscow, 17 Jan 1938). Russian musicologist and critic. She studied music history and theory at the Moscow Conservatory with Mazel', graduating in 1962, and was awarded the *Kandidat*

degree in 1988 from the Moscow Institute of Culture. She joined the editorial staff of the journal *Sovetskaya muzïka* in 1968, later becoming head of the music theatre section, and is also music critic of a number of newspapers, including the *Mariinskiy teatr* (from 1993). She became a member of the Union of Composers in 1968 and the Union of Theatre Workers in 1990. Nest′yeva's area of interest is Russian contemporary music and she has written on composers such as Tishchenko, Sil′vestrov, Pärt and Chalayev. The main focus of her work, however, is music theatre and in her dissertation for the *Kandidat* degree she examined new aspects of the synthesis of music and theatre in Soviet opera. In her numerous articles on operatic works she has considered a variety of components of this synthesis that range from the artistic composition of a production to the characteristics of individual performers.

NELLI GRIGOR′YEVNA SHAKHNAZAROVA

Nešvera, Josef (*b* Praskolesy, nr Hořovice, 24 Oct 1842; *d* Olomouc, 12 April 1914). Czech composer and conductor. He received his first instruction in music from his father, a village teacher and organist. While attending secondary school and teacher-training college in Prague, he studied the piano, organ and theory with Josef Krejčí, Josef Foerster and František Blažek. After a short career as a village teacher he devoted himself to music. In 1868 he became director of church music in Beroun, and ten years later he was appointed to a similar position at the cathedral in Hradec Králové. In 1884 he succeeded Pavel Křížkovský as music director at the cathedral in Olomouc, a post he held until his death; he was also active in the town's musical life as a teacher, conductor and critic.

Nešvera was a prolific composer, particularly of church music. In the 1860s and 70s he was in touch with the most important figures in Czech musical life (Smetana was his close friend), and his music from this period shows many features of the new style, especially those relating to the principles of Czech verbal accentuation. Later, through the influence of ecclesiastics who had made him known in Vienna (he taught some of the Habsburg family), he turned largely to strict Cecilianism in his church music. This separated him from modern trends in Czech music, but he nevertheless retained some characteristics of the national style. His mass and requiem settings, and especially the *České pašije* ('Czech Passion') op.17, became very popular and survived until recently in Bohemian Catholic services. His *De profundis* op.49, composed in 1889, shows the influences of Handel's and Dvořák's oratorio styles; it was performed and published in England.

Of Nešvera's secular works, the chorus *Moravě* ('To Moravia') is still popular and became a signature tune of the Moravian Teachers' Choir; it has also been used as an unofficial national anthem, especially during the Nazi occupation, when the real Czech national anthem was prohibited. Some of his other choral works are still in the repertory as well, and among his songs the *Starosvětské písničky* ('Old-world Ditties') are perhaps the most important. He was less successful as a composer for the theatre as his operas lack true drama; for instance, *Černokněžník* ('The Magician'), is merely a set of sentimental folk sketches. As a composer of instrumental music Nešvera was a miniaturist in the vein of Schumann. His piano music was much used for teaching purposes, and the *Ukolébavka* ('Lullaby') for violin and piano became well known internationally through performances by Ondříček, Kocián and Kubelík.

WORKS
(selective list)

printed works published in Prague unless otherwise stated

OPERAS

Bratránek [The Little Cousin] (1, A. Koukal), 1882
Perdita (3, J. Kvapil, after W. Shakespeare: *The Winter's Tale*), 1892, Prague, National, 21 May 1897; Směs [potpourri], arr. pf (n.d.)
Lesní vzduch [The Forest Breeze] (1, Nešvera), 1896, Brno, 23 Jan 1897; ov., arr. pf 4 hands (n.d.) [later rev. in 3 acts]
Černokněžník [The Magician] (3, B. Kazničov [pseud. of B. Remeš]), 1903–5, Brno, 7 Feb 1906 [later entitled Radhošť]
Meerweib (Ger. op, S. Pohl), 1908–10

SACRED VOCAL

České pašije [Czech Passion] (Bible), solo vv, chorus, org, op.17, 1882 (1882)
De profundis (Ps cxxix), orat, solo vv, chorus, orch, op.49, 1889 (London, 1890)
Job (Bible), orat, op.113, 1912
*c*25 masses for chorus, org, incl. Missa in honorem Beatae Mariae Virginis, op.16, Missa Sancti Procopii, op.18, Missa Spiritus Sancti, op.19, Missa Sancti Friderici, op.60 (Augsburg, n.d.), Missa Sancti Eugenii, op.74 (Vienna, n.d.), Missa Sancti Leonis, op.94 (Olomouc, n.d.); requiem masses, opp.13 and 38

OTHER VOCAL

Cants. for solo vv, chorus, orch, incl. První májová noc [The First May Night], op.50 (1901)
Unacc. choral works, incl. Zpěvem k tanci [Songs for Dancing], female vv (1890); Moravě [To Moravia], male vv (Brno, 1920)
Songs, incl. Starosvětské písničky [Old-world Ditties] (J.V. Sládek), i–iii (1891–5)

INSTRUMENTAL

Orch: Serenade, str (1891); Sym., g; Vn Conc., D
Chbr: Andante and scherzino, str qt, 1896; 2 str qts, D, G; Pf Trio, E♭, op.91; Suite, vn, pf, op.53 (1890); Ukolébavka [Lullaby], vn, pf; Nocturne, vc, pf, op.29 (1891)
Kbd: Oříšky, pf cycle, op.45 (1888); Plumlovské motivy [Plumlov motifs], op.52 (1890); 12 studies, pf (1891); org works

MIROSLAV K. ČERNÝ

Netherlands. *See under* LOW COUNTRIES.

Netherlands Antilles and Aruba. This region (formerly known as the Dutch West Indies) consists of six islands in the Caribbean Sea: Aruba; Bonaire and Curaçao (known as the Netherlands Leeward Islands); and Saba, St Eustatius and the southern half of St Maarten (the Netherlands Windward Islands). Aruba and those in the Leeward group are situated off the coast of Venezuela, while those in the Windward group are located to the south-east of Puerto Rico, forming part of the chain of islands known as the Lesser Antilles. The total area of the Netherlands Antilles and Aruba is 993 sq. km. The largest island, Curaçao, is 444 sq. km; the smallest, Saba, is 13 sq. km. The combined population is approximately 298,000 which breaks down as follows: Curaçao, 151,000; Aruba, 91,000; St Maarten (Dutch half), 39,000; Bonaire, 14,000; St Eustatius, 1,900; and Saba, 1,000.

Differing histories have left the six islands with diverse populations and varied cultural configurations. All of the islands were originally visited or inhabited by Arawak or Carib Indians. The southern islands of Aruba, Bonaire and Curaçao, after an initial period of Spanish rule, came under Dutch control in 1634; to the north, St Maarten, St Eustatius and Saba were seized by the Dutch during the same decade. Some islands in both the Leeward and Windward groups were captured by Britain or France a number of times before finally being returned to the Netherlands (the northern half of St Maarten, known as St Martin, remains an Overseas Department of France). The extent to which plantation economies and slavery came to dominate varied greatly from one island to the next. Such historical variations help to explain present-day ethnic, religious and linguistic differences. For instance, on Curaçao a majority of people are of African descent, whereas on Aruba a much larger proportion are of Amerindian descent, and on Saba nearly half are primarily of European descent. Curaçao was until recently primarily Roman Catholic, with a small but historically important Jewish minority; in contrast, St Eustatius and St Maarten have long been largely Protestant. While the inhabitants of the Leeward islands speak Papiamentu (a unique creole language with a vocabulary derived primarily from Portuguese, Spanish and Dutch), as well as Dutch (the official language), those of the Windward islands for the most part speak English as their native language.

These six islands remained a colony of the Netherlands until 1954, when they became an integral part of the Kingdom of the Netherlands, known collectively as the Netherlands Antilles. In 1986 Aruba seceded from the Netherlands Antilles and became an autonomous partner in the Kingdom of the Netherlands.

1. Aruba and Leeward islands. 2. Windward islands.

1. ARUBA AND LEEWARD ISLANDS. Aruba, Bonaire and Curaçao possess musical cultures that overlap to a considerable extent, although each island displays distinctive musical characteristics. All three share a neo-African, drum-centred tradition known as *tambu* (in Bonaire often referred to as *bari*), a quintessential Netherlands Antilles folk music, particularly on Curaçao, where it has come to serve as an important symbol of Curaçaoan identity and of the African past. In older versions of this tradition, a single drum made from a hollowed log (*tambu*) or wooden barrel (*bari*) is accompanied by a percussion instrument known as *chapi* or *agan* (also known as *gan* or *heroe*), a piece of metal (such as a section of an old plough or the head of a hoe) beaten with an iron rod. Sometimes a scraper or rasp (*wiri*) made from a gourd, cow-horn or serrated metal tube is also included; in the related *bari* tradition of Bonaire, various other instruments, such as guitar and *cuatro* (four-string guitar), are often added to the drum and percussion ensemble. While a lead singer alternates with a repeating chorus, the *tambu* and *wiri* keep up a complex rhythmic interplay. Lyrics are often improvised, and tend to centre on social commentary. Although for many years the African-based *tambu* tradition was suppressed by the Dutch colonial government, it survived by going underground and now enjoys renewed popularity.

Various other genres feature combinations of instruments that are unique to the Netherlands Antilles. The *muziek di zumbi* ('spirit music') of Curaçao, which dates back at least to the 19th century, brought together the *benta* (mouth bow), *tambu grandi* (large version of the *tambu* drum), *triano* (triangle), *chapi* (metallic percussion instrument) and *wiri* (scraper). The *benta* (also known as *janchicobaden*), which has both African and Amerindian antecedents, is made from a branch of the karawara tree, bent and held under tension by a coconut fibre attached to both ends. The player places his mouth at one end and strikes the string with a small stick or spoon handle, simultaneously stopping the string with the back of a knife; by modifying the shape of the oral cavity he is able to further vary the tones. By the early 20th century, the *benta* was often replaced by a flute.

The *simadan* or *seu* (harvest festival) of Curaçao is the setting in which the *cachu* (or *cachu di supla*), an African-derived instrument made from the horn of a cow, is played. The player blows through a hole bored in the side, a few centimetres from the tip; the tip itself is cut off, creating an opening that is alternately covered and opened with the thumb to change pitch. *Cachu* is played both individually and in ensembles, sometimes along with percussion and call-and-response singing. The *simadan* festivals of Bonaire also feature an African-derived aerophone, the *becu*, made from a stalk of the sorghum plant. The player blows through a reed cut out of the body, both exhaling and inhaling, while changing pitch by alternately closing the two fingerholes. Yet another aerophone is the *carco* (on Bonaire, sometimes called *kinkon*), a large conch shell that is blown at harvest festivals. The *carco* is also used to announce certain holidays and to send signals by imitating speech patterns. Bonaire also has a smaller version known as *cocolishi* or *kiwa*.

An abundance of other distinctive instruments can be found on Aruba and the Leeward islands in various

contexts. One of the most interesting is the *bastel* (*bestel*), a type of water drum consisting of a large calabash bowl turned upside down in a tub of water. When struck with two sticks, the instrument is called *seu*; when played with both hands, it is called *bastel*. Virtually identical water drums exist in several parts of Africa. Instruments of Curaçao include the *matrimonial* or *wacharaca* (a percussion instrument made from a thin wooden board to which several small, cymbal-like metal discs are nailed), the *cuchara* (a pair of spoons played as a percussion instrument) and the *kai* (a hand-cranked mechanical piano imported from Venezuela, also known as *kaha di musika*, *doshi di alegria* or *tingilingibox*). The *fio*, a type of folk fiddle, is found in Aruba, while the *bamba*, a stamping tube made of bamboo, is exclusive to Bonaire and is played in pairs of varying length.

A variety of distinctive song traditions exist in Aruba and the Leeward islands. Song genres associated with harvest festivals include *seu*, *simadan* and *wapa*, the latter performed as part of a line dance. Work songs are also found on all the islands. These include digging songs, house-building songs, rowing songs, road-building songs, harvest songs, unloading songs and axe songs. Unique to Aruba is a song genre known as *dande*, a kind of serenading tradition practised during New Year, when groups of singers and backing musicians (on fiddle, guitar and other instruments) go from house to house to perform. Another interesting vocal practice is *tambu di boca* ('mouth drumming'), in which performers vocally simulate the interlocking rhythmic parts that normally make up a *tambu* ensemble (*tambu*, *wiri* and/or *chapi*).

During the 19th century Aruba and the Leeward islands were strongly influenced by the music of both neighbouring Venezuela and Colombia (especially the song and dance forms *joropo* and *pasillo*) and the Spanish Caribbean (*danza* and *merengue*), and soon instruments such as guitar, mandolin and *cuarta* (a local version of the Venezuelan *cuatro*) were regularly featured in local dance ensembles. Because of the popularity of Cuban dance music, the *marimbula* (bass lamellophone) was also introduced. Also important during the 19th century were the various salon or ballroom dances imported from Europe and the United States (such as quadrille, mazurka, schottische, polka, lancers dance and Virginia reel). Both 'purer' and more creolized versions of these have long formed part of the repertories of dance bands on the Leeward islands. As in many other parts of the Caribbean, these salon dances, originally associated with the higher social strata, began to absorb elements from various local folk genres; at the same time, they also influenced the latter.

These cross-influences led to various new mixed genres. One of the most popular of these, known as *tumba*, grew partly out of the older *tambu* tradition, to which new instruments such as strings and horns were added, along with musical elements from a number of other Latin American and Caribbean dance styles. By the 1950s, *tumba* was being played by larger orchestras and was also being employed as a compositional form by local composers, some of whom were trained in European art music. Under the influence of other Caribbean musics, it had also branched out into a variety of sub-styles including *tumba guaracha*, *tumba pregona*, *tumba cumbia*, *tumba calypso* and *tumba di carnaval*. Since the 1950s, *tumba* has been the local popular music *par excellence* of Curaçao, Aruba and Bonaire. Some of the creolized European dance music genres that evolved in the islands during the 19th century also retain a strong association with local identity, similarly straddling the vernacular musical traditions of rural areas and the salon music of urban elites. The most important of these is the Antillean waltz (also known as the Curaçaoan waltz), distinguished from its European relatives chiefly by its differently accented rhythmic patterns.

European church and art music also have a long history in the Netherlands Antilles, particularly on Curaçao, where schooled composers have produced a number of works that draw inspiration from both the European art music tradition and the local folk heritage.

2. Windward islands. Virtually no ethnomusicological research has been carried out on the islands of St Eustatius and Saba. Little is known of older forms of music that might have once been peculiar to St Eustatius; present-day music making on this island is limited almost entirely to popular genres imported from elsewhere in the region, such as steel band music and the *soca* and *zouk* styles of the eastern Caribbean. Saba, on the other hand, has more clearly retained certain elements of an older local musical culture. Dance music has traditionally played an important role in neighbourhood festivities, picnics and other social gatherings on Saba; until fairly recently, dances were held regularly by invitation in private homes ('home parties'), with the location rotating from week to week. Older orchestras generally featured an accordion (locally called 'music box'), one or more drums and a triangle. Drums were usually made from kegs or barrels, over which a single sheepskin or goatskin head was secured and tightened by means of wooden hoops, rope and pegs. Sometimes these were supplemented with an assortment of other percussion instruments, such as maracas, *wera* or *wero* (metal scrapers similar to the *wiri* of the Leeward islands), tambourines, and hoe handles struck with a stick. This older dance music was also sometimes enhanced by additional percussive techniques, such as tapping on tables and chairs, and rapping of knuckles against house partitions. More recently, fiddle, harmonica or guitar could sometimes be heard alongside the accordion. One of the most popular of the older dances was the local version of the quadrille (typically consisting of either eight or 16 sets). Other dances that came into favour over time included *merengue*, waltzes, 'rhumba' (based on the Cuban *son*) and bolero. The accordion and percussion ensembles that played these genres were gradually supplanted by newer string bands modelled on those found on St Maarten and other islands in the Lesser Antilles. Despite changes in instrumentation, however, some of the older styles continue to be played.

St Maarten also retains a distinctive musical culture (shared to some extent with the French side of the island), though little formal research has been conducted there. Rapid development and the growth of the tourist industry during the second half of the 20th century has helped make St Maarten a major commercial centre and a crossroads for popular musicians from across the Caribbean, many of whom arrive looking for work in hotels and clubs. As a result, the island has become the site of a diverse and unusually cosmopolitan musical scene, influenced by a variety of imported popular genres; at the same time, this recent influx of foreign popular musics

has served to eclipse the original folk music of the island, and most of the older styles are rarely performed today.

The indigenous music and dance genre considered most typical of St Maarten is the *ponum* dance (sometimes spelt *ponnum* or *pannum*), which has been characterized by some as the 'national dance'. Thought to have originated among the island's slave population during the early 19th century, this dance is said to have been performed to celebrate emancipation in 1848. The *ponum* dance remained the principal social dance music in rural areas into the early 20th century, when it began to be replaced by string band music. The central instrument was the *pump* drum, a membranophone with a goatskin head. *Pump* drums varied in length from 20 cm to 1 m or more and were played with both hands. Two or more *pump* drums could be played simultaneously, and sometimes the drums were accompanied by other instruments such as a locally made tambourine, various metallic percussion instruments, and, more recently, fiddle, fife and triangle. By the late 19th century, such ensembles included in their repertories a number of European-derived dance musics, such as quadrille, polka, Scottish reel and maypole music, as well as highly creolized local versions of these known under other names such as the 'wash dance' or the 'saltpicking dance'. *Ponum* dances were also the occasion for the performance of a genre of songs known as *brim* songs.

A related musical genre is the song form known as *quimbe*. These songs were apparently once associated with *ponum* dances and were sometimes accompanied by drumming, but are now usually performed unaccompanied. They belong to a larger Caribbean tradition of topical songs and sung social criticism that includes genres such as calypso. *Quimbe* songs may be composed on the spot and often deal with local gossip and current affairs. In the past, they were sometimes performed in the context of 'contests' in which singers would try to outdo one another with impromptu compositions. Clever and rapid rhyming was an important part of the tradition.

Work songs, performed in call-and-response style, also once formed a part of daily life. These included planting songs, house-building songs, house-moving songs and arrowroot-pounding songs, most often performed as part of the local cooperative labour tradition known as 'jollification'.

Inter-island migration began to have a major impact on the music of St Maarten during the first few decades of the 20th century. Many St Maarten residents migrated as labourers to the Dominican Republic, where some settled in the British West Indies enclave at San Pedro de Macorís. A number of these returned to St Maarten in the late 1920s and introduced new instruments such as guitar, accordion, *marimba* (bass lamellophone, of Cuban origin) and *tambora* (double-headed drum of Dominican origin), as well as a new style based on Dominican and Cuban genres such as *merengue*, bolero and *guaracha*. Other migrants returned from periods of staying on Curaçao, Aruba, Anguilla, St Kitts and various other islands, and, along with visiting musicians from these islands, injected other new elements and instruments into the mix, such as mandolin, concertina, flute, *tres* (a guitar with three sets of doubled strings, known as *trey* in St Maarten), *bahoe* (a bass aerophone made of bamboo or metal pipe) and *wiri* (a serrated metal or gourd rasp also played on Curaçao, Aruba and other islands, known as *wiro* on St Maarten). This cosmopolitan mix of instruments and styles fused with elements from the indigenous *ponum* and *quimbe* traditions, forming the basis of St Maarten's unique string band tradition. At a variety of festive events known as 'casa dances', 'house concerts', 'bullfight dances' and 'two-sou dances', these new string bands forged a pan-Caribbean sound, playing local versions of genres such as *merengue*, mazurka, bolero, calypso, polka, waltzes and *tumba*. This local string band tradition remains fairly vigorous on both the Dutch and French sides of the island.

KENNETH BILBY

Netherlands Vocal Ensemble. Dutch ensemble founded by MARINUS VOORBERG.

Netherlands Wind Ensemble. Dutch ensemble. It was formed in 1959 by Amsterdam Conservatory pupils under the direction of Thom de Klerk, first bassoonist of the Concertgebouw Orchestra. After his death in 1966 it took the form of a foundation consisting of a classical wind octet (two oboes, two clarinets, two bassoons, two horns), expanding as repertory required to an ensemble of between 20 and 30 musicians under the conductor Edo de Waart. From 1971 they engaged conductors only when performing works for a large complement. In 1988 the original players were replaced by younger wind players from the main Dutch symphony orchestras who represent a new generation of Dutch wind playing. During the 1960s and 70s the ensemble became popular with a large and young audience for its revolutionary approach to concerts, and often made use of theatrical elements. Unconventional programming, combining old and new music in an adventurous way, has become a characteristic of its concerts in the Concertgebouw and, more recent in the 'rock temple' Paradiso in Amsterdam.

Since 1972 the Netherlands Wind Ensemble has given a spectacular annual New Year concert in the Amsterdam Concertgebouw, which has been televised since 1995. Over the years the ensemble has toured throughout the world. Its repertory ranges from Mozart to 20th-century music, and includes many specially commissioned works by Dutch composers.

TRUUS DE LEUR

Netti, Giovanni Cesare (*b* Putignano, nr Bari, ?4 Sept 1649; *d* Naples, July 1686). Italian composer and organist. He was a member of the clergy. *RicordiE* gives his date of birth as 1649, but according to Di Giacomo (1924) he was eight years old when, in 1663, he entered the Conservatorio della Pietà dei Turchini at Naples. He studied there until 1667, during which time Giovanni Salvatore was *maestro di cappella*. From 1675 (1679 according to Di Giacomo) he was supernumerary organist without pay in the royal chapel, Naples, and was appointed regular organist in 1684. In 1680 he was chosen over Francesco Provenzale as *maestro di cappella* of the Tesoro di S Gennaro at Naples Cathedral. A manuscript of cantatas (*GB-Lbl* Add.14218), of south Italian provenance, most of which are signed 'D.G.C.N.', may be by him. One of the cantatas (unsigned) is dated 29 June 1683.

□

Nettl, Bruno (*b* Prague, 14 March 1930). American ethnomusicologist of Czech birth. He was educated at Indiana University (AB 1950; MA 1951; PhD 1953) and the University of Michigan (MA 1960). His distinguished teaching career has been anchored at the University of Illinois at Urbana-Champaign (appointed associate professor of music, 1964; professor of music and anthropology, 1967–92; emeritus professor, 1992), but has included numerous guest professorships, including Kiel (Fulbright professor 1956–8), Washington (1985, 1988, 1990), Louisville (Bingham Professor 1983), Colorado College (1992, 1998), Harvard (1990), and Chicago (1996). Among numerous honours are two honorary doctorates (Chicago 1993; Illinois 1996), the Fumio Koizumi Prize (Tokyo 1993), and a Festschrift (1991).

Nettl's scholarship has been seminal for the growth of ethnomusicology during the second half of the 20th century. He has written or edited numerous works surveying and broadening theoretical and methodological principles, notably *Theory and Method in Ethnomusicology* (1964), *The Study of Ethnomusicology: 29 Issues and Concepts* (1983), and *Comparative Musicology and Anthopology of Music* (with P.V. Bohlman, 1991). He has also published extensively on a variety of topics, including Native American music, folk and traditional music, the Middle East (especially Iran), the intellectual history of ethnomusicology, urban ethnomusicology, local music ethnography and improvisation. He has influenced musical scholarship through extensive editorial activities, from journal editorships (*Ethnomusicology* 1961–5, 1998–2002) to advisory boards (AMS committee for publications of American music and *Garland Encyclopedia of World Music*) to monograph series (Detroit Monographs in Musicology and Chicago Studies in Ethnomusicology).

Nettl's influence on modern musical scholarship crosses disciplinary as well as international borders. He has encouraged rapprochement and cooperation among all domains of musical scholarship, and has strengthened the interdisciplinary potential of ethnomusicology by drawing from folklore studies, anthropology and the social sciences. The influences of his approaches to world music are also evident in his activities as a teacher, which embrace all levels of music education, and appear in his articles and classroom textbooks, as well as the characteristically lucid quality of all his published work. Many leading ethnomusicologists have studied with Nettl and written dissertations advised by him. It has been the greatest measure of his intellectual breadth and diversity that his former students have not formed a single school, but have established new directions both for ethnomusicolgy and modern musical scholarship generally.

PHILIP V. BOHLMAN

Nettl, Paul (*b* Hohenelbe [now Vrchlabí], Bohemia, 10 Jan 1889; *d* Bloomington, IN, 8 Jan 1972). American musicologist of Czech-German descent, father of BRUNO NETTL. He was educated at the German University in Prague, where he studied law (JurD 1913), musicology with Heinrich Rietsch (PhD 1915) and theory with Gerhard von Keussler. After military service in World War I he worked in Vienna under Adler. In 1920 he returned to Prague, where he taught at the German University and served temporarily as head of the musicological institute. In 1930, when it became clear that his Jewish origins would prevent permanent academic advancement, he became more active in journalism, and became music director for German radio in Czechoslovakia (1933). After the German occupation in 1939 he made his way to the USA, where he taught at the Westminster Choir College in Princeton, New Jersey, and in New York and Philadelphia. He was professor of musicology at Indiana University in Bloomington (1946–59), and also held positions at the Cincinnati Conservatory and at Roosevelt University in Chicago. After his retirement he continued to write and to teach part-time at Indiana until 1963, also lecturing for Südwestdeutscher Rundfunk, Stuttgart, and elsewhere. Nettl published many books and articles dealing with his primary research subjects: the music of the 17th and 18th centuries, Austrian and Bohemian music history, dance history, Mozart and Beethoven. He also wrote widely for the general reader, covering such diverse subjects as Mozart's involvement with freemasonry, national anthems, Luther and music, and Casanova and music; he published over 400 items altogether.

RAMONA H. MATTHEWS

Neubauer [Neubaur], **Franz Christoph** (*b* Hořín, nr Mělník, *c*1760; *d* Bückeburg, 11 Oct 1795). Czech violinist and composer. He was born of peasant parentage in the Czech-speaking part of central Bohemia. He received his early musical training from a local schoolmaster and was already a skilled violinist and composer when, still very young, he went to Prague to continue his studies. Like many of his Czech contemporaries he left his native country, and his early travels took him to various monasteries in Bavaria, performing and composing in return for food and lodging. Documentary records indicate that in autumn 1780 he visited the Augustinian monasteries Au am Inn and Gars am Inn as well as the Benedictine monastery Attel am Inn. In 1781 he stayed in the Upper Bavarian cloisters of Diessen, Andechs, Schäftlarn and Fürstenfeld. Further journeys took him to Munich and Vienna, where, according to Schlichtegroll, he made the acquaintance of Haydn, Mozart, and his compatriots Kozeluch and Wranitzky. Important among other monasteries visited were Ottobeuren, where he taught music intermittently from 1783 to 1787, St Blasien

(1786), and Schöntal, where Abbé Vogler expressed great admiration for his talents; records also confirm sojourns in Konstanz, Speyer, Heilbronn, Zürich and Koblenz. Neubauer obtained his first permanent position at Weilburg in 1790, but was forced to flee by the invasion of the French revolutionary armies. Following several appearances as a performer in Hannover, he briefly held a position at Minden before finally accepting an invitation from the Princess of Schaumburg-Lippe to join the court at Bückeburg. The resident Konzertmeister there was J.C.F. Bach, and Neubauer's arrival precipitated immediate rivalry between the two composers. After Bach's death Neubauer succeeded him, but within a year he succumbed to an illness that was attributed to excessive drinking.

Neubauer was a prolific and remarkably facile composer, as is shown by the number and variety of works he wrote during his short life. Predictably, as with most minor composers of the late 18th century, the influence of Haydn and Mozart can be detected in his works, which, although somewhat uneven, are considerably more than an eclectic fusion of traits from both composers, and reveal a skilled craftsman and imaginative composer with a marked individuality. His symphonies, quartets, concertos (particularly that for piano) and a piano trio are among his best instrumental works. For the most part they adhere to the three-movement plan, but in other respects are typical of his age. The forms are clear and well balanced, with the expected tonal organization of the Classical period, but in the development sections far-ranging modulations emphasize mediant relationships that are approached by shifts from major to minor. The quartets are not in the customary violin-dominated style, and go far towards achieving equal participation of all the instruments.

Although he was known among earlier chroniclers principally as a 'Sonatenkomponist', recent research confirms that Neubauer's considerable body of church music occupied a significant position at the time. His *Missa Solemnis ex Dis* is notable for containing a clarinet part and his *Stabat mater* (1781) is of remarkable quality. Other vocal music includes collections of solo songs, some of which achieve a surprising equality between voice and piano.

R.D. SJOERDSMA (work-list with ROBERT MÜNSTER)

Neubauer [Neubaur, Niebuhr], **Johann** (*fl* mid-17th century). German composer. On 9 August 1649 he dedicated from Kassel to Landgrave Wilhelm VI of Hesse a collection of four- and five-part dances with continuo that was probably intended for publication but remained in manuscript: *Neue Pavaner*, *Galliarden*, *Balletten*, *Couranten*, *Allemanden und Sarabanden* (in *D-Kl*). He is otherwise not heard of at Kassel or indeed anywhere else. He has been confused with Georg Nub, a musician at the Vienna court. A sacred vocal work (also in *Kl*) is attributed to him, as were three others (now lost, formerly in *D-Lm*). His 1649 collection consists of eight suites. Five comprise the first four dances listed in the title; to each of the other three an allemande and saraband are added in the mode opposite to that of the rest of the suite (e.g. in no.7, which is in C major, the extra movements are in C minor). The dances within a suite are not thematically related.

□

Neuber, Ulrich (*b* ?Prague; *d* Nuremberg, 1571). German printer, brother of VALENTIN NEUBER. He married Margaretha Rüplin in 1539 and in 1541 became a citizen of Nuremberg, where he founded a printing house with JOHANN VOM BERG. The firm of Berg and Neuber, which flourished 1541–63, published at least 122 editions of music, notably motet anthologies. After Berg's death in 1563, its colophon changed to 'Ulrich Neuber and Johann vom Berg's heirs'; after the marriage of Berg's widow Katherina vom Berg to Dietrich GERLACH in 1565, it changed again to that of Gerlach and Neuber. Neuber left the firm and started his own between 1566 and 1568, and in 1569 he bought a house 'am Ponersberg'. He took over some of the catalogue of the joint firm and successfully published these and other items.

In 1573, Neuber's widow married the printer Valentin Geissler, who later became an official printer to the Nuremberg city council. Of Neuber's seven children, one son, Georg (Jörg), was active as a printer (in Nuremberg in the 1570s), and another, Wolfgang, became a bookseller. Christoff Neuber, also a printer, was probably either a cousin or a brother of Ulrich.

For bibliography *see* BERG, JOHANN VOM.

SUSAN JACKSON

Neuber, Valentin (*b* ?Prague; *d* Nuremberg, bur. 6 Feb 1590). German printer, brother of ULRICH NEUBER. In 1548 he married Kungund Wachter, the widow of Georg Wachter, and thereby became heir to Wachter's printing firm; in the following year he received Nuremberg citizenship, and from 1583 he was a member of the greater city council. He published a large number of polyphonic lieder and monophonic Kirchenlieder and some works on music theory, such as Listenius's *Musica* and several editions of Heinrich Faber's *Compendiolum musicae*. Neuber was probably closely related to Christoff Neuber, another Nuremberg printer. One of his heirs was Hans Neuber, a lutenist in Prague; this fact and his dealings with the city of Prague suggest that he may have been born there.

Neue Einfachheit (Ger.: 'New Simplicity'). A short-lived movement that flourished in the later 1970s and early 1980s, conceived in reaction to the formalized, abstracted compositional procedures of postwar avant-garde music. Although some critics argued that such composers as Henze and Reimann were forerunners of the Neue Einfachheit, it was essentially a tendency within the younger generation of German composers, such as Hans-Jürgen von Bose (*b* 1953), Hans-Christian von Dadelsen (*b* 1948), Detlev Müller-Siemens (*b* 1957), Wolfgang Rihm (*b* 1952), Wolfgang von Schweinitz (*b* 1953), Ulrich Stranz (*b* 1946) and Manfred Trojahn (*b* 1949). They sought a more immediate relationship, unmediated by complex precompositional planning, between their creative impulse and its musical expression and, by extension, between their music and its listeners.

This intended directness of expression was an echo of the 'Einfachheit' to which the authors of the 18th- and 19th-century German lied had aspired, but it was most usually represented in works of the Neue Einfachheit by a re-engagement with the gestural and tonal language of late Romantic German music, by a return to more traditional instrumental groupings, such as the string quartet and symphony orchestra, and, in works involving text, often by the use of specifically German subject matter.

Other terms used to categorize this music included 'Neue Innigkeit' (new inwardness), 'New (or Neo-) Romanticism', 'New Sensuality' and 'New Tonality'. Confusingly, the English term 'New Simplicity' was also used of minimalist music. Of the composers of the Neue Einfachheit only Dadelsen, however, has made significant use of repetition and the Neue Einfachheit is perhaps best understood as an essentially national phenomenon, a musical equivalent of the revival of figurative and other representational imagery in the 'New German Painting' of Baselitz and Lüppertz, which also achieved critical prominence during the same period.

CHRISTOPHER FOX

Neue Händel-Gesellschaft. *See* HANDEL SOCIETIES.

Neue Sachlichkeit (Ger.: 'New Realism', 'New Objectivity'). Term used since the 1920s for various cultural modernizing trends of the Weimar Republic and to describe the general mood of that period. It was first used in 1923 for an exhibition of post-Expressionist painting by G.F. Hartlaub of Mannheim, and soon appeared in discussions of musical aesthetics. Writers in the journal *Melos*, for instance, particularly Heinrich Strobel, Erich Doflein and Hans Mersmann, promoted the term for the retreat from ideals of expressivity in post-Expressionist composition and interpretation and for the neo-Baroque style of recent works, particularly by Hindemith, which was felt to be 'realistic' and kinetic.

Composers sympathetic to the concept saw in it the means of appealing to a broad public. In 1927 Krenek formulated his views on Neue Sachlichkeit out of his opposition to Expressionism, his chief criticism being that the Expressionist artist was isolated as an individual from his effect on a wide public. For Krenek, as for Weill, Neue Sachlichkeit was primarily defined by the musician's search for a broader basis of operation, and was characterized by the absence of complexity and by an

element of familiarity in both subject and means of expression. Many composers achieved this by incorporating the idioms of contemporary popular dance and light music or jazz, quotations from the classical repertory and Baroque techniques of composition into new works. The self-contained work of art was thus largely rejected in favour of communication, and reference to external subjects and events became a crucial factor. This is particularly evident in music drama: in their first 'Zeitopern', Krenek (*Jonny spielt auf*, 1927) and Weill (*Royal Palace*, 1927) took as their subjects modern social and cultural issues and used a wide variety of styles from both opera and light music, as well as music reproduced by radio or gramophone on stage, thus making it clear that this music was available to all. Other composers of such works in the late 1920s include Hindemith, Schoenberg, Ernst Toch, Max Brand and George Antheil. This new aesthetic approach also attracted opera composers to commercial music theatre, notably Weill (*Dreigroschenoper*, 1928; *Happy End*, 1929), while technical development inspired the Neue Sachlichkeit composers to experiment with 'mechanically' produced sound and to use the opportunities for mass communication offered by the gramophone and radio and film music.

Some writers, such as Adorno, tried to extend the term to include Schoenberg's 12-note compositional technique. Yet despite its constructivist, anti-Romantic and anti-ornamental features, 12-note music runs directly counter to Neue Sachlichkeit's aim of mass reception, its reversion to harmonic tonality and its structural simplification.

NILS GROSCH

Neufville [Deneufville], **Johann Jacob de** (*b* Nuremberg, 5 Oct 1684; *d* Nuremberg, 4 Aug 1712). German composer. Born into a Huguenot family, he was the son of a merchant. For several years he was a pupil of Johann Pachelbel, who gave him instruction first in keyboard and later also in composition. According to Walther, in 1705 he was organist in a church in a suburb of Nuremberg. In November 1707 he made a journey to Italy to complete his education, and he stayed in Venice in February 1708. He returned to Nuremberg, through Graz and Vienna, in April 1709 and, because no better position was vacant (according to *GerberNL*), he became organist in the suburb of Wöhrd. His *Sex Melea*, five arias each with five to seven variations and a ciaccona, were influenced by Pachelbel's *Hexachordum Apollinis* (Nuremberg, 1699). His keyboard suite consists of an allemande, a courante, a sarabande and a minuet.

WORKS

Sex Melea s[eu] Ariae cum variationibus, org (n.p., n.d.) [preface dated Venice, 3 Feb 1708]
Encomia: Sit nomen Domini benedictum; Non est similis tui, Domine; Beatus vir, cujus est nomen Domini spes ejus; Confitemini Domino, quoniam excelsum nomen ejus, 1v, 3 insts, bc (Venice, 1708 [according to *GerberNL*]), lost, cited in *WaltherML* and *GerberNL*
Honig-Opffer auf andächtige Lippen trieffend, oder der allersüsseste Nahme Jesus, in 4 Denck-Sprüchen (Nuremberg, 1710), lost, cited in *WaltherML* and *GerberNL*
Trauermusik for J.W. Haller (Nuremberg, 1710), lost, see Dupont
Suite (g), kbd, *D-Bsb*, 2 movts ed. K. Herrmann in *Alt-Nürnberger Klavierbüchlein* (Mainz, n.d.)

GÜNTER THOMAS

Neuhaus, Heinrich (Gustavovich) [Neygauz, Genrikh Gustavovich] (*b* Yelizavetgradka, 31 March/12 April 1888; *d* Moscow, 10 Oct 1964). Ukrainian pianist and teacher. A nephew of the eminent pianist Felix Blumenfeld and cousin of Szymanowski, he made his début at Dortmund in 1904, although two years previously he had appeared in his native town with the violinist Mischa Elman, then eleven. He studied briefly with Michałowski in Warsaw, and then with Barth and Godowsky in Berlin, the latter whom he followed to Vienna, becoming his pupil at the Klaviermeisterschule of the conservatory. Neuhaus completed his studies with Godowsky in 1913, and then returned to Russia, where he enrolled at the St Petersburg Conservatory, graduating in 1915. For a year following this he taught in Tbilisi, and then from 1919 to 1922 at the Kiev Conservatory, before moving to the Moscow Conservatory, where he remained until his death. Neuhaus served as rector of the institution from 1935 to 1937.

Although Neuhaus's reputation rests chiefly on his abilities as a teacher, he was also a noted performer;

especially in the music of Chopin, Debussy, Skryabin and Szymanowski. Recordings of Liszt's Second Concerto and Chopin's First Concerto demonstrate that he had a refined technique and a propensity for exploiting the poetic aspects of the music, though he lacked the force and bravura of a seasoned virtuoso. As a teacher, Neuhaus utilized every facet of his wide culture and depth of imagination to develop a pupil's capacity for appreciating both the style and expressive content of the music. Pianists who studied with him include Richter, Gilels, Zak, his own son Stanislav, Virsaladze and, briefly, Lupu. He wrote the widely read book *Ob iskusstve fortepiannoy igrï* ('The art of piano playing', Moscow, 1958, 3/1967; ed. with biography and appreciation by Yakov Mil'shteyn, 1982; Eng. trans., 1973), which raises important questions relating to performance and gives experienced advice that has been of benefit to aspiring pianists.

JAMES METHUEN-CAMPBELL

Neuhaus, Max (*b* Beaumont, TX, 9 Aug 1939). American percussionist and sound sculptor. He studied at the Manhattan School of Music. In the course of his career as a soloist working with an avant-garde repertory, Neuhaus began in 1964 to amplify certain instruments. In 1965 he started to use acoustic feedback, and in 1966 he produced a special electronic circuit to be connected to a domestic hi-fi system; this was manufactured as Max-Feed by Mass Art in New York. In the same year he presented *Public Supply*, in which he mixed and modified sounds phoned in to a local radio station over ten lines by members of the public. The concept of *Public Supply* was expanded to a national scale in *Radio Net* (1974–7), and, on a global level, *Audium* (1992–).

Neuhaus's first semi-permanent sound installation, *Drive-In Music*, ran for six months (1967–8) in Buffalo, New York; 20 low-powered radio transmitters, spaced out along a mile of straight road, broadcast electronic sounds that changed according to weather conditions and were audible only over car radios. He abandoned his activities as a percussionist in 1968 to concentrate on building sound installations, which he described as 'sound works' after around 1990. Since 1971 several installations have explored underwater sounds, especially *Water Whistle*, in which whistles are sounded in a swimming pool by jets of water under pressure. His other environments have featured electronic sounds: in *Times Square*, an installation below a ventilation grill on a traffic island in Times Square, New York (1977–92), a large loudspeaker emitted a rich low sound, the timbre of which was affected by temperature and wind; this is in marked contrast to the delicate clicks heard from loudspeakers distributed in a subway station in *Walkthrough* (Jay Street, Brooklyn, 1973–7), and in *Untitled*, high up in a large tree in a wooded park at the Documenta 6 exhibition (Kassel, 1977). In each context the sounds are only minimally obtrusive, are well matched to the environment, and make an illuminating statement about it. When an installation involves a location along which the public walks, such as a passageway, tunnel or stairwell, Neuhaus often features a gradual progression in the sound design, sometimes affected by changing levels of light; other installations involve subtle uses of acoustic reflections. The loudspeakers and circuitry are always concealed. In 1978–80 Neuhaus developed a 'multi-synthesizer' to assist in the design of more complex sound structures; it makes use of a light pen to operate a microcomputer system by remote control. In the mid-1980s he began a series of sonic explorations of gallery rooms, including *Two 'Identical' Rooms* (1989), in which the sounds in each room are apparently identical but gradually assume very different characters. He was granted a US patent in 1991 for his research into more effective sirens for emergency vehicles.

WORKS

Installations: Drive-In Music, 1967 [Lincoln Parkway, between the Albright-Knox Museum and Soldier's Circle, Buffalo, NY, extant 1967–8]; Southwest Stairwell, 1968 [Ryerson U., Toronto; extant 1968]; Walkthrough, 1973 [subway entrance, Jay Street, Brooklyn; extant 1973–7]; Times Square, 1973–7 [traffic island between 45th and 46th streets, New York, extant 1977–92]; Drive-In Music, 1974–5 [Artpark carpark, Lewiston, NY; extant 1975]; Untitled, 1977 [Dokumenta 6, Kassel, Germany; extant 1977]; Untitled, 1978 [Sculpture Garden, Museum of Modern Art, New York; extant 1978]; Untitled, 1978–9 [stairwell, Museum of Contemporary Art, Chicago; extant 1979–89]; Untitled, 1980 [Como Park Conservatory, Minneapolis; extant 1980–83]; Time Piece, 1983 [Sculpture Garden, Whitney Museum, New York; extant 1983]; Untitled, 1983 [wooded hillside, Villa Celle, Santomato di Pistoia, Italy; extant 1983–90]; Untitled [Centre d'Art Contemporain du Domaine de Kerguéhennec, Bignan, nr Locminé; extant 1986–8]; Infinite Lines from Elusive Sources no.1 [Galerie Ghislaine Hussenot, Paris; extant 1988–90]; A Bell for Sankt Cäcilien, 1988 [Kölnischer Kunstverein, Cologne; extant 1989–91]; Two 'Identical' Rooms [Deichtorhallen, Hamburg; extant 1989]; A Large Small Room [Galerie Karsten Greve, Cologne; extant 1989–92]; Time Piece [Kunsthalle, Berne; extant 1989–93]; Two Sides of the 'Same' Room [Dallas Museum of Art; extant 1990]; Infinite Lines from Elusive Sources no.2 [Galleria Giorgio Persano, Milan, extant 1990]; Three 'Similar' Rooms [Galleria Giorgio Persano, extant 1990–]; Three to One, 1991–2 [Palast AOK, Kassel; extant 1992–]; Untitled [Musée d'Art Contemporain, Bordeaux; extant 1993–]; Untitled [Museo d'Arte Contemporanea, Castello di Rivoli, Turin; extant 1995–]; other works

Underwater works: Water Whistle I–XVII, 1970–75 [13 North American cities; extant 1971–5]; Underwater Musics I–IV, 1975–8 [I, Bremen; II, New York; III, Berlin; IV, Amsterdam; extant 1976–8]

Sound objects: Maxfeed, 1967–8 [edn of 50, private collections]; Bluebox, 1970–74 [edn of 10, private collections]; Untitled, 1974–5 [unicum, Christophe de Menil]; Time Piece, 1979–81 [edn of 31, private collections]

Broadcast works: Public Supply I–IV, 1966–73 [I, WBAI, New York; II, CJRT, Toronto; III, WBAI; IV, WFMT, Chicago]; Radio Net, 1974–7 [NPR, 2 Jan 1977]; Audium, 1992– [international broadcast and TV project]

Sound events: American Can [in 2 realizations: Central Park, 1966, and Lincoln Center Plaza, 1967, New York]; By-Product [in 2 realizations: Town Hall, 1966, and Park Place Gallery, 1967, New York]

HUGH DAVIES (work-list with JOHN ROCKWELL)

Neuhaus, Rudolf (*b* Cologne, 3 Jan 1914; *d* Dresden, 7 March 1990). German conductor. He studied privately with Abendroth and at the Cologne Musikhochschule (1932–4), obtaining his first appointment as music director at the Landestheater, Neustrelitz (1934–44). In 1945 he became conductor at the Landestheater, Schwerin, and Generalmusikdirektor from 1950. Later he was active in Dresden, conducting at the Staatsoper and teaching at the Hochschule für Musik. He conducted most of the new operas performed at Dresden during his time there, including the premières of Finke's *Der Zauberfisch* (1960), Kunad's *Maître Pathelin* (1969), and works by Cikker, Egk, Khrennikov, Wagner-Régeny and others. A frequent guest conductor in Berlin and Leipzig, he distinguished himself in Wagner and in contemporary operas, including the première of Schwaen's *Leonce und Lena* at the Berlin Staatsoper (1961).

Neuhoff. *See* NIEHOFF family.

Neukomm, Sigismund Ritter von (*b* Salzburg, 10 July 1778; *d* Paris, 3 April 1858). Austrian composer, pianist and scholar. His chief importance is as a transitional figure between Classicism and Romanticism. His father, David Neukomm (1749–1805), was a schoolmaster and teacher in a teacher training college; his mother, Cordula (née Rieder, 1753–1814), who was related to Michael Haydn, was a singer in the service of the Archbishop of Salzburg.

Neukomm received his first musical tuition at the age of seven from the Salzburg Cathedral organist, Franz Xaver Weissauer, and later became a pupil of Michael Haydn, who was responsible for his theoretical studies. On 1 December 1790 he entered the Benedictine Gymnasium in Salzburg, and subsequently studied philosophy and mathematics at Salzburg University. In about 1792 he became honorary organist at the university church, and in 1796 chorus master at the Salzburg court theatre. At the end of March 1797 he went to Vienna to become a pupil of Joseph Haydn, with whom he studied for seven years; numerous dedications and remarks made in later years testify to his lifelong veneration of his third teacher. His arrangements of works by Haydn were for the most part done with the composer's blessing; Haydn sanctioned arrangements by Neukomm of *The Creation*, *Il ritorno di Tobia*, *The Seasons* and *Arianna a Naxos*. He undertook for Haydn the arrangement of 43 Scottish songs, and transcribed Haydn symphonies and oratorios for harmonium and piano.

In Vienna Neukomm also gave piano and singing lessons; his pupils included Anna Milder and Franz Xaver Mozart. On 5 May 1804 he left Vienna for St Petersburg, where he became Kapellmeister at the German Theatre. On his way back from Russia to Vienna in 1808 he met the composer and teacher Karl Friedrich Zelter in Berlin. Between mid-November 1808 and February 1809 he visited Joseph Haydn every day.

On 7 November 1809 he arrived in Paris, which was to be his principal home for the rest of his life. Apart from a few brief periods of absence, his first stay in Paris lasted four years, and he soon made the acquaintance of such leading musicians as Cherubini, Gossec, Grétry and Monsigny. In 1814, as pianist to Prince Talleyrand, he attended the Congress of Vienna. There his C minor Requiem was performed before the distinguished company on 21 January 1815, and he was invested as Chevalier of the Légion d'Honneur; this was his only claim to the title of 'knight'. In 1816 the Duke of Luxembourg took him to Rio de Janeiro, where he acted as teacher to the court of John VI of Portugal and made the music of Haydn and Mozart in particular known in South America. Leaving Rio de Janeiro on 15 April 1821, he arrived back in Paris on 23 October and there enjoyed the special patronage of Talleyrand, the Princess of Vaudemont and the Duke of Orléans, later King Louis Philippe. The year 1826 saw the fulfilment of Neukomm's youthful ambition to travel in Italy and he visited Genoa, Florence, Rome, Naples, Bologna, Venice and Milan. His first trip to England took place in April 1829, and henceforth England was his second home. In his autobiography he declared 'I am, according to the English, the foreigner who has composed the greatest quantity of music to English words'. His compositions, which he conducted, were performed at all the major music festivals of England, Scotland and Ireland, and he travelled throughout the British Isles. In late 1834 and early 1835 he travelled as far as the north African coast, visiting Algiers and the surrounding district. In 1837 he conducted his Grand Military *Te Deum* at the unveiling of the Gutenberg monument in Mainz. In 1838, after an absence of 29 years, he returned to Salzburg, but the same year embarked on an extended tour of Switzerland which lasted into March 1839. 1840 was spent in France, Germany, Switzerland and Italy, 1841 in Switzerland, and his itinerary for 1842 took in England, Germany and Austria.

Neukomm's name is closely associated with the festivities on the occasion of the unveiling of the Mozart monument in Salzburg (4–6 September 1842). Neukomm himself delivered the panegyric at the unveiling ceremony, he conducted Mozart's 'Coronation' Mass (K317) and Requiem, and also composed for the celebrations the hymn *Österreich*. For Mozart, as for Haydn, he had lifelong admiration. His desire to introduce seldom-played works by Mozart to his contemporaries led to his transcribing much of Mozart's music for harmonium and piano. For the rest of his life Neukomm continued to travel widely. He was buried in the Montmartre cemetery in Paris.

In 1804 Neukomm embarked on a thematic catalogue of all his own works in chronological order, which he maintained until his death. The catalogue of 1265 items gives details of the place and date of composition of each individual piece, and also contains autobiographical information. Allowing for compositions dating from earlier than 1804 and others that he forgot to enter into his catalogue, Neukomm was the composer of some 1300 works. His output as a whole still remains to be investigated. In his study of the oratorios, Pellegrini-Brandacher concluded that

> On the one hand Neukomm represents the continuation of the Classical tradition up to Brahms. But on the other hand his oratorios were an important early stage of the sort of dramatic approach that is found in Wagner: firstly in the involvement of the composer in shaping the text; secondly in the displacement of the aria in favour of accompanied recitative; and thirdly in the . . . exploitation of . . . instrumental colours.

Neukomm's songwriting is particularly indebted to the Classical tradition, especially to Haydn; but Romantic traits appear, notably in the middle-period and late songs. As an author Neukomm made a name for himself principally in the *Revue et gazette musicale de Paris*.

Neukomm's sister Elisabeth (1789–1816) was a renowned soprano, who 'filled all circles of Vienna with rapture'. One of his nephews, Edmond Neukomm (1840–1903), was a French writer on music.

WORKS

drawn from Neukomm's MS catalogue, F-Pn; most MSS in F-Pn

STAGE

Die Nachtwächter (komisches musikalisches Zwischenspiel, 1, F. Treitschke and F.W. Hunnius), Vienna, 12 Jan 1804
Die neue Oper, oder Der Schauspieldirektor (komische Operette, 1, Hunnius), Vienna, 15 March 1804
Alexander am Indus (op, 1, Hunnius), St Petersburg, 15/27 Sept 1804; rev. version, St Petersburg, 30 Jan/11 Feb 1805
Sittah Mani oder Karl XII (incid music, Bender), St Petersburg, 13/25 Feb 1805
Die Braut von Messina (incid music, F. von Schiller), St Petersburg, 1805
Totenfeier (incid music, Bormann), Moscow, 4/16 March 1806
Musikalische Malerei (Posse, 1, Neukomm), Moscow, 19 April/1 May 1806
Arkona (melodrama, L.T. Kosegarten), Würzburg, 21 Sept 1808
Niobé (tragédie lyrique, 1, F. Rossel), Montbéliard, 28 May 1809
Athalie (incid music), Paris, Odéon, 1822 (Paris, 1822)

SACRED

Der Ostermorgen (cant., C.A. Tiedge), 3 solo vv, chorus, orch (Leipzig, 1824)
Christi Grablegung (orat, F.G. Klopstock) (Leipzig, 1827)
Das Gesetz des alten Bundes (orat, C.K.J. von Bunsen, Neukomm), vs (London, 1832)
David (orat, J. Webbe), vs (London, 1834)
Christi Auferstehung (orat, Klopstock), vs (Mainz, 1841)
Christi Himmelfahrt (orat, Klopstock), vs (Mainz, 1842)
Pfingstfeier (cant., Bunsen), solo vv, chorus, orch, vs (Bonn, 1846)
Lobet den Herrn (cant.), solo vv, chorus, orch, 1843, vs (Friedberg in der Wetterau, n.d.)
9 other orats, cants. and odes, incl. 5 pubd
48 masses, incl. 30 pubd; 3 Bs, incl. 1 pubd; 27 offs, incl. 7 pubd; 3 grads; 2 Passions, both pubd; 9 Ave verum corpus; 15 O salutaris hostia, incl. 8 pubd; 4 Sub tuum praesidium, incl. 2 pubd; 31 Tantum ergo, incl. 8 pubd; 11 TeD, incl. 1 (Mainz, 1837); 3 Mag, incl. 1 pubd; 7 Ave Maria, incl. 4 pubd; 18 Marian ants, incl. 2 pubd; 18 other ants, incl. 5 pubd; 5 Stabat mater, incl. 2 pubd, 1 (Leipzig, 1823); 73 Motets and anthems, incl. 5 pubd; 173 Psalms, incl. 15 pubd; 236 hymns and chorales, incl. 94 pubd; 243 chants and songs, incl. 14 pubd; over 60 other pieces, incl. 23 pubd

OTHER VOCAL

texts, mostly secular, in English, French, German, Italian, Latin, Spanish

12 cants. and odes, incl. 3 pubd
36 choruses, incl. 3 pubd separately and Zwölf Chöre für Singvereine (Leipzig, 1853)
Over 150 canons, mostly 4vv, incl. 2 pubd
Over 160 qts and trios, incl. 66 pubd; 45 duets, incl. 10 pubd
Over 275 arias, songs, romances, canzonets etc., 1v, acc., incl. *c*50 pubd separately and Sieben Gesänge (Leipzig, 1825); Die Trennung ed. in DTÖ, lxxix, Jg.xlii/2 (1935)

INSTRUMENTAL

2 syms, both pubd, 1 (Leipzig, 1822)
5 ovs., incl. 3 pubd; 1 pf conc.
6 phantasies, orch, incl. 3 pubd Leipzig: op.9 (1809), op.11 (*c*1810), op.27 (1821)
7 marches, orch, incl. 2 pubd; 10 marches, wind band, incl. 1 pubd
2 phantasies, wind insts; 6 marches, wind insts
1 nonet, 1 octet, 2 septets, 1 sextet, mostly wind insts
Qnt, cl, str, op.8 (Leipzig, 1809); str qnt 'L'amante abandonée' (Bonn, n.d.); str qnt 'Une fête de village en Suisse' (Bonn, 1818); 4 other str qnts, incl. 1 pubd; 1 qnt, fl, hn, vn, va, hp
3 qts: hn, vn, pf, hp; 3 hn, b trbn; 3 fl, fl d'amour
1 trio, ob, hn, pf
14 duos, various combinations of vn, fl, cl, hn, pf, hmn, incl. 6 pubd
Phantasie, pf, op.1 (Vienna, 1804)
Le retour à la vie, grande sonate, pf, op.30 (Leipzig, 1820)
O amor brasileiro, caprice, pf, op.38 (Leipzig, 1825)
17 other pf pieces, incl. 10 pubd
24 morceaux, hmn (Paris, *c*1842)
Over 100 other hmn pieces, incl. over 60 pubd
Various other works, pf arrs. of own orchestral works, solfeggios and studies
Arrs. for orch or for pf, hmn of over 40 works of Bach, Handel, J. Haydn, M. Haydn, Mozart, Beethoven and Hummel, incl. *c*30 pubd

RUDOLPH ANGERMÜLLER

Neuma [neupma, pneuma] (Lat.). A term used in the Middle Ages with several distinct, but related meanings, fundamentally connected with the notion of a musical phrase. Two Greek-Latin terms, *neuma* ('gesture') and *pneuma* ('breath', also used in the sense of 'Holy Spirit') were often confused and amalgamated. In a transferred sense the word came to signify the notational sign representing a melodic gesture (*see* NOTATION, §III, 1). It was also used in medieval service books to denote a number of special melismas or textless melodies: those added to the model antiphons found in tonaries; the melisma or jubilus at the end of responsories, graduals, alleluias etc.; and the vocalized repeat of a verse of a sequence after performance of that verse with text.

1. The *neumae* of model antiphons. 2. The *neumae* of responsories. 3. The *neumae* of sequences.

1. THE 'NEUMAE' OF MODEL ANTIPHONS. Model antiphons, one for each mode, are found in tonaries from the 10th century onwards (but not in the famous Dijon tonary *F-MOf* H 159, a special tonal arrangement of chants for the Mass). They are not liturgical chants, but preface a group of liturgical chants of the same mode. It was customary to conclude them with a *neuma* (*see* TONARY, §2). These *neumae* appear to have assumed a role in the liturgy during the 12th century, being added to the last vowel of important antiphons such as the last antiphon at Vespers and Lauds, and those of the *Magnificat* and

Benedicamus melodies borrowed from the neumae of Office responsories, with mother responsory cited in red (appearing lighter in the reproduction), from a Sarum missal written for Exeter, mid-13th century (GB-Mr lat.24, f.14r)

Benedictus (see for example Frere, 1898–1901/*R*, ii, p.209: the *neumae* of the Sarum tonary appear on pp.x, xvii, xxi, xxix, xxxv, xlii, li, lxv and lxvii–lxxi; see also *GS*, ii, 269ff; *CoussemakerS*, i, 219ff, 283ff; *CoussemakerS*, ii, 81ff). The use of a *neuma* to conclude antiphons survived to the 18th century (J. Lebeuf: *Traité historique et pratique sur le chant ecclésiastique*, Paris, 1741/*R*, p.239).

In the 13th century antiphon *neumae* served as tenors of polyphonic motets. *F-MOf* H 196 has two settings of the 1st-mode *neuma* (ff.94*r*, 190*r*) and one of each of the 2nd-, 3rd- and 6th-mode *neumae* (ff.92*v*, 160*v*, 355*r*, respectively). They also appear in *D-BAs* Lit.115 (f.53*v*) and *F-Pa* 3518 (f.118), and in Philippe de Vitry's *Douce playsence* (*c*1317). A comparable phenomenon is found in the 12th-century Laon manuscript *F-LA* 263, where each of the eight tones for singing the Gloria at the end of introits has a *neuma* (borrowed from the preceding tonary *neumae*) for the 'e' of 'Amen', followed by a texted version (or trope) of the *neuma*.

2. The 'neumae' of responsories. The Jubilus vocalized to the vowel 'a' at the end of the alleluia and its verse, and melismas in other chants, were known as *neumae* in the Middle Ages (e.g. in a late 13th-century Sarum missal from St Paul's Cathedral, London, *GB-Lbl* Harl.2787, f.14*v*; see F.H. Dickinson, ed.: *Missale ad usum insignis et praeclarae ecclesiae Sarum*, Burntisland, 1861–83, col.10).

Harrison has drawn attention to a Sarum ordinance which allowed the *Benedicamus* at Vespers and Lauds on important feasts outside Eastertide to be sung to a *neuma* from a suitable Office responsory (see Frere, 1898–1901/*R*, i, 254): 'Any appropriate Benedicamus from the formulary of Matins being celebrated shall be sung, or any other suitable for the feast'. Striking evidence of how this was done is offered by the *Benedicamus* collection in *GB-Mr* lat.24, a Sarum noted missal written for Exeter about 1260, in which the sources of the melismas are noted (see illustration; facs. in Harrison, 1958, pl.vii; Harrison has identified the sources and their place in the *Antiphonale sarisburiense* or *Graduale sarisburiense*). A similar practice is documented at the French monasteries of St Denis near Paris and St Corneille, Compiègne (see Robertson).

The 'flos filius' melody from the responsory *Styrps Iesse* was very popular as the basis of polyphonic *Benedicamus* settings. The earliest setting appears to be that in *I-Ma* M.17 sup. (ed. in H. Eggebrecht and F. Zaminer, *Ad organum faciendum*, Mainz, 1970, pp.5, 50, 96, facs.2). There are two settings in *F-Pn* lat.1139: one (f.59, facs. in H. Besseler and P. Gülke: *Schriftbild der mehrstimmigen Musik*, Musikgeschichte in Bildern, iii/5, Leipzig, 1973, p.33) has an extended texted upper voice *Organa letitie*, the other (f.60*r*, also in *F-Pn* lat.3549, f.166*v*) uses the text *Styrps Iesse* in a similar way, but in more melismatic style. Another setting is the first of the *Benedicamus* settings attributed to Gauterius Prefatus (? Gauterius de Castello Rainardi) in the Codex Calixtinus (*E-SC*, f.190*r*; ed. in HAM, i, 24). A setting in *F-Pn* lat.3719, f.70*r*, is joined to a *versus Umane prolis*. It is the melody most frequently set as a *Benedicamus* in the 'Notre Dame' repertory (called 'Benedicamus I' in F. Ludwig: *Repertorium*, Halle, 1910/*R*, p.67): there is a three-voice setting in *I-Fl* Plut.29.1, f.11*r*, five two-voice settings as *Benedicamus Domino* on ff.86*v*–87*v* (88*r*), and eight two-voice settings as *Domino* on ff.88*v*–89*r*. The 'clemenciam' melody is set by 'Droardus Trecensis' in the Codex Calixtinus. There is a four-voice setting of *Jacet granum* in *GB-Onc* 362, f.84*v* (ed. D. Stevens, *Music in Honour of St Thomas of Canterbury*, London, 1970), but the liturgical function of this piece is unknown.

3. The 'neumae' of sequences. It is not known whether, or how often, sequences were performed in the Middle Ages with each texted verse followed by a melismatic repeat of the verse. Such a practice is suggested by the notation of sequences in such manuscripts as *I-Ra* 123 (complete facs. in PalMus, 1st ser., xviii, 1969), *F-Pn* lat.9449, *LA* 263, *I-Td* G.V.20, *VEcap* CVII and *E-Bac* 52. It may also be implied by the rubrics in a few books such as *F-R* 277 (Y.50), f.376*v*, 378*v*, a Rouen Cathedral noted missal of the mid-13th century: 'the texted parts of the sequence are to be sung by five boys, the melisma on the other hand by the choir' ('Dicatur littera sequentie a quinque pueris pneuma tamen dicatur a choro'); 'the right-hand side of the choir sings the texted part and the left-hand side the melisma' ('dexter chorus dicat littera et sinister pneuma').

DAVID HILEY

Neuman, Daniel Moses (*b* Lausanne, 18 Jan 1944). American ethnomusicologist. He was educated at Illinois University where he earned the BA (1965) and PhD (1974) in anthropology; his principal teacher was Bruno Nettl. From 1971 he was affiliated to Dartmouth College, Hanover, NH, until 1980 when he joined the faculty at the University of Washington, Seattle, where he served as director of the School of Music (1984–94) and was professor of music in 1986. In 1995 he was appointed professor of ethnomusicology at UCLA and became dean of the School of Arts and Architecture (1996). He served as chair of the committee on ethnomusicology for the American Institute of Indian Studies (1985–94) and was a member of the Indo-U.S. Sub-Commission for Education and Culture (1988–93). He was also associate editor of *Ethnomusicology* (1978–81). The main focus of his work is on India and the social organization of musical culture.

GREGORY F. BARZ

Neumann, Angelo (*b* Vienna, 18 Aug 1838; *d* Prague, 20 Dec 1910). Austrian impresario. He studied as a baritone with Therese Stilke-Sessi, made his début in 1859 and appeared in Kraków, Pressburg (now Bratislava), Prague, Ödenburg (now Sopron) and Danzig (now Gdańsk). From 1862 to 1876 he sang at the Vienna Hofoper, where he witnessed Wagner's own 1875 productions of *Tannhäuser* and *Lohengrin*. By 1876 he had changed careers and went to Leipzig as director under August Förster. Within six years he had staged all the Wagner operas including, in 1878, the first *Ring* cycle outside Bayreuth. In 1882 Neumann took the *Ring* to London for its first performances there. The conductor at Leipzig was Josef Sucher, later succeeded by Anton Seidl, but Neumann also introduced the young Arthur Nikisch. In 1882 he left Leipzig to form his own touring company, the Richard Wagner-Theater. Its first tour was to Breslau (now Wrocław), Danzig, Magdeburg, Hamburg, Lübeck and Bremen. There he accepted the post of director, which he held until 1885. The company continued its travels in 1882 throughout Germany, the Netherlands and Belgium, and also to Italy, Austria and Hungary. Neumann contracted Seidl to conduct and engaged most of the leading Wagnerian singers of the day, including Georg Unger, Heinrich and Therese Vogl, Hedwig Reicher-Kindermann and Amalie Materna, but also gave the young Katharina Klafsky her first opportunity. In 1885 Neumann went to the German Theatre in Prague as director, and in 1889 revived his touring company for a *Ring* cycle in Russia under Carl Muck.

CHRISTOPHER FIFIELD

Neumann, Anton (*b* Brno, 1720–30; *d* 21/22 Nov 1776). German composer of Moravian descent. He received his musical education from the tower musicians of the town. In 1758 he was married and by the beginning of 1759 was chamberlain and musical director at the court of the Olomouc Bishop Leopold Egk (1758–60) in Kroměříž with an annual salary of 350 florins. In this capacity he served Egk's successor as well, Maximilian Hamilton. In 1763 Neumann left Kroměříž, and in 1764 he was engaged for the music at the coronation of Joseph II in Frankfurt. From 1764 to 1765 he served as music director to Archbishop Kajetan Śółtyk in Kraków. In 1765 he applied unsuccessfully for the post of town musician in Brno. He returned to Moravia in 1769 and on 1 July he became musical director of Olomouc Cathedral, in succession to Josef Gurecký. In this post he tried, by increasing the instrumental resources, to raise the artistic level of music in the cathedral and to consolidate the authority of the conductor, a policy which made him many enemies among his subordinates. On 16 July 1769 he married his second wife, Juliana Müller, from Vienna.

It seems that during his time at the bishop's court Neumann composed only instrumental music: symphonies and string trios of a pre-Classical type. A 1760 inventory of Leopold Egk's orchestra notes the incipits of 41 symphonies and 21 trios by him. Neumann was possibly also the composer of some lost divertimentos for baryton, viola and cello formerly in the collection of Nikolaus Esterházy. He presumably began to write church music from 1769, the time of his cathedral appointment. His eight surviving symphonies are in three movements. The opening movements are in a sketchily defined sonata form with comparatively extended development sections. Neumann was at his best in slow, emotionally charged movements. His finales are usually in triple time and of a dance character. His sacred music is pre-Classical in style, with much use of triplets and decorative melodic lines, and little counterpoint.

WORKS

MSS in CZ-Bm, KRa, Pnm

8 symphonies; 6 partitas, 2 eng hn, 2 hn, 1 bn; 2 str qts; 3 str trios; 1 sonata, vn, hpd
7 masses; 2 Requiems; 7 litanies; 10 smaller church works

JIŘÍ SEHNAL

Neumann, František (*b* Přerov, Moravia, 16 June 1874; *d* Brno, 25 Feb 1929). Czech conductor and composer. After an apprenticeship as a meat-smoker and sausage-maker in his father's firm he went to the Leipzig Conservatory, where he studied with Reinecke and Jadassohn and as a répétiteur with Felix Mottl. After completing his studies in 1897 he conducted in Austria, Germany and the border territories of Bohemia. In 1919 Janáček recommended him as director of opera at the National Theatre, Brno. Neumann was an organizer of great energy and raised the standards of the Brno opera company – in status second to that of Prague – to a remarkable degree. As well as the standard repertory he introduced the works of Richard Strauss, Debussy, Ravel, Stravinsky and Krenek and, perhaps most important, organized several Janáček world premières (*Kát'a Kabanová*, 1921; *The Cunning Little Vixen*, 1924; *The Makropulos Affair*, 1926). At the Brno Conservatory he taught the conductors Chalabala and Bakala. In 1925 he became managing director of the Brno National Theatre.

Of Neumann's eight operas (three of them lost) the most successful was the three-act *Liebelei* (1910), based on Arthur Schnitzler's play. It was performed in various theatres in German- and Czech-speaking countries and was first sung in Czech as *Milkování* in Brno in 1911. *Der Herbststurm* was based on a play by the Yugoslav Ivo Vojnović, and after its première in Berlin (1919) was first performed in Czech as *Ekvinokce* ('The Equinox'; 1920, Brno). *Beatrice Caracci*, to a libretto by the composer based on a novel by Ludwig Hunn, is set in 16th-century Venice. Neumann followed the style of late 19th-century

German drama, setting realistic subjects to dramatically effective and rhythmically lively music.

JAN TROJAN

Neumann, Frederick (*b* Bielitz, Silesia [now Bielsko-Biała, Poland], 15 Dec 1907; *d* Richmond, VA, 21 March 1994). American musicologist of German origin. He studied politics and economics in Germany and received the PhD in 1934. He worked as a research analyst in Prague until 1937, when he emigrated to America. After the war he took courses in music and music education at Columbia University, receiving the MA in 1947 and the PhD in 1952. He was also an accomplished violinist; his teachers included František Ondříček, Otakar Ševčík, Henri Marteau, Carl Flesch, Max Rostal and Adolf Busch. From 1939 to 1942 he taught at the Cornish School of Music and Arts in Seattle and from 1948 to 1951 was professor of violin at the University of Miami. In 1955 he was appointed professor of music at the University of Richmond; he was also leader of the Richmond SO from 1957 to 1964. In 1976–7 he was visiting professor of music at Yale University. Neumann undertook research on violin technique and performing practice in general, with particular emphasis on the Baroque period. His views on Baroque and post-Baroque ornamentation, formulated through close study of the theorists, caused considerable debate.

PAULA MORGAN

Neumann, Václav (*b* Prague, 29 Oct 1920; *d* Vienna, 2 Sept 1995). Czech conductor. He studied the violin with Josef Micka and conducting with Pavel Dědeček and Metod Doležil at the Prague Conservatory (1940–45); there he was first violinist and later viola player of the quartet which, as the Smetana Quartet, gave concerts from 1945. He made his conducting début in 1948 with the Czech PO, and after two years with the orchestra became chief conductor of the Karlovy Vary State PO (1951–4). As conductor of the Brno region SO (SOKB) (1954–6) he met Walter Felsenstein, director of the Berlin Komische Oper, who invited him to Berlin to conduct Janáček's *The Cunning Little Vixen* (30 May 1956). Neumann achieved a quite extraordinary success, and the famous production had a total of 215 performances in Berlin, Wiesbaden and Paris. Neumann worked with the Komische Oper for eight years (1956–64), as chief conductor for two seasons. At the same time he was conductor of the Prague FOK SO. From 1964 to 1968 he was second conductor of the Czech PO, chief conductor of the Gewandhaus Orchestra and Generalmusikdirektor of the Leipzig Opera. In 1968 he became chief conductor of the Czech PO, a post he held until 1990 and again in 1992–3, and from 1970 to 1973 was Generalmusikdirektor of the Stuttgart Staatsoper.

Neumann was a highly experienced, versatile conductor, able to connect organically the emotional and intellectual sides of music and build an effective dramatic climax both in concerts and operas. His repertory included Janáček's major operas (he recorded *The Cunning Little Vixen* and *From the House of the Dead*) as well as *Le nozze di Figaro*, *Don Giovanni*, *Tristan und Isolde*, *Boris Godunov* and Shostakovich's *Katerina Izmaylova*. With Czech and other orchestras he toured Europe, Japan and the USA, and appeared frequently at several international festivals. His concert repertory extended from Classical to contemporary music; a particular favourite was Mahler, most of whose symphonies he recorded. He also promoted Czech Classical and contemporary works – he was acclaimed, for instance, for giving the première of Vladimír Sommer's Vocal Symphony in 1963, and recorded an admired series of Dvořák symphonies. In the late 1980s he broke his contracts with Czech TV and Czech Radio in protest at discrimination against fellow-musicians.

ALENA NĚMCOVÁ

Neumann, Věroslav (*b* Citoliby, nr Louny, Bohemia, 27 May 1931). Czech composer. He studied composition with Řídký at the Prague Academy of Musical Arts (1950–54) and at the same time directed several of the city's youth ensembles and its military ensemble. He worked with the Czech Music Fond (1958–60), and in the Union of Czechoslovak Composers (1962–9) occupied several positions, including that of general secretary and president (1968–9). During the 1950s he composed numerous mass songs, some of which were published and received awards at the Fifth World Youth Festival in Warsaw in 1955. His style of composition marked him as a traditionalist during these early years, though later he created a more personal style, taking ideas from new music such as the abandonment of strict metrical structures and the employment of akatoric procedures within tightly defined limits. His vocal works and songs for children have enjoyed widespread popular appeal. In 1982 his *Soleils couchants* received 3rd prize at the international choral competition in Tours, while in 1987 he won the prize of the Union of Czech Composers and that of the Czech publishing house Panton. A lecturer at the Popular Conservatory, a secondary music school, in Prague from 1969, in 1991 he was appointed director of the Prague Conservatory.

JIŘÍ MACEK

Neumann, Werner (*b* Königstein, 21 Jan 1905; *d* Leipzig, 24 April 1991). German musicologist. He studied the piano and music theory at the Leipzig Conservatory, and musicology (with Kroyer and Zenck), psychology and philosophy at Leipzig University, taking the doctorate there in 1938 with a dissertation on Bach's choral fugues. His subsequent career was devoted to work on Bach. While working in Leipzig as a music teacher, critic and lecturer at the Musikhochschule he founded (1950) and directed the Bach-Archiv as the German centre for the collection of Bach documents; after joining the board of the Neue Bach-Gesellschaft (1952) he became co-editor of the *Bach-Jahrbuch* and the Neue Bach-Ausgabe (1953), to which he contributed several volumes. In 1954 he acquired professorial status. His writings include studies of Bach's cantatas and their texts; he has also edited a pictorial biography and, with H.-J. Schulze, three volumes of Bach documents. He was twice honoured with a Festschrift, published as the fifth and ninth volumes of the series Bach-Studien (*Eine Sammlung von Aufsätzen*, ed. R. Heller and H.-J. Schulze, Leipzig, 1975 and *Johann Sebastian Bachs Traditionsraum*, ed. R. Szeskus and J. Asmus, Leipzig, 1986).

HORST SEEGER

Neumark, Georg (*b* Langensalza, 7 March 1621; *d* Weimar, 8 July 1681). German poet and composer. He grew up in Mühlhausen, studied at the gymnasiums at Schleusingen and Gotha and in 1640 set out for Königsberg in order to study law at the university. On the way, however, he was robbed and for the next three years he wandered around

north Germany in great poverty. He spent a good deal of time in Hamburg and in 1641 taught in Kiel; at this period he wrote his first novel. He finally arrived in Königsberg about 1643 and probably met there Heinrich Albert and Simon Dach. In 1648 he was again moving about; first he was in Danzig, in 1649–50 in Toruń, Poland, and later in Hamburg and its environs, where he met Rist. Finally he became a chancellor and librarian in the service of Duke Johann Ernst of Weimar, with whom he remained for the rest of his life. He was the chief poet there and published a great deal. He was admitted to the society known as the Fruchtbringende Gesellschaft in 1653 and towards the end of his life to the Order of the Pegnitzschäfer.

Neumark wrote both sacred and secular poetry, some of it of a very high order. He himself set much of it to music and he was one of the most imaginative composers of continuo songs in Baroque Germany. In his largest and most important collection, the *Fortgepflanzter musikalisch-poetischer Lustwald*, the texts, mostly secular, are often imaginative variations of reform verses by Opitz, but he also experimented with old-fashioned German verse. Although some of the melodies are among the best of the time, often they are very plain. A few are French *airs* or Polish dances. Most of the songs have violin and viol obbligatos and ritornellos, which are frequently more interesting than the vocal parts; here he was inspired by songs by Adam Krieger requiring several instruments and by the virtuoso playing of the elder Johann Schop. Neumark probably played the viol in performances of his songs, which led him to emphasize this part. Most of the songs are strophic, and they sometimes include passages of dialogue: the wedding dance-song *Wie seh' ich nicht Eufrosillen* (no.84) combines a two-movement dance with dialogue, and in *Belliflor* (no.24) two singers sing alternate strophes with different melodies but the same bass.

Neumark's *Wer nur den lieben Gott lässt walten* and *Ich lasse Gott in allem walten* are standard Lutheran chorales; the former appears in Bach's cantata *Gott ist uns're Zuversicht* BWV197 and in a Mendelssohn cantata that takes its title from that of the chorale.

JOHN H. BARON

Neumatic notations. Notations formed primarily by neumes, that is, by graphic signs that represent essentially the movement in pitch of a melody. They are mainly associated with vocal music, in particular with the chant repertories of the Western, Byzantine and Orthodox Churches, and the Buddhist chant of India. (*See* INDIA; TIBETAN MUSIC; CHINA and JAPAN. *See also* NOTATION, §III, 1; PLAINCHANT, §2(iii); EKPHONETIC NOTATION.)

□

Neumatic style [group style]. In plainchant, the setting of text mainly with one neume (a group of usually two to four notes written together) per syllable, as for example in introits and communion chants. It is contrasted with syllabic style (mainly one note per syllable) and melismatic style (characterized by florid groups of notes, each sung to one syllable).

See also TEXT-SETTING.

□

Neumeister, Erdmann (*b* Uichteritz, nr Weissenfels, 12 May 1671; *d* Hamburg, 18 Aug 1756). German poet and theologian. The son of a schoolmaster, he received his education at Schulpforta and the university in Leipzig, where he matriculated in 1689 to study both theology and literature. After the completion in 1695 of his inaugural dissertation, a critical bibliography of 17th-century German poets, he was appointed *Magister legens* at the university and delivered a series of lectures on poetry that year. These lectures were published without his permission in 1707 by Christian Friedrich Hunold ('Menantes') under the title *Die allerneueste Art, zur reinen und galanten Poesie zu gelangen*. Neumeister began his career as a pastor in Bad Bibra from 1697 to 1704; he also served in Weissenfels (1704–6) and Sorau (1706–15) before becoming head pastor at the Jacobikirche in Hamburg (1715), where he remained until his retirement in 1755.

Neumeister considered himself both a poet and a theologian. Although his early poetry shows some influence of Pietism, in his theological writings he took a strongly polemical stand against it. His importance for music history lies in the nine cycles of cantata texts that he wrote between 1695 and 1742, each containing texts for all the Sundays of the church year and many extra feasts. His first cycle was complete at the time of the poetry lectures, and two cantatas from it appear in *Die allerneueste Art* as examples of his genre 'oratorio', which is made up of biblical verses and poetic aria texts, occasionally also a chorale. This type of cantata had been widely cultivated in Germany since about 1680, and Neumeister could have become acquainted with it in the works of Johann Schelle, who was Thomaskantor in Leipzig while he was there. J.P. Krieger, Kapellmeister at Weissenfels, composed cantatas for chorus and soloists on these texts beginning in 1696, of which one, *Rufet nicht die Weisheit*, is still extant; this cycle of texts was not published, however, until 1726.

Neumeister's next cycle was radically different. These he specifically called cantatas, and they consisted entirely of madrigalesque poetry for recitative and aria in the manner of the Italian secular cantata or, as he put it in the 1695 lectures, 'a piece out of an opera'. Krieger set 79 cantatas from this cycle and performed them at Weissenfels, beginning in 1702; unfortunately, none is extant, but Krieger's performance records indicate that they were almost all for solo voice. The texts were published separately as librettos and collectively in 1704, becoming Neumeister's first published cycle (one example cited in

Flemming). C.C. Dedekind had previously composed similar texts, but they had not been set to music (Steude, 1994).

Neumeister's fame rests on his combination of these two types of text into the newer mixed cantata, which became standard in the 18th century. Although others may have combined these elements earlier, including Count Ernst Ludwig of Meiningen (Küster, 1987), it was Neumeister's third cycle – prepared for the court at Eisenach, published in 1711 and set to music by G.P. Telemann – that established the new genre. Bach drew his Neumeister texts (for BWV 18, 24, 28, 59 and 61) from the third and fourth cycles. Other composers who set entire cycles of Neumeister texts included P.H. Erlebach, G.H. Stölzel and J.P. Käfer.

KERALA J. SNYDER

Neumeyer, Fritz (*b* Saarbrücken, 2 July 1900; *d* Freiburg, 16 Jan 1983). German keyboard player and composer. He received his musical training in Cologne and Berlin with the aim of becoming an opera conductor. From 1924 to 1927 he was répétiteur, then chorus master and conductor, at the Stadttheater in Saarbrücken. In 1928 he returned to Berlin as a freelance accompanist, primarily of singers. His involvement with early music began at this time with his interest in the collection at the Musikinstrumentenmuseum des Staatlichen Instituts für Musikforschung in Berlin and his meeting with its director, Curt Sachs, who encouraged him in playing historical keyboard instruments and in the study of performance practice. In these Neumeyer became a central figure, believing that each repertory, from Sweelinck and Frescobaldi to Schumann and Brahms, is best served by instruments of its own time and place. With this aim he began, in 1930, a notable collection of keyboard instruments which he had restored to playing condition and made available to performers. Since 1974 this has been housed in the castle at Bad Krozingen. As a performer Neumeyer was known from many recitals and broadcasts. In 1935 he joined the influential Kammermusikkreis of Gustav Scheck and August Wenzinger and in 1954 joined the Cappella Coloniensis of WDR. His influence was reinforced by prominent professorships in historical keyboard performance at the Hochschule für Musik, Berlin (from 1940), and the Staatliche Hochschule für Musik, Freiburg (1946–68). His compositions, which are listed in full in J. Böhme: *Fritz Neumeyer: Wege zur alten Musik* (St Ingbert, 1996), consist almost entirely of songs.

DAVID LEDBETTER

Neuner, Carl (Borromäus) (*b* Munich, 29 July 1778; *d* Munich, 1 April 1830). German composer and violinist. He learnt the violin with the Benedictines at Tegernsee and later studied music theory with Joseph Graetz and singing with J.E. Valesi. In 1800 he joined the Munich court as ballet répétiteur and supernumerary second violinist, advancing in 1807 to a permanent position as violinist (he later played the double bass) with the court orchestra. He retired in 1827. He was a founder-member of the Munich Musikalische Akademie, and was locally important in a circle that included Winter and Poissl.

Neuner was especially significant as a composer of early Romantic ballets. His flair for novel instrumentation aroused the interest of Weber, who praised his one-act ballet *Der Dichter Gessner* (1809) for its 'melodic richness ... expressed in good orchestration' and unsuccessfully urged him to turn his attention to the higher sphere of opera 'since none of the requirements of a good opera composer seem to be lacking in him'. Whether Weber also knew Neuner's music for F.X. von Caspar's 'Romantic tragedy' (the word 'Romantic' was added in manuscript) *Der Freischütze* (1812) is uncertain. The text was based on the tale in Apel and Laun's *Gespensterbuch* (1810), which was also Kind's source for Weber's opera; and though Neuner's score emphasizes lively, unsubtle dances, his overture is a more substantial, well-written piece which could have impressed Weber. Neuner's works consist principally of ballets; he also wrote some sacred choral music, songs and instrumental music, including an Oboe Concerto (1819) and a Symphony in E♭ (1826).

JOHN WARRACK

Neupert. German firm of piano and harpsichord makers. Founded by Johann Christoph Neupert (1848–1921) in 1868 as piano builders, it was among the first German makers to add harpsichords, clavichords and fortepianos to its production, in 1906. The company, which has been based in Bamberg since 1874, had begun to assemble a collection of historical stringed keyboard instruments even earlier, in 1895. Eventually this grew to number more than 250 specimens when it was donated to the Germanisches Nationalmuseum in Nuremberg in 1968 (a number of instruments from the collection considered to duplicate other examples had been transferred to the Händel-Haus Museum in Halle in 1939).

Hanns Neupert (1902–1980) joined the firm as technical director in 1928, after a three-year apprenticeship in piano building and studies in musicology and physics at the universities of Erlangen and Munich. He wrote a number of works dealing with historical stringed keyboard instruments and their revival in the 20th century.

In 1975, Wolf Dieter Neupert (*b* 1937) took over the management of the firm. He has written widely on the reproduction of historical keyboard instruments.

Until the mid-1970s the firm's harpsichord production was generally typical of the pre-1939 modern German school: heavily constructed, open at the bottom, a very long treble scale, with a 16′ register in the larger instruments, registration pedals and, from about 1930, adherence to the so-called 'Bach disposition' (*see* BACH HARPSICHORD). Neupert clavichords and fortepianos are more closely modelled on 18th-century prototypes. Reproduction instruments were occasionally produced before 1970, but it is only since then that a number of models of harpsichords in traditional styles superseded the firm's line of modern instruments; these include copies of historical harpsichords by Antunes, Blanchet and Hemsch, and grand fortepianos by Dulcken and Graf.

For illustration of a Neupert instrument *see* HARPSICHORD, fig.16.

Neuschel [Neuschl, Neischl, Neyschl, Meuschel]. German family of brass instrument makers. The oldest Nuremberg dynasty of brass instrument makers, it was founded by Hans Neuschel the elder (*d* Nuremberg, 1503 or 1504). The city awarded him the title of master coppersmith in 1479 and in 1487 he is recorded as having made a trumpet and slides (*Ziehstücke*) for either trumpets or trombones.

Hans Neuschel the younger (*d* Nuremberg, 1533), a son of Hans the elder, was the most famous member of the family – the Meuschelstrasse in Nuremberg is named after him. He was both an instrument maker and a trombonist. A document from 1491 in which he was appointed Stadtpfeifer (confirmed in 1499), attributed by Jahn to his father, probably applies to him. In 1493 he additionally became a master coppermith. He is said to have improved the art of trombone making in 1498. His instruments carried the hallmark of the imperial crown. By order of Emperor Maximilian I, in 1512, his likeness was included in one of Hans Burgkmair I's woodcuts for the series *Maximilian's Triumphal Procession*. The command to the artist was: 'On the same chariot there shall be five shawm, trombone and crumhorn players; and Neyschl shall be the master'. Pope Leo X ordered silver trombones from him, which he delivered personally. His brother Lienhard (*d* Nuremberg, 1515) worked with him in his shop.

According to Nickel, Georg [Jörg] Stengel (*d* Nuremberg, 1557), 'genannt Neuschel' – he assumed the family name in 1535 – was the adopted son or perhaps the nephew of Hans the younger, from whom he learnt his trade. He later took over the Neuschel workshop, and his privilege of carrying Hans's hallmark was renewed by Emperor Charles V in 1551. Besides making brass instruments, he was also a dealer in woodwind and percussion instruments. He sold 12 'deutsche' and 12 'welsche' trumpets and two military kettledrums to the King of Poland for 200 guilders, and other complete sets of trumpets for similar prices to courts in Berlin, Copenhagen, Dresden, London and Munich. An order placed in 1541 by Duke Albrecht of Prussia, however, was apparently never delivered because that monarch refused to pay more than 60 guilders. A tenor trombone – actually a cut-down bass, of which only the bell end may be regarded as authentic – made by Georg in 1557 is in the collection of the Kunsthistorisches Museum, Sammlung alter Musikinstrumente, Vienna. Nickel has shown that the Neuschels may have been related to the other great family of brass instrument makers, the Schnitzers, as Georg's wife Anna was apparently the widow of the Munich Stadtpfeifer Anton SCHNITZER. Anna's presumed son, Anton Schnitzer the elder, learnt brass instrument making from his stepfather, on whose death he took over the Neuschel workshop.

EDWARD H. TARR

Neusidler [Newsidler, Neusydler, Neysidler, Neusiedler]. German family of lutenists and composers. The first two discussed below are among the leading figures in 16th-century German lute music.

(1) Hans Neusidler (*b* Pressburg [now Bratislava], *c*1508–9; *d* Nuremberg, 2 Feb 1563). Composer, lutenist, intabulator and lute maker. He arrived at Nuremberg early in 1530; on 21 February he received from the city council a residence permit for one year, on 13 September he married a Nuremberg girl, and on 17 April 1531 he took the oath as a citizen. His finances apparently improved as a result of his marriage, for he was soon in a position to purchase a house with a courtyard on the Zotenberg behind the fruit market. He was highly regarded as a lute teacher and between 1536 and 1549 published eight books of lute music. In judicial records of 1550 he was twice described as a lute maker. He and his wife had 13 children, which caused him such financial embarrassment that he was forced to appeal to the city

council for help and eventually to sell his house. His wife died in January 1556, and no doubt because of his many small children he remarried on 4 May; he had four more children by his second marriage, and his second wife died in August 1562.

Together with Hans Judenkünig and Hans Gerle, Hans Neusidler was one of the principal figures in the early history of lute music in Germany. His lutebooks contain a rich and varied repertory, embracing arrangements of German songs, chansons, Italian madrigals, motets, German and Italian dances and free, improvisatory preludes. The pieces vary in difficulty, but apart from the two-part (tenor and bass) arrangements for beginners, reduced from fuller vocal originals, three-part works (descant, tenor, bass) are in the majority; four-part pieces appear only in the third of the 1544 books and in that of 1549. In the second 1536 book, explicitly intended for experienced players, the vocal originals are transformed into instrumental works by means of virtuoso passage-work. Favourite pieces from the earlier books reappear in later ones, usually with modifications.

The first 1536 book, intended for beginners, contains an important introduction on lute playing (Eng. trans. in M. Southard and S. Cooper: 'A Translation of Hans Newsider: *Ein newgeordnet küenstlich Lautenbuch* ... (1536)', *Journal of the Lute Society of America*, xi, 1978, pp.5–25ff). Neusidler's method, designed for use without a teacher, was the first to give exercises marked with fingering for the left hand, thus facilitating the playing of polyphonic music. The placing of one to four dots above each letter of the tablature indicates the stopping finger; one dot indicates the forefinger, two dots the middle finger, and so on. Neusidler also set great store by legato playing; he used a cross (+) beside a letter to indicate a sustained note. He demanded that runs be struck by alternating thumb and first finger, the latter being indicated by a dot, and he considered the correct use of this technique to be the greatest art of lute playing. No particular directions are given for the playing of chords by the right hand. The opening, fundamental pieces in the first 1536 book are marked 'Kleines Fundament' and 'Grosses Fundament'. The ensuing two- and three-part pieces are supplied in part with fingering for the left hand, in part with fingering for the right hand. The last 30 pieces, which are the most heavily ornamented, have no fingerings; nor do the contents of the second 1536 book. Neusidler did not develop his method in his later books but reproduced it more or less complete.

(2) Melchior Neusidler (*b* Nuremberg, 1531; *d* Augsburg, 1590). Intabulator, composer and lutenist, eldest son of (1) Hans Neusidler (not his brother as Koczirz suggested). His date of birth and relationship to his father can be deduced from his portrait at the age of 43 in his *Teütsch Lautenbuch* (1574; see illustration) and the date of his father's marriage (see above). In 1551 he applied to the German emperor for a ten-year privilege for the printing of his works. He soon moved to Augsburg, acquired a citizen's rights there and on 31 December 1552 relinquished his Nuremberg citizenship. He was the leader of the so-called 'stille musica', a group of musicians hired to play on festive occasions in the houses of prominent citizens; he also played with the civic musicians in public festivities. In October 1561 he visited Nuremberg, and because of his father's financial straits he undertook to bring up his three youngest brothers. In 1565 he went to Italy, published two lutebooks at Venice in 1566 and returned to Germany in the same year. In 1574 he supervised the printing of his other lutebook at Strasbourg. He applied unsuccessfully for a post at the Stuttgart court in 1576. On 23 December 1577 he sent Duke Wilhelm V of Bavaria 'some very good dances'. From September 1580 to May 1581 he was employed as a lutenist by Archduke Ferdinand II at Innsbruck. He numbered among his patrons Octavian II Fugger (a member of the leading Augsburg family), in whose house he often played in 1583 and from whom he received alms when he was old and plagued with gout. Tomaso Garzoni mentioned him as a famous lutenist in the 34th discourse of his *Piazza universale* (1587).

Melchior Neusidler: portrait from his 'Teütsch Lautenbuch' (Strasbourg: Jobin, 1574)

Melchior Neusidler's two lutebooks of 1566, which are in Italian tablature, contain arrangements of madrigals, motets, chansons and Italian dances, as well as some mostly imitative ricercares, called fantasias by Phalèse in his French tablature versions (1571) and by Neusidler himself in his *Teütsch Lautenbuch* (1574). The first book includes two dance suites, each consisting of a passamezzo, a saltarello derived from it and then a *ripresa*. In the *Teütsch Lautenbuch* this repertory is augmented by German songs and dances. In making his intabulations Neusidler kept wherever possible to the same number of parts as in the vocal originals and enlivened them with diminutions. In a preface to the 1574 book he described the customary six-course lute as inadequate, for 'now that music has risen to such heights of artistic beauty [one] cannot achieve the full range of pleasing harmonies or fingerings on such a lute'. One could do so, he maintained, only on a seven-course instrument, and he thought it more practical to tune the seventh course only a major 2nd – not a 4th – below the sixth course, which was tuned *Gg*.

INTABULATIONS
all for lute

Il primo libro intabolatura di liuto di … Neysidler … ove sono madrigali, canzon francesi, pass'emezi, saltarelli & alcuni suoi ricercari (Venice, 1566[29]; some repr. 1571[16]; all transcr. in Ger. lute tablature by B. de Drusina, 1573[25])

Il secondo libro intabolatura di liuto di … Neysidler (Venice, 1566[30]; some repr. 1571[16]; all transcr. in Ger. lute tablature, 1573[25])

Teütsch Lautenbuch, darinnenn kunstliche Muteten, liebliche italianische, frantzösische, teütsche Stuck (Strasbourg, 1574[13]); 1 ed. in DTÖ, lxxii, Jg.xxxvii/2 (1930/*R*), 1 in G. Adler, *Handbuch der Musikgeschichte* (Berlin, rev. 2/1930/*R*1961)

Ricercare super Susanne un jour, fantasia super Anchor che col partire, 6 other ricercares, 15 other fantasias, 10 Ger. sacred songs, 8 passamezzi, 7 galliards, 14 intabulations and dances, *CH-Bu*, *D-DEl*, *DO*, *Mbs*, *W*, *PL-Kj*

(3) **Conrad Neusidler** (*b* Nuremberg, bap. 13 Feb 1541; *d* Augsburg, after 1603). Lutenist and composer, son of (1) Hans Neusidler and younger brother of (2) Melchior Neusidler. In 1562 he moved to Augsburg and on 26 January 1564 renounced his Nuremberg citizenship. He still appeared in the Augsburg tax records in 1604. A subsequent report from the master builders to the city council mentioned that 'the late' Conrad Neusidler used to play his lute for weddings and similar festivities. His only extant music consists of some German dances, two intradas and intabulations of 14 German sacred songs, all in the same lute manuscript (*D-W* Aug.fol.18.7 and 18.8), and two intabulations of motets by Lassus and Johann Eckart (*DO* G.I.4). A manuscript appendix to the Deutsche Staatsbibliothek copy (now lost) of Rudolf Wyssenbach's *Tabulaturbuch uff die Lutten* (1550[25]) contained lute versions of two dances, two chorales and a chanson by him.

HANS RADKE/WOLFGANG BOETTICHER, CHRISTIAN MEYER

Neuss, Heinrich Georg (*b* Elbingerode, 11 March 1654; *d* Wernigerode, 30 Sept 1716). German composer, theologian and poet. His father died when he was two years old, therefore after attending the grammar schools at Osterwieck, Quedlinburg and Halberstadt he was forced through economic necessity to become a private tutor at Wernigerode before going on to study theology at Erfurt University from 1677 to 1680. After another period as a private tutor he became a deputy headmaster in 1683, and headmaster in 1684, at Blankenburg; he later became deacon at the church in the Heinrichstadt district of Wolfenbüttel. There, with two other clergymen, he held Pietist conventicles, which, however, were forbidden by ducal edict of 1692. After a brief stay at Hedwigsburg he became travelling preacher to Duke Rudolph August of Brunswick, who made him superintendent at Remlingen in 1695. In the same year he became a doctor of theology of the University of Giessen. Finally in 1696 Count Ernst von Stolberg summoned him to Wernigerode as superintendent and church councillor. He later took lessons with Heinrich Bokemeyer by post, but their correspondence has not survived. He also invented a pitch pipe as well as a tuning device for keyboard instruments, which he called 'mensa'.

Neuss's main work is *Hebopfer zum Bau der Hütten Gottes: das ist Geistliche Lieder, welche zur Andacht, Aufmunterung und Erbauung unsers Christenthums in allerhand Fällen zu gebrauchen* (Lüneburg, 1692, 2/1703). With the 70 or so melodies that he wrote for his poems he made an important contribution to the Pietist continuo song. He also included a few melodies by J.C. Horn and J.P. Krieger and even one or two operatic arias of the time. The *Hebopfer* attracted much attention in its day, and the *Geistreiches Gesangbuch* of Athanasius Freylinghausen (1704–14 and several later editions), the most influential collection of Pietist songs, contains 37 pieces from it. Neuss also published *Brunnenlieder, den Brunnengästen zu Pyrmont mitgeteilt* (Pyrmont, 1706) and is said to have written a wedding song in 1712; he wrote an introduction to Andreas Werckmeister's *Der edlen Musik-kunst, Würde, Gebrauch und Missbrauch* (1691), but a theoretical work sometimes attributed to him, *De musica parabolica*, is probably not by him.

WALTER BLANKENBURG/DOROTHEA SCHRÖDER

Neutralization (i). A means of handling chromatic notes introduced into diatonic contexts, whereby raised notes

ascend and lowered ones descend (in a way analogous to the treatment of the 6th and 7th degrees of the minor scale). Such treatment avoids false relations and results in smoother and more convincing modulation.

The term 'neutralization' was used in this sense, and in the sense of NEUTRALIZATION (ii), by Schoenberg.

JANNA SASLAW

Neutralization (ii). The process of gradually depriving motifs of their distinctive features and 'dissolving' them into less individual components such as scales and arpeggios, as happens typically in cadential or transitional passages; another word for this is 'liquidation'.

The term 'neutralization' was used in this sense, and in the sense of NEUTRALIZATION (i), by Schoenberg.

JANNA SASLAW

Neuwirth, Gösta (*b* Vienna, 6 Jan 1937). Austrian composer and musicologist. He studied with Schiske in Vienna (1954–62) and at the Free University, Berlin (PhD 1968), where his dissertation on Schreker was supervised by Adrio. He has directed the avant-garde theatre group Die Arche, and taught at the Graz Musikhochschule (from 1973) and the Hochschule der Künste, Berlin (from 1983).

Neuwirth's works, influenced by the experiences of his wartime childhood, delight in the *objet trouvé*, follow dream-like logic and rely on detailed proportional structures. Finding in Schreker's music a repressed, dark side to the culturally conditioned notion of progress, he embraced 15th-century numerology as an alternative type of musical thinking. His opera *Eine wahre Geschichte* (1981) juxtaposes rock and chamber ensembles, drawing on his memories of early cinema and the theatre. In *Sei Murrum Phonies* (1990–92) he treats the orchestra both as a totality of polyphonically related solo lines and as a collection of homogenous groups. The Marcel Proust cycle *Gestern und Morgen* (1953–96), a ten-part work for various combinations of instruments and voices, provides the most comprehensive overview of his style: the String Trio (no.4) resembles Rodolphe Berger's *Hier et demain* (around 1895) in its reverberation of 'lost time', a theme also present in *Hier et demain – seul* (no.1) and *Vieux songe* (no.2); the exact proportions of *Schandbuch der gewarnten Liebe* (no.3) reveal the influence of Josquin.

MATTHIAS BRZOSKA

Neuwirth, Olga (*b* Graz, 4 Aug 1968). Austrian composer. Some of her early compositions were performed at the Styrian Autumn Festival in 1985. She studied at the San Francisco Conservatory (1986–7) with Elinor Armer, among others, and took courses in painting and the cinema at the San Francisco Art College. She continued her studies at the Vienna Hochschule für Musik (1987–93), where her teachers included Erich Urbanner, Dieter Kaufmann and Wilhelm Zobl, and in Paris with Tristan Murail and the Stage d'Informatique Musicale at IRCAM (1993–4). She has also been influenced by Adriana Hölsky and Luigi Nono.

Neuwirth's compositions reflect her interests in literature, the cinema (she often employs the compositional equivalents of film clips and montages) and painting (*Hooloomooloo*, 1996–7, for example, paraphrases a painting by Frank Stella), resulting in a style rich with tonal, formal and media-related diversity. Her sound installations and use of video (as in the opera *Bählamms Fest*, 1997–9) illustrate her propensity for multimedia. In her instrumental music electronics alienate or extend sonorities and create what she has described as 'androgynous sounds'. Quasi-organic development and restless fragmentation overlap in large ensemble works. Extreme contrasts, a wide variety of quotations, and an alternation between ironic distance and direct expressivity are also characteristic.

BERNHARD GÜNTHER

Nevada [Wixom], **Emma** (*b* Alpha, nr Nevada City, CA, 7 Feb 1859; *d* Liverpool, 20 Jan 1940). American soprano, mother of MIGNON NEVADA. A pupil of Marchesi, she made her opera début in 1880 at Her Majesty's Theatre, London, in *La sonnambula*, an opera that brought some of her greatest successes (her medallion was later placed with those of Pasta and Malibran on Bellini's statue at Naples). She appeared to great acclaim in Italy and Paris, where her roles included Lucia and Mignon. Returning to the USA in 1884 she appeared at the New York Academy of Music, and, the following year, on alternate nights with Patti. She made several further tours of the USA and Europe, but sang at Covent Garden only in 1887, as Amina and Gounod's Mireille, her intonation and flexibility being admired but not her free treatment of Gounod's score. In England she frequently sang in oratorio, including the first performance of Mackenzie's *Rose of Sharon* (1884), the soprano part of which had been written for her. A noted feature of her concerts were her many changes of dress, culminating in the appearance of her wedding dress, in which she was said almost to 'defy description'. Among her pupils was her daughter Mignon.

J.B. STEANE

Nevada, Mignon (*b* Paris, 14 Aug 1886; *d* Long Melford, 25 June 1971). English soprano, daughter of EMMA NEVADA. Taught by her mother, she made her début at the Teatro Costanzi, Rome, in 1907, as Rosina. She sang with success elsewhere in Italy and in Portugal, and first appeared at Covent Garden as Ophelia in Thomas' *Hamlet* at the opening of Beecham's 1910 winter season. Other London roles included Olympia (*Les contes d'Hoffmann*), Zerlina and Gounod's Marguerite; her final Covent Garden appearance was in 1922. In 1920 she enjoyed considerable success in Paris for her Opéra-Comique performances as Lakmé and Mimì; she sang at La Scala in 1923 and at the Opéra in 1932. She was much admired by Beecham, who described her Desdemona in Verdi's *Otello* as 'the best I have seen on any stage'. Her voice was light and agile, though some (like Beecham himself) considered that her mother had unwisely trained her as a coloratura soprano instead of cultivating the warm mezzo quality of her voice. She made a single record in 1938 singing a song by her godfather Ambroise Thomas which had been given its first performance by her mother.

J.B. STEANE

Nevanlinna, (Otto) Tapio (*b* Helsinki, 7 April 1954). Finnish composer. He studied a variety of subjects at the Sibelius Academy in Helsinki, where he was taught composition by Heininen. He gained his diploma in composition in 1986. His first composition to reach public attention and receive critical acclaim was *Jousipiirros* ('String Drawing', 1983). His output since then has not been extensive and uses modest forces. His style constantly aspires towards clarity and glittering sonorities, avoiding pomposity and sentimentality. His harmonies are on occasion post-serial, and can appear at other times to be rooted in tonality. Many of the titles of his works tellingly reflect his sound-world, such as the solo violin composition *Yli kirkkaan* ('Over the bright', 1983) – which has been widely acknowledged by solo violin competitions during the 1990s – the piano sonata *Lasikaktus* ('The Glass Cactus', 1984) and the orchestral work *Lumikannel* ('The Snow Kantele', 1989); all are of especial brightness and clarity, with sparkling details. Of his orchestral works *Zoom* (1987) is transparent in its orchestration. *Lasikirja* ('The Glass Book', 1991) belongs to the same sound-world as *Lasikaktus*, but it approaches tonality after passages of denser harmonic writing in the manner of Ligeti.

OSMO TAPIO RÄIHÄLÄ

Nevel (Heb.). Ancient Jewish instrument, possibly a lyre. *See* BIBLICAL INSTRUMENTS, §3(vii).

Neves, Ignacio [Inácio] **Parreiras** (*b* ?Vila Rica, *c*1730; *d* Vila Rica, *c*1793). Brazilian composer, singer and conductor active in the province of Minas Gerais during the colonial period. He is first mentioned as a singer in the records of the Brotherhood of Our Lady of Mercy. On 16 April 1752 he entered the Brotherhood of St Joseph of Coloured Men (St Joseph's was the church of the many mulattos in Vila Rica), and took part in its musical affairs. Three works bearing Neves's name are extant: a Credo for mixed chorus and small orchestra (1780–85), divided

into six sections and written in a pre-Classical homophonic style (Curt Lange Archive, Ouro Prêto); a *Salve regina* (copy, dated 1895, in Archive Pão de Santo Antonio, Diamantina) and an incomplete Christmas oratorio, *Oratoria ao Menino Deos para a noite de Natal* (1789), in the vernacular (Music Museum, Mariana), whose two existing parts (soprano and instrumental bass) indicate its large proportions. He also wrote a *Música fúnebre*, for 4 choruses, for the exequies of Pedro III in 1787, but the manuscript is lost.

GERARD BÉHAGUE

Neveu, Ginette (*b* Paris, 11 Aug 1919; *d* San Miguel, Azores, 28 Oct 1949). French violinist. She came of a musical family, and was first taught by her mother. At the age of seven she appeared with the Colonne Orchestra in Paris under Gabriel Pierné. She studied at the Paris Conservatoire, gaining a *premier prix* when she was 11, then with Enescu and for four years with Flesch. In 1935 she won the International Wieniawski Competition (David Oistrakh was placed second) and so opened her brilliant career. Tours of Poland and Germany (1935), the USSR (1936), the USA and Canada (1937) were followed after the war by her London début in 1945, and a London-based year during which her unusually distinguished performances of Classical concertos excited high acclaim. 1947 brought débuts in South America, Boston and New York, and it was on her way again to the USA that she died in a plane crash; her brother Jean-Paul, a gifted pianist and her accompanist, was also killed, and her Stradivari destroyed.

Neveu played with extraordinary fire and passion, but her interpretations were beautifully controlled by an impeccable sense of style, and her technique was equal to her demands. Her recordings of the concertos of Brahms and, particularly, Sibelius remain outstanding. Poulenc composed his sonata for her, rewriting the last movement after her death. Though she was only 30 when she died, she ranks among the finest violinists of her time.

ERIC BLOM/DIANA McVEAGH

Neville Brothers, the. American rhythm and blues and rock performers. The brothers include Art (Arthur Lanon Neville; *b* New Orleans, 17 Dec 1937; keyboards and vocals), Charles (*b* New Orleans, 28 Dec 1938; saxophone and flute), Aaron (*b* New Orleans, 24 Jan 1941; keyboards and vocals) and Cyril (*b* New Orleans, 10 Jan 1948; vocals). Art was the leader of the vocal group the Hawketts who produced *Mardi Gras Mambo*, which was a minor rhythm and blues hit in 1954 and has since become associated with the New Orleans *mardi gras* festival. Aaron found minor success with *Over You* (1960) but had a major hit with the rhythm and blues ballad *Tell it like it is* (1966), which featured his sweetly melismatic tenor and falsetto sound. Art had also formed the influential funk band, the Meters, which worked with the producer Allen Toussaint, recording instrumental dance songs such as *Cissy Strut* (1969), and accompanying hits such as Dr John's *Right Place, Wrong Time* (1973) and La Belle's *Lady Marmalade* (1975); it also became a major influence on white funk groups such as Little Feat and on Jamaican reggae performers. Before the Meters disbanded in 1977, the other brothers joined the group to accompany George and Amos Landry on *The Wild Tchoupitoulas* (1976), a recreation of *mardi gras* ceremonial music. In 1978 the brothers regrouped under their own name and released a series of eclectic albums that incorporated disco influences, rock ballads, calypso and reggae rhythms, and blues-rock, along with their by-now trademark New Orleans funk sound. With the exception of Aaron's collaborations with Linda Ronstadt (*Don't Know Much*, 1989, and *All My Life*, 1990) and his solo hit record, *Everybody plays the fool* (1991), the Neville Brothers have never gained mainstream popular success; they have remained favourites of the 'roots' rock audience.

DAVID BRACKETT

Nevin, [Dale] **Arthur (Finley)** (*b* Edgeworth, PA, 27 April 1871; *d* Sewickley, PA, 10 July 1943). American composer, conductor and ethnomusicologist, brother of ETHELBERT NEVIN. After early musical instruction from his father, an amateur composer and biographer of Stephen Foster, he studied at the New England Conservatory (1889–93). In 1893 he travelled to Europe, where his teachers included Karl Klindworth (piano), and O.B. Boise and Engelbert Humperdinck (composition). Upon his return to the USA in 1897 he taught, composed (often using the pseudonym Arthur Dale) and conducted concerts of his own works.

During the summers of 1902 and 1903 Nevin lived among the Blackfoot Indians of Montana, documenting folklore and transcribing music. His study of Amerindian culture resulted in the composition of the opera *Poia*. In 1907, on an invitation from President Theodore Roosevelt, he presented an illustrated lecture on the work at the White House. Although an American production was not staged, *Poia* was performed at the Royal Opera, Berlin in 1910, the first American opera to be produced in a European court theatre. After dividing his time between composing and conducting at the MacDowell Colony, Nevin joined the music department at the University of Kansas, Lawrence in 1915. During World War I he directed choirs and bands at Camp Grant, Illinois. In 1920 he was appointed director of municipal music and drama in Memphis, where he also conducted the symphony orchestra. He moved to New York in 1922. The last 20 years of his life were spent in declining health.

Although Nevin's compositional style grows out of the salon music of the latter 19th century, his earliest works are characterized by an expansiveness that challenges the predictability of that tradition. His fusion of standard forms and freely tonal harmonies often projects an

Impressionistic style. His instrumental works are almost exclusively programmatic.

WORKS
(*selective list*)

Stage: The Economites (comic op, 3, W.G. Mudie), Sewickley, PA, ?2 Feb 1899; A Night in Yaddo Land (masque, E. Stebbins and W. Chance) (1900); Poia (op, 3, E. von Huhn, after R. Hartley), Berlin, 23 April 1910 ; The Daughter of the Forest (op, 1, Hartley), Chicago, 5 Jan 1918; At the Tavern (op impressionistic, 3, Hartley), Peterborough, ?1920; 4 other stage works

JOHN C. FRANCIS

Nevin, Ethelbert (Woodbridge) (*b* Edgeworth, nr Pittsburgh, 25 Nov 1862; *d* New Haven, CT, 17 Feb 1901). American composer and pianist. His father, Robert Peebles Nevin, was an author, poet and newspaper publisher; his mother, Elizabeth Duncan Oliphant, was a pianist for whom the first grand piano had been carried across the Allegheny Mountains to western Pennsylvania. Ethelbert was the fifth of eight children; his youngest sibling, ARTHUR NEVIN, also was a musician.

Nevin received his first musical training at home, by six could sing and play his own accompaniments at the piano, then studied with music teachers in Pittsburgh. At the age of 11 he wrote his first published work, *Lilian Polka*. During a family year abroad he studied the piano with Franz Böhme in Dresden. In 1881–3 at Boston he studied the piano with Benjamin J. Lang and harmony with Stephen A. Emery, then returned to Pittsburgh to teach and perform recitals, often including his own songs, chamber works and piano pieces.

In 1884–6 Nevin went to Berlin to study the piano with Karl Klindworth and composition with Karl Bial. He also took lessons in composition from Otto Tiersch and studied the piano with Hans von Bülow. He intended a career as a virtuoso pianist, establishing himself in Boston. Dividing his time between composing and performing, he found success with his published works, beginning with *Sketchbook* and then *Water Scenes*, including a piece Nevin himself tired of performing, *Narcissus*. He spent 1891–2 in Berlin and Paris, where he taught the piano, composed and lectured on Wagner. Back in Boston, he taught and performed – interrupted by a nervous breakdown and extended voyage to recover in 1894 – increasingly including performances of his own compositions. Seeking serenity, he removed in 1895–6 to Florence, Montepiano and Venice, where he wrote impressionistic piano suites. He resumed his recitals in New York; he shared one programme in 1898 with Isadora Duncan who 'illustrated in classic dances' his piano pieces *Narcissus*, *Ophelia* and *Water Nymph*. There in 1897 he wrote in one day his most popular song, *The Rosary*. In 1898 Nevin moved back to 'Vineacre', the family's estate, which Willa Cather described in 'An Evening at Vineacre' (quoted in Thompson). He wrote his last successful songs there and died during a winter sojourn in New Haven.

Nevin was a miniaturist who avoided large musical forms and deeper passions, emphasizing instead seemingly simple and spontaneous melody and accompaniments that support without seeking the foreground. He wrote some 55 piano pieces, 85 songs, 20 choral works and miscellaneous other pieces, all distinguished by their sentiment, grace and charm.

DEANE L. ROOT

New Age. An ideology based on the belief in the ultimate cultural evolution of human societies through the transformation of individuals. New Age thought surfaced in alternative healing communities in the USA during the late 1970s; its manifestations involve a great variety of techniques, including sound and music. A particular link is invoked connecting music, meditation and mind. In many cultures specific musical practices are used in religious ceremonies to induce altered states of consciousness (Bourguignon, Thame, Rouget). New Age offers explanations of such phenomena by merging North American shamanic traditions with the scientific approaches of psychology, neurophysiology and particle physics, as well as Indian mystical theories of perception.

As a contemporary musical genre New Age has generated important revenue for the international record industry. The term was introduced to the industry in 1976 with Will Ackerman's first release of acoustic guitar solos, *In Search of the Turtle's Navel*. Retrospectively the first New Age album was Tony Scott's *Music for Zen Meditation* (1964), where, as in so many later New Age albums, Asian and western musical instruments and styles are combined. In other respects the stylistic range is broad. Early New Age pioneers included progressive rock groups (Pink Floyd, Harmonium), jazz musicians (Paul Horn, Paul Winter Consort) and composers of electronic music (Wendy Carlos, Klaus Schultze). New Age also recognizes legacies from French impressionism and minimalism.

DIANE SCHREINER

Newark [Newarke, Newerk], **William** (*b* ?*c*1450; *d* Greenwich, 11 Nov 1509). English composer. In 1477 he was a Gentleman of the Chapel Royal under Edward IV. On 23 November 1480 he was confirmed in possession of a benefice in St Mary's Priory, Thetford, granted him in the previous year. On 6 April 1485 he received a life grant of £20 per annum from the royal manor of Blechingly, Surrey, again with effect from the previous year, and on 1 September 1487 he received a further corrody, in the monastery of St Benets Holme, Norfolk, after the death of the previous incumbent, Gilbert Banaster. On 17 September 1493 he succeeded Laurence Squier as Master of the Children of the Chapel Royal. He was paid for composing a song (unnamed) for Christmas 1493; he was responsible, particularly from 1503 until his death, for devising the annual Christmas entertainment for the court festivities. His appointment as Master of the Children was renewed on 23 May 1509, soon after the accession of Henry VIII, but he died only six months later. He made his will on 5 November (proved 13 December) and was buried in Greenwich.

Newark's seven known compositions are all secular songs and survive, one incomplete, in the oldest layer of the Fayrfax Book (*GB-Lbl* Add.5465). Four are for two voices and three are for three, though in one of the latter the third part is optional. A further anonymous two-voice song, *Ah my heart*, bracketed in the same manuscript, has been ascribed to him by Stafford Smith, an idea supported also by Stevens.

Newark's songs reveal a competent minor composer whose works are often charming, but who lacked the intensity, staying power and structural sense of Cornysh or Fayrfax. He chose amorous complaints for his texts, largely in the English rhyme-royal ballad stanza or its derivatives. As was common in settings of such poems, the vestigial musical rhyme of the old ballad proper often appears at the end of each section. Newark frequently made play with florid sesquialtera passages – which may have been intended for instruments – at phrase endings; he sometimes used simple variation techniques. He was fond of imitation, but did not take up the opportunity for canon offered by the text of *The farther I go, the more behind* (a poem once attributed to Lydgate but now thought to be the work of John Halsham). *Thus musyng*, probably his finest song, is also found in two fragmentary manuscripts.

WORKS
all in GB-Lbl Add.5465

Edition: *Early Tudor Songs and Carols*, ed. J.E. Stevens, MB, xxxvi (1975) [incl. all songs]

But why am I so abusyd?, 3vv; O my desyre, 2vv (inc., but can be reconstructed); So fer I trow, 2vv; The farther I go, the more behind, 2vv; Thus musyng, 3vv, also in *GB-Cfm* 1005 (frag.) and *US-NYp* Drexel 4183 (frag.); What causyth me wofull thoughtis, 2vv; Yowre counturfetyng, 3vv
Ah my heart, 2vv, anon., possibly by Newark

Newcastle upon Tyne. City in England. The formation in 1961 of the Northern Sinfonia, the first permanent chamber orchestra in Britain, and the related creation of an independent regional arts association, Northern Arts, has given professional music in the city even greater significance than it had in the time of Charles Avison in the 18th century and W.G. Whittaker in the early 20th

century. The vigorous cultivation of amateur and popular music has centred on the literature and lore of the Northumbrian small pipes, Tyneside folksong, competitive festivals and highly accomplished male-voice choirs and brass bands. The latest performance of a mystery play took place in Newcastle in 1599 and the Town Waits Band survived until 1793.

St Nicholas's (14th century), the cathedral since 1882, has often been used for concerts; its most famous organist was Avison (appointed 1736). St Thomas's, built by Dobson in 1825, is used for organ recitals and broadcasts. Opera is given in the Theatre Royal in Grey Street (1837), now owned by the corporation. It is visited by leading opera companies, including Glyndebourne, and the productions of locally based organizations such as Northern Opera are staged there. The refurbished Tyne Theatre (1867) retains its original stage machinery. Various 18th-century rooms were at one time used for music, including the Old Assembly Rooms, which were built in 1774 and still exist. Avison launched his fortnightly winter subscription concerts in 1735; these flourished until his death in 1770 and introduced much unfamiliar music to Newcastle, including Scarlatti sonatas and works by Rameau and Avison's friend and colleague Geminiani. William Herschel also led a weekly concert 'in a garden after the style of Vauxhall' in the 1760s. The City Hall (1929) provides the largest capacity (over 2000) for musical events but smaller concerts are given in the King's Hall (1904) and in the university theatre (1970), both seating about 500.

The Newcastle SO (professional and amateur, often conducted by visiting celebrities) and the Newcastle PO (staff and students of the Newcastle Conservatory) flourished before 1939. Attempts to establish a resident professional orchestra were unsuccessful until 1958, when the enterprise of Michael Hall (then a music student), with strong local support, led to the formation of the Northern Sinfonia Orchestra; it began in 1961 with 19 players and soon expanded. Its principals perform regularly as concerto soloists, chamber works are included in their programmes and ensembles drawn from the orchestra give recitals of chamber music. New works have been commissioned and soloists of international standing play with the orchestra. Concerts are given in the north as well as in other parts of Britain (including London) and overseas. The Northern Sinfonia Chorus was founded in 1973. Among the Northern Sinfonia's artistic directors have been Tamás Vásáry (1979–82), Richard Hickox (1982–90) and Heinrich Schiff (1990–).

In 1880 well-known local families and business men founded the Chamber Music Society to promote recitals; it is perhaps the oldest such society in Britain.

The Newcastle and Gateshead Choral Union (founded in 1888, and under its present title since 1896) was first conducted by the organ virtuoso James Preston. Later, many fine musicians including Hans Richter, Parry and Vaughan Williams conducted it, and Henry Coward was chorus master. W.G. Whittaker, also one of its prominent conductors, made a remarkable musical impact on his native city before moving to Glasgow in 1927. He founded the Newcastle upon Tyne Bach Choir Society, linked it with Armstrong College (now the university) and created a reputation in England and abroad for pioneering revivals of earlier English music. His friendship with composers like Holst and Bax and his scholarly advocacy of Bach gave his programmes distinction.

Festivals in the late 18th century (mostly Handelian) were conducted by the organist Matthias Hawdon, with singers from Lancashire and Durham Cathedral. In 1909 Busoni and Bantock conducted festival performances of their own works in the Old Town Hall and the Palace Theatre. An annual Newcastle Festival was established in the 1960s.

Although Newcastle University was part of Durham University until 1962 there was always a separate department of music in Newcastle. Successive directors from C.S. Terry to Chalmers Burns vigorously encouraged the study and performance of important works. A chair of music was established in 1971; the first professor was Denis Matthews. In recent years the university music department has been greatly enlarged, and now supports a large orchestra and choir, a comprehensive lunchtime concert series, early music groups and an electronic music studio. The Conservatoire of Music in Jesmond was active from 1897 to 1938; its most successful principal was Edgar Bainton (1912–33), who had a staff of prominent local and visiting teachers and performers, including Arthur Milner and Carl Fuchs. In 1964 a school of music was founded which rapidly expanded as part of the College of Further Education.

A number of scores of works by William Shield (who was born near the city but worked elsewhere), and works by Avison and other local composers, are in an important collection of music begun in 1913 by the Literary and Philosophical Society. These are housed in the city public library.

PERCY LOVELL

Newcater, Graham (*b* Johannesburg, 3 Sept 1941). South African composer. He started formal studies with Arthur Tempest (clarinet) and Fritz Schuurman (conducting) in 1955. While at secondary school some of his compositions were shown to Arnold van Wyk; for three years Newcater continued to send him works for comment. After an apprenticeship to a vehicle firm (1957–60), he returned to Johannesburg in 1960, studying privately with Gideon Fagan. A SAMRO scholarship enabled Newcater to study with Fricker at the RCM, where he completed his Symphony no.1. After a period at the South African Broadcasting Corporation (1964–6), he returned to England on a Vaughan Williams Award to study with Searle. He has subsequently been active as a freelance composer and conductor. His mature works display a rigorous and intellectual approach to formal aspects. Although he often uses sets by Webern, his use of serial technique is highly individual, with 2nds and 3rds predominant intervallically. In *Songs of the Inner Worlds* (1991), which employs the set of Webern's orchestral Variations, op.30, these intervals also become the principal elements of a rather static harmony. The best known of his ballets is *Raka* (1967). *Variations de Timbres* (1968) is an example of the concern with tone-colour evident in many of his works. Further information is given in Mary Rörich: 'Graham Newcater', *Composers in South Africa Today*, ed. P. Klatzow (Cape Town, 1987), 103–30.

JAMES MAY

New College Motet Fragments (*GB-Onc* 362). *See* SOURCES, MS, §VI, 3.

Newcomb, Anthony (Addison) (*b* New York, 6 Aug 1941). American musicologist. He took the BA at the University of California at Berkeley in 1962 and subsequently studied the harpsichord with Gustav Leonhardt on a Fulbright Scholarship to Holland. Returning to the USA, he enrolled as a graduate student at Princeton University (MFA 1965, PhD 1969), where his teachers included Oliver Strunk, Arthur Mendel and Lewis Lockwood. In 1968 he became a member of the music faculty at Harvard University, and in 1973 he joined the faculty of the University of California at Berkeley; in 1990 he became dean of arts and humanities.

Newcomb's initial field of research was Italian music from 1540 to 1640. His dissertation and subsequent writings centre on the Italian madrigal of the late 16th century, especially the music associated with the *tre dame* of Ferrara in the 1580s. His transcription and translation of correspondence involving Gesualdo sheds light on musical activities and performing practice in Ferrara, Florence and Naples. His later work reflects an interest in Wagner's music and writings. He has also undertaken research on instrumental music from 1800 to 1918 and the issue of meaning.

PAULA MORGAN

New Complexity. A term that became current during the 1980s as a means of categorizing the music of Brian Ferneyhough, Michael Finnissy and a number of younger composers, the majority of them British, all of whose music was held to share certain aesthetic and formal characteristics. In particular they sought to achieve in their work a complex, multi-layered interplay of evolutionary processes occurring simultaneously within every dimension of the musical material. Since composers within the New Complexity usually chose to realize their music through acoustic instrumental resources, their scores necessarily pushed the prescriptive capacity of traditional staff notation to its limits, with a hitherto unprecedented detailing of articulation. Microtonal pitch differentiations, ametric rhythmic divisions and the minutiae of timbral and dynamic inflection were all painstakingly notated; the technical and intellectual difficulties which such notations present for performers were regarded as a significant aesthetic feature of the music.

Although many of the composers involved were British, initial support for the New Complexity came principally from performers and promoters of new music in continental Europe. Both Ferneyhough and Finnissy became internationally prominent in the early 1970s through performances of their work at the Gaudeamus Music Week; later developments of the New Complexity were particularly closely associated with the Darmstadt summer courses where, between 1982 and 1996, Ferneyhough was coordinator of the composition programme. During that period avowedly 'Complex' younger composers such as Chris Dench, James Dillon, Richard Barrett, Klaus K. Hübler and Roger Redgate were all awarded Darmstadt's Kranichsteinpreis for composition. The presentation of their work within the Darmstadt courses was often accompanied by polemical debates whose trenchant modernism echoed that of the postwar serialist composers of the Darmstadt School, and in 1997 Claus-Steffen Mahnkopf went so far as to propose that the composers of the New Complexity be designated the 'Second Darmstadt School'. By then, however, the composers who had been allied to the New Complexity were a geographically disjunct group spread across North America, Europe and Australia, few of them were any longer involved in the Darmstadt courses, and the expressive and technical differences between their various musics outweighed any remaining aesthetic common ground.

CHRISTOPHER FOX

Neweland (*fl* c1425–50). Composer, presumably English. His Sanctus (ed. in Meyer-Eller, ii, 48) survives in an 'English' fascicle of *I-AO* (third layer, no.182). Guillaume de Van misread the name as 'Nelbeland'. Nothing is known of Neweland's life. His three-voice Sanctus is a setting of Sarum no.5 with the chant in the tenor (also in the duets); the repeat at 'Osanna' receives a varied treatment. The work shows him to have been a graceful composer with remarkable powers of melodic extension.

BRIAN TROWELL

Newerk, William. *See* NEWARK, WILLIAM.

New German School (Ger. *Die neu-deutsche Schule*). A group of progressive musicians in the mid-19th century. The name was coined by Franz Brendel in an address to the first conference of German musicians (*Tonkünstler-Versammlung*) in Leipzig in 1859; it was offered as an alternative to the popular critical epithet 'music (or musicians) of the future'. The spiritual fathers of this 'school' were Wagner, Liszt and Berlioz, although only Liszt had any extensive dealings with the numerous younger composers, performers and critics who made up its ranks. Despite objections that these leading figures were not uniformly 'German', and that neither Wagner nor, especially, Berlioz took any active role in fostering the identity of such a school, their names were consistently linked in the 1850s as the most significant proponents of musical progress. The triumvirate contributed models of new musical genres (the programme symphony, the symphonic poem, the music drama), innovations in harmonic language and orchestral technique, and new approaches to large-scale form involving motivic transformation, wide-ranging modulation and development, and principles of cyclic unity. Many of these innovations, whether in the context of vocal-orchestral or purely instrumental music, were understood to be motivated by the expression of 'poetic ideas', and the rapprochement of music with a broader intellectual culture was a unifying aim of the new school.

Aside from Brendel, many of the figures most active in propagating the ideas of the New German School were pupils or disciples of Liszt during his years at Weimar: Hans von Bülow, Joachim Raff, Louis Köhler, Felix Dräseke, Richard Pohl, Peter Cornelius, Hans and Ingeborg von Bronsart, and Carl Tausig. Although only Brendel and Pohl pursued journalism as a principal vocation, nearly all the New Germans were active as critics as well as musicians, contributing to Brendel's *Neue Zeitschrift für Musik* (the leading organ of musical progressives since Schumann's day) and more specialized progressive journals, such as the *Anregungen für Kunst, Leben und Wissenschaft* (edited by Brendel and Pohl from 1856 to 1861). The stimulus of Wagner's tracts on artistic revolution and reform from 1849 to 1852, and of Liszt's numerous essays of the 1850s (particularly 'Berlioz and his Harold-Symphony'), was as least as important to the critical activities of the New Germans as was the music of these composers. By the time of Brendel's death in 1868, however, Wagner and Liszt had grown apart, Berlioz had been for some time in a state of virtual retirement (he died the following year), and the New German School was already losing its cohesive identity. From the 1870s much of what this progressive party had stood for became gradually assimilated into the mainstream of European musical culture. The Lisztian genre of the symphonic poem, the innovations and 'reforms' of the Wagnerian music drama, and the extended chromatic-harmonic vocabulary common to both genres were all accepted elements in the status quo of musical 'modernity' by the end of the century.

THOMAS S. GREY

New Guinea. A Pacific island. The western portion belongs to the Republic of Indonesia, the remainder is part of the independent nation Papua New Guinea. For a discussion of its music, *see* MELANESIA, §8.

New Hebrides. *See* MELANESIA, §4.

Newlin, Dika (*b* Portland, OR, 22 Nov 1923). American musicologist and composer. She took the BA at Michigan State University (1939) and MA at the University of California at Los Angeles (1941); she then worked at Columbia University with Hertzmann and Lang and took the PhD in 1945. At the same time she studied composition with Arthur Farwell, Schoenberg and Sessions; her piano teachers included Serkin and Artur Schnabel. She subsequently taught at Western Maryland College (1945–9) and Syracuse University (1949–51), and in 1952 she joined the faculty of Drew University, where she was founder and head of the music department. In 1965 she became professor of music at North Texas State University, and in 1978 she moved to the Virginia Commonwealth University, where she was made professor and composition coordinator.

Newlin's research has centred on Austrian composers of the late 19th and 20th centuries, particularly Bruckner, Mahler, Schoenberg, Berg and Webern. Her book on Bruckner, Mahler and Schoenberg demonstrates the relationship between the three composers as heirs of the Romantic tradition. She has edited and translated some of the major writings by and about Schoenberg. Her interests include electronic and computer music, multimedia and experimental musical theatre, and she is active in all these areas as composer, teacher and performer. She

has written songs, piano and chamber works, three operas and a symphony for chorus and orchestra.

PAULA MORGAN

New London Consort. English ensemble of singers and instrumentalists, specializing in medieval, Renaissance and Baroque music. Founded by its director, Philip Pickett, in 1981, it has been involved in some of the most colourful and distinctive projects in the resurgence of early music in England. Its repertory ranges from early chant to Bach and encompasses Renaissance dance, early English opera, Italian *seconda pratica*, especially Monteverdi, and music by Biber. The group has made many recordings, and its musical activities are often sharply defined within a broad historical and educational context. Technical virtuosity and tight ensemble are integral to its reputation, which has been enhanced by a regular team of versatile specialist singers including Catherine Bott and Michael George.

JONATHAN FREEMAN-ATTWOOD

Newman (*fl* ? 3rd quarter of 16th century). English composer. Although a number of musicians named Newman were employed at the English court, none of them seems likely to have been this composer. A fancy and a pavan for keyboard survive in the Mulliner Book (ed. in MB, i, 1951, 2/1954); there is also a version for lute of the fancy as well as another two pavans and a galliard (ed. in lute tablature by J. Robinson, 'The Complete Lute Music Ascribed to Master Newman', *Newsletter of the Lute Society*, no.38, 1996, music suppl.).

There is little in Newman's music to distinguish him from other minor composers of his time. It is pleasant and competently written in the traditional forms in a simple polyphonic style. Where divisions are present they are sometimes reduced to virtually a single-line pattern. The keyboard pavan is unconventional in having four strains and no ornamented repeats. It probably originated as a lute piece, while the fancy may have been written first for a three-part instrumental consort.

DIANA POULTON/ANDREW ASHBEE

Newman, Alfred (*b* New Haven, CT, 17 March 1900; *d* Los Angeles, 17 Feb 1970). American composer and conductor. He was a piano prodigy, making his first public appearance at the age of eight. In 1914 he was offered a piano scholarship by Stojowski for a place at the von Ende School of Music, New York. Family poverty, however, compelled him to abandon a concert career while still young; instead, he played in Broadway theatres and on vaudeville circuits. He studied conducting with William Daly and was the youngest conductor ever to appear on Broadway. As well as serving as music director for the 1920 *George White Scandals* and for the *Greenwich Village Follies* of 1922 and 1923, he conducted shows by George and Ira Gershwin, Otto Harbach and Rodgers and Hart. In 1930 Newman went to Hollywood where he was soon appointed music director at United Artists. He worked primarily in film musicals but gradually became more interested in original composition, especially after the success of his score for *Street Scene* (1931). From 1940 to 1960 he was head of the 20th Century-Fox music department and divided his time between composing and supervising and conducting film musicals. Other activities included recordings with the Hollywood Bowl orchestra and guest conducting appearances with various American orchestras. Altogether Newman worked on more than 230 films, winning nine Academy awards and 45 nominations.

As one of the key figures in the history of American film music, Newman was among the first screen composers to establish the romantic symphonic style of Hollywood film scores, prevalent from the early 1930s to the mid-50s. In comparison to composers such as Korngold and Max Steiner, he was essentially self-taught as a composer; the few private lessons he took with Schoenberg in Hollywood had no appreciable effect on his musical style. His genuine musical talents and fine dramatic sensibility, however, enabled him to learn on the job. When he encountered his first truly challenging scores around 1935 he began to show a knack for developing motivic material and an appreciation for the sound track's potential to incorporate new and interesting musical effects. By 1939 his music had developed into the style with which his name is associated. Well-wrought and full-textured, his scores sometimes (especially in the string writing) attain a high degree of lyrical and dramatic expressiveness. The manner in which certain sequences follow overt or hidden implications of the dialogue resembles the leitmotivic procedures of Wagner and Strauss.

Newman's scores for *Wuthering Heights*, *The Prisoner of Zenda*, *The Hunchback of Notre Dame*, *Captain from Castile* and *The Robe* represent Hollywood film music at its best. As a conductor he had a great flair for moulding music to the texture and rhythm of a picture and for

coordinating the elements involved in the preparation and recording of a film musical. In his capacity as studio music director he encouraged the development of new ideas for improving the quality and technique of recording; the so-called Newman System for music synchronization, devised at United Artists during the 1930s, is still in use today.

WORKS
(*selective list*)
all film scores

Street Scene, 1931; We Live Again, 1934; The Dark Angel, 1935; Beloved Enemy, 1936; The Prisoner of Zenda, 1937; Beau Geste, 1939; Gunga Din, 1939; The Hunchback of Notre Dame, 1939; Wuthering Heights, 1939; Young Mr. Lincoln, 1939; Brigham Young, 1940; The Song of Bernadette, 1943; Wilson, 1944; Captain from Castile, 1947; The Snake Pit, 1948; Prince of Foxes, 1949; Twelve O'clock High, 1949; The Robe, 1953; The Egyptian, 1954, collab. B. Herrmann; A Man Called Peter, 1955; Anastasia, 1956; The Counterfeit Traitor, 1961; How the West Was Won, 1963; The Greatest Story Ever Told, 1965; Nevada Smith, 1966; Airport, 1969

CHRISTOPHER PALMER/FRED STEINER

Newman, Chris(topher) (*b* London, 1957). English composer, singer, writer and visual artist. After studying at King's College, London, he moved to Cologne in 1979 to study with Kagel. Since then he has lived in Germany.

Fundamental to Newman's entire output is a refusal to acknowledge boundaries, either between life and art or between different categories of artistic production: the texts of his many songs are intimately connected with his own day-to-day preoccupations; his work with 'Chris Newman and Janet Smith', an ensemble he describes as a rock group, demonstrates that he sees no useful distinction between popular and serious music. As a result, his work resists easy categorization, although Newman himself acknowledges kinship with musicians as different as Sibelius, John Lydon and Christian Wolff, and in other media with artists such as Joseph Beuys and Bruce Nauman.

His work in all media shares the same fascination with 'the way things really are' (the subtitle of his Piano Sonata no.2 for piano and offstage string quartet): the feel of words in the mouth, the sensation of colour or of instrumental sound. His musical materials are disconcertingly familiar – the melodic figures, rhythmic patterns and harmonic formulations of the Classical and Romantic musical vocabulary – but once stripped to their functional essentials and reordered within his own quirkily impulsive syntax, they become disorientatingly unfamiliar and, as Newman puts it, we are able to experience them not as 'abstractions' but 'as a substance'.

CHRISTOPHER FOX

Newman, Ernest [Roberts, William] (*b* Everton, Lancs., 30 Nov 1868; *d* Tadworth, Surrey, 7 July 1959). English writer on music. The most celebrated British music critic in the first half of the 20th century, he was the child of a tailor, Seth Roberts. He won a scholarship to Liverpool College from which he proceeded to Liverpool University. Intended for the Indian civil service, he was medically advised not to contemplate residence there, and in 1889 he entered the Bank of Liverpool as a clerk. He had no formal musical education but had taught himself to play the piano 'after a fashion' and later declared that he had been able to read music as easily as books. He spent his 14 years as a bank clerk reading and acquiring a wide knowledge of many subjects, including music, and attaining complete or partial mastery of nine foreign languages. By 1889 he was contributing articles to the *National Reformer*, on philosophy and literature first, then to other periodicals on these subjects and on music. His approach to the arts was intellectual rather than sensual and, as an apostle of rationalism and champion

of progressive ideas, he regarded himself as 'a new man in earnest' and therefore adopted the pseudonym Ernest Newman.

In 1894 he married. A year later he published his first book, *Gluck and the Opera*, which led his publisher, Bertram Dobell, to commission *A Study of Wagner* (1899). Granville Bantock, when appointed director to the Midland Institute School of Music in Birmingham, invited Newman, a Liverpool acquaintance, to teach singing and musical theory there; Newman moved to Birmingham in 1904. A year later he was appointed music critic of the *Manchester Guardian*. He was quick to alert readers to the qualities of Bruckner and Sibelius when Hans Richter introduced their music, as well as to those of Richard Strauss and Elgar. Newman wrote monographs on both these composers while their music was still new to Britain, as well as a remarkably perceptive early study of Hugo Wolf.

After a year in Manchester Newman was appointed critic of the *Birmingham Daily Post*, a position he retained until 1918, while continuing to write many occasional articles, to teach and to write books. Much of his most brilliant and perceptive musical criticism dates from these years. Newman's wife died in 1918. A year later he moved to London as music critic of the Sunday newspaper *The Observer*. In 1919 he married Vera Hands, a former music student at the Midland Institute. In 1920 Newman was persuaded to join the *Sunday Times*; he remained with that newspaper, apart from a five-month stint in 1923 as guest critic of the *New York Evening Post*, until his retirement in 1958, reviewing musical events and contributing a long, thoughtful weekly article. During these years he was also providing programme notes for Hallé concerts, adjudicating at music festivals, writing weekly music articles for the *Manchester Guardian* and, from 1923, the *Glasgow Herald*; from 1930 he made weekly broadcasts for BBC radio, as well as writing a sporting column for the *Evening Standard*. Despite all this journalistic activity he reserved his chief energies for his books.

Newman's philosophy of criticism is summed up in his keenly analytical yet far-sighted treatise *A Musical Critic's Holiday* (1925); his method of analysis in depth is well exemplified in *The Unconscious Beethoven* (1927). His major work is the four-volume *Life of Richard Wagner* which occupied him from 1928 until 1947, and it has still not been surpassed although research has uncovered much that is new. His widely read *Opera Nights* (1943), *Wagner Nights* (1949) and *More Opera Nights* (1954) had their origin in a series of 'Stories of the Great Operas', written from 1927 for publication in fortnightly instalments; subsequently Newman expanded these into detailed analyses with historical commentary of excellent informative and entertainment value.

As a critic, Newman's objective was complete scientific precision in the act of evaluation. Copious reading, a well-ordered system of notebooks, and a forensic style of argument developed from his early training in classical literature and philosophy, carried him far in this aim. Yet what continued to win him admirers was the lively humanity of his writing, which was also reflected in his style of life as much as the well-stocked mind and penetrating judgment. His major books remain a substantial monument, but his journalistic occasional writings, as collected in *A Musical Motley* (1919), the volumes *From the World of Music* (1956–8) and *Testament of Music* (1962), as cogently explain his international standing for so many years.

WILLIAM S. MANN/R

Newman, Randy (Gary) (*b* Los Angeles, 28 Nov 1943). American composer, singer and pianist. He was born into a musical family: three of his uncles – Emil, Alfred and Lionel Newman – composed and conducted film scores in Hollywood. He started to write songs when he was 16 and became a staff songwriter for the Metric music company in California, and also studied music at UCLA but left during his senior year. Some of his early songs were performed by Gene Pitney, Dusty Springfield, the Fleetwoods and the O'Jays, but his first widely recognized song was *I think it's going to rain today*, recorded by Judy Collins in 1966. Newman began to record his own songs in 1968. On *Randy Newman* (Rep., 1968), the contrast between the lush orchestrations and Newman's drawling, deadpan vocal style heightened the irony of his lyrics. Formally his songs range from the standard pop structure of verse and chorus to through-composed pieces. *12 Songs* (Rep., 1970), and all the later albums, use conventional rock instrumentation, and draw not only on rock styles but also on blues, jazz and show tunes, as well as classical sources.

Newman is a slow songwriter, recording an album every two or three years, and then making a tour. His 'Short people' – a wry, sardonic novelty song about prejudice – from *Little Criminals* (Rep., 1977) reached no.2 in the US pop chart in 1978. *Born Again* (WB, 1979)

and *Trouble in Paradise* (WB, 1983) showed a familiarity with current pop styles, and the latter included parodies of the styles of Paul Simon (who sings on *The Blues*) and Billy Joel. Rickie Lee Jones, Bob Seger and members of Fleetwood Mac and the Eagles have recorded with Newman. He has also composed and arranged film scores, with Academy Award nominations for those to *Ragtime* (1981), *Parenthood* (1989), *Avalon* (1990) *Toy Story* (1995) and *Toy Story 2* (1999).

JON PARELES

Newman, William S(tein) (*b* Cleveland, 6 April 1912; *d* Chapel Hill, NC, 27 April 2000). American musicologist and pianist. He studied piano at the Cleveland Institute of Music (1931–3) and composition and music history at Western Reserve University, earning the BS in 1933, the MA in 1935 and the PhD in 1939. From 1940 to 1941 he was enrolled at Columbia University as a postdoctoral student, working with Paul Henry Lang and Erich Hertzmann. He began teaching at the University of North Carolina in 1945; in 1962 he was appointed Alumni Distinguished Professor of Music and he was president of the AMS from 1969 to 1970. He retired in 1977.

Newman's principal interest is the music of the 17th century to the 19th, particularly performing practice and the development of the sonata. His three-volume *History of the Sonata Idea* is a study of the term and its applications from the Baroque up to the early 20th century. Each volume examines the general nature of the sonata in the period under consideration – its social function, geographical spread, instrumentation and structure – then surveys individual composers and their works. The extensive references and large body of information contained in the *History* make it an indispensable bibliographical tool and a basic text for the student of instrumental music.

Newman has performed throughout the USA as a pianist, both in solo appearances and with chamber groups and orchestras. His interest as a pianist and a scholar in questions of performing practice is reflected in his later writings, which include two monographs on Beethoven (1971; 1988) and many articles.

PAULA MORGAN

Newmarch [née Jeaffreson], **Rosa** (*b* Leamington, 18 Dec 1857; *d* Worthing, 9 April 1940). English writer on music. A granddaughter of the playwright James Kenney, she married Henry Charles Newmarch in 1883, and all her writings appeared under her married name. In 1897 she made the first of a series of visits to Russia, where she worked at the Imperial Public Library of St Petersburg under the supervision of Vladimir Stasov. Her numerous articles and lectures on Russian music and art in general did much to further in England an interest already awakened by Tchaikovsky's music. Newmarch's articles on Russian composers, contributed to *Grove's Dictionary*, second edition, were to many English musicians the first source of information about the aims and achievements of Russian nationalists, and her libretto translations helped to make their operas accessible to the British

public. Her last visit to Russia was in the early summer of 1915; when political events made access to the country difficult she directed her interest to western Slavonic music, particularly that of the Czechs and Slovaks, and enthusiastically took up the cause of emerging Czech composers including Janáček, Suk and Vycpálek. It was her initiative, for instance, that brought Janáček to England in 1926; her correspondence with the composer (published 1988) provides important data on this visit. Newmarch was a dedicatee of Janáček's Sinfonietta.

Her two pioneering books on Tchaikovsky (1900 and 1906) rendered invaluable service to that composer's early cause, though her 1906 translation of Modest Tchaikovsky's biography and letters of his brother is unreliable. She also translated several books on composers from German and French and from 1908 to 1927 she was an official programme writer for the Queen's Hall Orchestra.

New Music [New Music Edition]. American publishing and recording venture, founded in California by Henry Cowell. The quarterly publication New Music, issued first in 1927, was the only series of its day dedicated solely to the publication of new scores. These pieces, described by Cowell as 'non-commercial works of artistic value', often embraced advanced and innovatory compositional techniques for which publishing houses had little sympathy. The main series was supplemented by an Orchestra Series (1932–9) and occasional Special Editions. Many of the published pieces were also heard in San Francisco at concerts of the New Music Society (1925–36; founded by Cowell). In 1934 Cowell established New Music Quarterly Recordings. The discs, all first recordings, were more widely distributed than the scores, which were available only by subscription.

Cowell served as the head of all New Music projects until 1936. The recordings continued to be issued until 1942 under the direction of Otto Luening, while the New Music publications (New Music Edition from 1947) were edited by Gerald Strang, again by Cowell (1941–5), and later by Lou Harrison, Frank Wigglesworth and Vladimir Ussachevsky. Among the composers to be published in *New Music* (often for the first time) were Babbitt, John Becker, Paul Bowles, Brant, Cage, Carter, Chávez, Copland, Cowell, Crawford, Creston, Feldman, Harrison, Ives, Luening, McPhee, Nancarrow, Piston, Riegger, Rudhyar, Ruggles, Strang, Thomson, Varèse and Wolff. Although Americans dominated, Schoenberg, Webern and several Latin-American and Russian composers were also included. In 1954 New Music Edition experienced financial difficulties after the death of Charles Ives, who had for many years been its patron, and in 1958 it was transferred to Presser.

EMILY GOOD/DAVID NICHOLLS

New Musical Fund. British society established on 16 April 1786 to provide relief to infirm musicians, their widows and their children. Its principal founder was the music publisher George Smart who, according to Dibdin, after being rejected for membership of the Fund for Decay'd Musicians (now the Royal Society of Musicians) read Edward Miller's *Letters in Behalf of Professors of Music, Residing in the Country . . .* (London, 1784), deploring that fund's policy of excluding musicians who resided outside London. Smart, together with some colleagues, decided to establish a new musical fund, admitting provincial members and not requiring members to practise music to the exclusion of other professions. (A petition of 1789 to King George III, including the signatures of numerous executives and members of the fund, is in *GB-Lpro* H.O. 5520/29.)

The income of the New Musical Fund was derived from donations, honorary life subscriptions of ten guineas, annual subscriptions of one guinea and the proceeds of an annual benefit concert. The fund received regular donations from the nobility, and was one of four societies that shared equally the £6000 profit of the Royal Musical Festival of 1834. The sums paid out varied; widows received £25 per annum in 1794, but only £12 in 1821. Children of deceased members were supported to the age of 14, when they were bound apprentices.

From 1815 the annual benefit concerts were conducted by the founder's son Sir George Smart (some of his documents concerning the fund are in *Lbl* c.61.g.20). At the time of the final concert (1841) the fund had distributed about £20,000 (a list of expenditures is in *Lbl* Add.42225, ff.104*v*–105*v*); it was dissolved in 1842.

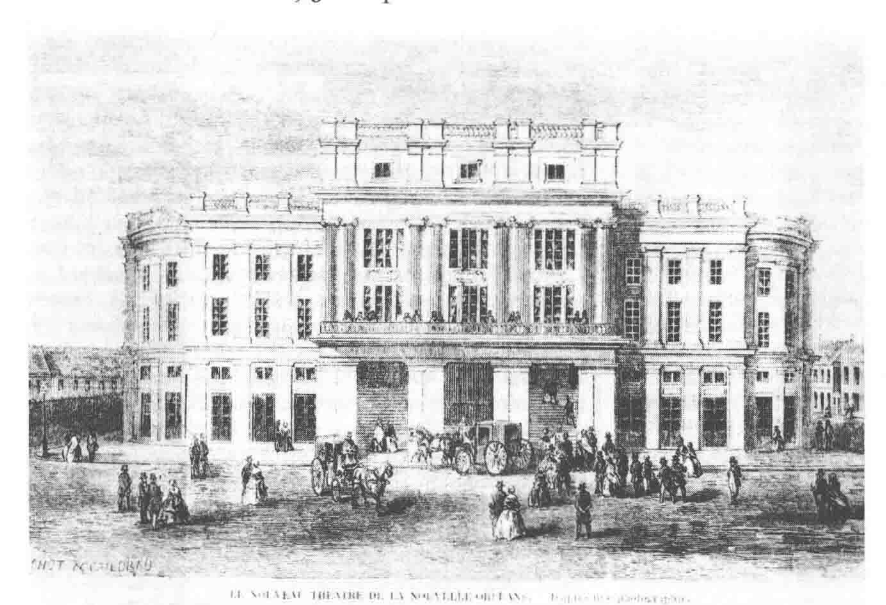
MICHAEL KASSLER

New Order. *See* JOY DIVISION.

New Orleans. American city in Louisiana. Founded in 1718, it was the capital of French colonial Louisiana until 1762 and then in Spanish possession until 1800. It reverted briefly to French rule before it became a US territory as part of the Louisiana Purchase in 1803. Few towns in the USA have developed and preserved as rich and individual a musical tradition. A primary reason for this is its position at the mouth of the Mississippi river; it was the principal harbour serving the vast country to the north, from which raw materials were exported and to which manufactured goods were imported. In the 18th century and much of the 19th, New Orleans was a northern point of the French and Spanish Caribbean trade routes, which had a profound effect on its musical culture. So too did the city's prosperous economy: there were rich and noble families among the first settlers, who had not only a taste for culture but also the financial means to enjoy it. In the late 19th century and the early 20th the city's musical importance shifted from opera to jazz, which had its roots in the popular music of the city's numerous brass and string bands.

1. Opera. 2. Concert music. 3. Brass bands. 4. Jazz. 5. Publishing and recording. 6. Educational institutions.



1. OPERA. In cultural terms New Orleans became the Paris of America, and the early opera repertory shows a marked preference for French and Italian works. The city was the first in North America to have a permanent opera company and from 1859 to 1919 owned one of the biggest and most expensive opera houses in the Americas. Opera in New Orleans was initiated in 1792 with the building of the Théâtre de la rue St Pierre (by Louis Alexandre Henry), where the city's first known performance of opera, Grétry's *Silvain*, was given in 1796. Although documentation is scant before 1800, there are written references to two later performances, Dezède's *Blaise et Babet* (1796) and Dalayrac's *Renaud d'Ast* (1799). The theatre was restored and reopened by Jean Baptiste Fournier in 1804. The first documented opera production under Fournier was François Devienne's *Les visitandines* (June 1805). Despite a prolific season (23 operas), Fournier was replaced in 1806 by Louis Tabary, a recent émigré from France. The ousted Fournier set up a rival theatre and opera company in a dance hall called the Salle Chinoise (later renamed the Théâtre de la rue St Philippe), and a brisk competition between these two theatres resulted in a number of performances remarkable for a provincial city of 12,000 inhabitants. The general dearth of opera houses in North America meant that many of these performances were American premières, including Grétry's *Le jugement de Midas* (1806), Méhul's *Une folie* (1807) and Boieldieu's *Le calife de Bagdad* (1805) and *Ma tante Aurore* (1807). The Théâtre de la rue St Pierre closed permanently in 1810, whereas the Théâtre St Philippe remained active until it was sold in 1832.

The most important opera house in New Orleans in the first half of the 19th century was the Théâtre d'Orléans. The original edifice, begun in 1806 by Tabary, opened belatedly in October 1815, only to burn down the next summer. It was rebuilt in 1819 by a French émigré, John Davis, under whose management it thrived as an opera centre. In his first five years Davis produced 140 operas, 52 of which were American premières. Again, French composers were favoured (e.g. Boieldieu, Isouard and Dalayrac), and the performances steadily improved in quality, owing to Davis's policy of engaging French professional singers, dancers and instrumentalists. The Théâtre d'Orléans achieved national prominence when, between 1827 and 1833, Davis led the company on six acclaimed tours of the north-eastern USA. In each of the cities visited (Boston, New York, Philadelphia and Baltimore), much of the repertory was new. John Davis was succeeded in 1837 by his son Pierre, and in 1853, by Charles Boudousquié, an American-born impresario who sustained the theatre's reputation until his resignation in 1859. Among the American premières given by these latter directors were those of *Lucia di Lammermoor* (1841), *La Juive* (1844) and *Le prophète* (1850). The theatre went into decline in the 1850s and closed in 1866.

During the heyday of the Théâtre d'Orléans (1825–40) a rival impresario, James Caldwell, had produced ballad operas and Italian and French operas in English translation with an American company he brought from Virginia. He built the first two theatres in the city's new American sector, the Camp Street Theater (1824) and St Charles Theater (1835). Between 1827 and 1833 he mounted over 100 productions at the former, including *The Beggar's Opera*, *The Barber of Seville* and *Cinderella* (*La Cenerentola*), and Boieldieu's *Jean de Paris*. In 1836 Caldwell introduced Italian opera to New Orleans with the Montresor troupe from Havana. In two successive seasons at the St Charles Theater the company performed such staples as *Norma*, *Semiramide* and *Il barbiere di Siviglia*.

The city's musical importance increased with the opening of the French Opera House in 1859 (fig.1). Built by Boudousquié, it was one of the largest and most expensive theatres in the West and one of the finest in the USA. The opera ensemble Boudousquié established there was by no means provincial: many fine singers appeared, including Julie Calvé and Adelina Patti, the tenors Lecourt, Mathieu and Escarlate, the baritones Victor and Melchisadels, and the bass Genibrel. 17 operas had their American premières there, among them Meyerbeer's *Dinorah* (1861, with Patti in the title role), Massenet's *Le Cid* (1890) and Saint-Saëns's *Samson et Dalila* (1893). The French Opera House closed in 1913 and was purchased in 1919 by William R. Irby, who presented it to Tulane University with funds for its restoration. Its planned reopening in December 1919 was thwarted by a fire on the night of 2 December. Most of its archives were destroyed, along with its valuable collection of operatic properties, costumes, scores and parts, and innumerable books and documents relating to opera.

New Orleans remained without a permanent opera organization until 1943, when Walter Loubart founded the New Orleans Opera Association. He was succeeded as music director by Walter Herbert (1944–54), Renato Cellini (1954–64) and Knud Andersson (1964–83). Performances (with visiting artists supported by local singers and chorus) were given in the city's Municipal Auditorium

1. The French Opera House, New Orleans: wood engraving by Fichot and Gaildrau from 'L'illustration' (10 December 1859)

until 1973, when the New Orleans Theater of the Performing Arts was opened. The seasons (October to May) consisted of six to eight operas from the standard Italian, French and German repertory; contemporary operas were avoided, though visiting companies staged *Lulu* (Sarah Caldwell, 1967) and *Gloriana* (ENO, 1984). After 1984 declining attendance and a reduced budget resulted in shorter seasons (three to five works) and a year-to-year reliance on guest conductors. Operas are presently sung in English or in the original language with English surtitles.

2. Concert music. In 18th-century New Orleans concerts were given regularly as preludes to the numerous balls for which the city was famous. The concerts followed the European plan of a long and varied programme, including orchestral works, chamber music, piano recitals, songs and choral works. A mixed group of amateur and professional instrumentalists known as the Philharmonic Society was founded in 1824 and gave frequent concerts until 1829, performing thereafter only sporadically until 1848. By the second quarter of the 19th century, a considerable number of freed black musicians trained in art music were resident in New Orleans, a few of them having studied in France. In the late 1830s a Negro Philharmonic Society of over 100 performing and non-performing members was organized to provide opportunities to hear music for those who objected to sitting in segregated sections in the public theatres. The society gave concerts and arranged for performances by visiting artists. For scores requiring larger forces the orchestra was augmented by white musicians. A small string orchestra, the Philharmonic Society of the Friends of Art, was formed in 1853 but survived less than a year because of a yellow fever epidemic. It was replaced by the Classical Musical Society, founded in 1855. Throughout the 19th century orchestral concerts were also given by the various theatre ensembles. Although, in contrast to the opera, the repertory was conservative and consisted mainly of well-established works, these concerts were of a high standard, judging by the critical reaction to them in New Orleans, New York, Boston and Philadelphia. The custom of engaging an outstanding soloist for a whole series of concerts began in the 1830s. Such artists as Ole Bull, Henry Vieuxtemps, Julie Calvé and Jenny Lind included New Orleans in their tours, and singers often remained there to join one of the theatre ensembles. Several musicians from New Orleans attained international prominence in the 19th century. Among them were Louis Moreau Gottschalk and Ernest Guiraud (1837–92), the teacher of Debussy and Dukas.

Many attempts to found an independent professional symphony orchestra between 1917 and 1934 failed for lack of financial support. The New Orleans Philharmonic SO was founded in 1936; its conductors have been Arthur Zack (1936–40), Ole Windingstad (1940–44), Massimo Freccia (1944–52), Alexander Hilsberg (1952–60), James Yestadt (1960–63), Werner Torkanowsky (1963–77), Leonard Slatkin (1977–9), Philippe Entremont (1979–86) and Maxim Shostakovich (1986–91). During Slatkin's tenure the orchestra moved into its own hall, the restored Orpheum Theater. Entremont shortened its name to the New Orleans Symphony and, in 1982, took the orchestra to Europe. After several years of financial insecurity, the orchestra folded in 1991. It was succeeded by the Louisiana PO, a cooperative ensemble founded by former members of the New Orleans Symphony and run solely by its players and invited local citizens. The orchestra continues regular subscription concerts, children's concerts and pop concerts, and serves both the Opera Association and local ballet companies. In 1994 its first permanent conductor, Klauspeter Seibel, was appointed.

3. Brass bands. The brass or military band, frequently augmented by woodwind and percussion, has long been important to the musical life of New Orleans, a southern Catholic city with a penchant for open-air festivities. Parades and parade music became the focal point of social life in the 19th century. On Sundays parades began early, their number and fervour increasing as the day wore on. Marching to bury the dead was customary as early as 1819, when the architect Benjamin Henry Latrobe, visiting the city, described the burial parades as 'peculiar to New Orleans alone among American cities'. By the

1830s notices of such parades often appeared in the newspapers. Members of militia companies, war veterans, freemasons, fire companies, benevolent societies, mechanics' societies and others all marched at any time of day to bury their dead. The death of a hero anywhere was sufficient reason in New Orleans to hold a parade, or even two, as when General Lafayette died. Only during epidemics did the city experience a surfeit of brass band funerals, their mournful music mitigated by 'gay and lightsome airs' as they left the cemetery, a practice imitated later in such jazz numbers as Jelly Roll Morton's *Dead Man Blues*. Military music flourished in New Orleans during the Civil War; in 1864 the famous bandleader Patrick S. Gilmore gave a concert there with 500 musicians.

A black marching-band tradition, which was of seminal importance in the genesis of jazz around 1900, originated in New Orleans after the Civil War (see §4 below). The presence of numerous concert-trained teachers and a plethora of military wind instruments at this time spawned a new generation of freed black bandsmen. A decade after the war there were several black wind bands fully competitive with the best white marching bands. By 1878 Kelly's Band and the St Bernard Brass Band were recognized as 'splendid corps of musicians, excelled by none', and in 1885 the Excelsior Brass Band, considered the finest black band in the city, played for the formal opening of the Colored People's Exhibit at the New Orleans Cotton States Exhibition. An important early impetus for the proliferation of black street bands was the dynamic social change of Reconstruction. The stimulus of emancipation, the prolonged presence of federal troops and military bands in the city, and the promise of social and political equality for black Americans contributed to the style and content of the music. A particular catalyst was the establishment of numerous benevolent societies at the instigation of the black Reconstruction governor P.B.S. Pinchback. These black socio-political groups sponsored marching clubs and drill teams to perform at political rallies and outdoor social events with parades, including funerals.

While the earliest black marching bands were musically trained and polished ensembles, a trend towards extempore performances with ad lib embellishments developed among the New Orleans bands of the 1890s, leading eventually to the fully improvisational smaller jazz bands. Documentation is extremely scant, but it appears that this approach to playing was influenced by the gradual infiltration into the black bands of self-taught instrumentalists, some of whom came from rough country bands in the surrounding region. The repertory was thus extended to include, in addition to military pieces, music based on song: religious spirituals and gospel songs, as well as secular ballads, reels, rags and blues. By 1900 such spontaneous performances by black bands, notably the Excelsior, Onward, Tuxedo (fig.2), Eureka and Olympia, were in great demand for all kinds of social occasion, including picnics, commercial publicity, boat excursions and dancing. Concurrently this style of band music was emulated by a number of white brass bands, notably that of 'Papa' Jack Laine, a mentor to many early white jazz musicians.

Black American parade-band music thrived and developed alongside its offspring, jazz, in the early decades of the 20th century. The earliest recordings of it, between 1929 and 1945, reveal still-strong ties to the march and the gospel song, with jazz-like syncopated rhythm and melodic embellishment. By 1960 the music as a thriving tradition had all but disappeared, save for occasional performances by the Olympia, re-formed by Harold Dejan. There has been a revival of sorts since 1980, by such new bands as the Dirty Dozen Brass Band and the Rebirth Jazz Band. These bands, however, are more commercially orientated, performing in clubs, festivals and for local tourist events, and they combine the older style with more recent musical idioms, such as be-bop and rhythm and blues.

2. The Tuxedo Brass Band on parade in New Orleans, 1973

4. Jazz. Although elements of a jazz style developed in several urban centres of the USA, the earliest examples of the genre arose in New Orleans, and therefore the city is generally regarded as the birthplace of jazz. The appearance of this style derived from many sources (church music, syncopated coon songs, ballads, folksongs, military brass bands, work songs, blues etc.) and from the many races that inhabited New Orleans (African, Spanish and French creoles and whites of European origin, mainly Italian).

Many early black jazz musicians received their musical training in the various black brass bands that paraded for social and religious occasions, such as funerals, while others began in the 'string bands': small ensembles with violins and double bass, which played for dancing. Thus, the first recognized 'jazz' band, led by the legendary cornettist Buddy Bolden, was a combination of both these sources, playing a repertory of written marches and freely improvised blues and ragtime themes. Bolden's powerful

playing, colourful personality and popularity earned him the title of 'king' and established a highly competitive spirit among New Orleans musicians, particularly cornet players. Early jazz bands often challenged each other to musical duels when touring the city on open wagons to advertise a function. Later cornet 'kings' included Freddie Keppard, King Oliver and Kid René, along with other notable cornettists such as Buddy Petit, Chris Kelly, Mutt Carey, Bunk Johnson and, of course, Louis Armstrong. Their expressive, almost vocal tones, harmonies around a written lead and use of mutes created a distinctive style that was identified with the city.

Another recognizable characteristic was the clarinet style. The fluid technique and sensual tone were the hallmarks of the city's French and Spanish creoles, and combined with black elements of intense passion and sweeping lines, this style is evident in the work of early clarinettists such as Jimmie Noone, Johnny Dodds, Sidney Bechet and, later, Barney Bigard and Edmond Hall. The percussive swing of the city's drummers was the third unique characteristic. The beat was relaxed, and the rhythmic texture varied to balance or motivate other performers. While a New Orleans band could be of any instrumentation, usually a vamping trombone, double bass (plucked rather than bowed) and banjo or guitar were added to the cornet/trumpet, clarinet and drums. The inclusion of a piano, often played by a woman, was largely a later, post-1920, development.

Jazz played by white musicians at that time remained largely independent of the black and creole development. The earliest known figure in this genre was the percussionist 'Papa' Jack Laine, who led various brass and ragtime bands from 1888 onwards. 'Dixieland' music (as it was later termed) probably reached its fullest expression in the Original Dixieland Jazz Band, a group of white New Orleans musicians formed in Chicago and led by Nick LaRocca, formerly a cornettist with Laine. The worldwide success of the group as a result of its recordings, beginning in 1917, established this brand of jazz, with its driving tempos and attenuated black instrumental effects, as a potent force in American popular music. The spread of 'jazz' began in about 1904, when New Orleans musicians settled in Texas and California and later in Chicago and New York. Foremost among these were the pianist-composer Jelly Roll Morton and, in 1922, Louis Armstrong. During the 1920s both musicians used the distinctive New Orleans sound to create some of the best jazz ever recorded.

Changing public taste in favour of larger orchestras during the 1930s meant small band jazz was less popular, although most New Orleans musicians were able to continue to find work. In the early 1940s there was a revival of interest in the New Orleans style and its musicians. The public acclaim of Kid Ory, Bunk Johnson, George Lewis and Oscar 'Papa' Celestin created a new white middle-class audience for TRADITIONAL JAZZ, yet the essentially backward-looking nature of 'revival' jazz has prevented New Orleans from reclaiming its former significance in this music. In the 1950s an indigenous style of rhythm and blues developed in the work of such musicians as Professor Longhair and Fats Domino, and in the 1970s a new young generation of black musicians formed small brass bands to perform a mixture of rhythm and blues, soul and jazz. The energy and percussive swing of these later bands retain many of the characteristics of New Orleans music. The historical interest in jazz led to the founding of the William Ransom Hogan Jazz Archive at Tulane University in 1958, bringing visitors and researchers to the city. Since 1969 New Orleans has held an annual spring music festival called the New Orleans Jazz and Heritage Festival, which features, in addition to traditional New Orleans jazz, various styles of modern jazz and a whole spectrum of allied genres. The influence of such superior indigenous musicians as Alvin Batiste and the Marsalis family has ensured that even at the end of the century New Orleans remains a potent force in the preservation and propagation of jazz.

5. PUBLISHING AND RECORDING. The thriving musical life of New Orleans enabled several music publishers to become established there. Among the earliest was Paul Emile Johns, a Polish-born emigrant from Vienna who opened a retail shop in 1830. In 1846 Johns sold his firm to William T. Mayo, who continued to print sheet music until he in turn sold the company in 1854 to Philip P. Werlein, a Bavarian emigrant known chiefly as the first Southern publisher of Dan Emmett's *Dixie* (as *I Wish I was in Dixie*, a pirated version preceding the authorized version of 1860). Werlein issued two sheet music anthologies as serials, the *Song Journal*(1870s) and *Werlein's Journal of Music* (1880s).

The firm of Armand Blackmar was active primarily during the Civil War years and was responsible for publishing some of the best-known music of the Confederacy, including *The Bonnie Blue Flag*, *Maryland! My Maryland!*, and an 1861 edition of *Dixie*. Louis Grunewald, a German emigrant who started a business in 1858, was the most prolific and versatile of all the New Orleans music publishers, extending his output in the 1880s to include religious and French Creole songs and piano compositions in the then popular 'Mexican' style. Both the Werlein and Grunewald firms continued into the early 20th century, but by the 1920s music publishing in New Orleans had declined.

The first recordings of New Orleans music were by the Louisiana Phonograph Company, which recorded white and black artists as early as 1891. The earliest jazz recorded in the city was done by northern companies between 1924 and 1928; the first significant locally produced recordings were made during the New Orleans jazz revival of the 1940s, chiefly on the Southland label (1949–69). Cosimo Recording (1945–69), one of the leading recording studios for the national rhythm-and-blues industry by the mid-1950s, cut records for such artists as Fats Domino, Bobby 'Blue' Bland, Big Joe Turner, Lloyd Price and Ray Charles. Among companies established since 1960 was the short-lived All-For-One (1961–4); two major studios, Seasaint and Ultrasonic, opened in 1970.

6. EDUCATIONAL INSTITUTIONS. The music department in Newcomb College of Tulane University was founded in 1909 by Leon Maxwell, who served as chairman until 1952. The department offers BA and MA degrees in history, theory and composition, and BFA and MFA degrees in piano and other instruments and in singing. Distinguished teachers have included Giuseppe Ferrata, Gilbert Chase, Howard E. Smither and Charles Hamm. Among the university's libraries, the William Ransom Hogan Jazz Archive is important as a repository of early American jazz (prints, recordings, photographs and taped

interviews), and the Louisiana Division of the Howard-Tilton Memorial Library includes American sheet music and documents pertaining to the southern states. The Latin American Library is the second largest archive of its kind in the USA and contains many musical items. The Amistad Research Center, located at Tulane, is one of the most inclusive archives of ethnic minorities in America, especially black American, and there are significant musical documents.

The Loyola University College of Music, founded in 1931 as a music conservatory, retains its emphasis on performance, which is reflected in its most distinguished alumni, the singers Norman Treigle, Marguerite Piazza, Harry Theyard, Charles Anthony and Anthony Laciura. It offers BM, BME, MM and MME degrees in performance and music therapy. The music department at Dillard University, one of three black collegiate institutions in New Orleans, was established in 1936 with Frederick Douglass Hall as its first chairman; Hall established the department's policy of emphasizing black music, especially spirituals, in its curriculum. Among its most distinguished alumni are the composer Roger Donald Dickerson and the jazz pianist Ellis Marsalis. The music department of the New Orleans Baptist Theological Seminary was founded in 1919, primarily for the training of church organists and choirmasters. Undergraduate programmes are also offered at Xavier University (music department founded 1934), for black Catholics, and at the University of New Orleans (music department founded 1963), which has recently established a degree in jazz performance. The Delgado Trade School was reorganized in the 1980s as the Delgado Community College and offers an undergraduate degree in music. The New Orleans Centre for the Creative Arts (NOCCA) is one of America's leading high schools for training musicians; among its graduates are Wynton Marsalis and Harry Connick jr. There are substantial musical holdings in the libraries of Tulane University, the Theological Seminary, and at Louisiana State University.

New Orleans jazz. A style of small-ensemble jazz that originated shortly before World War I, became internationally known through recordings in the 1920s, and underwent a revival in the 1940s (*see* TRADITIONAL JAZZ). It now exists as an interrelated group of performance styles with fixed instrumentation and relatively restricted repertory. Some writers distinguish it from DIXIELAND JAZZ, a label that they reserve for white musicians and orchestras.

The earliest New Orleans 'hot' players in the first two decades of the century thought of their music as ragtime, albeit with a local accent. This music was for the most part learned and played by ear by amateurs or semiprofessionals, though some players were musically literate; it usually used a rhythm section of drums, guitar and plucked double bass and emphasized a continuous ensemble polyphony, in which the wind players rarely rested. The large dance bands before 1920 comprised violin, cornet, clarinet, trombone, drums, double bass, guitar and sometimes piano. The use of two cornets – which was thought on the evidence of King Oliver's recordings of 1923 to be essential to the authentic New Orleans style – was virtually never a feature of the older orchestras. Furthermore, though often imitated during the 1920s, the instrumentation of the Original Dixieland Jazz Band (cornet, trombone, clarinet, piano and drums) was not common in New Orleans itself.

In the early New Orleans groups, the melody was often shifted from instrument to instrument. By the early 1920s, however, it was generally assigned to the cornetist, who most often functioned as leader. New Orleans cornetists born before about 1895 played the lead with relatively little variation, unlike later jazz trumpeters; they made use of clipped articulation with relatively precise binary subdivisions of the beat, cultivating the middle register to *f''* and employing a forceful tone, often with a 'whinnying' rapid vibrato. The clarinettist supplied a countermelody in quavers over a wide range, and characteristically used a more limpid timbre than later players, perhaps because of a French bias in the training of early New Oreleans clarinettists. In general, the earliest recordings by King Oliver, Sidney Bechet and others show New Orleans players as the first to integrate blue notes as well as portamento and strong vibrato into an expressive melodic instrumental style. New Orleans drummers used very large and resonant bass drums and employed the press roll on the snare drum, probably with comparatively little reliance on other percussion accessories. The much-discussed question of two-beat versus four-beat rhythm is related to the transition from ragtime to jazz: the first New Orleans jazz drummer to be recorded, Tony Sbarbaro of the Original Dixieland Jazz Band in 1917–18, freely shifted from one to other. Perhaps the most distinctive rhythmic feature was a pervasive but relaxed playing off the beat, particularly at the slower foxtrot or slow drag tempo.

The repertory and instrumentation of the white dixieland tradition became fixed to a far greater degree than that of the black tradition. Particularly with the onset of the 'revival' in the late 1930s, many hymn tunes and various Creole folk or popular songs entered the repertory of black New Orleans jazz, often at the behest of recording directors and jazz historians. The harmony of New Orleans jazz is often simpler than the ragtime progressions that underlie it: chords more complex than the dominant 7th and diminished 7th are seldom used; there is little modulation, except between the strains of march tunes; keys with more than one sharp or four flats are avoided. Solo playing is generally confined to the recurring two-bar breaks or to brief moments when one player dominates the ensemble, though there are frequent duets for wind instruments. In general there is little improvisation in the sense that term acquired after the early 1920s; routines, once learned, are quite stable.

The classic bands of the early 1920s New Orleans style were King Oliver's Creole Jazz Band and the New Orleans Rhythm Kings; later recordings of bands led by Jelly Roll Morton, Lil and Louis Armstrong and Johnny Dodds are also prized as early examples of New Orleans jazz. These were all recorded in Chicago for the so-called race record market. Recordings made in the 1920s in New Orleans itself, especially by Sam Morgan's band and the Jones and Collins Astoria Hot Eight, are somewhat different in character from the groups recorded in the North, and no doubt reflect the contemporary local style.

The strong association in the public's mind between New Orleans jazz and the music of the marching-band tradition is somewhat exaggerated: the custom of employing wind bands to play at the funerals of members of fraternal orders is a picturesque survival of one widespread in the USA during the 19th century. Many musicians and historians also hold that certain features of New Orleans jazz derive from or are common to musics of the West Indies. However, despite New Orleans's long history of close contact with the West Indies, this 'Spanish tinge' (the term is Jelly Roll Morton's) has yet to receive thorough study.

LAWRENCE GUSHEE

New Orleans Rhythm Kings [NORK; Friars Society Orchestra]. American jazz band. Its three principal members, trumpeter Paul (Joseph) Mares (1900–49), trombonist Georg(e Clarence) Brunis (1902–74) and clarinettist (Joseph) Leon Roppolo (1902–43), were boyhood friends from New Orleans who were reunited in Chicago in the early 1920s to form an eight-piece band for a 17-month residency at the Friar's Inn nightclub. The instantaneous success of the New Orleans Rhythm Kings' recordings and live performances made it the most important white New Orleans group after the Original Dixieland Jazz Band. Although the players never achieved the same widespread fame, and despite the fact that they based their style and repertory partly on those of the earlier band, on several counts they were superior to it. The originality of the group lay in blending the influences of the Original Dixieland Jazz Band with inspiration derived from the black New Orleans music of King Oliver's Creole Jazz Band. The New Orleans Rhythm Kings exuded a sense of relaxation that was rare among its contemporaries; the musicians avoided the nearly ubiquitous jerky phrasing, and with no loss of expression concentrated on legato playing. The final choruses of their performances are stirring without seeming frantic.

Mares, the group's leader, was heavily influenced by King Oliver's cornet playing. He usually remained in the middle register and established an emphatic lead part; during his solos he seldom departed from the melody, relying on subtle rhythmic and tonal inflections for variation. The group's foremost improviser was Roppolo, whose highly original solos on *Panama*, *Tiger Rag* (both 1922, Bennett) and *She's Crying for me Blues* (1925, OK) are superb. His playing on the ingeniously arranged *Wolverine Blues* (1923, Bennett) was much copied. Georg Brunis also played confident, adept solos, but his strength lay in creating clever 'tailgate' patterns, many of which were rigorously imitated by other trombonists for decades afterwards. The band's front line inspired a school of young white Chicago jazz musicians, and it is regrettable that so few of its recordings are satisfactorily balanced.

After leaving the Friar's Inn the group enjoyed brief residencies at two Chicago dance halls before disbanding altogether. In 1924–5 it was revived in New Orleans, but without notable success.

Newton, Sir Isaac (*b* Woolsthorpe, nr Grantham, 25 Dec 1642; *d* Kensington, London, 20 March 1727). English mathematician and natural philosopher. He was Luasian Professor of mathematics at Cambridge (1669–1701), MP for the university (1689–90), Master of the Mint (1699–1727) and president of the Royal Society (from 1703). He was knighted in 1705, and buried in Westminster Abbey. His principal publications were *Philosophiae naturalis principia mathematica* (London, 1687) and *Opticks* (London, 1704).

Newton never published on practical music theory, and so his original work in this field had no influence on later music theorists and remained unrecognized until the 20th century. The significant role that music (or, more precisely, harmonics) played in his scientific thought has taken longer still to be appreciated fully. His earliest work on music is found in two commonplace-books he used while at Trinity College, Cambridge, between about 1664 and 1666. The first (*GB-Cu* Add.3996) contains reflections on the acoustical properties of musical sound, while the second (*Cu* Add.4000) includes a short treatise *Of Music* (ff.138–43; versions also in *Ccl*, *Cjc*, *Och*) and several pages of tightly written mathematical calculations (ff.104–13, 137). The extracts he copied from Christopher Simpson's *Division Violist* (1659) may also date from this period (*Cu* Add.3970, ff.12–15), or else some time from the late 1680s, when he acquired a copy of Thomas Salmon's 'Division of the Monochord' (ff.1–11).

Arts students in Restoration Cambridge typically studied harmonics as a branch of mathematics, but Newton's treatment of the subject was exceptional. Of most interest is his application of logarithms to the division of the musical scale. Although Brouncker had already published on this in 1653, Newton was the first to express the magnitude of intervals in a logarithmic notation. He took the equal-tempered half tone as his basic unit or 'common measure', thereby anticipating the modern cent system. Apart from expressing the ratios of the syntonic diatonic scale (just scale) using this system, he considered various forms of multiple division (e.g. 12, 20, 24, 25, 29, 36, 41, 51, 53, 100, 120 and 612 parts to the octave), concluding that the 53-division was best. He also compiled a 'catalogue' of the 'twelve musical modes in their order of gratefulness' and devised a scheme on how to pass from one mode to another.

In 1677 Newton was asked to comment on Francis North's *Philosophical Essay of Music* (1677) by the latter's brother John, who was Master of Trinity College. He disagreed with North's explanation of sound

transmission, and found his pulse theory of consonance inadequate. 11 years later he presented the first mathematical analysis of sound waves in his *Philosophiae*, providing a model for all forms of wave motion.

Thus although Newton never published specifically on music, he applied the insights gained from studying musical phenomena to other branches of mathematical science, especially optics and mechanics. The best-known example is his famous analogy between the seven tones of a musical scale and the seven colours of the spectrum, made public for the first time in *Opticks*. He first explored this link between 1672 and 1675, when chronology and biblical prophecy involving numerological speculation occupied much of his attention.

Music also played a role in the development of his laws of universal gravitation. In the 1690s he claimed that Pythagoras had known the inverse square law theory, but had expressed it allegorically (e.g. the myth of the harmony of the spheres and the legend of the blacksmiths). Newton was himself a Pythagorean in that his concern was with abstract mathematical harmonies underlying the cosmos, rather than the sensual impact of lived musical experience.

PENELOPE GOUK

Newton, Ivor (*b* London, 15 Dec 1892; *d* London, 21 April 1981). English pianist. He was a pupil of Arthur Barclay, and then, deciding to devote himself to the art of accompaniment, studied lieder with Zur Mühlen and accompaniment with Coenraad Bos in Berlin. In his early days he played for De Groot at the Piccadilly Hotel, but he quickly won a reputation as one of the world's leading accompanists. During his long career he appeared in all parts of the world with many of the greatest singers and string players, including Melba, Chaliapin, Callas, Flagstad and Casals. As adviser in music to HM Prisons, Newton was influential in bringing good quality music to prisoners. His autobiography, *At the Piano – Ivor Newton* (London, 1966), is valuable for its detailed character studies of the performers with whom he was associated. He was made a CBE in 1973.

FRANK DAWES/R

New violin family [violin octet]. A consort of eight acoustically balanced instruments in graduated sizes and tunings (see illustration), ranging from the contrabass violin (tuned like the double bass) to the treble violin (an octave above the normal violin). This family of instruments developed out of the violin research by the physicist Frederick A. Saunders of Harvard, who began work in 1933. Tests made on excellent violins established some of the acoustical characteristics found in violins of desirable tone quality. These characteristics were projected, by the application of scaling theory, into seven other tone ranges, and gave rise to a new family of violins embodying the results of theoretical and practical experiments (see Table 1). This research was coordinated by members of the Catgut Acoustical Society (founded by Saunders in 1963), and the first set of the new instruments had been prepared by 1965. The instruments are designed to possess a homogeneity of tone which distinguishes them from the existing family of strings (in which the acoustical characteristics and tonal qualities of the viola, cello and double bass contrast with the violin and each other; *see* ACOUSTICS, §II, 2, especially fig.35). It is intended that the instruments be used in ensembles of up to eight; as solo instruments with distinctive characteristics; to blend and contrast with other instruments (particularly wind) or the human voice; to augment the strings in the symphony orchestra; and in combination with electronic sounds (where their clarity and distinctiveness have been found most effective). Michael Praetorius, in his *Syntagma musicum*, ii (2/1619), listed a family of eight *Geigen* with practically the same tonal ranges and tunings.

Instruments of the new violin family developed by the Catgut Acoustical Society: front row (left to right), baritone violin, small bass violin, contrabass violin, mezzo violin, soprano violin, treble violin; behind, tenor violin (left) and alto violin (right)

The treble violin or sopranino, tuned *g′–d″–a″–e‴*, is the smallest and highest member of the octet; its dimensions are approximately those of a quarter-size violin, and it can be played either under the chin or, rebec style, on the arm. It has very thick top and back plates and extra-large f-holes so that its main resonances occur at the desired frequencies. The extremely strong and thin E string (tuned to 1320 Hz) is made from carbon rocket wire, which has a tensile strength nearly twice that of normal E-string wire. The short strings of the treble violin make it possible to play a tremolo in intervals of up to an octave and double stops of up to a 12th. The soprano violin or descant is tuned an octave above the normal

viola (*c′–g′–d″–a″*); it is comparable to a three-quarter violin in size and string length, though it is somewhat broader in outline and has shallower ribs. The mezzo violin is an enlarged version of the normal (35·5 cm) instrument, with a body length of 38·2 cm, though its ribs are about half the usual height; it maintains the standard string length. It has large top and back plates and is thus more powerful, particularly on the lower strings, than the normal violin. The alto violin, tuned *c–g–d′–a′*, is essentially an enlarged viola but has additional clarity and power. Its body length (50·8 cm) makes it difficult to play under the chin, so it is often played like the cello, but on a longer endpin; the strings have been shortened to 42·5 cm to facilitate viola fingering.

The tenor violin, tuned *G–d–a–e′*, is similar in size to a three-quarter cello, but has thicker top and back plates, and shallower ribs that give it more the appearance of an enlarged violin. The baritone violin is tuned *C–G–d–a*like the cello, and has a nearly comparable string length but larger body dimensions. Since its resonances are lower than those of the cello, the tones on the C and G strings are unusually clear and powerful; its A-string resonances are not stronger than its lower tones, however, as is the case with the normal cello. The small bass violin is tuned *A′–D–G–c*, a 4th above the double bass; it is about the size of a three-quarter bass and has a similar string length, but has rounded shoulders and an arched back like the violin. The contrabass violin, tuned *E′–A′–D–G*, has a body length of 130 cm but a string length of only 110 cm. Its size, comparatively light construction and the tuning of its plates cause the lower notes to produce organ-type sonorities.

TABLE 1: Measurements and scaling factors for the new violin family

			Length in centimetres			*Relative scaling factors**		
Instrument name	*Tuning*	*Hz*	*Overall*	*Body*	*String*	*Body Length*	*Resonance placement*	*String tuning*
Treble	*g′–d″–a″–e‴*	392 587·4 880 1318·5	*c*48	28·6	26	·75	·50	·50
Soprano	*c′–g′–d″–e″*	261·6 392 587·4 880	54–5	31·2	30	·89	·67	·67

CARLEEN M. HUTCHINS

New wave. A term encompassing a range of pop music styles from the mid-1970s onwards. 'New wave' and 'punk' were initially synonyms used interchangeably between 1975 and 1977. However, Malcolm McLaren (manager of the Sex Pistols) used 'new wave' to draw a comparison with the left-field anti-establishment practices of the French Situationist movement of the 1960s. From early 1978, new wave began taking on a more specific meaning as a generic description of certain styles of post-punk music. Groups as diverse as the Stranglers, the Boomtown Rats, Blondie and Talking Heads were promoted as 'new wave' acts in that they had developed beyond punk's guitar-based fetishisation of incompetence; thus, acts such as Elvis Costello and the Attractions carried some of punk's angry attitude alongside a more well-crafted, politically informed lyricism. The Stranglers, who had in fact preceded punk, used keyboard runs inspired by progressive rock and unusual time signatures, while Talking Heads used disco and ethnic musics. New wave reaffirmed more traditional methods of promotion and visual presentation: whereas the rhetoric of punk had been constructed around subverting the star system and usurping gender stereotypes, Bob Geldof (Boomtown Rats) and Deborah Harry (Blondie) became sex symbols. Musically varied, new wave acts spawned many artists who built long-lasting careers, with the Police emerging globally as the most commercially dominant.

The impact of punk and new wave was also felt in Europe, Canada and Australasia. The most significant reaction was seen in Germany's 'Neue Deutsche Welle', a phrase coined by Alfred Hilsberg, one of the editors of the German rock magazine *Sounds*, in October 1979. Among the leading groups were Der Plan, DAF and Palais Schaumburg. However, it was the more conventional pop of Nena with her UK number one hit *99 Red Balloons* (1984) and the synthesizer pop of the quasi-novelty record *Da Da Da* by Trio (1982) which became crossover European hits.

Since the late 1970s, the term has become an imprecise signifier for renewal and generational angst. For example, in late 1993 'the new wave of the new wave' was used by the music press to describe British guitar groups such as Elastica, S*M*A*S*H and These Animal Men, who were seen by the music business as re-creating the energy of late-1970s punk.

DAVID BUCKLEY

New York. City in New York state, USA. It is the largest city in the USA and the cultural centre of the country. The fine natural harbour and waterways and the opening of the Erie Canal in 1825 quickly made New York the nation's principal commercial centre. As the most important port until after World War II, the city has been the gateway for both visitors and immigrants to the USA, bringing a density and variety of cultural influences that have created a dynamic and varied musical life. The heart of America's music industry is in New York, and the city is a showcase for individuals and organizations from other parts of the continent and from abroad. For the American musician a New York recital is the prerequisite of professional status.

1. Before 1800. 2. Concert life. 3. Concert halls and other performance venues. 4. Opera and musical theatre. 5. Orchestras and bands. 6. Chamber music. 7. Choral societies. 8. Religious music. 9. Avant-garde music. 10. Ragtime and jazz. 11. Ethnic and popular music. 12. Education. 13. Associations and organizations. 14. Publishing, instrument making, broadcasting and recording. 15. Criticism and periodicals. 16. Libraries.

1. Before 1800. The first documented concert in New York was given on 21 January 1736 by the German-born organist and harpsichordist C.T. Pachelbel, son of the renowned Johann, at the house of Robert Todd, a vintner, next to Fraunces Tavern; an announcement of the event refers to songs and instrumental music with harpsichord, flute and violin. Apparently the first organ was installed in the Dutch Reformed Church in 1724, followed in 1741 by an organ built by J.G. Klemm for Trinity Church. 46 concerts were advertised in New York between 1736 and 1775, more than in any other American city; they included a charity concert at City Hall after the installation of an organ in 1756 and, about 1766, the performance of a march from Handel's *Judas Maccabaeus* 'accompanied with a side drum' at the City Tavern.

Visiting musicians, usually from London, rarely remained long in New York; W.C. Hulett, who taught the violin and dancing in 1759 and was still in the city directory in 1799, was an exception. The arrival of William Tuckey in 1752 to become clerk of Trinity Church from 1 January 1753 marked a turning-point in New York's musical life. Tuckey promptly took over the Trinity choir and became a champion of Handel's works; he organized subscription concerts and balls in the 1760s, and on 16 January 1770 sponsored a benefit at 'Mr Burns' New Room' with the first New York performance of the overture and 16 numbers from *Messiah*. Works by Haydn appeared on programmes after 27 April 1782.

Various groups of New York musicians sporadically announced series of subscription concerts. 'City Concerts' begun in 1793 by Henri Capron, James Hewitt and G.E. Saliment lasted until 1797, and included music by Pleyel, Haydn, Grétry, Gyrowetz, Hewitt and Benjamin Carr; outdoor summer concerts initiated in 1765 by James Jones in the Ranelagh Gardens continued to be popular. Vocal and instrumental music by Haydn, Arne and Stamitz, as well as popular ballads, could be heard at Ranelagh Gardens and at Joseph Delacroix's Vauxhall Gardens in the late 1790s.

New York music organizations in the 18th century combining social and choral activities included the

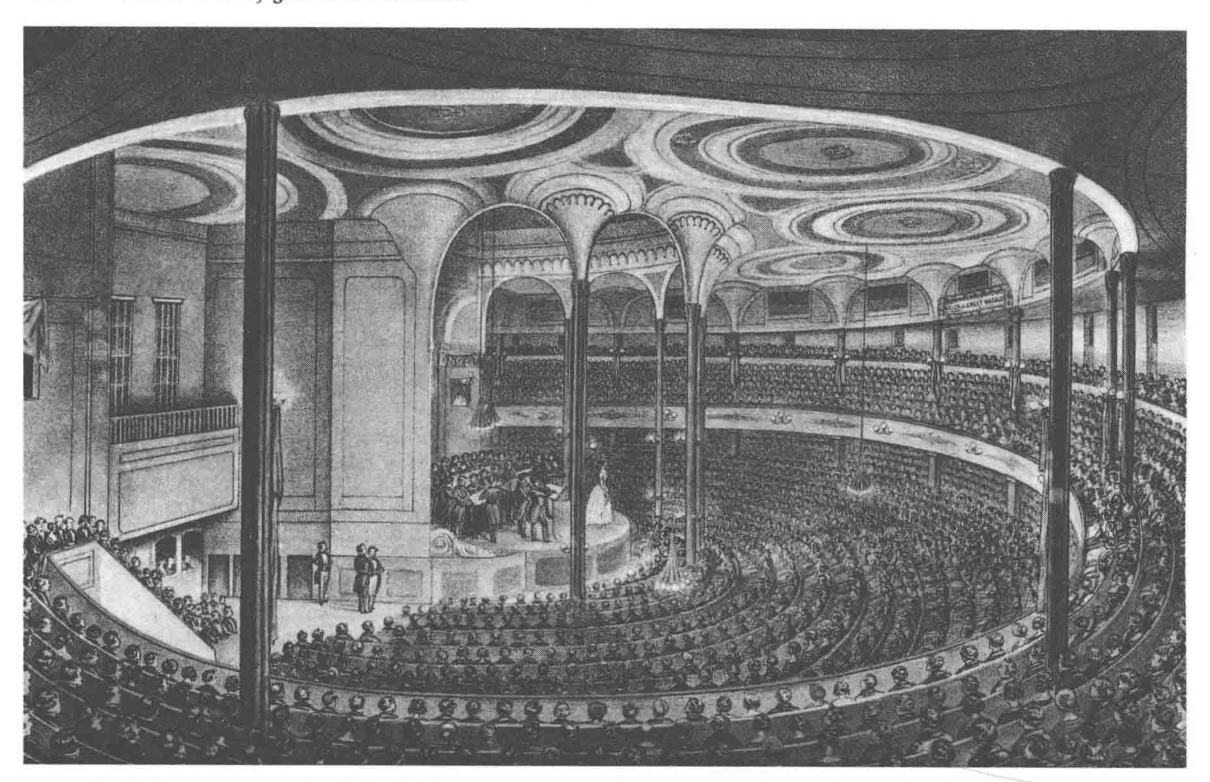
Harmonic (1773–4), Musical (1788–94), St Cecilia (1791–9), Harmonical (1796–9), Columbian Anacreontic (1795–?), Uranian (1793–8) and Philharmonic (1799–c1816) societies. The repertory usually consisted of hymns and, occasionally, anthems. Few societies survived their good intentions.

Theatre flourished and ballad opera was popular. Opera could be heard at the Nassau Street Theatre from 1750; *The Beggar's Opera* was one of the first performed there. In 1753–4 a troupe from London directed by Lewis Hallam performed operas and plays; David Douglass reorganized it under the name of the American Company (later Old American Company), and it performed at the John Street Theatre and in other coastal cities from 1767 to 1774. During the British military occupation (1776–83) plays or ballad operas were occasionally performed, but it was not until 1785 that Lewis Hallam jr and John Henry reopened the Old American Company, which they operated more or less regularly until the turn of the century. The musical repertory consisted largely of pasticcio arrangements of such popular works as *Thomas and Sally*, *Rosina*, *Love in a Village*, *Lionel and Clarissa*, *The Adopted Child*, *The Duenna*, *No Song, No Supper* and *The Flitch of Bacon*. Operas by Grétry (*Zémire et Azor*) and Duni (*Les deux chasseurs*) also served as a basis for local adaptation. For a short time in the 1790s French immigrants performed such works as *Les deux chasseurs*, Audinot's *Le tonnelier* and Rousseau's *Le devin du village* in French.

Native musical theatre came into its own in the last quarter of the 18th century. Among the earliest examples was *May Day in Town* (18 May 1788) with 'music compiled from the most eminent masters'. Hewitt's *Tammany, or The Indian Chief* (from which only one song survives), the first opera on an Indian subject, was produced on 3 March 1794; the libretto, by Anna Hatton, succeeded in its intention to arouse Federalist opposition, and *Tammany* had only three performances. The pantomime *The Fourth of July, or Temple of American Independence*, with music by Victor Pelissier, had one performance (4 July 1799), as did his *Edwin and Angelina*, based on Goldsmith (19 December 1796). More successful was Carr's opera *The Archers* (1796), from which only the introductory rondo and a single song survive.

J.J. Astor opened New York's first music shop in 1786, before concentrating on the fur trading business. Carr and Hewitt were both important figures in the growth of music trades in the city: Carr arrived from England in 1793 and set up a music shop in Philadelphia in 1794 and in New York in 1795; he sold the latter to Hewitt in 1797. English popular music and American patriotic songs were the mainstay of their sheet music sales.

2. Concert life. In the early 19th century concert life in New York centred on outdoor summer gardens, patterned on their London counterparts, and later on their attendant theatres. Popular establishments such as Castle Garden (1839–55) in the Battery and Niblo's Garden (1849–95) at Broadway and Prince Street presented ballad singers and mixed programmes of instrumental music.



Economic opportunities in America and political uncertainties in Europe spurred the arrival of talented young musicians. A number of European singers, composers, conductors and impresarios arrived during the early and mid-19th century, as well as popular virtuosos such as the violinist Sivori (1846–50) and the pianists Leopold de Meyer (1845–6, 1867–8) and Henri Herz (1846–8). Jenny Lind was on the stage of Castle Garden before a cheering audience of 7000 on the evening of 11 September 1850 (fig.1) for the first of about 20 concerts in New York, the last of which was on 24 May 1852. The significance of her tour, at first under the aegis of P.T. Barnum, lay less in her superb singing than in her impact on the box office, and the demonstration that a European artist of the first rank could find responsive audiences in America.

Virtuoso pianists such as Gottschalk, who gave 90 concerts in New York in seven seasons beginning in February 1853, and Thalberg, who played 56 concerts from November 1856 to April 1858, presented well-received programmes. Both artists, playing American Chickering pianos, concentrated almost exclusively on their own compositions, although Beethoven and Chopin were occasionally represented. Four resident pianists were active in the second half of the 19th century: Henry C. Timm (1835–92), Richard Hoffman (1847–97), Sebastian Bach Mills (1859–98) and William Mason (1855–1908). Each maintained a high standard of technical and interpretative excellence, and introduced to the American repertory works of a higher standard than the usual operatic potpourris, fantasies and variations.

The impresario and conductor Louis Jullien arrived in New York in August 1853 to give light concerts, including works by the Americans W.H. Fry and G.F. Bristow, in the Crystal Palace. Other popular performers included the violinists Ole Bull and Henry Vieuxtemps, both of whom visited for the first time in 1843, and the pianist Alfred Jaëll (1851–2). Typical programmes were mixed, usually including several arias and duets, one or two piano solos, a violin solo, an ensemble work and, if there was an orchestra, an overture. The solo recital was virtually unknown, even the most celebrated virtuosos appearing with other performers.

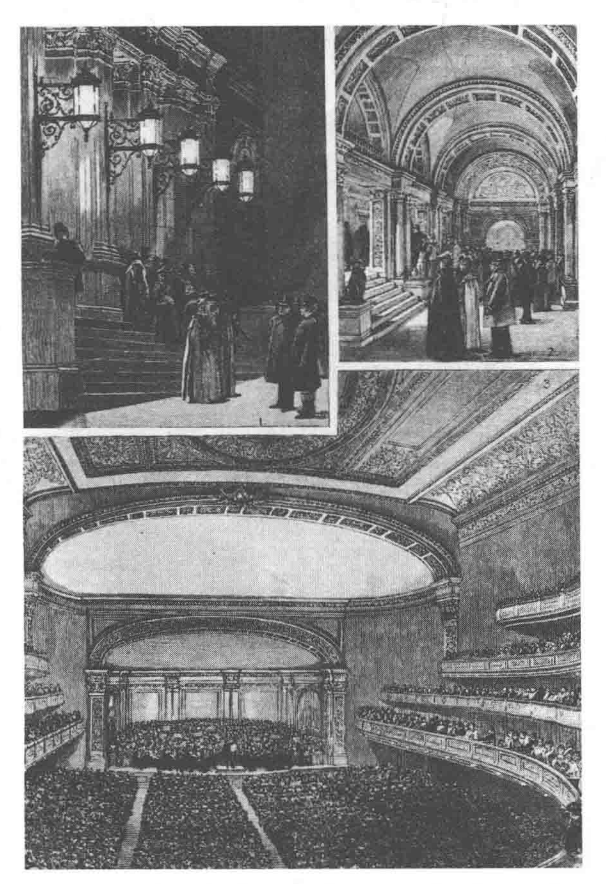
The quality of visiting artists steadily improved. The arrival of Anton Rubinstein and Wieniawski on 23 September 1872 brought a serious note to concert programmes; a bold solo recital surprisingly brought in more money than a troupe. Bülow visited in 1875–6 and again in 1889–90. Most Europeans arrived with their reputations already established at home, but Americans made their own evaluations; for example, free tickets were given for Paderewski's début on 17 November 1891, but it was four seasons before he became a popular success.

After 1900 New York concert life differed little from that of a large European city. With a population of about three and a half million, improved transport and an assured audience, the city's musical life became more predictable. Solo recitals became distinct from chamber concerts and orchestral programmes, and European artists made repeated visits to the city. After 1914 both American and European musicians frequently established a New York base. By the middle of the century programmes had changed; there were fewer solo recitals and more group events, chamber music was more popular, choruses were numerous but smaller, and the concert repertory became both more varied and more specialized within individual programmes. A revitalization of the solo recital and further growth in chamber music activities took place from the 1960s, led by the city's two largest performing arts centres, Carnegie Hall and Lincoln Center (see §3 below). Concert activities continued during the summer

1. Jenny Lind's first appearance at Castle Garden Theatre, New York, 11 September 1850: lithograph by Nathaniel T. Currier

months after the founding at Lincoln Center of the Mostly Mozart Festival (1966) and the more general Lincoln Center Festival (1996).

3. CONCERT HALLS AND OTHER PERFORMANCE VENUES. The centre of New York's musical life has moved steadily uptown since it began in what is now the financial district. For many years the principal musical activities were in the midtown area bounded by the Metropolitan Opera House in West 39th Street and Carnegie Hall at 57th Street and 7th Avenue. Carnegie Hall has played host to virtually every significant American or visiting musician since its opening on 5 May 1891, at which Tchaikovsky was guest of honour (fig.2). The main hall, named in 1997 Isaac Stern Auditorium, seats 2804 and is celebrated for its superb acoustics. Until the opening of Lincoln Center it was the home of the New York PO. The adjacent Carnegie Recital Hall (cap. 268, renamed Weill Recital Hall in 1986) is used for many début recitals. Threatened with demolition when plans for Lincoln Center were announced in the mid-1950s, Carnegie Hall was saved through the efforts of a citizens' committee organized by Isaac Stern in 1960. New York City purchased the hall and leased it to the newly formed Carnegie Hall Corporation, which became responsible for programming. The regular season includes classical, jazz and popular concerts, as well as educational programmes. In support of contemporary music, the corporation commissioned 21 new works between 1986 and 1999. A permanent exhibition on the history of Carnegie Hall is on display in the hall's Rose Museum (opened 1991).



Town Hall (cap. 1498, built 1921) in West 43rd Street was particularly popular as a concert hall in the middle decades of the 20th century. The hall was acquired by New York University in 1958 and closed temporarily in 1978; it reopened in 1984 after restoration. Radio City Music Hall in Rockefeller Center opened in 1932. Until 1974 it had a resident ballet company, and it continues to maintain its own orchestra and the Rockettes, a troupe known since 1933 for its precision chorus-line dancing. The *art déco* music hall seats 5874 and houses a noted Wurlitzer theatre organ.

In the 1960s the axis of concert life moved further north with the establishment of Lincoln Center for the Performing Arts, a complex of buildings and organizations including almost a dozen theatres and concert and lecture halls (fig.3). Philharmonic Hall opened on 23 September 1962 to a capacity audience of 2646; it was subsequently modified to improve its acoustics. In 1973 it was renamed Avery Fisher Hall and in 1976 was completely gutted and rebuilt to a new, successful acoustical design (cap. 2742 after renovation; fig.4). The openings of the New York State Theater (1964) and the new Metropolitan Opera House (1966) (see §4 below), which also flank the main plaza, were followed in 1969 by that of Alice Tully Hall (cap. 1096), an ideal setting for solo and chamber concerts. The Vivian Beaumont Theater, the Mitzi E. Newhouse Theater and the Library and Museum of the Performing Arts of the New York Public Library occupy a corner position at 65th Street and Amsterdam Avenue, while the Juilliard School and Alice Tully Hall are across 65th Street on Broadway. Free outdoor concerts are given each summer in the plaza of Lincoln Center and in the Guggenheim Bandshell of Damrosch Park (adjacent to the opera house).

Elsewhere in the city many colleges, museums and other institutions include halls used for public concerts. Prominent among them are Merkin Concert Hall at Abraham Goodman House (opened 1978), Sylvia and Danny Kaye

Playhouse at Hunter College, the Metropolitan Museum of Art's Grace Rainey Rogers Auditorium, the Kaufmann Auditorium at the East 92nd Street Young Men's–Young Women's Hebrew Association, Kathryn Bache Miller Theater at Columbia University, Aaron Davis Hall at City College, City Center for Music and Drama, Cooper Union, the Asia Society and the Alternative Museum. Symphony Space, at Broadway and 95th Street, offers a varied programme ranging from gospel and ethnic music to marathon concerts devoted to Bach, Ives, Cage and others. Besides PS 122, the Clocktower Gallery and Franklin Furnace, the Kitchen has since 1971 been the most important centre for 'downtown' experimental music, dance, performance art, video and film.

Outside Manhattan the most important concert centre is the Brooklyn Academy of Music, which opened in 1861 at a site in Montague Street; the present building in Lafayette Avenue opened in 1908. From the 19th century it was a cultural community and civic centre presenting opera, oratorios and plays. Since 1967 the academy has played a prominent role in sponsoring modern dance and theatre as well as music. Since its first season in 1955, the Brooklyn Philharmonia (now PO) has performed at the academy. The 'Next Wave' activities inaugurated in 1981 have expanded to include an annual festival and touring programme featuring both contemporary music and less familiar works from the past. Outdoor summer concerts were held at Lewisohn Stadium from 1918 to 1966. Concerts are now held in Central Park and in parks in the other boroughs. The New York PO first gave outdoor concerts in 1965, and the Metropolitan Opera has done so since 1967.

4. Opera and musical theatre. Italian opera first reached New York on 29 November 1825 with a performance at the Park Theatre of Rossini's *Il barbiere di Siviglia* by an Italian company led by Manuel García, the famous Spanish singer and teacher, who took the part of Count Almaviva. The ensemble of eight singers, four of them Garcías (including the 17-year-old Maria-Felicia, later Malibran), had been recruited in London by a New York vintner, Dominick Lynch. Encouraged by Lorenzo da Ponte, then a professor of Italian at Columbia College, Lynch took García's troupe to New York for a season of 79 performances, accompanied by a local orchestra of 24; the repertory included *Don Giovanni*, Rossini's *Tancredi*, *Otello*, *Il turco in Italia* and *La Cenerentola*, Zingarelli's *Giulietta e Romeo* and García's own *La figlia dell'aria*. Before García's appearance opera in New York had consisted of makeshift adaptations of comic pasticcios with spoken dialogue and popular airs inserted in place of difficult arias (see §1 above), performed by actors. No female stars performed in New York until the 1820s. After the Garcías' departure for Mexico in November 1826, a French company from New Orleans took a two-month season of French opera to the Park Theatre, opening on 13 July 1827 with Isouard's *Cendrillon*. The French repertory included at least ten operas, among them Cherubini's *Les deux journées*, Auber's *La dame blanche* and Boieldieu's *Le calife de Bagdad*. The next opera company to appear was led by the tenor Giovanni Montresor in 1832–3; it gave about 50 performances of such works as Bellini's *Il pirata* and Mercadante's *Elisa e Claudio*, in addition to works of Rossini. Another French troupe from New Orleans introduced Rossini's *Le comte Ory* (Park Theatre, 19 August 1833) and Herold's *Zampa*.

New York's first venue for opera, the Italian Opera House at Church and Leonard streets, opened on 18 November 1833 with Rossini's *La gazza ladra*; among its backers were Lynch and Da Ponte. The second season was financially disastrous and in December 1835 the building was sold. When it reopened as the National Theater it joined other New York theatres as the home to British stars performing in the English-language repertory. The English opera was popular until the mid-1840s. On 3 February 1844 Ferdinando Palmo, a restaurateur, opened Palmo's Opera House (cap. *c*800) with the New York première of Bellini's *I puritani*. In four seasons Palmo introduced Bellini's *Beatrice di Tenda*, Donizetti's *Lucrezia Borgia* and *Linda di Chamounix*, and Verdi's *I Lombardi*. At other theatres pasticcios of opera in English by Balfe, Rooke and Benedict remained popular. While Palmo's held sway in Chambers Street, 150 wealthy men were raising money for another opera house further uptown, and the Astor Place Opera House (cap. 1500–1800) opened on 22 November 1847 with Verdi's *Ernani*. The guaranteed support lasted only five years, financial returns were slight and the house closed in 1852.

The period between 1847 and the founding of the Metropolitan Opera in 1883 was a turbulent one in New York's operatic history, dominated by colourful impresarios, competitive prima donnas and constantly changing personnel who appeared in operatic performances in many New York theatres. After the closure of the house at Astor Place the only theatre devoted specifically to

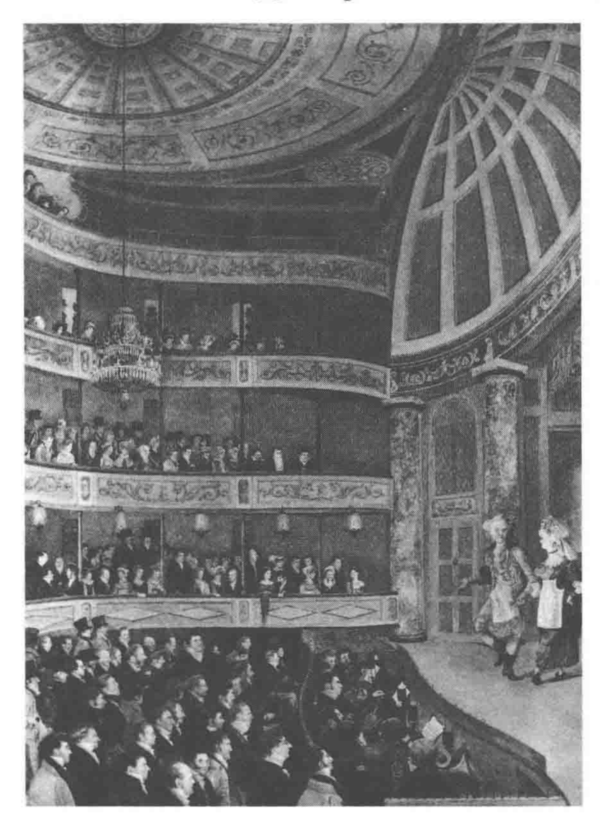
3. Aerial photograph of Lincoln Center for the Performing Arts: (clockwise, from lower left) New York State Theater, Damrosch Park, Metropolitan Opera House, Vivian Beaumont Theater and New York Public Library, Juilliard School and Alice Tully Hall, and Avery Fisher Hall

concert and opera was the Academy of Music at 14th Street and Irving Place, which opened on 2 October 1854 with a performance of Bellini's *Norma* starring Giulia Grisi and Giuseppe Mario; it continued to present regular operatic seasons until 1886. When it was built (at a cost of $335,000), the house contained the largest stage in the world (21·5 × 30 metres) and seated 4600. During the first 24 years the management changed every season.

Max Maretzek, who left London in 1848 to conduct at the Astor Place Opera, was among the more prominent impresarios. A frequent lessee and conductor at the Academy of Music, he was associated with the first New York performances of many operas there. Academy audiences heard *Rigoletto* (19 February 1855), *Il trovatore* (2 May 1855), *La traviata* (3 December 1856), Meyerbeer's *L'Africaine* (1 December 1865) and Gounod's *Roméo et Juliette* (15 November 1867), the last two in Italian. The brothers Maurice and Max Strakosch were also among the operatic producers active in New York from 1857. Most important was J.H. Mapleson, who went to the Academy of Music in 1878 and directed operatic activities there and abroad until 1886. Many great singers appeared in New York; audiences in 1853, for example, heard the nine-year-old Adelina Patti, Mario, Lind, Henriette Sontag, Grisi and Marietta Alboni. Later decades saw the appearance of such singers as Christine Nilsson, Lilli Lehmann and Italo Campanini. 39 American singers, among them Lillian Nordica, Clara Kellogg, Minnie Hauk and Annie Louise Cary, sang at the Academy of Music before 1884. Local composers were not so fortunate, although Bristow's *Rip Van Winkle* ran for four weeks in 1855 at Niblo's Garden, and Fry's *Leonora* was heard in March 1858, 13 years after its première in Philadelphia. The first German operas (albeit English adaptations) performed in New York were *Der Freischütz* (1825), *Die Zauberflöte* and *Fidelio* (both in the 1830s). The first opera by Wagner heard in the city was *Tannhäuser*, given on 4 April 1859 at the Stadt Theater.

The Metropolitan Opera House at Broadway and 39th Street opened with Gounod's *Faust* on 22 October 1883 (fig.6). Originally conceived as a social gesture by a score of millionaires who could not obtain boxes at the Academy of Music, the Metropolitan quickly achieved international eminence. The Metropolitan Opera Association has the longest uninterrupted existence of any organization of its kind in the USA: apart from 1892–3, when the house was closed because of a fire, and 1897–8, when Maurice Grau reorganized his company, a resident company has presented opera continuously at the Metropolitan since 1883. Henry Abbey, a well-known theatrical producer with little operatic experience, directed the first season and incurred a loss of $500,000. The artistic importance of the house dates from the following season when the board of directors accepted Leopold Damrosch's proposal that he should direct a season of German opera. In the seven years after Damrosch's death in 1885 all of Wagner's operas from *Rienzi* to *Götterdämmerung* were conducted – five for the first time in America – by his successor, Anton Seidle. As in Europe, this was the peak period for Wagnerism, and this was particularly evident in New York. Celebrated European singers like Lehmann, Marianne Brandt, Amalie Materna and Albert Niemann were

members of the company, and in effect the Metropolitan became a German opera house; even *Il trovatore* and *Aida* were given there in German. Out of 17 operas in the repertory in the 1890–91 season, eight were by Wagner.



The sobriety of the programmes eventually exhausted the patience of the box holders, and in 1891 Abbey returned as lessee, placing the management in the hands of Grau, a shrewd student of public taste. He built his company around such admirable singers as Emma Eames, the De Reszkes, Emma Albani and Jean Lassalle, at first presenting the repertory exclusively in French and Italian. It was Grau's conviction that audiences attended opera primarily to hear fine singing, a belief he substantiated with some of the most brilliant casts Americans had ever heard. Among them were Nordica, Eames, Zélie De Lussan, Victor Maurel, Edouard De Reszke and Giuseppe Russitano in *Don Giovanni*; Melba, Nordica, Sofia Scalchi, the De Reszkes, Maurel and Pol Plançon in Meyerbeer's *Les Huguenots*; and Nordica, Brema, the De Reszkes and Giuseppe Kaschmann in *Tristan und Isolde* when the performance of German opera in German was resumed in 1896. In many respects these paralleled performances at Covent Garden, where Grau was also the impresario during part of this period.

Grau retired in 1903 and a new producing group was organized with Heinrich Conried as manager. His theatrical experience as a producer of plays in German improved that aspect of the Metropolitan's productions considerably. Highlights of Conried's tenure included Caruso's Metropolitan début (23 November 1903), a sensational *Salome* with Fremstad (22 January 1907), Chaliapin as an almost nude Méphistophélès (20 November 1907) and Mahler conducting *Tristan und Isolde* (1 January 1908).

Giulio Gatti-Casazza, the director of La Scala, was engaged as director in 1908, becoming general manager in 1910; Toscanini came to the Metropolitan with him, making his conducting début in a performance of *Aida* (16 November 1908). With the musical cooperation of Toscanini and the financial assistance of Otto Kahn, Gatti-Casazza established an operatic enterprise of imposing scope and efficiency. Under him the policy of presenting opera in the language of its composition became the rule of the house. Important conductors during his 27-year tenure included Mahler (1908–10), Toscanini (1908–15), Hertz (1902–15), Bodanzky (1915–39) and Serafin (1924–34). The repertory was expanded to include as many as 48 different works in a 24-week season. Puccini's *La fanciulla del West* and Humperdinck's *Königskinder* had their world premières at the Metropolitan in 1910. Gatti-Casazza continued to keep abreast of operatic developments in Italy and elsewhere, at the same time initiating the production of American operas, including Converse's *The Pipe of Desire*

(18 March 1910), Parker's *Mona* (14 March 1912) and Taylor's *Peter Ibbetson* (7 February 1931). Although the company prospered under Gatti-Casazza's astute management, the 1929 stock market collapse and ensuing Depression severely depleted its reserve fund, and the season was shortened to 16 and later to 14 weeks. In 1935 Gatti-Casazza retired and was succeeded briefly by the singer Herbert Witherspoon, who died while planning his first season. His successor was the Canadian tenor Edward Johnson, long a member of the company, who managed the Metropolitan until 1950.

An experiment with a low-priced spring season featuring young American singers sponsored by the Juilliard Foundation lasted only two years (1936–7), but American singers such as Lawrence Tibbett, Eleanor Steber, Rose Bampton, Richard Crooks, Dorothy Kirsten, Leonard Warren and Risë Stevens played an increasingly important role during Johnson's regime. Helen Traubel, Lauritz Melchior and Kirsten Flagstad led a strong Germanic wing with outstanding Wagner performances in the late 1930s and early 1940s. Italian opera continued to dominate the repertory, French works being in the minority. Few modern operas were produced during Johnson's tenure, although the Metropolitan did give Walter Damrosch's *The Man without a Country* in 1937, Bernard Rogers's *The Warrior* in 1947 and Britten's *Peter Grimes* in 1948. The Metropolitan Opera Guild, a supporting organization founded in 1935 by Mrs August Belmont, has a national membership of over 100,000 and sponsors an educational programme and special performances for schoolchildren.

In 1950 Rudolf Bing, a Viennese impresario who had managed the Glyndebourne and Edinburgh festivals, became general manager of the Metropolitan. His tenure, which lasted until 1972, was marked by modernization of stage techniques, an increasingly international cast and the move of the company to new quarters in Lincoln Center. Although the repertory remained basically conservative, Bing introduced several American operas including Barber's *Vanessa* (15 January 1958; fig.7), Menotti's *Le dernier sauvage* (23 January 1964) and Levy's *Mourning Becomes Electra* (17 March 1967); light operas such as Strauss's *Die Fledermaus* and Offenbach's *La Périchole* were also added to the repertory.

The new Metropolitan Opera House at Lincoln Center opened on 16 September 1966 with the world première of Barber's *Antony and Cleopatra*, in which Justino Díaz and Leontyne Price sang the title roles. Although the work was a spectacular failure, the house was a success. The seating capacity of the new auditorium (3788) is not much larger than that of the West 39th Street building (3625), but the inadequate staging facilities of the old house were replaced by a much larger stage and generous backstage quarters. The $46 million required for construction was raised in contributions by Lincoln Center and the Metropolitan Opera Association. The opera orchestra has 140 members and the chorus 80 full-time members.

In addition to accommodating the regular Metropolitan season of 32 weeks, the house is used by visiting opera and dance companies from the USA and abroad. Bing resigned in 1972 and his successor, the Swedish director Göran Gentele, died before his first season. Since then the Metropolitan Opera management has undergone several

6. Programme for the opening of the Metropolitan Opera House, 22 October 1883

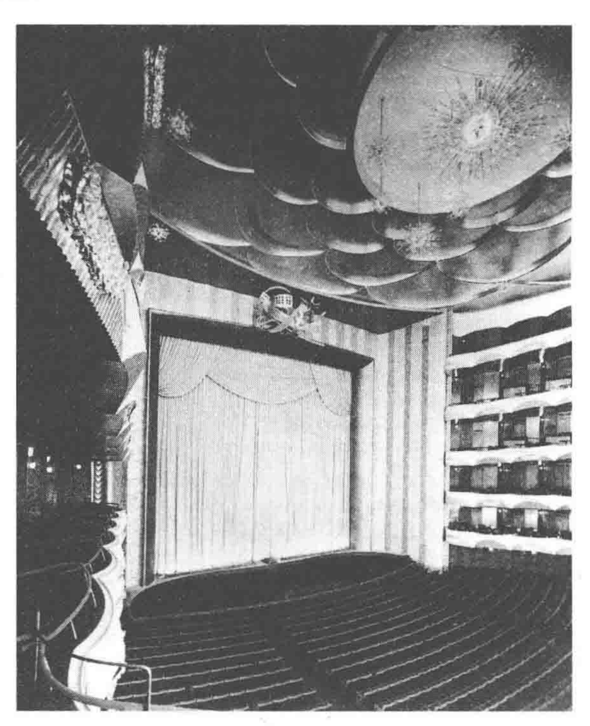
7. Set design by Cecil Beaton for the original production of Barber's 'Vanessa', Metropolitan Opera, New York, 15 January 1958

reorganizations, resulting in a gradual separation of the artistic and managerial functions. Artistic control has increasingly been given to the conductor James Levine, appointed music director in 1975. His interests range from the early Mozart operas to the classics of the 20th-century repertory. Notable new productions under his tenure have included *Idomeneo*, *Rinaldo*, *Lulu*, *Wozzeck*, *Mahagonny* and *Moses und Aron*. Management of the company has been assumed by a succession of administrators: Schuyler Chapin (1972–5), Anthony Bliss (1975–85, with Levine and John Dexter, 1975–80), Bruce Crawford (1986–9), Hugh Southern (1989–90) and Joseph Volpe (from 1990). The Metropolitan has maintained its international status as a showcase for singers suited to the scale of the auditorium, a scale which also helped determine the house production style of spectacular naive realism, represented particularly by the work of Zeffirelli (*see* OPERA, fig.50). In the 1990s the company began to use in addition more exploratory directors and designers, and to broaden its hitherto traditional repertory. Corigliano's *The Ghosts of Versailles*, given its première on 19 December 1991, was the first new opera performed by the company since *Antony and Cleopatra*, and was followed by Glass's *The Voyage* (1992) and Harbison's *The Great Gatsby* (1999). During this period, too, Levine began giving concerts at Carnegie Hall with the Metropolitan orchestra.

Only two companies have challenged the hegemony of the Metropolitan on a regular basis. The first, Oscar Hammerstein's Manhattan Opera Company, opened in December 1906 in the Manhattan Opera House on 34th Street; Cleofonte Campanini was artistic director and conductor. Before frustrated guarantors of the Metropolitan bought him out in 1910, Hammerstein had introduced many French works to American audiences, including *Thaïs* (25 November 1907), *Louise* (3 January 1908) and *Pelléas et Mélisande* (19 February 1908), all with Mary Garden. He also presented such celebrated singers as Melba, Calvé, Tetrazzini, Renaud and Dalmorès, in a varied repertory including the American première of Strauss's *Elektra* (1 February 1910).

The New York City Opera was founded as the City Center Opera Company in 1943. Opening at the City Center Theater in West 55th Street on 21 February 1944 with Dusolina Giannini as Tosca, the company has consistently encouraged participation by younger singers, composers and audiences. At first seasons were short, a few weeks before and after the Metropolitan, but the spring and autumn periods were later lengthened to 11 weeks each, with about 175 performances given annually. A succession of conductor-managers – Laszlo Halász (1944–51), Josef Rosenstock (1952–5), Erich Leinsdorf (1956–7) and Julius Rudel (1957–79) – produced an imaginative repertory ranging from Prokofiev's *The Love for Three Oranges* (1949), *Wozzeck* (1959), Handel's *Giulio Cesare* (1971) and Monteverdi's *L'incoronazione di Poppea* (1973), to Gilbert and Sullivan, without neglecting standard works. American opera fared particularly well at the City Opera; premières included Still's *Troubled Island* (1949), Copland's *The Tender Land* (1954), Kurka's *The Good Soldier Schweik* (1958), Douglas Moore's *The Wings of the Dove* (1961), Ward's *The Crucible* (1961), Rorem's *Miss Julie* (1965), Weisgall's *Nine Rivers from Jordan* (1968) and Menotti's *La loca* (1979). On 22 February 1966 the New York City Opera opened its spring season at its new home, the New York State Theater in Lincoln Center, with a performance of Ginastera's *Don Rodrigo*. The house (cap. 2800) was originally designed for the New York City Ballet, and was criticized as acoustically unsuited to opera, but a renovation in 1981–2 (cap. 2737) resulted in improved acoustics for opera performances.

The City Opera has always stressed ensemble production in contrast to the international star system, and has produced some fine native singers, among them June Anderson, Patricia Brooks, Ashley Putnam, Samuel Ramey, John Reardon, Gianna Rolandi, Beverly Sills, Norman Treigle and Carol Vaness. Sills became director of the company in 1979, and Christopher Keene acted as



music director (1982–6). Sills encouraged American conductors and opera in English. In 1984 the company was the first in the USA to introduce surtitles. The City Opera has continued to produce new works by American composers, among them Floyd's *Of Mice and Men*, Glass's *Akhnaten*, Anthony Davis's *X* and Argento's *Casanova's Homecoming*. Productions of Bernstein's *Candide* (1982) and Sondheim's *Sweeney Todd* (1984) demonstrated Sills's interest in forging links between opera and musical theatre. In 1984 the company received a gift of $5 million to make possible a regular spring season of musical comedy. Latterly one or two musical comedies have been performed each season along with traditional operas, new works (including Wiesgall's *Esther* in the company's 50th anniversary season) and rare 20th-century European works, such as *Die Soldaten*, *Doktor Faust* and *Mathis der Maler*, that became a speciality during Keene's term as general director (1989–96). His successor, Paul Kellogg, has turned attention more to the recent American past.

Notable among the city's smaller opera companies are the Amato Opera Theatre (founded 1948), which has presented the American premières of Boito's *Nerone* and Verdi's *Alzira*; the Bronx Opera Company (1967), which juxtaposes standard repertory with lesser-known works; the Opera Orchestra of New York (1966), which gives unusual works in concert form; the Village Light Opera Group (1968); the New York Grand Opera (1973), which presents popular staged performances of more familiar operas; and the Dicapo Opera (1981), which mixes the familiar with the unfamiliar. Conservatories and schools combine training and performance in contemporary and standard repertory; among the most important are the Juilliard School's American Opera Center and the Manhattan School of Music. Besides the ensembles already mentioned, more than 40 organizations produce operas regularly.

The New York stage has also played host to more popular musical entertainment throughout its history. Following the success of ballad opera in the 18th century, parody burlesques, minstrel shows and extravaganzas dominated the scene in the mid-19th century. *The Black Crook* (music by Thomas Baker and others, 1866), *Evangeline* (1874) by E.E. Rice and Charles Hoyt's *A Trip to Chinatown* (1890) were particularly successful productions in a developing vernacular form that eventually fused song, dance and plot into the American musical comedy.

Operettas by Offenbach were popular from the 1860s, but in the two decades after the New York première of *H.M.S. Pinafore* (January 1879) European light opera by Sullivan, Audran, Millöcker and others competed with local operetta by Caryll, Kerker, De Koven and Herbert. Gilbert and Sullivan, Lehár and Strauss still draw enthusiastic audiences to both opera houses and off-Broadway theatres, especially the Light Opera of Manhattan (founded 1968).

George M. Cohan's first success, *Little Johnny Jones* (1904), popularized the patriotic American musical; 'Give my regards to Broadway' became a theme that summed up the importance of the New York stage in the vernacular musical theatre for the rest of the century. A Broadway run is a requisite for a successful musical comedy, and Broadway theatres have fostered such composers as Kern, Berlin, Gershwin, Porter and Rodgers. Blitzstein, Menotti,

8. Auditorium of the Metropolitan Opera House, Lincoln Center, opened 1966

Bernstein and Sondheim have attempted to bridge the gap between the Broadway musical and opera with such works as *Regina* (1949), *The Consul* (1950), *Candide* (1956) and *Sweeney Todd* (1979). After the Metropolitan Opera opened its house on Broadway in 1883, lavish theatres were soon built in the district around 42nd Street, such as the Lyceum (1903), New Amsterdam (1903), Lyric (1903), Liberty (1904), Republic (later Belasco and Victory, 1907), Eltinge (later Empire, 1912), Harris (1914), Apollo (1920) and Ritz (later Walter Kerr, 1921). The area became the centre of entertainment after the brothers Shubert began to operate their theatres in 1900. By the late 1920s the Shubert Organization owned more than 100 theatres around the country; among those in the city were the Shubert Theatre, Booth Theatre (both built in 1913), the Broadhurst Theatre (1917) and the Barrymore Theatre (1928), which the organization retained until the 1990s. In the mid-1990s the Shuberts owned and operated 16 Broadway theatres. Since its arrival to Broadway, the organization has produced over 500 melodramas, comedies, operettas, musicals and reviews. The New York opening of the Walt Disney Company's first Broadway show, *Beauty and the Beast* (1994), coincided with the beginning of Disney's renovation of several theatres on 42nd Street.

Dance also plays a vital part in New York's musical-theatrical life. Among the most prominent of the almost 100 dance companies in the city are the New York City Ballet (founded 1948), the Ballet Theatre (1939; renamed the American Ballet Theatre, 1956), the Robert Joffrey Theatre Ballet (1956–64, the Robert Joffrey Ballet since 1965), the Alvin Ailey American Dance Theatre (1958), the Martha Graham Dance Company (1926) and the Paul Taylor Dance Company (1961).

5. Orchestras and bands. Amateur orchestras first appeared late in the 18th century. In 1799 two of these organizations, the St Cecilia and Harmonical societies, joined forces to form the Philharmonic Society, which in that year participated in the funeral service for George Washington. This first Philharmonic ceased activity after 1816, to be followed in 1824 by a second Philharmonic Society, which played the finale of Beethoven's Second Symphony for the first time in New York on 16 December 1824 and continued in existence until 1827. In 1825 unidentified groups essayed Beethoven's *Die Geschöpfe des Prometheus* and the *Egmont* overture, both at City Hotel. The Euterpean Club, which gave one orchestral concert annually, existed from 1800 to 1847. The New York Musical Fund Society, an orchestra that first appeared in 1828, attempted the first movement of Beethoven's First Symphony under U.C. Hill at City Hotel on 27 April 1831, but 'the orchestra was weak [and] the instruments were frequently out of tune and out of time'. The Steyermarkische, Lombardi, Gung'l, Saxonia and Germania orchestras arrived from Europe in 1848–9, but most were notable more for their discipline and uniforms than for the quality of their programmes. The Germania Musical Society survived until 1854, giving exemplary performances of great works, but the other groups disbanded.

The Philharmonic Symphony Society of New York dates from 1842, and is the oldest orchestra in continuous existence in the USA. The impetus for its foundation came in June 1839 when a 'musical solemnity' in memory of Daniel Schlesinger brought together a nucleus of musicians intending to form a permanent orchestra. The first organizational meeting of the Philharmonic Society was called by Hill on 2 April 1842. The first concert was held in the Apollo Rooms on Lower Broadway on 7 December 1842: an orchestra of 63 players performed Beethoven's Fifth Symphony under Hill, Weber's *Oberon* overture led by D.G. Etienne and an overture in D by Kalliwoda conducted by H.C. Timm. Hummel's quintet arrangement of his Septet in D minor and vocal selections from *Fidelio*, *Die Entführung aus dem Serail* and Rossini's *Armida*, sung by C.E. Horn and Mme Otto and conducted by Timm, made up the rest of the programme. The first season consisted of three concerts; the second included the American première of Beethoven's Third Symphony. During the next 16 seasons the orchestra gave four concerts annually; in 1859–60 they gave five, and a decade later six. During its first ten years the orchestra numbered between 50 and 67 players. Various conductors, usually members of the orchestra, shared the podium, often during the same concert; George Loder was perhaps the most outstanding. Later one or two conductors assumed the responsibility, beginning with Theodore Eisfeld who was elected director in 1848 and served until 1865. Other conductors included Carl Bergmann (1855–76), Leopold Damrosch (1876–7), Theodore Thomas (1877–91) and Anton Seidl (1891–8). Under the presidency of R.O. Doremus the number of players increased to 100 in 1867, and the orchestra moved to larger quarters at the Academy of Music. It subsequently relocated to the Metropolitan Opera House (1886), then to Carnegie Hall (1892).

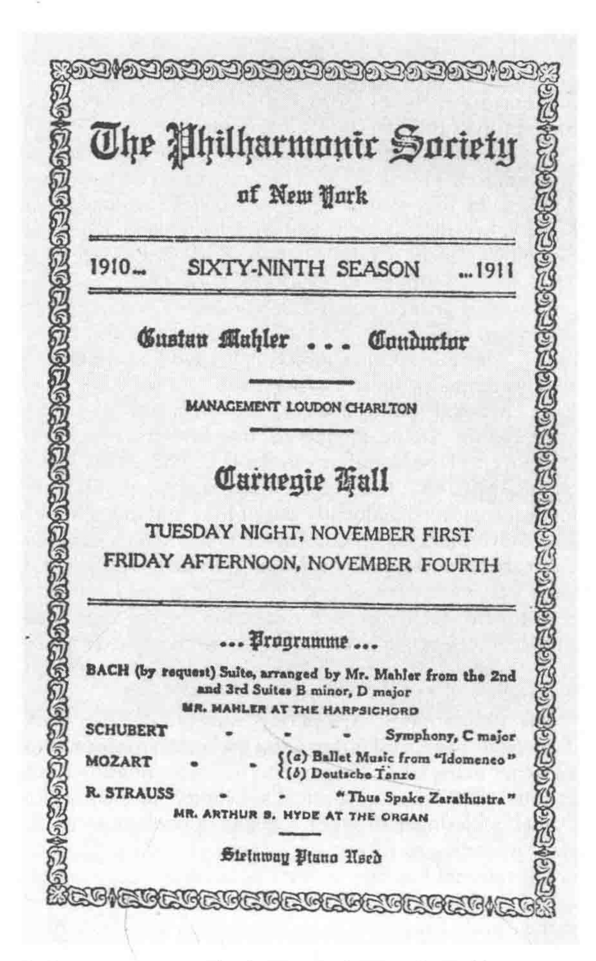
The repertory of the New York Philharmonic reflected the European training of its conductors, and there was heavy emphasis on the Germanic school. On 20 May 1846 Loder led the first American performance of Beethoven's Ninth Symphony at Castle Garden before an audience of 2000; the same year saw performances of Chopin's First Piano Concerto and several Berlioz overtures. Although the orchestra performed Bristow's *Concert Overture* in 1847, European works continued to fill the programmes throughout the century. Bergmann, Thomas and Seidl were all notably progressive in the advocacy of new music. Seidl, in particular, specialized in the works of Liszt and Wagner.

The age of the Philharmonic and its 20th-century significance assure the orchestra a predominant place in New York's musical history, but at times during the 19th century other orchestras partly eclipsed its importance. Lighter music and American works were emphasized by Jullien, who conducted an occasional orchestra at the Crystal Palace after 1853; his concerts included Fry's programmatic symphonies *A Day in the Country*, *The Breaking Heart* and *Santa Claus*. In 1867 Thomas, who made his conducting début at Irving Hall in 1862, formed his own 60- to 80-piece orchestra which performed in New York and on national tours until 1891. Programmes included music from Bach to Saint-Saëns, and some concerts were devoted to Wagner, Beethoven, Mozart and Mendelssohn. The majority of Seidl's numerous New York symphonic concerts were the orchestras other than the Philharmonic (though with overlapping personnel); his Seidl Society Orchestra performed 14 times each week in the summer at Coney Island's Brighton Beach, offering programmes filled with Wagner. The first Brooklyn Philharmonic (1857) was similar to its New York counterpart; among its conductors were Eisfeld, Bergmann and Thomas.

The New York Symphony Society was founded in 1878 by Leopold Damrosch, who conducted the orchestra until his death in 1885 when his son Walter assumed the position. Orchestras under Damrosch and Thomas competed: in 1881 Damrosch conducted 1500 performers in Berlioz's *Grande messe des morts* before an audience of 10,000, and in 1882 Thomas directed a mammoth festival with a chorus of 3200 assembled from other cities. Although the Symphony's performances were not as well received critically as the Philharmonic's, Damrosch's programmes were often more adventurous, tempering the usual Germanic fare with works by Debussy and Berlioz.

Walter Damrosch reconstituted the orchestra on a cooperative basis in autumn 1903 as the New York SO; profit and loss were shared by members of the organization and a group of guarantors. This proved unsatisfactory and the Symphony Society was reorganized in 1907 with regular salaries for the musicians and a board of directors who assumed all financial responsibilities. H.H. Flagler, a supporter of the society for several years, undertook its financial backing in 1914. In 1920 he provided an estimated $250,000 for a concert tour of Europe, the first by an American orchestra. Long before then, however, Damrosch and his orchestra had been noted for their pioneering activities, bringing symphonic music to many communities in the USA for the first time. Until 1928 Damrosch conducted the majority of its concerts, although Weingartner shared the 1905–6 season with him as guest conductor. In the 1920s a number of guest conductors appeared with the Symphony Society, including d'Indy, Albert Coates, Vladimir Golschmann, Walter,

Fritz Busch, Ravel, Eugene Goossens, Gabrilovich and Arbós.



From 1887 New Yorkers could also hear the Boston SO in as many concerts as were given by the local Philharmonic. Late in the 19th century Thomas returned with the Chicago SO, and the Philadelphia Orchestra made regular visits from 1903. The local Russian SO (1904–18) under Modest Altschuler introduced works by Rachmaninoff, Skryabin, Rimsky-Korsakov and Lyadov, and the American débuts of Lhévinne (1906), Elman (1908), Rachmaninoff (1909) and Prokofiev (1918) were made with them. An Italian SO conducted by Pietro Floridia appeared in 1913.

Meanwhile the Philharmonic continued a wavering but sedate course under Emil Paur (1898–1902), Walter Damrosch (1902–3), various guests (1903–6), Vasily I. Safonov (1906–9), Mahler (1909–11) and Josef Stransky (1911–23). In 1909 the orchestra, which had been operated on a cooperative basis, was reorganized as a full-time professional ensemble with a group of guarantors to ensure financial solvency. In 1921 it amalgamated with the two-year-old New/National SO which had been conducted by Varèse, Bodanzky and Mengelberg. The concert schedule had increased considerably, and it was decided that the conductor's task was too great for one person, so the duties were shared by two or three principal conductors and various guests. During the next decade regular conductors included Mengelberg (1921–30), Willem van Hoogstraten (1923–5), Furtwängler (1925–7), Toscanini (1927–36), Molinari (1929–31), Kleiber (1930–32) and Walter (1931–3).

During this period the Philharmonic Society absorbed several other new orchestras, among them the City Symphony (1921–3), the American National Orchestra (1923) and the State SO (1923–6). The most important merger was that of the Philharmonic with Damrosch's Symphony Society in March 1928, the orchestra being renamed the Philharmonic-Symphony Society Orchestra.

The growth of the USA, the cosmopolitan nature of its social order and a new prosperity demanded more consistent bases for its performing organizations than personal whim, private philanthropy or musicians' profit sharing. All aspects of the business of music in the USA were now centred in New York: concert management, publishing, radio broadcasting, phonograph recording and musicians' unions. The merger of the two competing orchestras under a single board of trustees was a logical development, but a subsequent plan to unite the orchestra and the Metropolitan Opera was discarded. The new season lasted 28 weeks and included 103 concerts. Toscanini became the principal conductor, sharing the 1928–9 season with Mengelberg and Molinari. A European tour in spring 1930 offered 23 concerts in five weeks. Toscanini's tenure has become legendary, and many accounts describe the glamour of the years 1929–36.

After Toscanini's retirement regular conductors of the Philharmonic included Barbirolli (1936–43), Rodziński (1943–7), Walter (1947–9), Mitropoulos (1949–58), Bernstein (1958–69), Szell (music advisor and senior guest conductor, 1969–70), Boulez (1971–7), Mehta (1978–91) and Masur (1991–2002). Bernstein, the first American-born conductor to direct the orchestra, brought an eager showmanship that did not earn universal approval but undeniably produced vital interpretations both of the standard repertory and of lesser-known works. Although

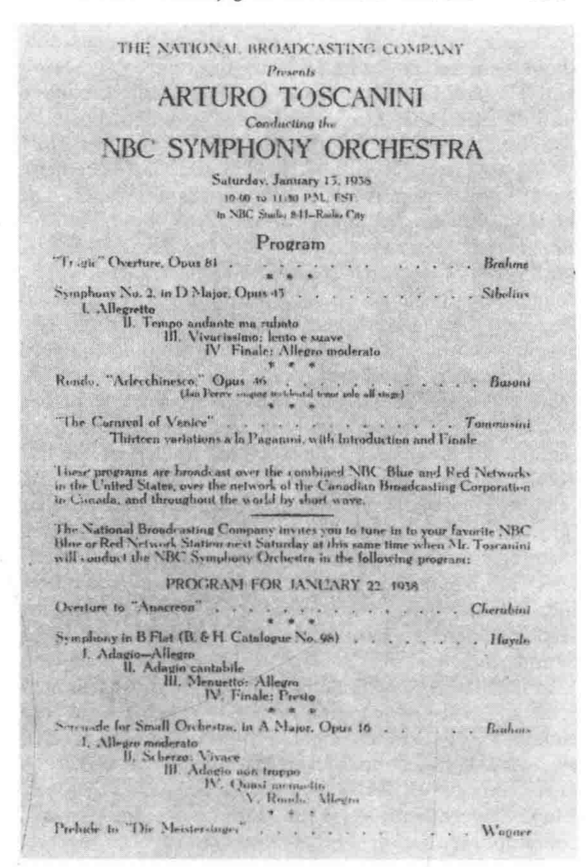
9. Concert programme for the New York PO under Mahler, Carnegie Hall, November 1910

his programmes were generally conservative he gave the world première of Ives's Second Symphony (1902) in 1951, and included works of living American composers from Randall Thompson to Copland and Schuman. He maintained his association with Broadway theatre and continued to compose during his tenure as conductor.



Boulez, by contrast, emphasized unfamiliar repertory both of 20th-century composers and of such earlier composers as Liszt, Schumann and Haydn. He instituted a series of informal 'rug concerts' and presented programmes in less important auditoriums, with the intention of drawing a wider public than the subscription audience. Mehta, who had previously led the Los Angeles PO, returned to a more conventional repertory, though he commissioned Messiaen's *Eclairs sur l'Au-delà*: his greatest affinity was with Romantic literature. Masur restored the orchestra's solidity in the classic Austro-German repertory.

In 1964 the Philharmonic became the first American orchestra to offer year-round contracts to its members, which led to expanded programming. In the 1990s the orchestra gave nearly 200 concerts each year. The principal season runs from late September to June with four subscription concerts weekly in Avery Fisher Hall. In late spring and summer there have been various festivals, tours and parks concerts.

Orchestral concerts for children were presented by Thomas as early as 1883, but their continuous history begins with the establishment of the Young People's Symphony Concerts of New York by Frank Damrosch in 1898, with the Symphony Society's orchestra. Walter Damrosch, succeeding his brother, added a series for younger children. The Philharmonic Society launched its own children's concerts in January 1924 under the direction of Ernest Schelling, who continued to conduct the programme until his death in 1939. The society has maintained the Young People's Concerts. Between 1958 and 1969 Bernstein conceived, wrote, narrated and conducted 47 televised shows before audiences of children. Radio broadcasting of the orchestra's concerts began in 1922 and continued until 1967; it was resumed in 1975.

Throughout the 20th century New York has been rich in orchestras. From 1940 to 1943 a New York City Symphony supported by government funds was conducted by Klemperer, Beecham and others. In 1944 a new orchestra under Stokowski was formed with the same name; the final season was conducted by Bernstein in 1947. Radio broadcasting networks have often formed their own orchestras in the city. One sponsored by CBS and conducted by Bernard Herrmann and Howard Barlow was active from 1927 to 1950, and Alfred Wallenstein led an orchestra for the Mutual network from 1933 to 1943. Probably the most famous was the NBC SO, formed in 1937 specifically for Toscanini, who conducted it until 1954 when he retired; the ensemble disbanded soon afterwards.

In the 1990s some 40 symphony orchestras were active in New York and its environs, some of which were amateur or community ensembles, others fully professional; most offer between three and six concerts each season. The Brooklyn PO, under its artistic directors Lukas Foss (1971–90), Dennis Russell Davies (1990–95) and Robert Spano (1996–), has been notable for its adventurous programming. The Little Orchestra Society, conducted from 1947 to 1975 by Thomas Scherman, and Newell Jenkins's Clarion Concerts (founded 1958) have been active in reviving neglected repertory. Other orchestras include the American SO, an ensemble of young professionals founded in 1962 by Stokowski and reorganized in 1973 as a cooperative orchestra; the American Composers Orchestra, founded in 1977 to promote American orchestral music, with Dennis Russell Davies as principal conductor; and the New York Chamber SO, founded in 1977 with Gerard Schwarz as conductor. The National Orchestra of New York (formerly the National Orchestral Association), conducted by Leon Barzin from 1930 to 1976 and a training ground for young musicians seeking orchestral experience, has been affiliated with Columbia University since 1984. The Orchestra of St Luke's evolved in 1979 from the St Luke's Chamber Ensemble, founded by Michael Feldman. Under its later music directors Roger Norrington (1990–94) and Charles Mackerras (1998–) the orchestra developed a diverse repertory ranging from the Baroque to contemporary music. The New York Pops Orchestra specializes in popular orchestral repertory. Other New York orchestras include the Queens SO, the Bronx SO, the New York City SO, the Julius Grossman Symphony, and the suburban Long Island PO (Melville), the Westchester PO (Hartsdale), the Massapequa PO and the Nassau SO.

Prelude to "Die Meistersinger" . . . . . *Wagner*

10. Concert programmes for the NBC SO under Toscanini, January 1938

Bands in New York were frequently affiliated with military regiments, but played public concerts in the parks and at Manhattan and Brighton beaches. Among the most famous bandmasters in New York were the Dodworth family, Claudio S. Grafulla, Carlo Alberto Cappa, Patrick S. Gilmore and, later, Edwin Franko Goldman and his son Richard. The tradition of military bands in the city inspired founding of professional brass bands in the early to mid-19th century, the first of them being Thomas Dilka's Independent Band of New York formed in 1825. In 1835 Allen Dodworth took some of its members and formed the National Brass Band which became the most successful and influential band in the city. In 1860 the bandmasters lived in the city: Harvey Dodworth led the Dodworth Band and the 13th Regiment Band of the New York National Guard, Claudio S. Grafulla and David L. Downing led the 9th Regiment Band, Patrick S. Gilmore assumed in 1873 leadership of the 22nd Regiment Band, known from then as Gilmore's Band. After Gilmore's death in 1892, 19 musicians from the band joined the ensemble of J.P. Sousa, which became nationally renowned. Edwin Franko Goldman formed his own band in 1911, and it performed continuously from 1918 to 1979 (from 1956 it was directed by Richard Franko Goldman). Since 1980 the group has continued under the direction of Ainslee Cox as the Goldman Memorial Band.

6. CHAMBER MUSIC. Few concerts devoted to chamber music were given publicly in New York before 1850. In 1851 Theodor Eisfeld initiated a series of quartet concerts

including works by Haydn, Beethoven and Mendelssohn; these were succeeded in 1855 by the renowned Mason and Thomas Chamber Music Soirées, which continued until 1868. Their fine programmes included music by Schubert, Schumann and Bach. On 27 November 1855 William Mason, Theodore Thomas and Carl Bergmann gave the first performance of Brahms's Trio op.8. The New York Trio, founded about 1867 by Bernardus Boekelman, was active until 1888. The Kneisel Quartet (1885–1917) and the Flonzaley Quartet (1903–29), founded by the New Yorker Edward J. De Coppet, played frequently in private homes and at public concerts. The People's Symphony Concerts, a series of public chamber music concerts, were inaugurated in 1902. In 1914 the pianist Carolyn Beebe founded the New York Chamber Music Society, a group of about 12 musicians who gave regular concerts at the Plaza Hotel and elsewhere for about 25 years. The Society of the Friends of Music (1913–31) was chiefly a sponsoring organization that introduced many unfamiliar works to New York, among them Schoenberg's Chamber Symphony op.9 and Mahler's Eighth Symphony (April 1916). The Barrère Ensemble, a wind group organized in 1910 by the flautist Georges Barrère, expanded in 1915 to become the Little Symphony.

In 1936 the New Friends of Music began an annual series of 16 concerts with a repertory ranging from solo sonatas to works for chamber orchestra, carefully selected to review certain eras or specific composers; the series lasted until 1953. While groups like the New Friends of Music concentrated on 18th- and 19th-century music, contemporary music was presented in regular concerts sponsored by the League of Composers and the American section of the International Society for Contemporary Music (both founded in 1923; they merged in 1954) and the National Association for American Composers and Conductors (1933). The music of young composers was heard in the Composers' Forum, active in New York until 1940 from its foundation in 1935 by Ashley Pettis; it was revived and sponsored jointly by the New York Public Library and Columbia University from 1947 to 1980, when it was reorganized independently. Early music became popular in performances by the New York Pro Musica (1952–74), founded by the conductor Noah Greenberg; the 13th-century *Play of Daniel* was performed in costume in 1958 and aroused an interest in period performance.

In 1925 40 chamber groups were identified as resident or as annual visitors; 50 years later at least 70 were resident and the number of visitors had increased. The Chamber Music Society of Lincoln Center, founded in 1968 by Charles Wadsworth with the support of Alice Tully, gives a series of programmes emphasizing unfamiliar repertory performed by outstanding musicians. Other mixed professional ensembles include the New York Chamber Soloists (1957), Tashi (1974), the New York Philharmonia Virtuosi, the Bronx Arts Ensemble and the Orpheus Chamber Orchestra (1972). The Juilliard (1946), Galimir, Guarneri (1964), Composers, American (1974), Concord, Emerson (1976) and Orion (1987) string quartets are based in New York, as are the American Brass Quintet and the New York (1947) and Dorian woodwind quintets. Ensembles specializing in contemporary music have included the Contemporary Chamber Ensemble (founded in 1960 by Arthur Weisberg), the Group for Contemporary Music (founded in 1962 by Harvey Sollberger and Charles Wuorinen), Continuum (founded in 1967 by Cheryl Seltzer and Joel Sachs as the Performers' Committee for 20th-Century Music), Speculum Musicae (1971), Parnassus, the Da Capo Chamber Players, and the New York New Music Ensemble, as well as several professional associations (see §§9 and 13 below). Professional ensembles specializing in early music include the Waverly Consort, the Ensemble for Early Music, the Western Wind, Music for a While, Pomerium Musices, the New York Renaissance Band, Calliope, Concert Royal, Anonymous 4 and the New York Cornet and Sackbut Ensemble. The Bach Aria Group (1946), the New York Collegium (founded in 1998 under the direction of Gustav Leonhardt) and the Neue Bach Band are the leading specialist Baroque ensembles.

7. Choral societies. The earliest choral societies included a Handel and Haydn Society, which sang the first part of *The Creation* on 10 June 1818 at St Paul's (in Trinity Parish), and the New York Choral Society, under James Swindells, which sang there before Lafayette during his visit in July 1824. The first established group on record is the Sacred Music Society (1823–49), which sang *Messiah* (using Mozart's accompaniments) under U.C. Hill in November 1831; the society had a chorus of 73 and an orchestra of 38 at that time, and the receipts of $900 imply a large audience. In 1838 the society performed Mendelssohn's *St Paul* and Mozart's Requiem. The first serious rival to the Sacred Music Society was the Musical Institute, founded in 1844 and directed by H.C. Timm. In 1849 the two groups merged to form the New York Harmonic Society, their first concert being a performance of Mendelssohn's *Elijah* (June 1851) in Tripler Hall. The society lasted until 1868 and its conductors included Timm, Eisfeld, Bristow, Bergmann, F.L. Ritter and James Peck. An ambitious splinter group, the Mendelssohn Society, formed in 1863, was short-lived. In 1869 Peck directed the socially orientated Church Music Association; in 1873 Thomas imported a Boston chorus for a festival concert, an action considered an insult to the vocal and choral forces of New York.

New York's German population had two prominent men's choruses: the Deutscher Liederkranz, which gave its first concert on 17 May 1847 in the Apollo Rooms, and the Männergesangverein Arion, an offshoot formed in 1854. The Liederkranz numbered Thomas, Bergmann, van der Stucken and Leopold Damrosch among its conductors before 1895, while the Arion rose to prominence after getting Damrosch from Breslau to be its director in 1871. The two societies united in 1918 and celebrated a centenary in 1947. In 1866 a professional men's chorus, the Mendelssohn Glee Club, was formed, which also survived for a century. Its first permanent conductor (from 1867) was the violinist Joseph Mosenthal, a pupil of Spohr and one of the city's leading church musicians; he died in 1896 while conducting a rehearsal of the group. MacDowell then led the club until 1898; his successors were Arthur Mees, Frank Damrosch, Clarence Dickinson, Nelson Coffin, Ralph Baldwin, Cesare Sodero and Ladislas Helfenbein. During the 20th century the membership shifted from professional to amateur singers, mainly businessmen, who sang popular favourites at private entertainments. Other men's clubs cultivating light music included the Downtown and University glee clubs,

both conducted for many years by Channing Lefebvre and George Mead.

The longest-lived serious choral organization is the Oratorio Society of New York, founded in 1873 by Leopold Damrosch. Its first concert (3 December 1873) included works by Bach, Mozart, Palestrina and Handel sung by a choir of about 50. In May 1874 the society gave Handel's *Samson* with orchestra, inaugurating the tradition of oratorio and large choral works that has continued to characterize the society's repertory. An annual Christmas performance of *Messiah* was inherited from the late Harmonic Society in 1874 and has continued to be a feature of the group's programme. Late in the 19th century choruses of 400 to 600 sang Brahms's *German Requiem* (1877), Berlioz's *Grande messe des morts* (1881), Liszt's *Christus* (1887) and Saint-Saëns's *Samson et Dalila* (1892), and introduced *Parsifal* to the USA in concert form (1886). After Leopold Damrosch's death in 1885 conductors of the Oratorio Society included his sons Walter (1885–98 and 1917–21) and Frank (1898–1912), Albert Stoessel (1921–43), William Strickland (1955–9), T. Charles Lee (1960–73) and Lyndon Woodside (from 1974).

Two organizations encouraging popular participation in music were the People's Choral Union and Singing Classes, organized in the city's lower East Side by Frank Damrosch in 1892 and continuing into the 1930s, and the People's Chorus of New York, founded and from 1916 to 1954 conducted by Lorenzo Camilieri. Both groups sometimes assembled choirs of 1000 voices.

Musical life was enriched by the Musical Art Society, a professional mixed chorus conducted by Frank Damrosch for 26 years from 1894, which performed Palestrina, Bach, and the *a cappella* repertory. Contemporary choral music including Pfitzner's *Von deutscher Seele* (1923) and Honegger's *Le roi David* (1925) was presented by the Society of the Friends of Music (1913–31).

The Schola Cantorum grew out of a women's chorus established by Kurt Schindler in 1909, which became a mixed ensemble in 1910 and adopted its later name in 1912. Schindler conducted the choir until 1926, when Hugh Ross began a long tenure ending only with the group's final concert in 1971. The Schola Cantorum's programmes often included unfamiliar works; Schindler introduced traditional and religious music from the Basque region and Catalonia, and Ross conducted the New York premières of such works as Bloch's *Sacred Service* (1934), Walton's *Belshazzar's Feast* (1935), Stravinsky's *Perséphone* (1936) and Delius's *Mass of Life* (1938).

Baroque music performed in period style characterized the programmes of the Cantata Singers, founded in 1934 by Paul Boepple, remaining active until 1969; later conductors of the ensemble – Arthur Mendel (1936–53), Alfred Mann (1953–9), Thomas Dunn (1959–67) and Robert Hickok (1968–9) – were also noted for their scholarship. The Dessoff Choirs grew out of Margarete Dessoff's Adesdi Chorus of women's voices organized in 1924; a mixed choir was begun in 1928, and from 1930 the combined ensembles directed by Dessoff performed under the present name. Boepple conducted the groups (which merged in 1942) from 1937 to 1968; subsequent conductors have been Thomas Sokol (1969–72), Michael Hammond (1973–82), Amy Kaiser (1983–95) and Kent Tritle (from 1996). The Dessoff Choirs perform mixed programmes ranging from Baroque to contemporary music. The Collegiate Chorale was founded in 1941 by Robert Shaw and conducted by him until 1954 with assistance (1949–52) from Margaret Hillis and William Jonson. Later conductors were Mark Orton (1953–4), Ralph Hunter (1954–60), Abraham Kaplan (1961–73), Richard Westenburg (1973–9) and Robert Bass (from 1979); this amateur ensemble has performed both large standard works and contemporary pieces.

Musica Sacra, organized by Westenburg in 1970 at the 5th Avenue Presbyterian Church, has become the most prominent professional choral ensemble in New York. Organizations employing professional choral singers are the National Chorale (founded 1959) led by Martin Josman, the Amor Artis Chorus and Orchestra (1961) led by Johannes Somary, the Gregg Smith Singers (1961), Musica Aeterna (1969), Musica Viva of New York (1977) led by Walter Klauss, Musicians of Melodious Accord (1984) and the New York Concert Singers (1988). The amateur St Cecilia Chorus, formed in 1906 by Victor Harris as a women's chorus, was expanded to a mixed ensemble in 1964. Other choruses are the Canterbury Choral Society (1952), Masterwork Chorus (1955), the New York Choral Society (1959), Canby Singers (1960), the New Amsterdam Singers (1968–72 as the Master Institute Chorus), the Canticum Novum Singers (1972), the Sine Nomine Singers (1973), the Cappella Nova (1975), the New Calliope Singers (1976), the New York City Gay Men's Chorus (1980), the Riverside Choral Society (1980) and the Russian Chamber Chorus of New York (1985). The Boys Choir of Harlem (1968) has achieved international renown.

8. Religious music. Trinity Church at the top of Wall Street (fig.11) became the first important centre of music in New York through the activity of William Tuckey (see §1 above), and the church continued to exert a powerful influence over sacred music in the city for over two centuries. The first organist, John Clemm (1741–4), was probably the son of Johann Gottlob Klemm, the builder of the organ. After a fallow period, during which George K. Jackson's Te Deum in F was sung weekly for over two decades, the newly rebuilt Trinity Church was consecrated in 1846, with the English musician Edward Hodges as its music director and organist. He introduced a boys' choir and a new repertory close to that of an English cathedral. 18,000 people attended a two-day inauguration of a new organ by Henry Erben, installed in the rebuilt church in 1846. Later organists there included H.S. Cutler, A.H. Messiter, Victor Baier, Channing Lefebvre, George Mead and Larry King, the last four of whom maintained the popular tradition of midday concerts.

One of the first examples of psalmody published in New York was *Psalms of David for the Dutch Reformed Church* (1767); a later important collection of psalm settings was *A Selection of Psalm Tunes for Use of the Protestant Episcopal Church in New York* (1812), revised in 1828 to include the works of five American composers. Thomas Hastings held various positions in New York from 1832 to 1872 and was an influential force in the city's musical development.

During the 19th century many churches developed extensive musical programmes. Large mixed choirs, led by quartets of highly paid professional singers, and organs with several manuals became standard. Many distinguished organists, who often shared the duties of choir

director, composer and teacher, served in the city, among them Samuel Prowse Warren at Grace Episcopal (1867–94), George William Warren at St Thomas's (1870–1900) and Harry Rowe Shelley at the Church of the Pilgrims and Central Congregational in Brooklyn and at the Fifth Avenue Baptist Church (1878–1936). G.W. Warren's son Richard held positions in various city churches for 50 years from 1880. William Crane Carl was at the First Presbyterian from 1892 to 1936, and Walter Henry Hall was active in New York from 1896 to 1935 at several churches, among them the Cathedral of St John the Divine. Ives served at Central Presbyterian (1900–02), and in Brooklyn Raymond Huntington Woodman was at the First Presbyterian (1880–1941), John Hyatt Brewer in several positions from 1871 to 1930 and Dudley Buck at Holy Trinity (1877–1901).

Pietro Yon at St Francis Xavier (1908–26) and St Patrick (1927–43), Clarence Dickinson at Brick Presbyterian (1909–59), and Tertius Noble at St Thomas's (1912–47) had long, distinguished careers. Like many of their colleagues they published anthems and larger choral works, the octavo editions of which sold millions of copies. Seth Bingham at Madison Avenue Presbyterian (1912–51), Samuel A. Baldwin (active 1895–1932), and W. Lynnwood Farnam at the Church of the Holy Communion (1920–30) were especially fine organists.

Although choirs have become smaller, many churches maintain the practice of performing large-scale sacred works, often on Sunday afternoons or evenings. Among these musically active churches are St Bartholomew, the Church of the Ascension, Riverside, St Thomas, the Cathedral of St John the Divine, the Church of our Saviour, Holy Trinity Lutheran, St Patrick's Cathedral, St Ignatius Loyola, First Presbyterian, the Fifth Avenue Presbyterian, St Mary the Virgin, Corpus Christi, and St Peter Lutheran (noted for its jazz and choral programmes). In the tower of the Riverside Church is the Laura Spelman Rockefeller Memorial Carillon, which with its 74 bells is the largest in the world. Significant music ensembles are also supported by the Russian Orthodox Cathedral of St Nicholas and the Armenian St Vartan Cathedral. Synagogues notable for their music are the Temple Emanu-El, Central Synagogue and the Ashkenazi synagogue B'nai Jeshurun.

9. Avant-garde music. The conscious cultivation of experimental musical activity in New York dates from the 1920s, and was the result of the convergence of several trends. One was the nascent self-awareness of American composers. Another was the rise of New York as the capital of American culture and its music business. A third was the sudden internationalism forced upon American artists and intellectuals by the country's involvement in World War I. The timing meant that avant-garde activities in New York had a distinctively French cast: most of the composers active in New York between the world wars had studied in Paris with Nadia Boulanger (above all Copland and Thomson) or were part of Varèse's circle. Organizations sponsoring new music included the League of Composers (founded 1923), with which Copland was deeply involved (its journal *Modern Music*, 1924–46, was particularly influential), the American

section of the International Society for Contemporary Music (ISCM), and two organizations founded by Varèse – the International Composers' Guild (1921–7) and the Pan American Association of Composers (1928–34). Cowell's series of scores (*New Music*), begun in 1927, was also important. The Composers' Forum, founded in 1935, carried on the sponsorship of new-music concerts.

The arrival in New York of many important European composers, notably Bartók and Wolpe, reinforced internationalist tendencies and fostered a younger generation of American composers who came to dominate new music after World War II. Beginning in the 1950s New York avant gardism became marked by a division of sensibilities that was subsequently labelled 'uptown' and 'downtown'. More visible at first was the 'uptown' serialist school (and its non-serialist but equally rationalist allies), linked with the academy. This group not only controlled the concerts of the combined League of Composers and ISCM, but later founded new performance groups that specialized in dense, highly dissonant, chromatic music: the Group for Contemporary Music, Speculum Musicae (1971) and the New York New Music Ensemble (1975).

The rationalist sensibility was also active in the first American experiments in electronic music, which centred on New York. Landmark events included the creation by Cage of the tape work *Imaginary Landscape no.5* (1951–2) and the first American tape-music concert, which Luening and Ussachevsky produced on 28 October 1952 at the Museum of Modern Art. In 1959 the RCA Mark II synthesizer was installed at Columbia University and the Columbia-Princeton Electronic Music Center, directed by Babbitt, Luening, Ussachevsky and Sessions, was founded.

Cage's work became the focus of 'downtown' new-music activity in the 1950s. His closest disciples were Christian Wolff, David Tudor, Morton Feldman and Earle Brown; their work was paralleled by the New York activities of Fluxus (fig.12), which prefigured the varied

13. 'Next Wave' festival performance of 'The Gospel at Colonus' by Lee Breuer and Bob Telson, Brooklyn Academy of Music, December 1983; performers include (right) Clarence Fountain and the Five Blind Boys of Alabama

forms of mixed-media experimentation of the 1960s and beyond. Allan Kaprow, the inventor of 'happenings', was part of the Cage circle, as were Toshi Ichiyanagi, Jackson Mac Low, Nam June Paik and La Monte Young.

Experimental concerts were held at night clubs such as the Electric Circus and at the major New York art museums (the Whitney, the Guggenheim, the Museum of Modern Art) long before they were accepted by the more conservative midtown musical organizations. But the bulk of experimental activity since the 1970s has taken place under the auspices of new organizations located in the lofts of lower Manhattan. Chief among them are the Kitchen, the Experimental Intermedia Foundation, Roulette and the Alternative Museum.

Some performers have succeeded in expanding their audiences by appearing in rock clubs, notably Glass, Reich, Laura Dean and Laurie Anderson. By the early 1980s experimental music in New York had begun to overlap with avant-garde jazz and rock. Composers such as Glenn Branca, Rhys Chatham and Peter Gordon, and bands including Sonic Youth, moved freely between experimental performance spaces and rock clubs; avant-garde rock musicians, among them Arto Lindsay, Elliot Sharp and John Zorn, have attracted some attention from new-music circles, and jazz composers such as Henry Threadgill and Joseph Jarman play both at jazz clubs and in Weill Recital Hall.

Experimental music has long been a limited offering at the city's major halls. By the 1980s, however, signs were pointing to the acceptance of experimental music in more traditional locations. The Brooklyn Academy of Music became an important sponsor of new-music activities with its 'Next Wave' events and festivals (fig.13). At Lincoln Center, Horizons festivals in 1983 and 1984, sponsored by the New York PO under the direction of composer-in-residence Jacob Druckman, offered a dramatic midtown showcase for a wide variety of new music. Other performing groups – the American Composers Orchestra, the Composers' Showcase and Continuum – perform contemporary music while steering a course between the various new-music factions.

10. RAGTIME AND JAZZ. New York's role in jazz history has always been significant, and from the mid-1920s decisive: it has attracted the best musicians, provided the most favourable opportunities for performing, hearing, broadcasting and recording the music, and has been the home of most important innovations. It was the seat of the ragtime craze early in the 20th century: elements of the pioneering 'classic' Missouri school, including ragtime king Scott Joplin and his publisher Stark, transferred to New York in the first decade, and New York's own school of ragtime was by far the country's most active, and certainly the most published. Much of the style was taken over into the Harlem school of stride pianists, the earliest

true jazz pianists, who performed and entertained at clubs and private social functions; they were frequently recorded, and their high technical standards and inventive improvisation influenced most later jazz pianists.

Small- and large-band jazz were slower to develop, but the point of departure was again ragtime, especially as performed (and as early as 1898 recorded) by Sousa's Band and those of his rivals Arthur Pryor and Charles Prince. Later bands played orchestral ragtime well into the 1920s on a scale indicated by the names of groups like the Fifty Merry Moguls, whose leader Fred Bryan was known as 'the jazz Sousa'. These and more importantly New York's dance bands, which proliferated in the many large dance halls founded during Prohibition, became the basis of the city's remarkable orchestral jazz in the 1920s. Thus the success of the Original Dixieland Jazz Band on their appearance in New York in 1917 is not surprising; other white groups playing a similar bowdlerization of New Orleans style had already appeared in New York, but without the combination of showmanship and shrewd publicity that allowed the Original Dixieland Jazz Band to bring jazz in quick succession to the city's, the nation's and Europe's attention (fig.14). In January 1917 they made the first jazz recording; their second, made in February, had sold two million copies by the end of the year. Their success spawned hundreds of similarly named white jazz groups in the city, of which the much recorded Original Memphis Five was the most important.

Jazz features were also taken over by many of the city's dance bands, particularly that of Paul Whiteman, whose name became a byword for jazz in the 1920s. Although Whiteman's 'symphonic jazz' was later discredited as a vitiated form of the music, he hired true jazz performers such as Bix Beiderbecke and Frankie Trumbauer, and his performances set standards of musicianship that were emulated by large jazz ensembles throughout the country.

Among the important black New York bands to profit from Whiteman's example were those of Fletcher Henderson and Duke Ellington. Each of these leaders hired first-rate jazz soloists as early as 1924, notably Louis Armstrong (with Henderson) and Sidney Bechet (with Ellington). Henderson's arranger Don Redman was among the first to transform Armstrong's 'hot' style into an orchestral idiom, developing a repertory that determined much of the swing-band music of the following decade. Less influential, though of greater artistic merit, were the experiments of Ellington, who from the mid-1920s combined commercial dance music with ingenious idiomatic arrangements and later produced what are widely regarded as the most significant jazz compositions.

By the end of the 1920s New York had become the centre of the American jazz scene. Armstrong, Jelly Roll Morton, King Oliver and Red Allen, the leading musicians in the late New Orleans style, all lived there, as did most of the important musicians of the Chicago school following the suppression of that city's underground 'speakeasy' culture. 'Red' Nichols and 'Miff' Mole had created an indigenous New York style of small-combo jazz characterized by well-integrated ensembles and comparatively advanced arrangements, while Beiderbecke, in many recordings with various ad hoc studio groups, was producing some of the greatest improvised solos of early jazz. Big bands on the Henderson model proliferated: bandleaders such as Henderson, Ellington, Luis Russell, Jimmie Lunceford, Cab Calloway, Chick Webb, Benny Goodman and Charlie Barnet, all performed, broadcast and recorded in New York in the 1930s, and Count Basie's group, the most important jazz orchestra of the competing Kansas City tradition, was based in New York from 1937. The recognition of jazz by the country's established musical institutions was marked in 1938 by Goodman's concert at Carnegie Hall, and the country's historical interest in the genre was demonstrated there the same year by John Hammond's retrospective 'Spirituals to Swing' concerts.

Small-ensemble jazz was generally not popular in the 1930s, but the repeal of the Prohibition Amendment had led to the establishment of numerous small clubs in New York, at some of which small jazz ensembles played. A number of clubs in 52nd Street (Onyx, Famous Door and Kelly's Stable) promoted advanced swing jazz in small combinations. Minton's Playhouse and Monroe's Uptown House, both in Harlem, were later indispensable to the bop school, which originated in New York in the early 1940s and was almost exclusively a small-group form. Café Society, Birdland, Half Note, Five Spot, Village Vanguard and Village Gate were all clubs that presented the most creative modern jazz of the 1940s and 50s. The Five Spot in particular fostered avant-garde jazz; the origins of free jazz are often dated from the appearance there of Cecil Taylor in 1957 and Ornette Coleman in 1959. Although developments in this genre also took place in Europe, New York shared with Chicago the leadership of the free-jazz scene and saw the origins in the 1960s of free-jazz groups like the New York Contemporary Five with John Tchicai and Don Cherry, the New York Art Quartet, the Jazz Composer's Orchestra and the musicians associated with LeRoi Jones's Black Arts Repertory Theater-School. Two developments of the late 1960s and early 70s had a lasting effect on New York's jazz culture: the ascendance of rock music, which made it difficult for jazz musicians to find employment or recording opportunities, and a deep economic crisis which caused many clubs to close and many musicians to prefer

14. Caricature of the Original Dixieland Jazz Band, with J. Russel Robinson (piano), Larry Shields (clarinet), Nick LaRocca (cornet), Emil Christian (trombone) and Tony Spargo (drums)

other cities (particularly New Orleans and Los Angeles). In emulation of visual artists and experimental classical musicians, some jazz players organized and performed in 'lofts', abandoned upper-storey warehouses available at relatively low rents. The loft scenes in SoHo (South of Houston Street) and Tribeca (Triangle Below Canal Street) witnesses highly interesting developments in avant-garde jazz in the work of such musicians as Sam Rivers, David Murray, Henry Threadgill and Julius Hemphill, and groups such as the World Saxophone Quartet. Many of their stylistic innovations later found their way into the post-modern aesthetic and 'world music' of the late 1980s.

With the city's economic recovery from the late 1970s New York regained much of its former influence as a jazz capital. The revival of bebop brought many older musicians back to the USA from self-imposed European exile, and several excellent repertoire orchestras were founded with the object of cultivating the historical styles of the jazz tradition. Among these ensembles were the American Jazz Orchestra, the Lincoln Center Jazz Orchestra and the Carnegie Hall Jazz Orchestra. Equally important was the recognition of mainstream jazz in the curriculum of the Juilliard and other music schools, ensuring a continuous influx of talented and highly trained young musicians into the jazz scene. Avant-garde jazz continued to flourish in the Knitting Factory (founded in 1987), where experimentation and crossovers with ethnic musics, notably klezmer, were systematically cultivated. The Newport Jazz Festival, which relocated to New York in 1972, remains one of the most active and prestigious festivals in the country under its present name of 'JVC Jazz Festival New York'.

Today New York's jazz scene is no longer confined to Manhattan but can also be found in the city's other boroughs, particularly Brooklyn. Although many of its jazz musicians are financially dependent on regular European tours for their livelihood, New York's concentration of media and creative artists is sufficient ot ensure that the city remains the nerve centre of America's jazz culture.

11. Ethnic and popular music. German singing societies made an important contribution to the city's choral life in the 19th century (see §7 above); in the last decades of the century many Irish and Italian immigrants brought their traditional music to New York, as did the Hungarians, Czechs, Russians, Ukrainians, Greeks and others. In the early 20th century especially, Jewish actors and dramatists from Russia made downtown Second Avenue a centre of the Yiddish stage; operettas and musical revues presented there had a further influence on popular songwriters, many of whom were of Jewish origin. The 1960s and 70s saw a constant flux of folk and ethnic styles, including a wide range of Latin styles, Greek, Middle Eastern and Asian music, reggae, and Brazilian jazz and bossa nova.

After 1950 rock and roll became firmly established in New York, owing in part to the extension of Tin Pan Alley's institutional structures into the rock field. Songwriters, including Carole King, Ellie Greenwich and Doc Pomus, many of whom worked in teams in the Brill Building on Broadway, turned out rock songs with the same facility as songwriters of the big-band era. New York was also a centre of doo-wop, which was largely a product of black and Italian American communities of the East Coast.

In the early 1960s musicians who played in such Greenwich Village clubs as the Bitter End and Folk City forged a creative union between rock and folk music. The most famous figure to emerge was Bob Dylan; others included Peter, Paul and Mary, the Lovin' Spoonful and Simon and Garfunkel. Folk music of this sort lost its commercial cachet after Dylan took up electric instruments in 1965, but it continued to produce fresh, young talent into the 1980s.

Beginning in the late 1960s Velvet Underground inspired the worldwide punk rock and new-wave movements, encouraging a return to the basics of rock music after the romanticized inflation of rock of the late 1960s and early 70s. A number of striking performers emerged in the late 1970s, among them Talking Heads, whose cool rock minimalism proved most enduring. New York rock evolved in the late 1970s and early 80s into an often deliberately primitive art rock, fostered by such musicians as Glenn Branca, Sonic Youth, Arto Lindsay and Elliot Sharp. The New York area was also the spawning ground of popular heavy-metal groups; of 'noise rock', highly animated, extremely loud improvisations full of exotic sound effects and propelled by an almost visceral energy; and of rap, the cadenced, rapid-fire chanting of lyrics, which often reflect social concerns, over a pounding funk beat.

12. Education. Music schools offering professional training became important in New York in the second half of the 19th century. One of the longest lived was the New York College of Music, founded in 1878. Having absorbed the German Conservatory in 1920 and the American Conservatory in 1923, it was itself incorporated into New York University in 1968. The National Conservatory of Music in America, founded by Jeanette Thurber in 1885, was granted a national charter in 1891, and Dvořák was director from 1892 to 1895. Although by 1910 the conservatory's reputation rivalled that of the Peabody, Cincinnati and New England conservatories, it fell far behind these private institutions in funding and ultimately succumbed to public apathy. A Metropolitan Conservatory, begun as a school of singing in 1886, became the Metropolitan College of Music in 1891 and the American Institute of Applied Music in 1900. It survived some 40 years but eventually succumbed to financial troubles. Settlement schools founded to provide musical training for underprivileged children fared better. The Henry Street Settlement (1893), Third Street Music School Settlement (1894), Greenwich House Music School (1906) and Turtle Bay Music School (1925) are among those that survive. In 1899 William C. Carl, a former student of Guilmant, founded at the First Presbyterian Church the Guilmant Organ School, the first American school devoted exclusively to the training of organists and choirmasters.

The Juilliard School, a conservatory of international reputation, was begun by Frank Damrosch in 1905 as the Institute of Musical Art. In 1924 the Juilliard Musical Foundation bestowed an endowment of approximately $23 million on a graduate school, which subsequently with the institute became known as the Juilliard School of Music. Later presidents have been John Erskine (1928–37), Ernest Hutcheson (1937–45), William Schuman (1945–62), Peter Mennin (1962–83) and Joseph W. Polisi (from 1984). Before moving to Lincoln Center in 1968 the school incorporated a drama division, raised the dance

department to divisional status and changed the name to the Juilliard School.

The Mannes College of Music was founded in 1916 by David Mannes and his wife Clara Damrosch. First known as the David Mannes School, the college became a degree-granting institution in 1953; it was the first school of music in the USA to offer a degree in the performance of early music. Leopold Mannes was director from 1940 until his death in 1964. The Manhattan School of Music, a conservatory founded by Janet Schenck in 1917, offers undergraduate and graduate degrees. Its programme in orchestral performance, founded in 1991, was the first of its kind in the USA. John Brownlee, president from 1966 to 1969, expanded the school's opera department, and in 1969 George Schick became president and the school moved to the Claremont Avenue building vacated by the Juilliard School. He was succeeded by John Crosby (1976–91) and Marta Istomin (1992–). The New School of Social Research added music to its curriculum in the 1920s. After 1933 it became a sanctuary for Jewish and socialist scholars who greatly influenced academic music education in the USA.

Two private universities in the city have strong academic courses in music. Columbia received its first endowment for the study of music in 1896. The first professor of music was MacDowell. Paul Henry Lang was appointed professor of musicology at Columbia in 1939, and in 1944 Otto Leuning, a co-founder of the Columbia-Princeton Electronic Music Studio, became professor of the music department at Barnard College, then Columbia's women's affiliate. The university's Teachers College, devoted to graduate study in education, also maintains an active music department. New York University offers advanced degrees in musicology and education. Union Theological Seminary's School of Sacred Music (1923–73) was absorbed by Yale University in 1974.

The City University of New York consists of a graduate centre and many four-and two-year colleges, most of which offer both academic and practical instruction in music. Hunter, Queens, Brooklyn and City colleges have traditionally strong music departments. In 1981 the Brooklyn and Queens departments were renamed respectively the Conservatory of Music and the Aaron Copland School of Music; the former is the seat of the Institute for Studies in American Music (founded 1971). A doctoral programme at the CUNY Graduate Center in 365 Fifth Avenue was established in 1968 by Barry S. Brook. Since 1987 it has also had a programme in performance. The institution is the home of two bibliographical projects, the Répertoire International de Littérature Musicale (RILM) and the Répertoire International d'Iconographie Musicale (RIdIM).

State schools offered sporadic music education from 1856 but no clear course until 1898. In 1976 nearly 1700 music teachers served in elementary and secondary schools. The High School of Music and Art, from 1984 combined with the High School of the Performing Arts as the Fiorello LaGuardia High School, provides an opportunity for students to specialize in music theory, history and performance, along with regular academic subjects. In addition to the settlement schools, instruction is available at such schools as the Harlem School of the Arts, the Dalcroze and Diller-Quaile schools and the Bloomingdale House of Music.

13. Associations and organizations. One of the first associations organized to promote the works of local composers was the Manuscript Society, founded in 1889 and reorganized in 1899 as the Society of American Musicians and Composers. In 1914 a group of men concerned principally with popular music, including Victor Herbert, formed the American Society of Composers, Authors and Publishers (ASCAP), later the foremost American association for the protection of copyright musical works. ASCAP is a non-profit-making organization, representing both serious and popular music, that collects and distributes licensing fees for public performance. Broadcast Music Inc. (BMI), established in 1940, performs a similar function. The American Composers Alliance (ACA), founded in 1937 by Copland and others, was later affiliated with BMI. National in scope, these organizations have their headquarters in New York. Organized labour is represented in New York by Local 802 of the American Federation of Musicians, which includes instrumental ensemble musicians in all spheres, and the American Guild of Musical Artists (AGMA), which has represented opera and concert artists since its formation in 1936.

Other non-profit-making organizations in the city have been actively concerned with the promotion of music and the welfare of musicians. The Beethoven Association (1918–40) under its president Harold Bauer was an important force in sponsoring concerts, publications and charitable works. The National Federation of Music Clubs (founded 1898) encourages young musicians throughout the country. The American Music Center (1939) has served as a reference and information centre in New York, encouraging the performance of contemporary American music. The League of Composers, Composers' Forum, ACA and National Association for American Composers and Conductors (1933) have sponsored many concerts locally.

The principal musicians' club in New York is the Bohemians, a service and social organization founded in 1907 by Rafael Joseffy. More specialized societies have included the Composers Collective of New York (1932–6), the New York Music Critics' Circle (1941–65), the American Guild of Organists, the headquarters of which have been in New York since its formation in 1896, and the Charles Ives Society, active from 1973. In 1983 the Kurt Weill Foundation for Music (founded 1962) opened its research centre.

New York is also the national centre for concert management. In the 1980s over half the serious artists' representatives and concert managers, including the influential Columbia Artists Management, were in New York.

14. Publishing, instrument making, broadcasting and recording. Early music publishers were often also dealers. James Hewitt (active 1793–1819) and his son James Lang Hewitt (1830–47) had a music shop and published music, as did John Paff from 1798 to 1817 and Joseph Atwill from 1833 to 1850. William Dubois (1813–54) also dealt in pianos, and Edward Riley (1806–50) taught music. In 1815 Firth & Hall, joined in 1832 by Sylvanus Billings Pond, began an important association that lasted under various names until 1884 (fig.15). Sheet music in the form of patriotic songs, simple operatic selections and piano pieces dominated the repertory. In the second part of the 19th century Harvey

15. Sheet-music cover of Francis H. Brown's 'Happy Family Polka' (New York: Firth, Pond & Co., 1851): lithograph by Sarony and Major

B. Dodworth (1845–87) and the Schuberths, Julius and Edward (from 1858), achieved prominence. Of 27 firms belonging to the Board of Music Trade, however, only six were from New York. The introduction of the octave anthem by Novello in 1870 infused new strength into serious music publishing, especially by the firms of G. Schirmer (set up as Beer & Schirmer in 1861 by Gustav Schirmer) and Carl Fischer (established in 1872). The 1880s saw the founding of two important popular publishers, Harms (in 1875) and M. Witmark (in 1885); both are now subsidiaries of larger organizations. From the 1890s a large part of the popular songwriting and music-publishing industry was in New York, its centre moving gradually uptown on Broadway. Leading music publishers in New York after 1945 included G. Schirmer, Carl Fischer, Boosey & Hawkes, Belwin-Mills, Associated Music Publishers (a division of Schirmer), C.F. Peters, Peer-Southern and Chappell. Since the 1980s many independent houses have been acquired by conglomerates. This has particularly affected the popular field, although by the 1990s the only important publishers of classical music left in New York were Boosey & Hawkes and G. Schirmer.

The manufacture of lutes and violins was reported in New York as early as the 1690s. 21 instrument makers were active in the city in the 1790s, among whom Christian Claus (1789–99), Thomas Dodds (1785–99) and Archibald Whaites (1793–1816) frequently advertised in papers their abilities to make a dozen kinds of instruments. By the 1820s instrument making was the city's fifth-largest industry. A census of 1855 listed 836 instrument makers, among them 553 immigrants, mostly from Germany. In the 1890 census, there were 131 instrument firms employing 5958 craftsmen.

John Geib, an organ builder from 1798, was joined by his brothers Adam and William in a firm that manufactured pianos until 1872. The firm Dubois & Stodart made pianos from 1819 to the 1850s. Among the many piano-making firms active in the latter part of the century were Weber (founded 1852), Steck (1857), Hardman (1842), Bacon (1841), Haines (1851), Mathusek (1857), Behning (1861), Doll (1871), Sohmer (1872) and Behr (1881). The first three were absorbed by the Aeolian Corporation, which maintained its headquarters in New York into the 1970s. Most important among the city's piano makers has been Steinway & Sons, founded by Heinrich E. Steinweg in 1853. Some later publishers also dealt in instruments. E. Riley made flutes, and Firth, Pond & Co. made woodwind instruments from 1848 to 1865. A.G. Badger was an important flute maker from 1845, the business being absorbed by the Penzel & Mueller Co. after the turn of the century. Among brass instrument makers the Schreiber Cornet Co. (from 1867) and John F. Stratton (from 1859) were significant, the latter turning to guitar manufacture in 1890. August and George Gemunder and family arrived in the city from Germany before 1850 and made prizewinning violins for over 75 years. Rembert Wurlitzer Inc. was noted for the restoration and sale of rare violins from 1949 to 1974. By the mid-1990s Steinway remained the only piano maker in the city. A few small ateliers make high-quality instruments, notably the Gael Français Violin Workshop, Matt Umanov Guitars and the string instrument makers Ruting and Oster.

New York became the national centre of radio broadcasting with the founding of the first American radio networks – NBC in 1926 and CBS in 1927. For a while, before the impact of populist aesthetics and, later, television was felt, the networks attempted to emulate state-supported European broadcasters by sponsoring their own studio orchestras. The best-known of these was the NBC SO (see §5 above). New York PO has presented regular radio broadcasts since 1930, and more occasional telecasts and concerts for young people. The Saturday matinée performances of the Metropolitan Opera have been broadcast since 1931. Since the 1970s performances at the Metropolitan and other Lincoln Center venues have been telecast on the Public Broadcasting Service network. New York has several classical music FM stations, as well as a variety of stations which broadcast jazz, country music, rock, rap and other pop genres.

New York was a centre for the recording industry from its earliest days. Recordings of all musical genres were dominated by RCA Victor and Columbia, located in New York. After the rise of rock and the penetration of country music into the commercial mainstream, however, New York was successfully challenged by Los Angeles (for pop) and Nashville (for country) as a national recording centre. But with the corporate headquarters of CBS, RCA, BMG, Sony, Angel/EMI, Polygram Classics and Warner Communications, as well as specialized labels such as CRI, New World and Nonesuch (now part of Elektra/Warner), and with ample recording facilities and an

active musical community, New York has retained its leading position in the recording industry, especially for classical music, contemporary music and jazz. The Recording Industries Association of America (RIAA), a trade organization formed in 1952, is also based in the city.

15. Criticism and periodicals. Early reviews of public performances were unsigned. In the mid-19th century two literary figures, Walt Whitman in the *Brooklyn Eagle* (1841–5) and Margaret Fuller in Horace Greeley's *Tribune* (1844–6), included music in their critical writing. The city's first prominent music critic was the composer William Henry Fry, who wrote for the *New York Tribune* from 1852 to 1863. In 1880 Henry Krehbiel joined the paper, for which he wrote distinguished critical commentary until 1923. Henry Finck contributed to the *Evening Post* from 1881 to 1924, and J.G. Huneker's columns appeared in various publications from 1891 to 1921. W.J. Henderson in the *New York Times* (1887–1902) and the *New York Sun* (1902–20, 1924–37) and the *New York Herald* (1920–24), and Richard Aldrich in the *New York Times* (1902–37) were particularly influential. These men were all cultivated university graduates with extensive musical training, as well as editors, lecturers, teachers and authors; they were given free rein by their newspapers, and their judgments have in the main stood the test of time.

The tradition of fine critical writing was continued by Lawrence Gilman (active from 1901, with the *New York Tribune* 1923–39), Deems Taylor in the *New York World* (1921–5) and Olin Downes in the *New York Times* (1924–55). Virgil Thomson added his strongly individual voice to the *Herald-Tribune* from 1940 to 1954, followed by Paul Henry Lang from 1954 to 1963. Chief music critics at the *New York Times* were H. Howard Taubman (1955–60), Harold C. Schonberg (1960–80), Donal Henahan (1980–91), Edward Rothstein (1991–5) and Bernard Holland (since 1995). The paper, which is the most influential reviewing medium in the city, had in 1999 five critics for classical and four critics for popular music, who are supplemented by freelance writers. Weekly periodicals also provide a forum for music critics, notably the *Village Voice* which focusses on contemporary and popular music; *New Yorker* was elevated to become a dominant force of music during the tenure of Andrew Porter (1972–92), who was succeeded by Paul Griffiths (1992–7) and Alex Ross (since 1996); *Rolling Stones* (1977) is a primary source for rock criticism; and *Billboard* (1894) for popular music in general.

New York has long been a centre of publishing activity of many kinds; 82 music periodicals appeared in the city between 1850 and 1900. Notable among them were the *Choral Advocate and Singing-Class Journal* (1850–73), what was eventually called *Watson's Art Journal* (1864–1905), the *Music Trade Journal* (from 1879) and *Music Trades* (from 1890); *Musical America* was founded in 1898 and merged with *High Fidelity* in 1965. General periodicals such as *Scribner's Magazine* (1887–1900) and *Harpers* (from 1850) have also carried articles of musical interest. *The Musical Observer* (1907–31) and *Modern Music* (1924–46) were influential. *The Musical Quarterly*, established in 1915, is a leading scholarly journal. Its editors have included Oscar Sonneck (1915–28), Carl Engel (1929–44), Gustav Reese (1944–5), P.H. Lang (1945–73), Christopher Hatch (1973–6), Joan Peyser (1977–84), Eric Salzman (1984–91), Paul Wittke (1992) and Leon Botstein (from 1993). Three important journals for organists, *Church Music Review* (1901–35), *American Organist* (1918–70), and the journal of the American Guild of Organists, *Music AGO/RCCO Magazine* (founded in 1967 and in 1980 renamed *The American Organist*) were published in New York. *Metronome* (1885–1961), devoted to bands and jazz, has been superseded by a variety of magazines on jazz, pop, rock, salsa, rap, hip hop and other genres of popular music. A thorough listing of music and other events held in the city can be found in *Time Out New York*. *Opera News*, published since 1936 by the Metropolitan Opera Guild, features regular commentaries on the Saturday afternoon radio broadcasts from the Metropolitan Opera.

16. Libraries. The New York Public Library, formed in 1895 by the amalgamation of the Astor (1849) and Lenox (1870) libraries with the Tilden Foundation (1887), includes one of the world's outstanding research collections. The Music Division (with nearly 700,000 titles as well as programmes, clippings, photographs and letters) is in the Library and Museum of the Performing Arts at Lincoln Center, and the Rodgers & Hammerstein Archives of Recorded Sound there include over 450,000 recordings of all kinds; in the same building the library maintains a circulating collection of over 150,000 scores, books and recordings. Another division of the New York Public Library, the Schomburg Center for Research in Black Culture, collects materials on jazz and the music of black musicians. In other parts of the city the Queensborough and Brooklyn public libraries maintain large music collections, and there are additional centres for circulating recordings in Manhattan and the Bronx. Theatre life on 42nd Street is documented at the archives of the Shubert Organization on 45th Street, and the history of the Metropolitan Opera at the opera's archives in Lincoln Center. The American Music Center (founded 1940) has a collection of scores and sound recordings of contemporary American music, and the library of the Archive of Contemporary Music specializes in collecting pop, jazz and rock and roll.

Each of the educational institutions offering advanced degrees has a good working collection to support its courses. Columbia, whose first music librarian, Richard Angell, was appointed in 1934, is one of the oldest. The Juilliard library has a collection of 50,000 books and scores. The Pierpont Morgan Library houses many valuable music manuscripts, and several distinguished private collectors live in New York, notably James J. Fuld. The Department of Musical Instruments of the Metropolitan Museum of Art, whose origins go back to 1889, has a renowned collection of approximately 4500 Western and non-Western instruments, which are on display in the André Martens Galleries, opened in 1971. The curators of the collection have included Emanuel Winternitz and Laurence Libin. Collections of historical pictures of musical life can be found at the Research Center for Music Iconography at the City University of New York, and news photos of 20th-century musical life at the Battmann Archive. The Dance Notation Bureau (founded 1940) is one of the world's most important centres for research in dance notation. The collection of the Museum of Television & Radio in 52nd Street preserves recordings of about 75,000 radio and television

programmes, a large number of them featuring music events.

New York Dolls. American punk rock group. Its principal members were David Johansen (*b* Staten Island, New York, 9 Jan 1950; vocals), Johnny Thunders (John Anthony Genzale; *b* New York, 15 July 1952; *d* New Orleans, 23 April 1991; electric guitar) and Sylvain Sylvain (Sil Mizrahi; electric guitar). In a brief and commercially unsuccessful career, the New York Dolls introduced several of the motifs that would characterize both the glam rock and punk rock movements of the 1970s. Like the more successful Kiss, the group members adopted 'trashy transvestite' stage clothing and make-up, with Johansen dressed as a parody of Mick Jagger of the Rolling Stones. Musically their sound was a regression to an imagined rock and roll simplicity based around the buzzsaw tone of the twin guitars played by Thunders and Sylvain. Johansen's hoarse vocalizing was buried in the recorded mix designed by Todd Rundgren, the producer of the group's debut album, *New York Dolls* (Mer., 1973). The group's original compositions veered thematically from conventional romance (*Looking for a Kiss*) to psychotic states (*Personality Crisis*). They recorded a second album, *Too Much Too Soon* (Mer., 1974), before splitting up. Thunders became an erratic participant in the punk scene of the late 1970s, while Johansen re-emerged in the late 1980s as Buster Poindexter, and convincingly recreated the jump band sounds of the 1940s on a series of entertaining recordings.

DAVE LAING

New York Pro Musica Antiqua. American ensemble of singers and instrumentalists, founded in 1952 by NOAH GREENBERG. Greenberg hoped to resurrect, by means of scholarship and convincing performances, the then largely neglected music of the Middle Ages, Renaissance and early Baroque. Pro Musica developed a large repertory and achieved high standards of virtuosity. Among its artists were Shelley Gruskin and Bernard Krainis (recorders), LaNoue Davenport (recorders and viols), Judith Davidoff (viols), and the singers Bethany Beardslee, Charles Bressler, Jan DeGaetani, Jean Hakes, Russell Oberlin, Sheila Schonbrunn and Robert White. The ensemble created a sensation in the 1957–8 season with its production of the medieval liturgical drama *The Play of Daniel* and in 1963 with *The Play of Herod*, both of which opened at the Cloisters of the Metropolitan Museum of Art. These works were recorded, televised and performed on the group's tours, which included performances at various European cathedrals (1960), at summer festivals (1963) and in the USSR (1964). The group's office served as a library, research centre and rehearsal studio. Major financial and artistic support came from Lincoln Kirstein and the Rockefeller and Ford Foundations. Pro Musica was one of three performing organizations (with the Juilliard Quartet and the New York PO) chosen to inaugurate the opening of Philharmonic Hall at Lincoln Center.

After Greenberg's death in 1966 Pro Musica continued until 1974 under the direction of John White (1966–70), Paul Maynard (1970–72) and George Houle (1972–4), its final performances including Marco da Gagliano's *Dafne*. Many members of subsequent American early music ensembles had trained with Pro Musica musicians, and their audiences had been created by Greenberg's pioneering efforts. Pro Musica's library went to SUNY, Purchase, its archives to the New York Public Library and its collection of instruments to New York University.

JOHN SHEPARD/RICHARD FRENCH

New York School. A loose confederation of painters, sculptors, dancers, composers, poets and critics based in New York from approximately 1947 to 1963. Art historians apply the term to a group of artists, including Jackson Pollock, Willem De Kooning, Franz Kline, Robert Motherwell, Mark Rothko and others, who collectively established the style of American painting known as Abstract Expressionism. Musicologists apply the term to a group of composers, including John Cage, Morton Feldman, Earle Brown, Christian Wolff and David Tudor, who shared many aesthetic values with these artists, and in some cases formed deep friendships and synergies with them.

The group of New York School composers, however, was larger than the 'circle of Cage'. Edgard Varèse and Stefan Wolpe also belonged to the group, serving as mentors and teachers; Lucia Dlugoszewski, a Varèse student, had her compositions first performed by New York School artists; and Ralph Shapey attended some of their gatherings. The group often met at the Cedar Tavern or at The Club (39 East 8th Street), where Cage delivered several lectures, including his celebrated 'Lecture on Nothing' (1949), and Varèse presented his 'Music, an Art-Science' (1950). Cage and Motherwell co-edited the Abstract Expressionist journal *Possibilities*, and Cage wrote essays for another of the group's journals, *The Tiger's Eye*. Varèse contributed an interview to *Possibilities*, as well as a page of the score of his unfinished *Espace*. Feldman's seminal essay 'Sound. Noise. Varèse. Boulez' appeared in The Club's official journal *It is* (no.2, 1958, p.46). While Cage, Feldman, Brown and Varèse all painted in an Abstract Expressionist style, as composers their ties to the New York School painters varied. Cage

admired the improvisation methods and the non-hierarchical, 'all-over' surface of their paintings, yet he disliked their heroic posturing and the autobiographical impulses behind their work. He preferred to link himself with Marcel Duchamp and the dada movement, not to Pollock. Brown's open-form procedure in such works as *Twenty-Five Pages* (1953), *Available Forms I* (1961) and *Available Forms II* (1961–2) owes a great deal to the improvisation method in Pollock's 'drip' paintings, yet owes just as much to the mobile sculptures of non-New York School artist Alexander Calder, or to the non-narrative writings of James Joyce. Feldman's connection to the artists was perhaps the strongest. He wrote: 'the new painting made me desirous of a sound world more direct, more immediate, more physical than anything that had existed heretofore' ('Autobiography', *Essays*). His reliance on psycho-automatic instinct and his concern with abstract physical essences derive directly from Philip Guston, Rothko and his other painter friends. He composed soundtracks for Hans Namuth's documentary films *Jackson Pollock* (1951) and *De Kooning* (1963) and titled works in homage to painters and poets of the group, including *For Franz Kline* (1962), *Piano Piece (to Philip Guston)* (1963), *Rothko Chapel* (1971) and *For Frank O'Hara* (1973).

STEVEN JOHNSON, OLIVIA MATTIS

New Zealand. Country and group of islands in the South Pacific Ocean. It is located about 1900 miles south-east of Australia across the Tasman Sea and comprises two main islands, North Island and South Island, and several much smaller ones, including Stewart Island and the Chatham Islands. The population is highly urbanized: of *c*3.8 million people (est. 2000), around 75% live on North Island, most in the cities of Wellington and Auckland.

I. Traditional music. II. Western art music.

I. Traditional music

The original inhabitants of New Zealand, the Maori, are a Polynesian people who migrated to the islands around the 10th century; today Maori comprise about 12% of the population. There are also significant expatriot Maori communities in Australia, the USA and the UK. Most New Zealand families have relatives of Maori descent and thus, in effect, a double cultural heritage. Maori is now an official language of New Zealand, with English.

The most comprehensive collection of Maori music can be found in the Archive of Maori and Pacific Music, which was established in 1970 within the Department of Anthropology at the University of Auckland. Its holdings include commercial and field recordings of vocal and instrumental music, folklore and oral history. In addition to its research and teaching functions, the archive also publishes catalogues and reports on specific music research projects. Repositories of research material are also held by the Alexander Turnbull Library (Wellington), the Hocken Library (Dunedin) and the Sound Archives of Radio New Zealand.

1. Maori vocal music: (i) Recited styles (ii) Sung styles. 2. Maori instruments: (i) Idiophones (ii) Aerophones. 3. European traditional music.

1. Maori vocal music. There are two forms of indigenous Maori music. The first, known as 'action song' (*waiata-a-ringa* or *waiata kori*), dates only from the beginning of the 20th century, and although its words and actions are Maori, its melodies are European. The origin of the action song is generally attributed to the east coast Maori leader Sir Apirana Ngata (1874–1950), who with Paraire Tomoana (1868–1946) composed the well-known *E te ope tuatahi*as a recruiting song during World War I. The person most responsible for bringing action song to its present form was Tuini Ngawai (1910–65), also from the east coast, who composed more than 100 songs during and after World War II, setting original Maori words to the tunes of popular European songs of the day. Her song *Arohaina mai*, written in 1939 as a farewell for the C Company of the Maori Battalion, has the tune of *Love walked In*; *Te hokowhitu toa*, which became a favourite of the C Company, used the tune of *Lock My Heart and Throw Away the Key*; and her celebrated tribute to the Victoria Cross winner Lieutenant Te Moana-niu-a-Kiwa Ngarimu, *E te hokowhitu a tu*, was written to the tune of *In the Mood*. Although the melodies and harmonies of action songs are borrowed, the messages and sentiments expressed by the texts are purely Maori, as are the actions and the manner of performance. Traits such as uniformity of body movement, hand-trembling (*wiri*) and the use of regular metre appear to be derived from the traditional *haka*(shouted posture dances) and core hand gestures from extempore actions used in the traditional *pātere* (occasional songs; see §(i) below).

The other form of Maori music – which is referred to hereafter as Maori chant – is wholly indigenous in origin and has remained relatively uninfluenced by European music. It serves specific social and ceremonial needs (see McLean, 1965) and reflects its origins in its stylistic and other similarities to traditional music from elsewhere in Polynesia.

Maori chant is classified by the Maori themselves into song-use categories that can be further grouped on musical grounds into sung and recited styles. Recited styles are distinguished primarily by the absence of stable pitch organization and by much more rapid tempos. In both sung and recited styles, tempos once set are invariable. Other points of similarity include the use of additive rather than divisive rhythms (except for *haka*; see §(i) below) and a continuous style of performance in which breaks of any kind, even for breathing, are avoided. Most types of song are performed in unison by groups of singers who are kept together by a song leader. The leader is responsible for choosing a pitch that will suit most of the singers, and he or she also sets the tempo of the song. Mistakes are regarded as ill omens.

The sung styles have a strong emphasis upon a tonic (the note which occurs most often) in the centre of the range, which is generally limited to a 4th. Melodic intervals are mostly major and minor 2nds and minor 3rds. Form is strophic, usually with two phrases to each

1. Maoris in traditional costume dancing the haka (shouted posture dance)

strophe. A characteristic device is the terminal glissando, sometimes heard when an individual in a group stops singing; it nearly always occurs at the ends of stanzas, and it almost invariably marks the end of the song itself.

(i) Recited styles. *Karakia* are rapidly intoned spells or incantations. They include simple charms used by children, spells used by adults to meet the contingencies of daily life and highly esoteric invocations used in numerous rituals by priests. Most *karakia* are performed in a rapid monotone punctuated by sustained notes and descending glides at the ends of phrases. More than any other type of song, ritual *karakia* had to be performed word-perfect, for it was believed that any mistake, however trivial, would bring death or disaster upon the performer. To achieve an unbroken flow of sound, longer *karakia*were performed alternately by two priests. *Karakia* of the ritual kind are still performed on occasions such as the opening of a meeting-house, where *tapu* (sacredness) placed upon a house during its construction has to be removed; canoe *karakia* (those associated with the ancestral canoes that are said to have brought the Maori people to New Zealand) are customarily performed by men as introductions to speeches on the *marae* (village square).

Pātere are occasional songs, composed mostly by slandered women in reply to gossip. Rather than denying the gossip, the reply typically takes the form of recounting the lineal and lateral kinship connections of the author. Songs recited in the same style as *pātere*, but distinguishable by their more virulent or abusive texts, are called *kaioraora*. Like the *karakia* or incantation, *pātere* and *kaioraora* are intoned, but the tempo is not as rapid, and sustained notes are absent. Unlike *karakia* they are often performed by groups. Most of the recitation is on one note, but a gradual rise of pitch followed by a fall occurs near the ends of stanzas. There is a tendency towards duple metre with characteristic rhythmic groupings, modified by occasional additive combinations that give an effect of apparent syncopation.

Haka are shouted posture dances with compound divisive metres that set them apart from other song types. Contrary to popular belief, the *haka*was not exclusively a war dance, nor was it performed solely by men. In former times, as today, *haka* were used for entertainment and to welcome visitors as well as in preparation for battle, and women took part in them. They are characterized by foot-stamping, thrusting and flourishing movements of the arms, quivering of the hands, movements of the body and head, out-thrust tongue, distorted eyes and grimacing (fig.1). The vocal style is one of stylized shouting. Usually there is an alternation between leader solos and shouted responses from the chorus. The tempo is the slowest of all the recited styles, though much faster than in any of the sung forms of chant.

(ii) Sung styles. The term *waiata* is sometimes used loosely as a generic word for all songs. Properly, however, it is a specific type of song. About four-fifths of these are laments for the dead, called *waiata tangi* (*tangi*: 'to weep'). Most of the rest are *waiata aroha* or *waiata whaiāipo* ('love songs' and 'sweetheart songs'), but these may also be thought of as laments, as they are usually about lost or unhappy love. *Waiata* are customarily performed at the *tangi*, or funeral ceremony, after speeches of praise or farewell to the dead.

Waiata of all kinds are typically performed in unison by groups of singers. A leader, who may be a man or a woman, begins the song and performs short solos, called *hīanga*, at the end of each line of the text, usually on meaningless syllables.

Pao are topical songs about matters of local interest; the texts are usually in couplets. Many *pao* are gossip songs about the loves of their subjects, and *pao* of this kind are sung mostly for entertainment. Others, however, have a serious purpose and may be sung, for example, as aids to speech-making, as answers to taunts or as songs of farewell; in this respect they are similar to *waiata*. Unlike *waiata*, *pao*are typically composed in improvisa-

tory fashion. Each couplet is first sung solo by the composer and is then supposed to be repeated by the chorus while the composer thinks of the next couplet. At subsequent performances, each couplet typically continues to be sung twice. Musically, *pao* are distinguished by a tendency towards iambic rhythms, an abundance of rapid ornament and a typically descending melodic contour, even for songs whose range is small. In consequence, the tonic tends to be near the bottom of the range instead of in the middle, as in *waiata*.

Poi are dances with sung accompaniment, in which women swing light decorated balls attached to strings (fig.2). Little is known about the origins of the *poi*. Early accounts describe it as a game, and it seems probable that formerly the accompanying songs of the *poi*were recited songs similar to *haka* and *pātere*. Most extant *poi*, however, except for those performed in acculturated style by modern action song groups, belong to a now declining religious movement that flourished in the 1880s and 90s under the leadership of the Maori prophets Te Whiti and Tohu. For these men, who were early believers in 'passive resistance', the *poi* was a symbol of peace. Their followers reworked *waiata* and *karakia* and adapted them to the *poi*. The results were songs in rapid tempo with a very small range, often in additive rhythms running counter to the divisive off-beat slap of the *poi* balls. As in *waiata*, a basic melody is repeated again and again, but there is no *hīanga*, or solo, from the leader to mark the end of each line. Instead, the song is performed from beginning to end by the entire group of singers. Because the *hīanga*is not used, the meaningless syllables characteristic of *waiata* are absent.

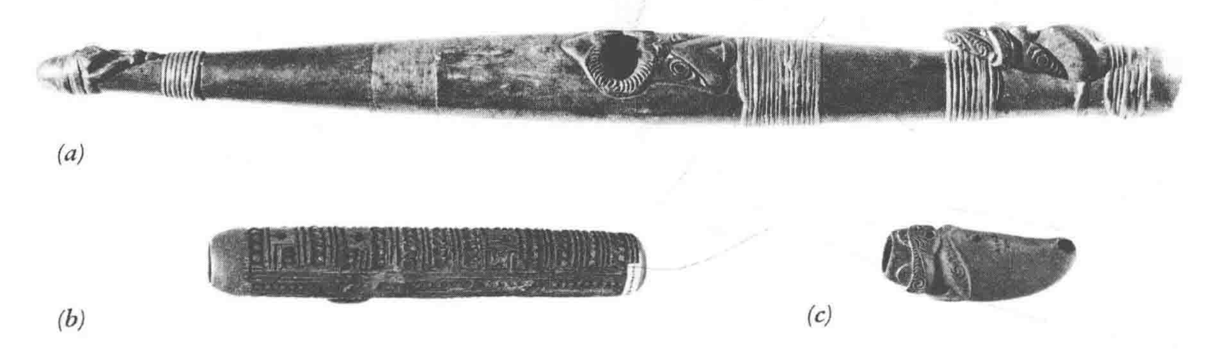
Oriori are songs, the most important examples of which were composed by parents or grandparents for young children of noble birth or of warrior lineage. These songs are often described as lullabies, but their purpose was to educate children in matters appropriate to their descent, and the texts are correspondingly full of obscure references to myth, legend and tribal history. As in most types of song, performance is continuous, with no pauses or breaks between lines, but there are no leader solos at the end of lines. In this respect *oriori* are similar to *poi*; but whereas leader solos are absent altogether in *poi*, in *oriori* they tend to occur either at the beginning or at the end of stanzas. These leader solos are more diverse melodically than the rest of the song, which is typically in simple syllabic style. Tempos of *oriori* are usually fast, and among sung items are second in this respect only to *poi*.

2. MAORI INSTRUMENTS. Maori musical instruments were limited to idiophones and aerophones. There were no membranophones, and except for a single unconfirmed report of an instrument called the *kū* – which may have been a form of musical bow – there is no evidence of chordophones. If sound-producers used for non-musical purposes such as signalling are excluded, the list of instruments is very small.

2. *Poi dancers, Whakarewarewa, Rotorua*

(i) Idiophones. The most important idiophone – and the only instrument resembling a drum in New Zealand – was the percussion idiophone that in New Zealand took the name *pahu*, which elsewhere in Polynesia was applied to the sharkskin drum (*pahu* in Tahiti; *pa'u* in the Cook Islands). Most were flat slabs of resonant wood between 1·2 and 9 metres in length, which in favourable conditions could be heard reportedly at distances of up to 20 km. Some slab *pahu* were unmodified, some apparently had a shallow depression or groove in the centre, and others had an elliptical or oval hole pierced through the centre. Only one specimen (made in 1899) is reported to have resembled the Polynesian slit-drum in being hollowed out. The main use of the *pahu* was in warfare. By means of ropes tied around the ends, it was either suspended between two trees or, more usually, hung from a crosspiece supported by forked-stick uprights above the platform of a watch-tower, 5 to 6 metres high. This watch-tower was part of the defences of the fortified village or *pā*. The watchman sat on the platform and beat upon the *pahu* to assemble the people in times of danger or, if they were safe inside the *pā* at night, as a signal that the *pā* was on the alert. From time to time throughout the night he also recited watch-songs (*whakaaraara pā*) or sounded blasts upon the *pūkāea* (wooden war trumpet).

Though not a chordophone, the *pakuru* was, in effect, the Maori equivalent of the musical bow. It took the form of a thin strip of resonant wood about 40 to 50 cm long, 2 to 5 cm wide and about 1 cm thick; one surface was flat and the other convex. According to most authorities, one end was held lightly with the left hand, and the other was placed between the teeth with the flat side down. The instrument was played by tapping it lightly with another rod about 15 cm long held in the fingers of the right hand. The tapping was done in time to special songs called *rangi pakuru*, and the sound was modified by movements of the lips.



Another instrument that depended upon mouth resonance for its effect was the *rōria*, or Maori form of the jew's harp. The pre-European form was made from an elastic piece of supplejack 7 to 10 cm long, one end of which was held in the mouth or against the teeth and twanged with a finger. The player made guttural sounds, and the movement of the lips helped vary the sound. The appeal of the instrument lay in its ability to communicate words; Maori lovers used to sit side by side, each with a *rōria*, and hold quiet conversations on the instruments. Later, European jew's harps replaced the native instruments, and the name *rōria* was transferred to them.

(ii) Aerophones. The *pūtātara* or *pū moana* (shell trumpet) was simply a large triton shell with the end cut off and a carved wooden mouthpiece lashed on in its place. It was a signalling trumpet that emitted a single note. Chiefs sometimes carried these instruments when travelling and would sound them to warn villagers of their approach. They were also used by some chiefs' families to announce the birth of a first-born son; by commanding chiefs to direct or rally their forces during a fight; and as a signal to assemble villagers on the *marae* (village square).

The *pūkāea* (wooden war trumpet) was from 1 to 2·5 metres long and was formed by splitting a piece of *mataī* wood longitudinally, hollowing it, and then binding it together again. One end had a wooden mouthpiece and the other was flared out to a diameter of 8 to 12 cm. Inside, near the bell end, were inserted small wooden pegs called *tohe*; these represented the human tonsils and uvula. Single-note blasts were sounded on the *pūkāea* by watchmen, and the instrument is said also to have been used as a megaphone through which insults could be hurled at the enemy.

The *pūtōrino* (fig.4*a*) is an instrument about 30 to 60 cm long, widest in the middle and tapering at each end. One end is usually not quite closed; the other has a mouth-hole, and in the middle is a figure-of-eight or oval soundhole. The *pūtōrino* was made in the same manner as the *pūkaaea*, and the finest specimens are highly polished and intricately carved around the middle and ends. The earliest reports of the instrument describe it as a trumpet that produced a 'shrill, hoarse' or 'harsh, shrill' sound. It has also, however, been described as a flute, and experiment has shown that although the large specimens are indeed trumpets, the small ones can also be blown as flutes of limited range. The description of the *pūtoorino*as a 'bugle-flute' (Anderson, 1934) may therefore be accepted, though there seems to be little doubt that the instrument was originally a trumpet.

The *kōauau* (fig.4*b*) is a simple open-tube flute, 12 to 15 cm long with a bore of 1 to 2 cm and three finger-holes. Some were made of wood and others of bone, and many were beautifully carved. When not in use, they were often worn suspended around the neck as an ornament. Contrary to popular belief, the *kōauau* was not a nose flute but was played with the mouth. The traditional

4. Maori aerophones: (a) pūtōrino (flute or trumpet) from North Island, (b) kōauau (end-blown flute), (c) nguru (end-blown flute) from Oruarangi Pā, Matatoki (Auckland Institute and Museum)

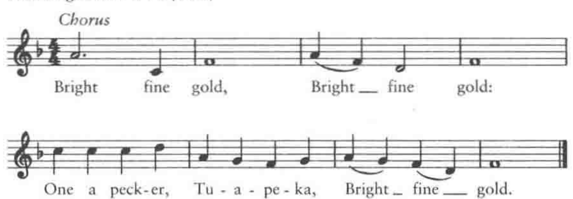
blowing technique, which is diagonal or oblique rather than vertical or horizontal, can still be found. Recent research has shown that there were three or four standard scales, which are identical to those of many present-day *waiata*. This provides support for statements by informants that the instrument played *waiata*melodies and was used principally for unison accompaniment of group singing.

The *nguru* (fig.4*c*) is a flute 8 to 10 cm long, made of wood, clay, stone or whale's tooth. One end is open as on a *kōauau*, and the other finishes with a small hole in the centre of a tapered, upturned snout. In addition to the snout hole there are usually two finger-holes on top and another one or two beneath the snout. The prototypal shape was probably a gourd. The earliest reports of the instrument describe it as a whistle, worn about the neck and yielding a shrill sound. It was possibly used for signalling, as some writers have suggested, but its primary use was as a flute. Although some *nguru* flutes can be blown with the nose as well as the mouth, this method is unlikely to have been much used. The normal method of blowing was probably from the wide end with the mouth, in the same manner as the *kōauau*. This produces normal *kōauau* scales except for an extension downwards – usually by a major 2nd or minor 3rd – of one or two extra notes in the case of instruments with extra finger-holes underneath the snout, duplicating the ability of the *kōauau* to produce these notes by portamento. The *nguru* can therefore be regarded as simply a variety of *kōauau*, though its shape was different.

Of less importance than the instruments discussed above are the *tētere* ('flax trumpet'), the *kōrorohū* ('whizzer') and the *pūrorohū* (bullroarer). The *tētere* was in fact not a trumpet. It was made by winding a split half-blade of flax in overlapping turns to a wider distal end. It was played with as a toy by children and was sometimes used by adults as a makeshift instrument to announce their approach to a village.

There is confusion in the terminology of the whizzer and the bullroarer. Both had numerous alternative names, and several of these are applied by different authorities to both instruments. The term preferred here for the whizzer is that used today by members of the Tūhoe tribe; Buck's usage is followed for the bullroarer.

The *kōrorohū* ('whizzer' or 'cutwater') was a children's toy made from a small piece of thin, flat wood or pumpkin rind pointed at both ends. Two holes were pierced near the centre through which the two ends of a piece of string were threaded and then tied, one thumb was inserted in the tied end and the other in the loop end; the disc was next swung towards the operator to twist the string; when it was sufficiently wound up an outward pull on the string caused it first to unwind rapidly and then, by its own momentum, to wind up again in the opposite direction. By timing the outward pull on the strings, the player could keep the instrument revolving rapidly in alternate directions, producing a whizzing noise during the unwinding parts of the cycle. Songs in *pao* style were sung to the accompaniment of the sound.



The *pūrorohū* (bullroarer) was made of a thin, flat piece of board of similar shape to the *kōrorohū*, but about 30 to 45 cm long. A cord about 120 cm long was tied to one end, and the other end of the cord was attached to a wooden handle about 90 cm long. By means of the handle, the operator swung the instrument until it produced a deep booming sound. In the Cook Islands and Hawaii, and perhaps elsewhere in Polynesia, the bullroarer was apparently used as a children's toy, but in New Zealand it is believed to have been used ceremonially to produce rain.

3. European traditional music. Prior to colonization in the mid-19th century, European contact with the indigenous Maori through the activities of traders, sealers, whalers and missionaries had already laid the groundwork for the development of a distinctive song ethos. The British colonization schemes that began in 1840 did not result in any large-scale importation of folksong, but there was some transit of English, Scottish, and Irish folksong material and a resultant acculturation of such material in the new environment. Variants of traditional British songs such as *Rattlin' Roarin' Willie*, *The Fox* and *The Foolish Boy* developed, and children's games and songs, some of ancient European origin, also entered the song milieu. British nursery rhymes even found their way into the Maori language: words such as 'cow' and 'spoon' (in *Hey Diddle Diddle*) became transliterated as 'kau' and 'pune'. Popular songs such as *Home, Boys, Home*, with strong 'I would I were in my own country' folk sentiments, derived indirectly from 17th-century British broadside balladry. Large influxes of Californian and Australian miners during the gold rush periods of the 1860s and 70s, and a periodic inflow of Australian shearers, harvesters and other workers, introduced further new elements. In the early 20th century the existence of a folksong subculture was highlighted by the writer James Cowan. *I've Traded with the Maoris* (a local adaption of a British sea shanty and sung today in restored and amended form as *Across the Line*) is one of a few old songs collected by Cowan.

The worldwide folksong revival movement of the 1950s and 60s, typified by groups such as the Weavers in America and the Ewan MacColl-Peggy Seeger duo in Britain, saw the emergence of local collectors and folk-singing groups, the recording of songs for the commercial market, and the nationwide development of folk clubs and organizations. Pioneer collectors of the 1950s included Rona Bailey, who undertook field trips (one government-assisted) in the South Island; Neil Colquhoun, leader of the Song Spinners, who produced locally-made recordings of whalers', gumdiggers' and goldminers' songs; and Les Cleveland, whose *Black Billy Tea*, based on a ballad by the Canterbury farmer and folk poet Joe Charles, is a classic in today's repertory. The song corpus was added to by new compositions depicting historical and contemporary aspects of the New Zealand scene (the songwriter Willow Macky had already composed the New Zealand Christmas carol *Te Harinui* and *The Ballad of Captain Cook* in the 1950s) and musical arrangements of the balladry of indigenous folk poets, such as *The Shearing's Coming Round*, a setting of David McKee Wright's verse of the 1890s. Some songs in the repertory approach the traditional ideal of folksong as the product of oral circulation and transmission: *The New Chum*or *I'm a Young Man*, for instance, originating as an entertainer's song in the 1860s, survived largely by these means over an extended period. Due to the fragmentary nature of much collected material, other songs are the result of extensive restoration and amendment processes. For instance, *Bright Fine Gold*, reconstructed around an Otago goldfield's nursery ditty, adapts the street cry of

the English rhyme *Hot Cross Buns* to its chorus opening and further turns to advantage the 'one-a-pecker, two-a-pecker' doggerel of British nursery literature in the substitution of a New Zealand goldfield's place name (ex.1).

Ex.1 *Bright Fine Gold* (trad.)

Harding's discographic and bibliographic research (1992) classifies New Zealand traditional song as it has developed since the first European contacts under the major headings of 'folk' and 'popular'. The 1500 or so titles listed bring into focus the bicultural nature, in social and economic terms, of such song. Te Rangi Hikiroa's World War I song *Ka Mate! Ka Mate!*, Maewa Kaihau's *Now is the Hour*, Karaitiana's *Blue Smoke* and rock star Tim Finn's *Parihaka*are a few examples of titles illustrating this cultural blend.

Musical instruments included fiddles, flutes, concertinas, mouth organs, jew's harps and penny whistles, used in colonial times on the goldfields, gumfields or on such occasions as end-of-season woolshed dances on sheep stations to accompany jigs, reels, polkas and popular dances. The Kokatahi Band of Westland, formed in 1910 as a 'goldfields' band, has incorporated in its mix of folk instruments improvised items such as sheep-bone castanets (fig.4). Among home-made instruments popular at various periods have been a kerosene-tin fiddle (an entire 'tin band' has been reported as active in the lower North Island) and the flagonophone (also called the beer bottle saxophone), intricately cut from large bottles. A revivalist upsurge of interest in colonial dancing saw the development of 'bush bands' such as the Canterbury Crutchings Bush and Ceilidh Band in 1976 and the Pioneer Pog'n'Scroggin Bush Band (1980). Such bands today might include any number or variety of bush or country-style instruments: banjo, mandolin, guitar, piano accordion, dulcimer, autoharp, bush (or tea chest) bass, spoons and the showpiece-style lagerphone (a pole loosely hung with bottle tops), to name a few.

A variety of minority communities have perpetuated their folk music through clubs and associations. In the North Island popular performers at local events are descendants of 19th-century Bohemian settlers at Puhoi, who maintain a fiddle, accordion and *dudelsack* (bagpipe) band and perform dances such as the Egerlander polka. Similarly, descendants of Dalmatian *kauri*gumfield workers have a *tamburica* orchestra and perform the *kolo*, a traditional circle dance. The cultural activities of other groups, for example Chinese, Indian, Scandinavian, Dutch and Greek communities, and those of British descent (of which the Scots, long associated with pipe bands and Highland dancing, have strongly asserted a musical identity) are currently experiencing revitalization in the wake of a large inflow of new Asian residents. In Auckland, New Zealand's largest city, popularly dubbed 'the multicultural capital', an annual Maori and Pacific Islands Secondary Schools' Cultural Festival is expanding to accommodate countries such as China, India, Thailand and Sri Lanka.

Traditional music in New Zealand in its various forms is featured also in film, radio and television programmes. A late-1990s performance of the *haka Ka Mate!* by Britain's pop group the Spice Girls indicated the spread of one aspect of the genre.

II. Western art music

British sovereignty was proclaimed in New Zealand on 21 May 1840, and systematic colonization, mainly by settlers of English and Scottish origin, began soon afterwards. The country's geographic isolation, exacerbated by its early development as a predominantly agricultural economy with a multitude of far-flung, sparsely populated settlements, bred a climate of musical self-help and a sturdily amateur tradition with a regional rather than national focus. For over a century, professional music-making was provided mainly by visiting artists. It was not until the end of World War II and the gradual emergence of state patronage that a significant number of resident professional musical organizations began to develop.

The circumstances of New Zealand's foundation meant that the musical traditions established were based on Western European models. Indigenous Maori music-making was regarded initially as a curiosity and seldom became a subject of study or a source of inspiration until after the middle of the 20th century. The country's transformation then into a substantially urban, technological society prompted a reappraisal of its position in the world, and the growing importance of Pacific and Asian influences came to be reflected in many aspects of musical life.

1. Before World War I. 2. 1914–45. 3. After 1945.

1. BEFORE WORLD WAR I. New Zealand's early colonists brought with them their folksongs and the popular European art music of the day, particularly opera airs and ballads. They were also encouraged to bring musical instruments: there are several accounts of pianos being transported long distances to remote locations. As settlers strove to recreate for themselves an approximation of the cultural life they had left behind, music quickly became the most valued and practised of the performing arts, and home music-making established itself as a favourite pursuit at all levels of society. Within a short time, music teachers and music shops began to appear in many centres.

At first the only organized music-making was provided by British military bands, which gave concerts of marches and operatic arrangements and accompanied the 'select' and 'popular' balls that were the focus of early social life outside the home. As the population increased, amateur musical organizations began to emerge in the larger settlements. A short-lived Philharmonic Society was formed in Wellington in 1848, and the first choral society, founded in Lyttelton in 1852, was followed by others in Auckland (1855), Dunedin and New Plymouth (1856), and Wellington and Christchurch (1860). Their programmes were almost indistinguishable in style and content from those of similar institutions in English provincial cities, though a chronic shortage of competent instrumentalists meant that, unlike in England, women were quickly accepted as players in the amateur orchestral societies that grew up as adjuncts to many of the choirs.

The discovery of gold in 1861 galvanized the economy, fuelled rapid population growth and created a demand for professional entertainment of all kinds. Theatres and opera houses were built, and New Zealand became part of a well-defined entertainment circuit that also included Victoria and New South Wales. From the late 1860s, touring artists and ensembles became a feature of musical life. Notable early visitors included Anna Bishop (1869), Arabella Goddard (1874) and Ilma de Murska (1876), and by the turn of the century the country had become a mecca for a wide range of itinerant musicians. Opera was paramount. The first professional performance, an English-language version of *La fille du régiment*, took place in Dunedin in 1862. Two years later W.S. Lyster's Royal Italian and English Opera Company visited six centres with a repertory of 29 works, and professional opera tours were soon an almost annual event. Specialist light opera companies, most of them working under the

auspices of the Australian-based impresario J.C. Williamson, introduced Gilbert and Sullivan and English adaptations of the latest European *opéras comiques* and operettas with remarkable rapidity, and from the mid-1890s until 1905 a professional light opera troupe, the Pollard Opera Company, operated from a New Zealand base. Heavier operatic fare was initially provided by companies associated with Lyster. Later performer-managers, such as Fanny and Martin Simonsen or Annis Montague and Charles Turner, continued to introduce new works. The Australian impresario George Musgrave brought lavish Wagner productions on tour in 1901 and 1907 – the year New Zealand attained dominion status – and the works of Puccini were introduced by Williamson's Grand Opera Company in 1910.

Apart from teachers, the main resident professional musicians in New Zealand in the 19th and early 20th centuries were associated with the church. The English cathedral tradition was consolidated with the foundation of a choir school in Christchurch (1879), and English organists and choirmasters such as Thomas Tallis Trimnell, Robert Parker and Maughan Barnett had a major influence on the country's musical life. One of the first New Zealand-bred professional musicians to make a mark was Alfred Hill, who returned from training in Leipzig to conduct the largely amateur Wellington Orchestral Society between 1892 and 1896. A professional orchestra of 45 players conducted by Raffaello Squarise was assembled for the Dunedin and South Seas Exhibition (1889–90), and a slightly larger one formed to play under Hill during the Christchurch Exhibition of 1906–7, but both were disbanded after the exhibitions closed.

The vigorous amateur tradition of the colony's founding years went on. As the British regiments were withdrawn, their musical mantle passed to volunteer garrison bands. The 1870s saw the emergence of bands representing local communities and the transition from wind-dominated military-style ensembles to brass. Exceptional levels of skill were displayed in the band contests that began in the 1880s, and a tradition of writing for brass grew up. New Zealand's expertise in the brass band field was demonstrated when the national Hinemoa Band made an acclaimed tour of the United Kingdom in 1903. During the same period choirs and operatic societies continued to proliferate. Musical journalism flourished – particularly in the iconoclastic pages of *The Triad*, a monthly arts magazine founded by the Dunedin critic C.N. Baeyertz in 1893 – and musical education was in great demand. Pressure for a national conservatory went unheeded, but the first university school of music was set up in Auckland in 1888, and Canterbury University College added music to its curriculum in 1891. A small regional conservatory, the Nelson School of Music, was founded in 1894 with the German conductor Michael Balling as its first director.

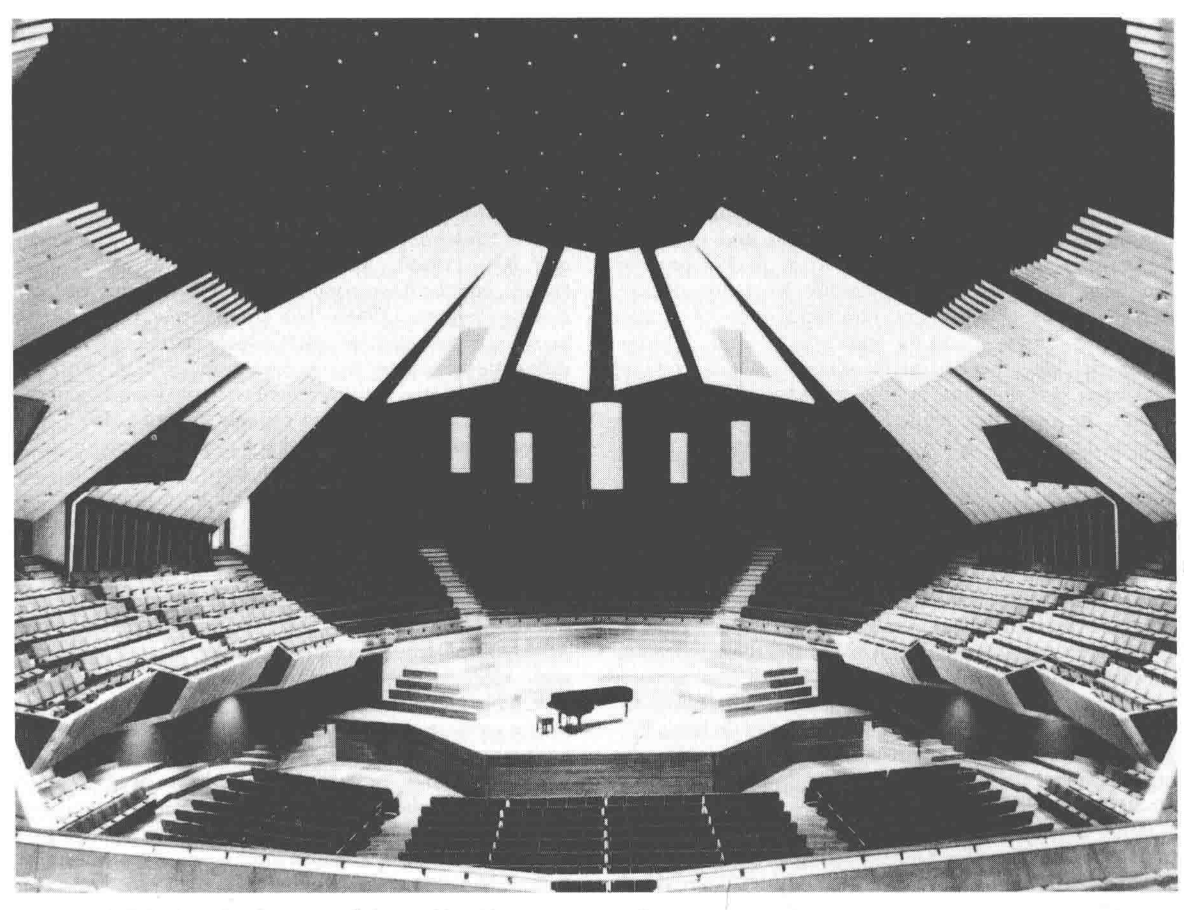
Instrument-making also became established. The earliest New Zealand-made instrument still surviving is an organ completed by James Webster in 1850, now in the Auckland Museum. New Zealand-made pianos were displayed at various Australasian exhibitions during the 19th century. One of the earliest was by Charles Begg, an Aberdeen piano-maker who had settled in Dunedin in 1861 and went on to found a chain of music shops throughout the country. There were organ builders and makers of stringed instruments in many centres by the end of the century, the most notable being the Auckland violin-maker Charles Hewitt, whose firm is still active.

Among the first music books were collections of satirical songs set to pre-existing tunes, the work of popular balladeers such as Charles Robert Thatcher. The enthusiasm for domestic music-making spawned a profusion of salon-style songs and piano pieces in the later 19th century. Several composers tried a hand at opera, and the colourful, self-promoting Luscombe Searelle (1853–1907) succeeded in having several works professionally produced at home and overseas. But the only composer to write music combining European tradition with a uniquely New Zealand flavour was Alfred Hill, whose interest in the music and mythology of the Maori was reflected in works such as the cantata *Hinemoa* (1896) and opera *Tapu* (1902–03). He had no immediate successors, but his internationally successful songs *Waiata poi* and *Waiata Maori* set a fashion for smaller compositions celebrating the country's natural beauty and for romanticized notions of the Maori.

2. 1914–45. New Zealand suffered a temporary downturn in organized amateur music as a result of the loss of manpower in World War I. At the same time professional music-making was adversely affected by the advent of moving pictures. Cinema orchestras briefly provided employment – until the arrival of the talkies made them redundant – but the cheapness and novelty of film almost destroyed the professional entertainment circuit. Touring ensembles became a rarity. Just four opera troupes visited New Zealand during this period, though the 1919–20 and 1932 Williamson companies were the largest yet seen in the country. Two tours by Henri Verbrugghen's New South Wales State Orchestra showed how far New Zealand had fallen behind its former fellow colony in developing professional institutions. There was an upsurge in the number and quality of overseas soloists visiting, but they merely reinforced a perception that music was an exotic art provided by foreigners. However, music's place in universities and teacher training colleges continued to improve, and musical education in schools was greatly strengthened following the appointment of E. Douglas Taylor as Supervisor in School Music at the Department of Education in 1926, even if it was accepted that New Zealanders wishing to make a musical career in any sphere other than teaching would have to do so abroad.

Change came with the development of broadcasting. Radio had existed in largely experimental form since 1921 but was not formally established until the founding of the national Radio Broadcasting Company in 1925. From the beginning it provided employment opportunities for musicians, and these were increased when small regional broadcasting orchestras were set up in four main centres: Wellington (1928), Auckland (1930), Christchurch (1934) and Dunedin (1935). In 1939 a fully professional National Broadcasting String Orchestra was formed under the leadership of the English violinist Maurice Clare. This provided the nucleus of the 34-strong National Centennial Orchestra, which was founded the following year under the direction of Andersen Tyrer for the country's centennial celebrations. However, the intention to put this orchestra on a permanent footing did not survive the outbreak of World War II, and professional music-making again fell into the doldrums.

3. After 1945. New Zealand's search for an identity accelerated in the postwar period, and an upsurge of interest in the performing arts led to the establishment of numerous institutions that transformed and enriched the musical scene. The most important of these was a permanent symphony orchestra. Founded in 1946 as part of the newly centralized New Zealand Broadcasting Service, the National Orchestra gave its first public concert on 6 March 1947. An arduous and extensive programme of touring ensured that it quickly became central to New Zealand's musical life. Its standards rose sharply under the resident conductorships of James Robertson (1954–7) and the enterprising John Hopkins (1957–63), and these gains were consolidated by Juan Matteucci (1964–9) and Brian Priestman (1973–5), with whom the orchestra made its first overseas tour (to Australia in 1974). At Hopkins's urging a National Youth Orchestra was founded in 1959 and an orchestral cadet scheme, later known as the Schola Musica, instituted (1961–89). In 1975, the National Orchestra was renamed the New Zealand SO, and the practice of having a resident conductor gave way to a system of principal and guest conductors, but the broadcasting association lasted until 1988, when the orchestra became an independent, crown-owned entity. It gives around 120 public concerts a year, in addition to broadcasting, theatre and commercial recording work. Overseas tours have included visits to the Hong Kong Arts Festival (1980) and Seville Expo 92. The orchestra also tours nationally and provides an organizational umbrella for the New Zealand Chamber Orchestra, founded in 1987.



Other professional orchestras have developed on a regional basis. The Alex Lindsay String Orchestra, which flourished in the capital between 1948 and 1973, provided the nucleus for what became the Wellington Sinfonia. The Dunedin Sinfonia, born from a largely amateur ensemble formed in 1958, achieved professional status in 1965, and the John Ritchie String Orchestra (1958) provided a catalyst for the eventual creation of the Christchurch SO in 1973. The Symphonia of Auckland (1970) expanded from semi-professional beginnings into the country's second orchestra, the innovatory Auckland Philharmonia.

An influx of European migrants, particularly in the 1940s, helped diversify and enrich New Zealand's musical life. Several were active in promoting the growth of professional chamber music, which began with the founding of the Wellington Chamber Music Society in 1945. Similar societies emerged in other centres, leading to the formation of a national organization, the New Zealand Federation of Chamber Music Societies, in 1950. This promoted tours by distinguished overseas groups, fostered resident ensembles and steadily evolved into a stimulating cultural force. Its activities moved beyond concert promotion to embrace educational programmes, the commissioning of music and a composer-in-residence scheme. In 1987 the organization changed from a federation of autonomous societies into a centralized national body, Chamber Music New Zealand. The result of a supportive environment has been the formation of several professional chamber ensembles, notably the New Zealand String Quartet (1987).

Opera took longer to become established after 1945. A visit from a strong Italian company under Williamson auspices in 1949 showed that a demand existed, but a resident professional ensemble only began to emerge in 1954, when Donald Munro formed the New Zealand Opera Company. From shoestring beginnings, this grew into the biggest arts organization in the country. Major seasons were given in metropolitan centres, opera with piano visited smaller towns, and live broadcasts took performances into every home. Important productions included David Farquhar's specially commissioned *A Unicorn for Christmas* (1962), the New Zealand premières of *Die zauberflöte* (1963), *Così fan tutte* (1963), *Porgy and Bess* (1965), *Albert Herring* (1966) and *Fidelio* (1968), and the Australasian professional première of *The Rake's Progress* (1969). The company was at its peak between 1958 and 1966, after which it suffered economic difficulties and went into recession in 1971. A period of semi-professional activity ended with the founding of the short-lived National Opera of New Zealand (1979–83), whose demise was the signal for opera to develop on a regional rather than national basis. Wellington City Opera (now National Opera of Wellington) was launched in 1984 and Canterbury Opera the following year. In Auckland the mantle passed first to the dramatically inventive but musically variable Mercury Opera. Following the building of a new theatre, the Aotea Centre, several semi-professional groups amalgamated to form Auckland Metropolitan Opera in 1990; after a merger with Mercury and several name changes this became Opera New Zealand in 1995.

The scope and quality of musical life in New Zealand has increased dramatically since the 1960s. Many multipurpose theatres or concert halls have been built to accommodate the increase in performing arts activities (fig.5), accelerated by the growth of festivals, the largest of which is the New Zealand International Festival of the Arts, held biennially in Wellington since 1986. A number of publications, notably Owen Jensen's *Music Ho* (1941–8) and William Dart's *Music in New Zealand* (1988–96, 1998–) helped widen horizons and stimulate debate, while the establishment of specialist collections, such as the Alexander Turnbull Library's Archive of New Zealand Music (founded 1974), encouraged the study of New Zealand's musical past. Tertiary musical education has expanded to embrace performance studies, musicology, ethnomusicology, jazz and popular music, music theatre and composition. Improved instrumental training and a steady infusion of overseas players seeking a better life have contributed to enhanced standards, and though some artists, particularly opera singers, still find it necessary to base themselves overseas, most of them also make frequent appearances at home. The country's strong tradition of instrument making continues. The 'Musical Instruments through the Ages' exhibition in Auckland (1986) displayed the work of 23 New Zealand makers, including several with international reputations. Amateur organizations such as choirs, bands and operatic societies also still thrive. Of particular note is the National Youth Choir (founded 1979), which has made several acclaimed overseas tours, and the National Band of New Zealand, which won the world title in 1975, 1978 and 1985 and has also toured internationally.

The strongest expression of growing postwar musical self-confidence has been the emergence of a significant number of composers. This is partly the result of increased educational opportunities and new forms of patronage, such as composer residencies and the underwriting of commissions and performances by musical organizations

5. Concert hall in Christchurch Town Hall, designed by Miles Warren, opened 1972

and by the Arts Council of New Zealand/Toi Aotearoa (originally founded as the Queen Elizabeth II Arts Council in 1963). Further encouragement and support has come from the New Zealand branch of the ISCM (1949–66), the Composers' Association of New Zealand (founded 1974), the Composers' Foundation (1981) and the New Zealand Music Centre (1991). Radio has been crucial in helping composers reach a wider audience. Four stations modelled on the BBC Third Programme were established in the 1950s and linked as a network from 1963 onwards. This network, known as Concert FM, has consistently championed New Zealand music and performers and has been a major force in the country's cultural development. Recording companies, notably Kiwi/Pacific International (founded 1978), Ode (1968) and Ribbonwood (1989) have also helped propagate New Zealand music, as have publishers such as the Waiteata Music Press, which issued its first scores in 1967, and Nota Bene (1979).

Many composers have also derived inspiration from the example of Douglas Lilburn (*b* 1915). In 1946 he argued for 'a living tradition of music created in this country', and the exactness and economy with which he evoked a sense of place in seminal works such as *Landfall in Unknown Seas* (1942) was crucially important, particularly to the first postwar generation of composers, which included Edwin Carr, David Farquhar, Larry Pruden, Ronald Tremain and Anthony Watson, several of whom came under Lilburn's tutelage at the summer Cambridge Music School (founded in 1946). Although most subsequently studied in Europe, the majority returned to work in New Zealand. Farquhar, Tremain and John Ritchie emulated Lilburn in holding university posts and were responsible for teaching many of the next generation. Among this younger group, Jack Body, Christopher Blake, Dorothy Buchanan, John Cousins, Lyell Cresswell, Ross Harris, Jenny McLeod, John Rimmer and Gillian Whitehead have adopted a wide variety of musical styles. Lilburn's establishment of an electronic music studio at Victoria University of Wellington in 1966 was the catalyst for some to embrace modern technology, including computer techniques. Others have absorbed the sounds of Asia and the Pacific and combined these with European influences. Though most of these composers chose to live and work in New Zealand, several opted for overseas careers. By contrast, the members of the next, predominantly university-trained generation, born in the 1950s and 1960s, enjoy a greatly enhanced range of opportunities in their own country. Eve de Castro-Robinson, John Elmsley, Gareth Farr, David Hamilton, Nigel Keay, Martin Lodge, Christopher Norton, Anthony Ritchie and John Young are no less eclectic than New Zealand composers of previous generations, but their frame of reference tends to be focussed on the Asia-Pacific region, and their 'New Zealandness' no longer involves a search for identity but is a subconscious certainty.

Ney [nai, nāī, nāy, nay]. Oblique rim-blown flute of the Arab countries, Iran and Central Asia. The term derives from the old Persian for 'reed' or 'bamboo' and by extension 'reed flute'. The instrument has been known in the Near East since antiquity; iconographic and written documents attest its use by the ancient Egyptians in the 3rd millennium BCE. A particularly striking example of its use occurs on a ceremonial slate palette (*c*2900 BCE, now in the Ashmolean Museum, Oxford), on which a fox plays the instrument for a dancing giraffe and ibex (*see* EGYPT, §I, 2, fig.1); a Sumerian silver flute dating from 2450 BC has been found in the royal cemetery of Ur in Southern Mesopotamia.

The *ney* of Iran is primarily a classical instrument; it is made of reed with seven nodes, 40 to 80 cm long, and has five finger-holes and one thumb-hole producing the basic pitches *c′–d′–e′–f′–f♯′–g′–a′* (the *e* and *a* are a quarter-tone flat). Other notes can be obtained by varying the breath pressure, and the range can thus be extended to two and a half octaves. As the bevelled edge of the mouth-hole is sharp on the inside, it is often covered by a metal band to prevent damage to the instrument. The joints are sometimes made at the nodes of the reed, the tube of which can be decorated with engraving.

Players of the *ney* in Iran place the rim between their teeth, which produces a warmer and more powerful tone; this more difficult technique is a development from

Player of the popular ney (rim-blown flute), Fez, Morocco

the 19th century, apparently inspired by the Turkmen *tüydük*. The *ney* is the only wind instrument in the classical Persian orchestra, but its melodic and rhythmic resources fit it equally for solo performance. The great *ney* tradition is preserved at Esfahan, where its repertory (*radif*) includes pieces reserved exclusively for it.

Various popular forms of the instrument are known, made of wood, reed or metal and with various vernacular names, for example the Baluchi *nel*, Turkmen *tüydük* and Kurdish *şimşal*.

The *ney* of Azerbaijan is 60 to 70 cm long, and also made of wood, reed, brass or copper, with three to six finger-holes. The player holds the instrument obliquely, with its head in the corner of his mouth. It is now rare; once it was common, particularly as a shepherd's instrument. The Turkish *ney* is played in classical *fasıl* (art music) and is an important member of the ensembles that play at the ceremonies of the Mevlevi order of Sufis founded by JALĀL AL-DĪN RŪMĪ. It is similar to the Arab *nāy* in construction but has a wooden cap to facilitate blowing and tone-production.

The term 'nāy' is the generic Arabic name for several folk flutes as well as the specific term for the reed flute used in Arab art music. The classical Arab *nāy* consists of

an open-ended segment of 'Persian reed' (*Arundo donax*) with six finger-holes in front and one thumb-hole; the edge of the tube at the top is lightly bevelled. The *nāy* tube varies in length from 32 to 81 cm and whatever its size it must contain eight nodes and nine antinodes. The reedpipe from which the instrument is made should be not less than three years old and the tube must be hard, smooth and compact; the distance between the nodes is taken into consideration. Several instruments can sometimes be made from one long reed stem.

In Arab countries the classical *nāy* is made in several lengths. Each instrument is designated by the name of its fundamental note (given by opening the first hole): *nāy Māhūr* (C), *nāy Dūkāh* (D), *nāy Buselik* (E), *nāy Chargāh* (F), *nāy Nawā* (G), *nāy Ḥusaynī* (A), *nāy 'Ajam* (B♭), *nāy Kardān* (c), and so on. Theoretically, it is possible to have a *nāy* for each semitone of a chromatic scale, and for some quarter-tones; in practice each maker has a restricted number of models to suit the requirements of the music played in his area. Apart from making the *nāy* according to the musician's individual requirements, there are three methods of placing the fingerholes: this may be done by measuring (*al baḥr*), calculation (*al ḥisāb*) or analogy (*al muqābala*). The *nāy* is difficult to play because the bevelled mouth-hole remains completely open, only partly resting on the lower lip. Musicians often use different sizes of *nāy* during a concert, but a virtuoso can play the three-octave range on one instrument by altering the position of his fingers on the holes, by movements of the lips and head, and by breath control.

The *nāy* is an urban instrument and the only wind instrument used in Arab art music. As part of the *al-takht al-sharqi* ('oriental ensemble') found in large Arab towns, it appears alongside the *'ūd* (lute), the *qānūn* (box zither) and two membranophones: the *daff* (frame drum) and the single-headed *dunbuk*. As a solo instrument it is used for improvisation (*taqsīm*). It also accompanies religious glorifications.

The popular Arab *nāy* may be made of wood, reed or metal, and has many local names including *shabbāba*, *blūr* and *madruf* in the Middle East and *suffāra*, *salāmiyya*, *qaṣaba*, *ḳawwāl*, *juwaḳ* or *fḥal* in North Africa. A popular *nāy* does not conform to any rigorous norms. The reedpipe *nāy*, which varies in length from 20 to 80 cm, is not always completely straight. It can be made from one segment of reed which may include three or four nodes with a diameter that varies between 1·5 and 2·5 cm. Three to ten holes are distributed in several different ways but usually begin at the second antinode from the bottom. The upper opening may be bevelled, or it may be capped with a conical metal mouthpiece (as in the *shāqūla* of Dayr az Zawr, eastern Syria). The metal *nāy* is 30 to 40 cm long, and sometimes has a bevelled mouth-hole; it is held and played in the same way as those of reed or wood. Middle Eastern models have six finger-holes and one thumb-hole, while the North African *qaṣaba* has seven finger-holes and one thumb-hole.

The instrument is also played by the Karakalpak peoples of Central Asia, where it can be made of a variety of materials which are often described by a prefix, for example *agach-nai* ('wooden *nai*').

SCHEHERAZADE QASSIM HASSAN, JEAN DURING

Ney, Elly (*b* Düsseldorf, 27 Sept 1882; *d* Tutzing, 31 March 1968). German pianist. She was a pupil of Isidor Seiss for nine years at the Cologne Conservatory, after which in 1901 she won the Mendelssohn Prize in Berlin and then continued studies under Leschetizky and Sauer in Vienna. Shortly before Seiss' death in 1905, the year of her official Viennese début, Ney took over his class in Cologne, but after three years abandoned teaching in favour of her concert career. From 1921 she played in the United States, where in the years before the Second World War she established a reputation as a serious and deeply musical artist. Ney made regular appearances with the Leipzig Gewandhaus Orchestra under Nikisch and for sixteen years from 1911 was married to the Dutch conductor Willem van Hoogstraten, with whom in the 1960s she recorded the last three Beethoven concertos. During the 1930s Ney established a piano trio with Max Strub (violin) and Ludwig Hoelscher (cello).

Renowned as a large-scale virtuoso player in her earlier years, she is remembered more especially for the Beethoven and Brahms performances of her middle and later career. In contrast to the massive displays of temperament in her playing, she was also capable of highly sensitive tonal colouring and managed to maintain her finely developed finger technique into old age. Latterly she gave masterclasses at the Mozarteum in Salzburg. She published *Ein Leben für die Musik* (Darmstadt, 1952), which later appeared as *Erinnerungen und Betrachtungen* (Aschaffenburg, 1957).

Nezeritis [Neseritis], **Andreas** (*b* Patras, Greece, 30 Nov 1897; *d* Athens, 19 Nov 1980). Greek composer. He studied the piano with Evlambiou, Wassenhoven and Farandatos at the Patras and Athens conservatories (1917–22), also following courses in harmony, counterpoint and fugue. Lavrangas gave him private lessons in composition and orchestration (*c*1926–33). In 1957 he was elected vice-president of the League of Greek Composers and in 1967 he succeeded Varvoglis as president. His nationalist music is characterized by a smooth-flowing modal melody that unites a variety of harmonic styles, as in the prelude to the *Five Psalms of David*, a staple of the Greek orchestral repertory. His Symphony no.3 (1969), with its debt to Brucknerian symphonic gesture, represents a sincere confession of religious faith.

GEORGE LEOTSAKOS

Nezhdanova, Antonina (Vasil'yevna) (*b* Krivaya Balka, nr Odessa, 4/16 June 1873; *d* Moscow, 26 June 1950). Russian soprano. She graduated from Umberto Masetti's class at the Moscow Conservatory in 1902; that year she was engaged as a soloist at the Bol'shoy, where she remained for nearly 40 years, singing leading roles in Russian and west European operas opposite Sobinov. In 1912 she sang Gilda at the Paris Opéra with the Monte Carlo company. Her other roles included Lyudmila, Tat'yana, Lakmé, the Snow Maiden, Volkhova (*Sadko*), the Queen of Shemakha, Elsa and Rosina. As Glinka's Antonida and Rimsky-Korsakov's Marfa (*The Tsar's Bride*), she achieved a most harmonious musical and dramatic integration.

Antonina Nezhdanova as Antonida in Glinka's 'A Life for the Tsar'

Nezhdanova was one of the greatest representatives of the Russian school, with a clear, beautiful voice and a coloratura technique of dazzling lightness and brilliance. Her performances were unselfconscious and heartfelt, and she was a subtle, dramatic actress. From 1936 she taught at the Stanislavsky Opera Studio and at the Bol'shoy opera studio, then at the Moscow Conservatory (1943–50).

Ngoma [engoma, goma, gomo, ingoma, iñgoma, ng'oma, ngomba, ngomm, ngomo etc.]. A common term (with many variants) used generically for many kinds of drum among the numerous Bantu-speaking peoples of central, eastern-central and southern Africa. However, 'ngoma' often has a wider meaning, at its widest standing for music and dancing (and the associated feasting), and for ceremonies in which drumming occurs. Because of its use as a general name for drums of various shapes and sizes it often appears in the catalogues of instrument collections (e.g. Boone, 1951).

Among different peoples *ngoma* can variously denote a dance, a drum ensemble, the most important drum of an ensemble, or individual drums. Use of the name is sometimes indicative that drums have special sacred or magical properties. *Ngoma dza midzimu* ('drums of the ancestor spirits') is the term used by the Venda of the Transvaal for spirit possession dances; the bass drum in the accompanying ensemble, a large hemispherical drum with a single head, resembling the two drums with which it is played, is itself called *ngoma*. Common nomenclature also includes *ngoma* in compound forms, for example, *ngoma ya shina*.

Ngoma drums may also be associated with royal power, as was frequently the case, for example, among the kingdom states of central Africa. Among the drum ensembles of RWANDA AND BURUNDI, those usually cited as *iñgoma* were formerly played only for the rulers (Tutsi). They consisted of sets of up to nine laced drums of the Uganda drum type beaten with drumsticks, struck with awesome power and precision to the accompaniment of praise verses. As in many other cases, each drum in the ensemble had its own pitch and special name. In Burundi the ensemble was even larger, up to 25 drums (with single pegged heads) being used in a single set. This ensemble formerly performed only at the court at the behest of the king but like the Rwanda set is now played generally at festive occasions.

Nguyen Thuyet Phong [Nguyen, Phong] (*b* Tam Ngai, Vietnam, 9 Aug 1946). Vietnamese performer of traditional music and ethnomusicologist. He began studying music at the age of 5 with his father, followed by formal instruction with master musician Tram van Kien [Muoi Kien] at the age of 10. Eventually he excelled in music for festivals and rituals, chamber and theatrical styles and Buddist chant, widely performing both vocally and instrumentally. He first studied Western music after moving to Saigon but earned the Baccalaureate degree in Vietnamese literature and philosophy at the University of Saigon. After teaching literature, he became principal of a high school (1970–74), adding music to the curriculum, which was then considered an innovation. After spending 1974–5 in Japan, he emigrated to Paris where he earned the PhD in Ethnomusicology at the Sorbonne (University of Paris), writing a prize-winning dissertation on Vietnamese Buddhist chant under Edith Weber and Trân Van Khê. After being appointed to the Centre National de la Recherche Scientifique (CNRS), he began working in the USA in 1983, eventually becoming a citizen. He has held positions at UCLA, the University of Washington, the University of Pittsburgh and Kent State University. Both his performance activities and research have continued with grants from the Social Science Research Council, the Asian Cultural Council, Earthwatch and the National Endowment for the Arts, which awarded him a National Heritage Fellowship in 1997. In 1990, along with Terry E. Miller, he founded the International Association for Research in Vietnamese Music and during the 1990s he conducted comprehensive fieldwork throughout Vietnam, the first person to do so after the end of the war. Nguyen performs internationally and publishes research in both English and Vietnamese. As a professional performer of traditional music and song, he brings to his writing an insider's knowledge, especially with regard to Vietnam's complex modal system. Following the retirement of Trân Voun Khê, Nguyan has become the leading authority on and exponent of Vietnamese music.

Nias. *See* INDONESIA, §VI.

Nibbio, Stefano Venturi del. *See* VENTURI DEL NIBBIO, STEFANO.

Niblock, Phill (*b* Anderson, IN, 2 Oct 1933). American composer and multimedia artist. He graduated from Indiana University in 1956 with a degree in economics. After taking up photography, he moved to New York. He joined the Experimental Intermedia Foundation in 1968 (director from 1985) and was appointed to teach film, video and photography at the College of Staten Island, CUNY in 1971. An important early musical influence was Morton Feldman, but the seed of his musical invention was most firmly planted in the mid-1960s when he rode a motorcycle up a hill behind a large truck and was mesmerized by 'the strong physical presence of the beats resulting from the two engines running at slightly different frequencies'. That experience inspired him to compose music in which loud sustained tones blend and collide, creating almost physically tangible sound. During the 1970s and 80s he constructed pieces by recording instrumentalists playing pitches chosen for their potential to create beats and difference tones, editing and looping these recordings so the sounds had no apparent start or finish, and layering the edited versions over each other. In live performances of his works, musicians move slowly through the concert space, playing sustained tones that interact with recordings. In 1990 he began using digital samplers to create textures of up to 50 layers. His music has frequently been performed during showings of his films.

GREGORY SANDOW (text, bibliography), JOHN ROCKWELL (work-list)

Nicaragua (Sp. República de Nicaragua). Country in Central America. It is the largest of the Central American republics (130,000 sq. km) and encompasses two broad cultural areas, the Atlantic and Caribbean coasts. It is bounded in the north by Honduras, east by the Caribbean, south by Costa Rica and west by the Pacific. 90% of the estimated population of four and a half million live on the western, Pacific Coast region.

I. Historical background. II. Art music. III. Traditional and popular musics.

I. Historical background

Archaeological findings and descriptions by *cronistas*, early Spanish writers, are the primary sources for musical practices before sustained European contact. Both are almost entirely restricted to the southern lowlands of the Pacific Coastal zone. The archaeological record indicates two major migrations from central Mexico, that of the Chorotegas, a Mangue-speaking group, and the Nahuatl-speaking Nicarao. Less definite is the place of origin or time of arrival of the smaller Matagalpan group dispersed in the central highland region, which may be of South American origin. Throughout the lowland region, archaeologists have found small tubular and globular duct flutes in different sizes and with a variety of numbers of holes and tunings. In 1523, the Nicarao chieftain Diriangén provided a performance of an ensemble of five flute players for the Spanish conquistador Gil González Dávila before later forcing him back to Costa Rica. Both Chorotegan and Nahuatl communities marked the ending of each calendar year and other occasions with large-scale celebrations that included musical accompaniment for thousands of costumed dancers. In 1540, Giralmo Benzoni witnessed such a large celebration and described the musical instruments as trumpets (*excoletes*), flutes made from both reeds and clay, drums and whistles. He also mentioned *chilchil*, which he termed small bells, similar to *chischiles*, the current name for small bells sewn onto dancers' shoes in several folkdances. Also present in parts of the Pacific Coast was the *teponaztli*, a slit-drum found among Nahuatl-speaking peoples in central Mexico, whence the Nahuatl speakers in Nicaragua originally emigrated; it has long been extinct.

Earthquakes and social upheavals have nearly obliterated such documentation as might have existed of the nation's earlier musical history. In comparison to Guatemala and other larger Spanish colonies, institutionally supported musical activity in colonial Nicaragua was probably at a low level considering the province's lack of strategic importance and economic activity. Colonial documents record a steady payment to priests for masses and other religious services that no doubt required musical performance. Several references establish the penetration of Spanish instruments throughout the Pacific Coast. Colonial writings also attest some retention of pre-European musical practices among the Indian communities that were experiencing increasingly mestizo acculturation. From the late 1850s American travellers, crossing the isthmus to California, provide summary descriptions of several folk music traditions still practised today. The remaining cultural autonomy of indigenous enclaves on the Pacific Coast became severely eroded with the introduction of intensive coffee cultivation in the late 19th century.

There are no musical instruments that can be definitively traced as survivals from the pre-European period, though several percussion instruments share a similarity both with 16th-century descriptions of indigenous instruments and Spanish ones. Examples of this potential double origin are vertical flutes and the *tambor*, a medium-sized, two-headed drum still found in some indigenous enclaves.

The contemporary population of the Pacific Coast is overwhelmingly mestizo, a mixture of indigenous American and European peoples and cultures. Beginning in 1524, the rapid subjugation and near destruction of the Nahuatl and Chorotegan peoples allowed for subsequent pervasive Spanish acculturation. Even the isolated pockets of indigenous communities on the Pacific Coast have all suffered strong mestizo influences. During the colonial period, Africans were brought to replace the exhausted indigenous population for agricultural and mining work. The mixture of this relatively small proportion of African blood in some sections of the Pacific Coast has so thoroughly blended into the general population that presently it is not generally recognized as part of the national make-up, and in fact no African musical stylistic retentions are identifiable. Nicaragua's majority culture, then, forms one part of the general mestizo Pacific Coast culture of Central America that runs from southern Guatemala through the Costa Rica *meseta central*.

II. Art music

The first important composers in a classical vein came with the flourishing of the salon tradition in the larger cities towards the end of the 1800s. Waltzes and other European dance-related forms typify the works of this time. Touring zarzuela companies were also highly influential. Composers with some classical training devoted much of their effort towards funeral marches and church-related musical forms. Small music schools that promoted the European art music tradition were founded around the turn of the century in the major cities; the first documentation of Nicaraguan compositions for wind and brass ensembles dates from this period. Pablo Vega Raudes (1850–1919), from Masaya, conducted several bands and a chamber orchestra, and founded the nation's first school of music in León. The two most significant composers from this period are José de la Cruz Mena (1874–1907) from León and Vega Raudes's son Alejandro Vega Matus (1875–1937) from Masaya. Like his contemporaries, Mena adopted a European academic style that harked back to Haydn for his more classically oriented works, principally several short masses. Most of his works were a type of erudite popular song. Vega Matus led the most celebrated dance and orchestral band of his time, a vehicle for the many foxtrots, one-steps, *paso dobles* and other songs that make up most of his output. Vega Matus also composed many sacred works and short pieces for chamber orchestra. His son, Ramiro Vega Jiménez, directed both his father's ensemble and the prestigious Band of the National Guard. He wrote masses, operettas, overtures and other pieces scored primarily for band. Fernando Luna Jiménez (1853–1936), first violinist in the Orquesta Vega Matus, wrote several masses, requiems, chamber works, nocturnes, as well as the celebrated overture *La cabaña de Lepha*, and the first symphonic work based on Nicaraguan folk material, *El Toro Huaco* op.8.

A more developed attempt at a nationalist use of folk materials, as well as the first composition of extended works for full orchestra, was initiated by Nicaragua's best-known composer, LUIS ABRAHAM DELGADILLO (1887–

1961). He was a pianist and primarily composed piano pieces and short symphonic works, many of them programmatic in nature. Juan Manuel Mena Moreno (1917–89), founder and director for many years of the Nicaraguan National Choir, remains the nation's most accomplished composer of vocal works in the classical idiom. There has been a dearth of new compositions in the classical idiom in the late 20th century, an outcome of the unfortunate status of performing ensembles in the country. During the early 1980s, scores for the film industry, now defunct, were a new outlet for compositions. Notable among the dozen or so examples of incidental film music is that of the director of the Orquesta de Cámera in the 1980s, Pablo Buitrago, particularly his score for the short film *El Centerfielder*.

The Managua-based Orquesta de Cámera Nicaragüense and the Camerata Bach are the only organizations dedicated to classical music performances. Some semi-classical works are included in the repertory of the Nicaraguan National Choir. The Banda Filarmónica de Managua at times continues the tradition of outdoor concerts, originally established by the pioneering Banda de los Supremos Poderes as early as the 1930s. Most of the nation's small clubs that feature local popular musicians, including New Song performers, are located in Managua.

The bulk of musical education takes place on a private basis and is not found within an institutional framework. Governmental initiative during the Sandinista period (1979–90) established the various Centros Populares de Cultura. Renamed Casas de Cultura after 1990, they continue to play a key role in the country's smaller cities and towns, serving as a locus for a variety of cultural activities, including musical instruction. Music education in primary and secondary schools suffers from a severe shortage of instruments and teachers. There is no musical instruction at any of the nation's universities. The Escuela de Música in Managua only offers instruction to university entry level.

III. Traditional and popular musics

1. Caribbean Coast: (i) Sumu (ii) Rama (iii) Miskitu (iv) Garífuna (v) Creole. 2. Pacific Coast: (i) Northern regions (ii) Southern region (iii) Popular music.

1. CARIBBEAN COAST. Historically, the Caribbean Coast has had little contact with western Nicaragua and its primary economic and cultural relationship with the outside has been with the greater Caribbean basin. Spanish control was never fully exercised and English influence has been strong. There are six distinct ethnic groups among the estimated current population of 470,000. Positioned along a continuum that runs from Amerindian to African they are: Sumu, Rama, Miskitu, Garífuna and Creole and mestizo; the latter are relative newcomers to the area. In addition, all groups have varying degrees of European mixture, especially Creoles. Mestizos currently constitute approximately two-thirds of the total population and their musical practices from the Pacific Coast have had increasing impact upon previously established groups.

(i) Sumu. The estimated population of 10,000 Sumu currently inhabit tributary headwaters of main rivers on the Caribbean Coast in Nicaragua (part of the northernmost group is also found in Honduras). The Sumu are the most isolated indigenous group within the nation's borders. Once related to the Miskitu, the Sumu share many instruments and musical nomenclature with them. One example is the *lungku* (or *luñku*), a musical bow made from a thin and flexible wooden branch from 50 to 80 cm long and a cord from the dried fibre. Played exclusively by women among the Sumu, the player places the bow in the mouth to act as a resonator and plucks the string with the right hand. Compositions tend to imitate the sounds of animals and are highly individual in nature. Another important shared instrument is the *bra-tara* or *bara*, a large bamboo flute of up to 2 metres. It is played exclusively by the *sukya*, or shaman, who blows through a mouthpiece formed from birdskin and beeswax during curative rituals, producing a loud, roaring sound from two to four holes along the length of the flute.

Group singing plays an important part in the Sumu life-cycle and daily activities, especially choruses formed by women of a given community. The most important ceremony among the Sumu is the funerary ritual, called *sau* for a woman's death and *sikro* for a man's. Rattles made from round or egg-shaped gourds are principally played by women during the *sau*. The more elaborate *sikro* ceremony, exclusively male, lasts several days. During the first night the *sukya* sings to invoke the spirit of the deceased. The spirit's arrival along a thread attached from the grave to the deceased's house is announced with the sound produced from a type of bullroarer, made from spinning a pole with an attached bamboo strip. The ritual proceeds to dancing accompanied by *bara* reed flutes, the short fifes called *una*, and *pantañ/panatañ* cedar drums. A *pantañ* is an upright, hourglass drum hollowed from a solid block of mahogany or cedar wood, and used only in this ceremony. The drumhead can be made from a variety of animal skins, including deer, tapir, or even toad or iguana.

The Sumu also use a single-note flute made from the femoral bones of deer, tapir or other large animals used in hunting to lure the agouti. As revealed in its name, the *durum* was originally introduced through contact with the English. It is played with sticks, not hands, and is the most widely used membranophone. Perhaps the previous existence of the *lungku* led to the popularity of the *yusap*, or trumpet, also originally introduced by Europeans.

(ii) Rama. The Rama have been reduced to a community of less than 700. They have suffered significant deculturation, including language loss. There are no published studies on their musical practices.

(iii) Miskitu. The Miskitu population totals approximately 170,000, of which 120,000 reside within the borders of Nicaragua and 50,000 in Honduras, together with a scattering of families in Managua, Nicaragua and along the coast in north-eastern Costa Rica. Contemporary Miskitu identify themselves and are considered by outsiders as essentially of Amerindian descent but in the last five centuries they have mixed extensively with Europeans and Africans.

The principal secular form of music is called *kitarlawana* (from *kitar* and *lawana*, song) or *tiun*. *Tiun* are songs composed by men and their lyrical content centres on a woman. Most often the sentiments expressed are ones of love, longing and desire, but a range of emotions can be represented, including strong negative feelings. The songs can be accompanied by one or more *kitars* and/or guitars. The *kitar* (from 'guitar') is a handmade plucked wooden lute. Its strings were once made from catgut but nowadays are purchased commercially. Although the

pegbox is designed for six strings, the *kitar* used by young people to accompany their *tiun* customarily has fewer strings. Additional percussion instruments accompany *tiun*: *kritas* (scrapers) and *aras napats* (horses' jawbones). The strong impact of centuries of European contact and an intensive European missionary presence are clearly evident in the melodic design and full use of functional harmony. *Tiun* melodies are sung solo or harmonized in an approximate pattern of parallel 3rds and 6ths. Vocal style can vary from a forceful production that borders on shouting to a relaxed, often plaintive style where the singer cracks his voice at the end of phrases. Tonality is overwhelmingly major. Metres can be 3/4 or 4/4 at a moderate to slow tempo. Dotted rhythmic accompaniment is pervasive.

The Miskitu funerary ritual, *sikru*, was probably once identical to the Sumu *sau* and *sikro*, but transformed over time from the Miskitu's increased outside contact. The *sikru* has suffered from repression by Moravian Christian missionaries. For example, the *kungbi* is a large drum probably resulting from contact with the population of African descent on the coast. It measures 40 to 50 cm in diameter, is one to one and a half metres in length and is made from the hollowed-out section of a *yulo* (mahogany) log. The drum is laid upon the ground and the player sits astride it, beating the deerskin head with his hands to accompany the singer who sits immediately behind him. The *kungbi* has traditionally been used in the *sikru* ritual. The influence of the Moravians, who have attacked the drum as demonic, has diminished its ritual presence and resulted in the *kungbi* being used above all for secular entertainment.

The *sikru* ceremony contains women's laments around the body of the deceased and at burial. The dance of the *sukia*, or shaman, is accompanied by one or more *kitars*, *drita* (rasps), *insuba* (rattles) and *arasnapats* (jawbones). At the same time, younger men perform their own *tiun*, accompanied by the same instrumentation. Contemporary ritual celebrations have also incorporated portable radios and record players, thereby combining popular music forms with traditional music.

(iv) Garífuna. The current estimated population of 2000 Garífuna, or black Caribs, are descendants from the mixed Carib and African people exiled from St Vincent to the island of Roatán, Honduras, in 1797. Nicaraguan Garífuna migrated from Honduras and Belize during the later half of the 19th century. Nicaraguan Garífuna are relatively acculturated to mestizo and Creole culture compared to the larger communities in Honduras and Belize. Salient among the musical practices of the Nicaraguan Garífuna is the curative *walagallo* ritual (Suco Campos, 1987). The music and dance of this ceremony closely parallels similar ones among other Garífuna on the Caribbean Coast. Studies of Garífuna music have been on these larger Garífuna populations north of Nicaragua in Belize and Guatemala.

Nicaragua, §III, 1(v): Traditional & popular musics: Creole

(v) Creole. The Creole population on the Caribbean Coast, totalling approximately 40,000, is concentrated primarily in urban areas. Creoles arrived in two migrations, one over several centuries as slaves and escaped slaves of the English, and a more recent migration primarily from Jamaica since the late 1800s. In contrast to mestizos, Creoles are overwhelmingly Moravian Protestants and speak a creole English. There are no published studies on Creole music beyond occasional reporting on annual festivities in the national press.

Moravian hymnody remains a central musical outlet in the Creole community. West Indian influence is reflected in the most common musical form, usually referred to as *mento*, which clearly resembles Jamaican *mento*. These songs are characterized by duple metre, moderate tempo, major tonality, syncopated rhythmic accompaniment, open vocal style and a basic structure of alternating verse and chorus. The instrumentation reflects the Creoles' common cultural links with other parts of the English-speaking Caribbean: banjo, asses' jaw, washpan (wash tub) bass, scraper, guitar and, more recently, accordion. Claves, bongos and congas are also occasionally added. Lyrics typically describe an actual local event, frequently laced with satire.

The maypole, roughly similar to the English version, is performed in conjunction with other festivities to celebrate the earth's fertility. These celebrations close with another traditional dance, the *tulu lulu* (or *tulululu*), accompanied by the song of the same name. Maypole dance style was transformed into a sensual, popular dance form that became nationally popular in the 1970s and especially the 1980s under its Spanish name *palo de mayo*. Strongly influenced by modern *soca* (*see* TRINIDAD AND TOBAGO), *palo de mayo* conserves much of the acoustic *mento*-based style, such as lyrics, basic melodies, chordal patterns and other musical elements, but it transforms the earlier style by increasing tempos and substituting the banjo, wash-tub bass and accordion with a popular music instrumentation of trap drums, horn sections and electric instruments, including electric bass, organ and/or synthesizer. Reggae music also has a following on the Caribbean Coast, where it is often called 'Rasta'.

2. PACIFIC COAST. The Spanish musical stylistic foundation of Nicaragua's folk and popular music is clearly evident throughout the Pacific Coast, notable by a marked preponderance of 3/4 and 6/8 metres and the characteristic harmonization of melodic lines in 3rds. The six-string Spanish guitar is by far the most popular and widely distributed instrument. One or more guitars accompany lyrical songs, sung solo or in duet, throughout the region.

The Pacific Coast can be roughly divided into two demographic areas, the mountainous northern and central regions and the populous southern zone.

(i) Northern regions. Duo guitar instrumental pieces have been cultivated in Nuera Segovia and neighbouring northern regions more than in other parts of the country. The *mazurka segoviana* is the most popular form for these instrumental guitar duos. Performed in triple metre at a slow tempo, this music and associated dance were introduced into the northern coffee-producing regions by Central European immigrants in the late 19th century. Instrumental ensembles centred around a *violín de talalate* (named after the soft, white *talalate* wood famed for ease of carving into the appropriate shape) and one or more guitars perform a variety of musical genres, including mazurkas. The musical style of the *violín de talalate*, similar to the region's vocal aesthetic, emphasizes glissandos in the melodic ornamentation and favours a thin, sometimes raspy sound. The *quijongo* monochord, of African origin, has been limited to the zone close to the Honduran border and at the present time is practically extinct.

Approximately 20 *romances* can be found throughout the Pacific Coast that closely retain the original Spanish melodic and lyrical form, though most exist with more than one variation. *Romances* in Nicaragua roughly adhere to the standard form of four octosyllabic lines per stanza and range from four to 12 stanzas in length. The Nicaraguan *corrido*, sometimes referred to as the *corrido nacional*, developed following the basic form as the Spanish *romance*. Both *romances* and *corridos* are frequently identified by other names, such as *versos*, *historias*, *coplas* and *canciones*. All types of *romances* and *corridos* are overwhelmingly in a major key, with a small melodic range and typical descending melodic ending leading to the tonic. A number of *corridos* can be dated to the first half of the 19th century. Some of the best-known *corridos* stem from the military and political struggle of Augusto C. Sandino in the northern regions (1928–33). *Corridos* about Sandino survived the repression of successive Somoza family-controlled governments and a few regained national prominence with the triumph of the Sandinista Revolution in 1979. In these songs, the impact of the Mexican revolutionary *corrido* is clearly evident in both lyric content and musical material, including several borrowed melodies.

(ii) Southern region. Small vertical flutes and double-headed drums, sometimes played by one musician in pipe and tabor fashion, accompany many of the dances performed at annual patron saint's day celebrations. Although this drum and flute instrumentation may originate from similar Spanish folk traditions, the musical content at this time is clearly of local origin.

In the low-lying coastal plains on the Pacific Coast, the *sones* (song forms) of the traditional repertory of the *marimba de arco* (marimba with a bowed wooden arc) accompany the most widespread folkdance. The diatonic, 22-keyed *marimba de arco* is the most distinctive instrument in the lowland region and the only one of African origin. It is always played solo. The musician sits within the arc and the frame rests on his knees. He is flanked with a metal-stringed guitar and smaller four-string *guitarrilla* to form the common trio instrumentation. Pieces considered *música folklórica*, i.e. the repertory for accompanying the traditional dance, are marked by major tonality and either *ABAB* or *ABABA* structure. The rhythmic feel of the ensemble often clouds the distinction between 6/8 metre and 3/4. In Nicaragua, unlike other Central American countries, *cumbias* and other popular dance forms are also performed by *marimba de arco* trios for entertainment.

European brass and wind instruments used in military bands gradually became adopted by larger sectors of the population, eventually forming the contemporary *bandas de chichero* that are omnipresent in the lowland Pacific Coast zone. During rodeos and religious festival processions, *bandas de chicheros* perform *sones de toro*, or *cacho*, dance and bullfight songs whose origin may vary from folksongs of anonymous authorship to military marches or adaptations of popular songs.

Cantos a la Purísima, *alabanza* praise-songs to the Virgin, are sung from door to door during the Christmas season. Most *sones de pascua*, or villancicos, began as written compositions for *bandas*, though many are now passed on in oral tradition.

Any direct connection these traditional musics may have had with Spanish forms, e.g. the derivation of *sones de toro* from Spanish bullfight music, has disappeared as a distinctive national musical style and repertory have developed. Nicaraguan versions of Mexican *mariachis* and *trios* date from their arrival via records and films in the 1930s and remain popular.

(iii) Popular music. Throughout the Pacific Coast the *canción ranchera* (folk and popular song genre) and other central and northern Mexican forms have become deeply rooted. The *son nica* (from *nicaragüense*), popular since the 1940s, was deliberately created as a Nicaraguan antidote to continued Mexican musical influence. Important performing composers in this style include Camilo Zapata (*b* 1917), credited as the originator of the *son nica*, Víctor Manuel Leiva (*b* 1925), Jorge Isaac Carvallo (*b* 1927) and Otto de la Rocha (*b* 1936). The rise in importance of Latin American New Song in Central America, sometimes dubbed *volcanto* (from combining *volcán*, volcano, and *canto*, song), has paralleled the nation's political upheavals beginning in the mid-1970s. Carvallo's 'Campesino' was the first recorded protest song (1964), but Carlos Mejía Godoy (*b* 1943) first established political song as an important genre. The musical style of his younger brother, Luis Enrique Mejía Godoy (*b* 1945), typifies that of other younger *volcanto* musicians in his use of electric instrumentation and eclectic array of continental musical influences.

T.M. SCRUGGS

Niccolini, Giuseppe. *See* NICOLINI, GIUSEPPE.

Niccolò da Perugia [Nicolaus de Perugia, Magister Sere Nicholaus Prepositi de Perugia, Niccolò del Proposto, Ser Nicholo del Proposto] (*fl* Florence, 2nd half of the 14th century). Italian composer. The only firm biographical information is a note referring to him in 1362 as a visitor, together with Ser Gherardello, to the Florentine monastery of Santa Trìnita. The fact that Niccolò set to music several texts by Sacchetti suggests that some of his works must have been composed in Florence between 1354 and 1373. Whether he is identifiable with the Ser Niccolò who was a singer of *laude* in Florence in 1393 is uncertain (see D'Accone, 1969, and Wilson, 1997). To judge from his name, Niccolò came from Perugia where his father was provost (for an identification, see Di Bacco, 1991). He may well have been acquainted with his contemporary Bartolino da Padova, for they both set the madrigal *La fiera testa* to music. Despite the allusion in the text of this work to the coat of arms of the Visconti family (i.e. the viper: 'La fiera testa che d'uman si ciba'), and the quotation of their motto in the last line ('soffrir m'estoit'), the text is probably directed against the Visconti; the piece may have been composed in Perugia during the period of the hostilities between Florence and Milan between 1397 and 1400. It has been suggested, on somewhat tentative grounds, that Niccolò had a son who was the composer of the ballata *Donna, posso io sperare*; its musical style and metrical features are certainly very different from the other ballatas, and the manuscript bears the inscription 'Ser Niccholay prepositi'. Apart from texts by Sacchetti, Niccolo set poems by Soldanieri and Stefano di Cino.

Miniature thought to portray Niccolò da Perugia: detail of initial from the Squarcialupi Codex (I-Fl Med.Pal.87, f.81v)

The composer's surviving works are all to be found in Tuscan manuscripts: 36 pieces, of which 23 *unica*, in the Squarcialupi Codex (*I-Fl* 87; see illustration); 13, with four *unica*, in *GB-Lbl* Add.29987; six in *F-Pn* it.568; one in *I-Fn* 26; two, of which one *unicum*, in *I-La* 184. His name was mentioned by Sacchetti in connection with further works – two madrigals and three ballatas – whose music is now lost. Some pieces were referred to by Prudenzani, and some exist (presumably through textual adaption) as *laude* – both indications of their popularity; several of the texts of his ballatas have also come down to us in manuscripts of poetry. The madrigals and cacce, which are with one exception all two-voice, were directly influenced by the works of Giovanni da Cascia and particularly Jacopo da Bologna. Part-crossing does not occur at all in the madrigals, and isolated examples of imitation are confined mainly to the ritornellos, where a change of mensuration is usually involved. The untexted monophonic link passages that occur between the lines of the madrigal text reveal Jacopo's influence in particular. A peculiarity of Niccolò's style is the provision of different music for two madrigal strophes (see *Cogliendo per un prato*, *O giustitia*, *O sommo specchio*, *Virtù, loco non ci*). In the single three-voice madrigal, there is constant shifting of text between the three parts – a direct contrast to the almost completely simultaneous articulation of syllables in the two-voice pieces. With the exception of *Io vegio in gran dolo*, *I' son tuo, donna* and *Molto mi piace*, in the two-voice ballatas both voices are supplied with text. The shorter or longer melismas frequently encountered on the first or penultimate syllable of a line are presumably an indication of madrigal influence. *Dio mi*

guardi is an exception to this; it is almost totally syllabic and very similar to a *lauda*.

The 'minime' and 'piccole' ballatas (ballatas with a one-line *ripresa*; described by Antonio da Tempo, 1332, and by Gidino da Sommacampagna 1381–4), should be regarded as a speciality of Niccolò. These pieces are short, aphoristic and often with a moralizing content. *Donna, posso io sperare* is set out in dialogue form; *Chiamo, non m'è risposto* also contains elements of dialogue, and *I' son tuo, donna* is a dialogue from a textual (but not a musical) point of view. The tenor of *Il megli'è pur tacere* is possibly a folksong-like *cantus prius factus*. The simple setting of these short ballate and dialogues is evidence of the Florentine 'gusto borghese' (Li Gotti) which found particular expression in the work of Niccolò and of Andreas de Florentia.

WORKS

Editions: *Der Squarcialupi-Codex Pal.87 der Biblioteca Medicea Laurenziana zu Florenz*, ed. J. Wolf (Lippstadt, 1955) [W]
Italian Secular Music, ed. W.T. Marrocco, PMFC, viii (1972) [M]

BALLATAS

Benché partir da te, 2vv, W 146, M 101 (?Debenedetti, no.35; lauda contrafactum: 'Benedetto colui')
Ben di fortuna (N. Soldanieri), 2vv, W 139, M 103
Chiamo, non m'è risposto, 2vv, W 120, M 105
Chi 'l ben sofrir (F. Sacchetti), 2vv, W 138, M 106
Ciascun faccia per sé (Soldanieri or A. Pucci), 2vv, W 141, M 107
Dè, come ben mi sta, 2vv, W 146, M 126 (text inc.)
Dio mi guardi, 2vv, W 136, M 127 (text similar to a lauda; lauda contrafactum: 'Signor, merzé ti chieggio')
Donna, posso io sperare, 2vv, M 128 (dialogue ballata)
Egli è mal far, 2vv, W 121, M 130
Il megli'è pur tacere, 2vv, W 120, M 131
Io vegio in gran dolo, 2vv, M 132 (text inc.)
I' son tuo, donna, 2vv, M 136 (text, but not music, in dialogue form)
La donna mia, 2vv, W 149, M 139 (Debenedetti, no.48)
Mentre che 'l vago viso, 2vv, W 138, M 145
Molto mi piace, 2vv, W 125, M 147 (?Debenedetti, no.34)
Non più dirò, 2vv, M 153
Non si conosce 'l bene, 2vv, W 129, M 154 (text inc.)
Non so che di me fia, 1v, W 133, M 155
Sempre con umiltà, 2vv, W 140, M 183 (text inc.; perhaps experimental)
Stato nessun ferm'à, 2vv, W 140, M 191
Tal sotto l'acqua, 2vv, W 133, M 194 (reading in *I-La* 184 very different from that in *I-Fl* 87)

MADRIGALS

Cogliendo per un prato, 2vv, W 148, M 109 (2nd stanza has new music)
Come la gru (Sacchetti), 2vv, W 144, M 112
Come selvagia fera (Sacchetti), 2vv, W 141, M 114
I' son c'a seguitar, 2vv, W 155, M 133
It'a veder ciascun, 2vv, W 145, M 137
Nel meço già del mar (Sacchetti), 2vv, W 119, M 148 (lauda contrafactum: 'Nel meço a due ladron')
Non dispregiar virtù (Stefano di Cino), 2vv, W 134, M 151
O giustitia regina (?Boccaccio), 2vv, W 128, M 156 (2nd stanza has new music)
O sommo specchio, 3vv, W 150, M 159 (2nd stanza has new music)
Povero pellegrin (Sacchetti), 2vv, W 127, M 172 (?Debenedetti, no.25)
Qual perseguita, 2vv, W 125, M 174 (Senhal: 'Isabella')
Quando gli raggi, 2vv, W 137, M 177
Rott'è la vela, 2vv, W 135, M 179
Tal mi fa guerra (?Soldanieri), 2vv, W 142, M 192
Vidi com'a [A]mor, 2vv, W 147, M 196
Virtù, loco non ci à (Soldanieri), 2vv, W 154, M 198 (2nd stanza has new music)

CACCE

Da poi che 'l sole, 3vv, W 121, M 117
La fiera testa, 3vv, W 152, M 141 (?Petrarch; metrically, a madrigal; Italian-Latin-French text)
Passando con pensier (Sacchetti), 3vv, W 129, M 165
State su, donne (Sacchetti), 3vv, M 184

LOST WORKS
all cited by Sacchetti

Ballatas: Chi vide più bel nero; Di diavol vecchia; Lasso, s'io fu' già preso
Madrigals: Corendo giù del monte; Una angelletta

KURT VON FISCHER/GIANLUCA D'AGOSTINO

Niccolò Patavino [Niccolò da Padova, Nicolaus de Albis] (*d* 1516). Paduan composer and priest. He spent much of his career with Lucrezia Borgia, daughter of Pope Alexander VI. He was apparently already in her services in Rome during the very late 15th century, for he and a companion accompanied her from that city to Ferrara for her wedding in January 1502 to Alfonso I d'Este, oldest son of Duke Ercole I d'Este. 'Niccolò da Padova, cantore', with an annual salary of 96 lire, remained with Lucrezia until at least 1511, when he was included in a list of benefices as 'Messer Nicolò, cantore de la duchessa'. He appears to have left her services just after this: in April 1512 Lucrezia, apparently ignorant of his whereabouts, asked Francesco Gonzaga of Mantua to aid 'Niccolo cantor'. Like other Ferrarese musicians who departed the city during this period, he must have journeyed to Rome to join the services of the new music-loving Pope, Leo X. He is probably identical with the 'Nicolaus de Albis' (called 'clericus Paduanus') who entered the private chapel of Leo in 1513. He died in May 1516.

Niccolò is the author of 17 frottole, all of which first appeared in Petrucci's second through sixth frottola books (RISM 1505[3], 1505[4], 1505[5], 1505[6] and 1506[3]). They represent works heard and sung by the Borgia duchess. He is also assuredly the 'Don Niccolò' who contributed two or three works to Petrucci's *Laude, libro secondo* (1508[3]); both *Ben serà crudel e ingrato* and *Salve, croce, unica spene* were written for Good Friday. Both are also corporate prayers, adopting the plural rather than the singular voice and were probably intended for one of the elaborate processions held in Ferrara during Holy Week. The third lauda, *Senza te, madre Maria*, is printed twice in Petrucci's book, once with this text and ascribed to 'D. Niccolò' and once with the text *Vengo a te, madre Maria* and ascribed to 'Jacobus Folianus Mutinensis'.

WILLIAM F. PRIZER

Niccolò Piffaro. Name of either one or two Italian composers of the early 16th century. Niccolò Piffaro Senese can be identified as Maestro Niccolò di Cristoforo di Brandino (*b* 1480; *d* ?1566), a Sienese composer, shawm player and leader of the wind band at Siena's Palazzo Pubblico. He was the son of Maestro Cristoforo di Brandino, from Lombardy, who had settled in Siena by the early 1470s and played the shawm in the Palace band from 1472 to 1495. Niccolò himself enjoyed a long service there, from 1510 to 1565. He is the author of eight works in Sambonetto's *Canzonetti sonetti strambotti e frottole libro primo* (RISM 1515[2]), ascribed to 'Nic[colò] Pif[faro] S[enese]' or some variation of this. They are squarely in the style of the north-Italian frottola, though the texts appear to be local products.

An otherwise unknown composer and shawm player, Niccolò Piffaro, probably from northern Italy, is the author of ten works in Petrucci's sixth through to eighth books of frottole (1506[3], 1507[3], 1507[4]). D'Accone (1991) argued convincingly against the identification of this man with the Sienese Niccolò on the grounds that the latter's career was centred exclusively in his native city, far removed from the vast majority of Petrucci's composers. Furthermore, the one work of Niccolò Piffaro in the Sienese print (1515[2]), *Se'l t'è cara*, appears there anonymously and as a *contrafactum* (*Con dolor vivo*); it is attributed to him only in Petrucci's sixth book of frottolas. Finally, three of this Niccolo's *barzellette* include refrains that cite popular tunes, a characteristic practice in the Veneto and Lombardy, but not seen in Tuscany. It is possible that he was a Mantuan musician, since he is described in Filippo Oriolo's *Monte Parnasso* (*c*1520) as playing with the Mantuan shawm players Bernardino Piffaro and Giovanni Mantovano Piffaro. Luisi conflated the two men. Gallico (1961) conflated the northern Niccolò Piffaro with a third figure, Niccolò Patavino.

WILLIAM F. PRIZER

Nice (It. Nizza). City in the south of France. At the crossroads of French and Italian cultures, Nice has belonged successively to Provence, Savoy (1388), France (1705), Austro-Sardinia (1706), France (1793), Piedmont (1814) and finally France (1860).

In the 18th century, the city's musical life revolved around the Teatro Maccarani and the Baroque churches, several of which still contain organs made by the Grinda brothers, renowned local organ builders. In the 19th century Nice became famous for its Russian, English and Belgian visitors, and attracted many composers, including Berlioz, Meyerbeer, who composed *L'Africaine* there, Wagner, Paganini and Halévy, both of whom died in Nice. Composers who have worked in Nice in the 20th century include Massenet, Fauré, Albéniz and Stravinsky, who between 1925 and 1930 composed *Oedipus rex*, the Symphony of Psalms and *Apollon musagète* in Nice. The film composer Maurice Jaubert was born in the city in 1900.

Aristocratic music salons flourished in Nice in the 19th and early 20th centuries. Baron von Derwies organized the French première of Glinka's *A Life for the Tsar* in his château, and the Vicomtesse Vigier (who as Sophie Cruvelli had sung Hélène in the first performance of Verdi's *Les vêpres siciliennes*) organized the French première of *Lohengrin* in her Cercle de la Méditerranée (1881). By the 1870s Nice had several theatres, including the Théâtre Français, where Offenbach conducted, the Théâtre Italien, where the French première of *La forza del destino* was given in 1873, and by the 1880s the Casino de la Jetée-Promenade and the Casino Municipal, where Verdi's *Otello* received its French première in 1891 and Falla's *La vide breve* its world première in 1913.

The only theatre which still survives is the Opéra, inaugurated in 1885 as the Théâtre Municipal. It has staged the world premières of many works by minor

composers as well as the first French performances of *La Gioconda* (1886), Berlioz's *La prise de Troie* (1890), *Yevgeny Onegin* (1895), Leoncavallo's *La bohème* (1899), *Das Rheingold* (1902), *Manon Lescaut* (1906), Shostakovich's *Katerina Izmaylova* (1964), Henze's *Elegy for Young Lovers* (1965), Janáček's *From the House of the Dead* (1966) and Milhaud's *David* (1968). A new opera auditorium, the Acropolis, was opened in 1985. It has a seating capacity of 2500 and one of the largest stages in Europe (1200 m²). The Opéra now mounts two to four of its productions here each year.

Until 1970, when it was disbanded, the orchestra of the Nice station of Radiodiffusion Française gave a number of premières of contemporary French music. The city now supports a symphony orchestra (the Orchestre Philharmonique de Nice), chamber orchestras, a baroque ensemble and a renowned centre for electro-acoustic research, the Centre International de Recherche Musicale, which organizes the Festival des Musiques Actuelles. The Nice Conservatoire is one of the best in France. Since 1960 the Académie International d'Eté has drawn music students from all over the world. The city's musical prestige is further enhanced by a summer chamber music festival and the Nice Jazz Festival, founded in 1948. (*OG*; C. Pitt)

ANDRÉ PEYRÈGNE

Niceta of Remesiana (*b* Dacia, early 4th century; *d* Remesiana [now Bela Palanka, Serbia], after 414). Bishop and ecclesiastical writer. Virtually all that is known of Niceta comes from a letter and two laudatory poems of his friend Paulinus of Nola (*d* 435). He was born during the second quarter of the 4th century and in about 371 was appointed bishop of Remesiana, where he spent the remainder of his life except for a number of brief visits to Italy. The last contemporary reference to him comes from a letter of Pope Innocent I written in 414. All Niceta's surviving works were falsely attributed to various authors until restored to him in the 1905 edition of A.E. Burn.

Among the works are a pair of sermons of great importance for our understanding of early Christian music: *De vigiliis* and the variously named *De utilitate hymnorum* or *De bono psalmodiae*. Before Burn's edition they were transmitted in a grossly defective version and attributed to the 6th-century Nicetius of Trier. (The second of the two appeared thus in *GerbertS*, i, 9–14.) *De vigiliis* defends the type of vigil that became popular in the second half of the 4th century, first in the Eastern Christian centres and subsequently in the West. The vigil, held in the early morning hours before the Saturday and Sunday celebration of the Eucharist, was characterized by the prolonged singing of psalms interspersed with prayers.

At the close of *De vigiliis* Niceta promised a sermon devoted exclusively to the psalmody of the vigils; the result is a remarkable document that warmly endorses ecclesiastical song and summarizes the entire orthodox position on the subject. Niceta first defends singing aloud in church against those who thought it appropriate only 'to make melody in their heart'; he continues with a history of sacred song illustrated by quotations from the Old and New Testaments and closes with a unique passage that describes in some detail the manner in which edifying congregational singing is to be conducted.

Morin and Burn (1926) attributed the composition of the *Te Deum* to Niceta, but appear to have done so merely on the grounds of his obvious interest in ecclesiastical song.

JAMES W. McKINNON

Nichelmann, Christoph (*b* Treuenbrietzen, 13 Aug 1717; *d* Berlin, 1761–2). German composer. After studying music in his native town, Nichelmann entered the Leipzig Thomasschule in 1730, coming under the supervision of J.S. Bach. He studied the keyboard and composition with W.F. Bach, but left for Hamburg in 1733 to pursue his interest in opera. There he studied the French and Italian styles as well as general theatrical technique with the leading musical figures, Keiser, G.P. Telemann and Mattheson. For several years Nichelmann alternated periods of study with periods of employment as private musician and secretary to various noble families. In 1739 he moved to Berlin to pursue a musical career. Since the accession of Frederick the Great, Berlin had become an active musical centre which attracted some of the best-known musicians of the time, and Nichelmann continued his study with Quantz, the king's flute instructor, and with the Kapellmeister C.H. Graun. His first printed keyboard sonatas were completed during this period, and in 1745 he joined C.P.E. Bach as one of two harpsichordists in the royal establishment.

In keeping with the general tenor of literary activity in Berlin, and in response to the controversy over the merits of the French and Italian styles, Nichelmann brought out in 1755 an extended treatise which attracted much attention, *Die Melodie, nach ihrem Wesen sowohl, als nach ihren Eigenschaften*. The work is unusual in that it focusses throughout on melody, yet much of the substance derives from the earlier writings of J.-P. Rameau. A pseudonymous Caspar Dünkelfeind severely criticized it in *Gedanken eines Liebhabers der Tonkunst* (Nordhausen, 1755), and Nichelmann continued the discussion in *Die Vortrefflichkeit der Gedanken des Herrn Caspar Dünkelfeindes über die Abhandlung von der Melodie*. Nichelmann's departure from court in 1756 has been attributed to this literary exchange, but Marpurg wrote that he requested and was granted his release from the king's service. Nichelmann wrote most of his smaller keyboard pieces and songs during his remaining years in Berlin, years made difficult by the upheavals of the Seven Years War.

The earliest date on any Nichelmann manuscript is 1737, the latest 1759, outlining a period when musical styles were changing rapidly and one in which Berlin emerged as an important musical centre. The relative significance of the Berlin school derives from several factors, including the literature on music originating there and the continued development of the keyboard concerto following its inception by J.S. Bach. Nichelmann participated in both activities, but his main contribution lay in

the realm of the keyboard concerto, which was still a relatively new genre at the time, one which reflected many of the changes in musical style which have come to be associated with the Enlightenment. His works in this medium present the keyboard as a solo instrument with an established technique capable of a wide variety of musical effects. The emphasis on phrase structure and slower harmonic rhythm, the idiomatic conception for the solo instrument and the trend towards a condensed reprise of materials are features of Nichelmann's concertos which became basic to much instrumental music later in the 18th century. The sonatas and miscellaneous keyboard pieces have appeared in many editions and are the works by which he is best known. Although probably conceived for dilettantes (see the title to his first published sonatas), the sonatas require a well-developed technique and their keyboard writing is thoroughly idiomatic. They are in three movements (fast–slow–fast), using binary dance structure, with the outer movements carrying most weight. The miscellaneous pieces are miniatures intended for a society which valued such pieces; among them are works of genuine vitality, such as the Fantasia in E♭.

Among the vocal works, the serenata *Il sogno di Scipione* enjoyed some popularity in the 18th century; only the opening sinfonia has appeared in a modern edition. A cantata and a requiem stand as isolated examples in Nichelmann's catalogue, and his 22 lieder should be noted as early examples of the genre.

WORKS

DOUGLAS A. LEE

Nichifor, Şerban (*b* Bucharest, 25 Aug 1954). Romanian composer. After studying the cello with Serafim Antropov at the Bucharest Academy, graduating in 1972, he took private composition lessons with Stroe and Walter Mihai Kleper. Nichifor continued his composition studies in Darmstadt and Breukelen with Ton de Leeuw (1978, 1980) and in Munich with Celibidache. Musical secretary of the George Enescu Philharmonic, he has also taught in the chamber music class at the Bucharest Academy, where he took the doctorate in music (1995) and in theology (1996). Developing from a neo-romantic stylistic basis, Nichifor has remained firmly convinced of the continuing relevance of conventionally composed music. He has experimented with new techniques of sound organization and structure, notably in his opera *Domnişoara Cristina*, which includes tape recordings. His eclectic compositonal language extends to jazz elements in his Third and Fourth Symphonies. In his compositions after 1990 he has developed a simplified style employing themes reminiscent of Byzantine chant. Further information is given in G. Tartler: *Melopoetica* (Bucharest, 1984).

WORKS
(*selective list*)

Op: Domnişoara Cristina [Miss Cristina] (2, after M. Eliade), 1980–81, Timişoara, Opera Română, May 1996
Vocal-orch: Izvoare 2050 [Wellsprings], chorus, orch, 1978; Gloria Heroum Holocausti, 1979; Oratoriu de Crăciun [Christmas Orat.], 1979; Messa da requiem, 1990
Orch: Constelaţii, 1977; Sym. no.1, orch, tape, 1980; Sym. no.2 'Via lucis', 1983–5; Sym. no.3 'Ecouri şi vise din Est-America' [Echoes and Visions from Eastern America], 1985–6; Sym. no.4, 1986–7;

Sym. no.5 'Pro patria', chorus, orch, 1987; Sym. no.6 'Arcuri în timp' [Arc in Time], 1988

Chbr and solo inst: Baroque Variations, hpd, 1974; Sonata, 2 vc, 1975; Anamorfose, str qt, 1976; Retro-Qnt, cl, tpt, trbn, prep pf, perc, 1976; Chimoero, sax, vib, 1984; Sonata Rag-Time, fl, b rec, 1984; Challenger, lament, ens, 1986; 7 colinde [7 Carols], 4 tpt, 4 trbn, tuba, org, 1986; Str Qt no.2 'Văile uitării' [The Valleys of Forgetting], 1988; Sonata 'sopra aqua e pictra', pf, 1988; Anastasis, sextet, 1989; Poem bizantin, 1989; Mezoomkion, a Byzantine Poem, 1990

Songs: 4 schiţe pentru un lied neterminat [4 Sketches for an Unfinished Lied] (M. Dinescu), 1980; Pisicile din Vatican [The Vatican Cats] (Dinescu), 1985–6; Aurora borealis (E. Saideler), 1992

OCTAVIAN COSMA

Nicholas de Merques. *See* MERQUES, NICOLAS.

Nicholl, Horace (Wadham) (*b* Tipton, nr Birmingham, 17 March 1848; *d* New York, 10 March 1922). English organist and composer. A descendant of the founder of Wadham College, Oxford, Nicholl was taught music by his father and Samuel Prince. He was organist at Dudley near Birmingham (1867–70) and at Stoke-on-Trent (1868–70); while there he was persuaded to go to Pittsburgh, where he became organist of St Paul's Cathedral, and afterwards at a Presbyterian church. He lived in New York from 1878 onwards and was organist at several churches in Manhattan and Brooklyn. Nicholl was an editor for the firms of Schuberth and Schirmer and also wrote for the *Musical Courier*. He remained in the USA except for visits to London and Berlin in 1900 and 1901.

As a composer Nicholl united great contrapuntal skill with a contemporary taste; his organ pieces include 12 symphonic preludes and fugues, a symphonic poem called *Life* in six movements and a *Symphonische Fantasie über Psalm 130*. Among his vocal works are the first four of a projected cycle of 12 oratorios, *Adam*, *Abraham*, *Isaac* and *Jacob* (1880–90), all in manuscript; a setting of Longfellow's *The Golden Legend*; a *Cloister Scene* for chorus and orchestra (op.6) and a Mass in E♭ major, which were published. His orchestral works are reflective of the harmonic styles of Wagner and Liszt and anticipate Richard Strauss in their virtuoso orchestration. They include a Suite op.3; Symphonic Fantasies opp.5 and 7; a Symphony in G minor, *The Nation's Mourning*, op.8; another in C major, op.12; symphonic poems, *Tartarus* op.11 and *Hamlet* (after Shakespeare) op.14, and a Scherzo-Fugue for small orchestra op.15. Besides these he wrote numerous piano pieces, songs, anthems, and some chamber music and textbooks. (*GroveA* (D. Kelleher))

J.A. FULLER MAITLAND/CHRISTOPHER KENT

Nicholls, Agnes (*b* Cheltenham, 14 July 1877; *d* London, 21 Sept 1959). English soprano. In 1894 she won a scholarship to the RCM, London, where she studied with Albert Visetti, and a year later played Purcell's Dido at the Lyceum Theatre. While still a student, she took part in three performances given privately before Queen Victoria, and also sang Anne Page in the first English-language production of *Falstaff*. Her Covent Garden début (1901) was as the Dew Fairy in *Hänsel und Gretel*; in the 1904–6 seasons she sang with distinction in the great international casts assembled for *Don Giovanni* and *Carmen*. In 1906 she also appeared as Venus, thus marking the start of a notable series of Wagner roles, including Sieglinde and the *Siegfried* Brünnhilde in the first English-language *Ring* productions under Richter in 1908. She continued to sing at Covent Garden until 1924, and was also a principal of the British National Opera Company, of which she became a director. Throughout her career Nicholls was a leading soloist at music festivals, in concert and oratorio. At the 1906 Birmingham Festival she sang in the first performance of Elgar's *The Kingdom*; several British composers wrote for her, including Parry and Hamilton Harty (whom she had married in 1904). Though she rarely appeared outside Britain, she undertook a North American concert tour in 1904, singing at the Cincinnati Festival. Her recordings, few and mostly scarce, enable one to appreciate the purity of tone and soundness of technique, and to sense the considerable power of her voice. (P. Lewis: 'Agnes Nicholls: Columbia Records and 78 rpm Discography', *Record Collector*, xxx (1985), 275–8)

J.B. STEANE

Nicholls, Horatio. *See* WRIGHT, LAWRENCE.

Nicholls, John (*b c*1627; bur. Durham, 6 June 1681). English cathedral musician. He was a lay clerk of Durham Cathedral from the Restoration until his death. In September 1665 he and John Foster tuned the organ in the bishop's private chapel at Bishop Auckland. In July 1677 he was appointed master of the 'petty' school on Palace Green, and put a deputy in this position when he was appointed Master of the Choristers (but not organist) in 1677. He was described by Bishop Cosin as 'a diligent, painfull man'. His full setting of *O pray for the peace of Jerusalem* (*GB-DRc*, *Lbl*) may have been composed before 1660, his verse anthem, *I will give thanks unto thee, O Lord* and Short Service (both *GB-DRc* and incomplete), after 1677. All three compositions are included on Durham's oldest service sheet, that for June 1680.

Nichols, Red [Ernest Loring] (*b* Ogden, UT, 8 May 1905; *d* Las Vegas, NV, 28 June 1965). American jazz cornettist and bandleader. He studied the cornet with his father, a college music teacher, and acquired a sure technique. In 1923 he moved to New York, where he soon became a highly regarded sideman and the most prolifically recorded white jazz bandleader of the late 1920s; for the Brunswick label he recorded under the name Red Nichols and his Five Pennies. From 1925 he also played in Broadway pit orchestras, and in 1929–31 he led the orchestras for Gershwin's musicals *Strike Up the Band* and *Girl Crazy*. In the mid-1930s he worked for CBS

radio and in the late 1930s he led a big band, but in 1944 he returned to small-group jazz. In 1959 Nichols played for the soundtrack of *The Five Pennies*, a film based loosely on his life, as a result regaining much of his earlier popularity. He toured the Near East in 1960 and Europe in 1964.

Nichols's playing has often been compared with that of Bix Beiderbecke, with whom he shared a strong attack and clear tone, though his style was more rhythmically incisive, angular and polished, and of a narrower emotional range. His many recordings of 1926–8 (for example, *That's no bargain*, 1926, Bruns.) are the most progressive white jazz of the period in concept and execution, with wide-ranging harmonies and balanced ensemble; at this time his groups included such important musicians as Joe Venuti, Eddie Lang, Vic Berton, Jimmy Dorsey, Adrian Rollini, Fud Livingston, Pee Wee Russell and Miff Mole; later bands featured Benny Goodman, Jack Teagarden, Glenn Miller and Artie Shaw at formative stages of their careers. However, the innovative style of these groups was almost entirely superseded by the swing style of the 1930s, to which Nichols turned as a bandleader and occasionally as a performer. His later small groups attempted to recapture the sound of his performances from the 1920s.

JAMES DAPOGNY/R

Nichols, Roger (David Edward) (*b* Ely, 6 April 1939). English musicologist. He read music at Oxford (1959–64, BA 1962), and after teaching music at Bishop's Stortford College (1964–6) and at St Michael's College, Tenbury (1966–73), he was Haywood Research Fellow in music at Birmingham University (1974–6) and a part-time lecturer in music at the Open University (1975–6). He held positions as lecturer in music at the University College of Wales, Aberystwyth, in 1976 and at Birmingham University in 1978; since then he has worked as a freelance writer and broadcaster. His main area of research is French music since 1870 and he has edited a series of critical editions of Ravel's solo piano works as well as piano and chamber works by Satie. He specializes in documenting contemporary accounts of the lives of composers and has translated the letters of Berlioz and Debussy.

Nicholson. English family of organ builders and music retailers. The source of their expertise is not known, but they were related to a family of printers, publishers, machine makers and mechanical innovators of which 18 members are known. Their ascendancy was fuelled by the contemporary growth in church building and restoration, and their surviving work shows great skill and fine choice of materials. Three older members of the family, (1) Richard (i), (2) John (i) and Thomas, almost certainly shared the same (possibly thrice-married) father, Joshua, a joiner and builder.

(1) Richard Nicholson (*b* Warley, nr Halifax, W. Yorks., 2 Jan 1788; *d* Walsall, Staffs., 5 March 1862). Organ builder. In 1816 he was a 'machine maker (woolen)' in Rochdale, Lancashire. He was recorded as an organ builder in 1824 and as a piano maker in the following year. His business flourished: he built an organ for the Rev. Patrick Brontë at Howarth, Yorkshire, in 1834 and he is known to have exported to Melbourne, Australia in 1842. Some of his pipework and casework survives, notably at the Countess of Huntingdon's Chapel (now Huntingdon Hall), Worcester (1840), St John the Baptist's, Fladbury, Worcestershire (1838), and St John's, Smallbridge, near Rochdale (1844). By his first marriage he had nine children, of whom five became organ builders, and by his second, six children, of whom two became organ builders.

In 1861 he moved to Walsall with his youngest son, Charles Henry Nicholson (*b* Rochdale, 1840; *d* ?Walsall, after 1900), where they set up a general retail music business, but also continued to build organs as Nicholson & Son. During the early 1870s Charles Henry, who had worked for the piano firm Kirkman, formed a business partnership with Edmund Lord (*b* Rochdale, *c*1832), who was probably trained by Richard and had moved to Walsall with them. The firm of Nicholson & Lord was highly productive and continued, latterly as an organ tuning concern, until 1952.

Circumstantial evidence suggests that Richard sold the Rochdale business to T.H. Harrison (*see* HARRISON & HARRISON) when he moved to Walsall; there may have been some intermarriage between the two organ-building families. Of Richard's other organ-builder sons, the eldest, (3) John Nicholson (ii), was the most prominent. His second son, James Nicholson (*b* Rochdale, 1819; *d* ?1890), was an organ builder in Newcastle upon Tyne by 1843. He was succeeded in business there by his son, F.C. Nicholson (*b* Milnrow, nr Rochdale, *bap.* 5 Sept 1841). Richard's third son, Joseph Nicholson (*b* Rochdale, 1822–3; *d* Macclesfield, 26 July 1855), was first an apprentice in an iron foundry, but had became an independent organ builder in Macclesfield by the 1850s. He died when a 'splinter broke off' from a wooden pipe and 'penetrated to his brain'. Richard's eldest son (third child) by his second marriage, Thomas Haigh Nicholson (*b* Rochdale, 1835; *d* Southport, 26 May 1910), worked as an organ builder in Lincoln and later in Southport.

(2) John Nicholson (i) (*bap.* Warley, 2 Oct 1791; *d* ?Bradford, 17 April 1851). Organ builder, brother of (1) Richard Nicholson. He worked initially as a joiner, but was building organs in Bradford with his half-brother, Thomas (*b* Warley or Halifax, 17 April 1800; *d* before 1851), probably by 1830 and certainly by 1837; the latter's first two sons, William (*b* Heptonstall, Yorkshire,

*c*1825; *bur.* Rochdale, 4 Dec 1851) and RIchard (ii) (*b* Bradford, 1 Oct 1833), were recorded in Rochdale in 1851, respectively, as a 'metal pipemaker' and organ builder. John's eldest son, Frederick Whitworth Nicholson (*bap* Bradford, 27 June 1830; *d* after 1906), succeeded to the business and achieved a considerable reputation as an organ builder in Bradford and Huddersfield. He was probably assisted by his youngest brother, James (*b* ?1838).

(3) **John Nicholson** (ii) (*b* Rochdale, 15 Jan 1815; *d* Worcester, 28 Sept 1895). Organ builder, eldest son of (1) Richard Nicholson. He was the best-known member of the organ-building dynasty and produced the most distinguished work. Like his brothers, he almost certainly trained with his father and may have acquired specialized skills as a metal pipe maker. He was listed as having an independent business in Rochdale in 1837, and he moved to Worcester in 1841. Early commissions were possibly aided by his family's Baptist connections in Gloucestershire and Worcestershire. He was almost ruined by a disastrous fire in 1845, but subsequently the business flourished in Palace Yard, close to the Cathedral. An early instrument survives in St Mary and St Nicholas's, Chetwode, Buckinghamshire (1842). His first large organ was for the Shire Hall, Gloucester (1849). In 1854 he built an outstanding and innovatory concert organ for the Music Hall, Worcester, which attracted much attention, but was destroyed by a 'storm' five or six years later. The organ in St Michael and All Angels, Great Witley, Worcestershire (1857) remains in substantially original condition and indicates continental influences. Another outstanding example survives, complete with the original pneumatic-lever action, in All Saints, Shrewsbury (*c*1880). He enjoyed the patronage of F.A.G. Ouseley, and built a controversial organ, designed by Ouseley, for Manchester Cathedral (1861), of which the pipework has been reused in an otherwise new instrument in Portsmouth Cathedral (1994). His firm produced over 300 instruments which were distributed throughout central England, with examples in Wales, Scotland, Australia, the Channel Islands and France. His organs resembled in character those of William Hill. His work was of the highest quality; in 1944 Cecil Clutton noted that the firm 'did as much as anyone to establish the great Victorian school ... the few remaining untouched instruments show that the voicing was of the best'. His only son, Joseph Wrigley Nicholson (*b* Rochdale, 1839; *d* Southport, 11 March 1873) trained as an organ builder. He and his contemporary T.H. Harrison worked for John (ii) in the West Country.

John Nicholson (ii) retired in 1886. His substantial fortune (he left almost £44,000) may have owed more to money-lending and property speculation than to his original craft. On his retirement control of the business passed to William Haynes, then organist of Malvern Priory, and the firm became known as Nicholson & Co. Following several changes in ownership, it was acquired by J.W. Walker & Company in 1931, but returned to private ownership in 1951 and moved to Malvern shortly afterwards, where it continues to operate, exporting many instruments.

JAMES BERROW

Nicholson, Charles (*b* Liverpool, ? bap. 12 Aug 1795; *d* London, 26 March 1837). English flautist. He was taught by his father Charles Nicholson, also a flautist of note, and held in turn most of the chief appointments in London orchestras, including those at the Drury Lane and Covent Garden theatres and, from about 1823, the Opera and the Philharmonic Society; he also appeared as a soloist at provincial festivals and played several of his own flute compositions at the Philharmonic. On the opening of the RAM in 1823 he was appointed professor of the flute. Esteemed for his technical brilliance and the nobility of his *adagio* playing, Nicholson was probably the most controversial flautist of his time. His very powerful and somewhat hard tone was not universally admired, though it was regarded as a model in England. His great physical strength enabled him to exploit to the full a flute with unusually large finger-holes and embouchure, originally designed by his father. Commercial royalties on this instrument contributed much to his income. Nicholson's publications include flute concertos, fantasias, duets and some good instruction books.

PHILIP BATE/CHRISTINA BASHFORD

Nicholson, Paul (Shannon) (*b* London, 31 Dec 1952). English harpsichordist, organist and conductor. After studying the organ with John Wellingham and the harpsichord with Roy Truby, he took a music degree at York University in 1974, studying the organ there with Nicholas Danby. He made his début in 1973 at the Harrogate Festival and has subsequently performed with many of the leading early music ensembles and orchestras in Britain. Nicholson has conducted the Orchestra of the Age of Enlightenment, the Parley of Instruments and the Norwegian Chamber Orchestra, and has toured as harpsichordist and organist in Europe and North America. His recordings include solo harpsichord works and the complete organ concertos of Handel, 18th-century English keyboard concertos and the virginal music of Peter Philips. Nicholson is admired as an accomplished and tasteful musician whose interpretations are founded on a broad knowledge of the performing practices of the 17th and 18th centuries.

HOWARD SCHOTT

Nicholson [Nicolson], **Richard** (bap. 26 Sept 1563; *d* Oxford, 1639). English organist and composer. He may be the person of this name who was a chorister at Durham Cathedral from 1576 to 1580 and whose baptism is recorded in the St Oswald's (Durham) parish register for 26 September 1563. He appears to have spent all his

working life in Oxford. On 23 January 1595 he was appointed *Informator choristarum* (and probably also organist) at Magdalen College, a position which he held until the year of his death. He took the Oxford BMus degree in 1596. In 1626 he became the first master of the Music Praxis under William Heyther's foundation (the position was subsequently incorporated into that of professor of music). He held this university position until his death.

Nicholson's extant compositions, although few in number, embrace many of the most important genres of the period. His finest work is *When Jesus sat at meat*, an extended consort anthem with viol accompaniment for the feast of St Mary Magdalene. Like his full anthem *O pray for the peace of Jerusalem* it is preserved in an important set of partbooks which form part of the original Music School collection of music books donated by Heyther in 1626. Another consort anthem with viol parts, *O Lord, consider my distress*, survives in the Music School manuscripts. In one partbook (*GB-Ob* Arch. f.e.24) it is attributed to 'R N', a fact which has led some writers to regard it as the work of Nicholson, but it is possible that it was merely copied by him and that the composer was the Durham Cathedral organist Edward Smith (*d* 1612), to whom the anthem is ascribed in the Durham Cathedral manuscripts.

Nicholson's music survives in manuscript only, and some works are of uncertain attribution. Four madrigals and two secular consort songs, which are preserved anonymously in one of the major sources of his music (*GB-Lbl* Add.17797), are probably his. Three religious consort songs in the same manuscript are sometimes attributed to him; but these also appear in a set of partbooks copied in the 1580s (*Och* 984–8) and are therefore probably by an older composer. Nicholson's most interesting composition is a madrigal cycle for three voices based on the popular Elizabethan romance of Joan and John. In 11 distinct sections, the cycle treats their courtship, Joan's illness and apparent death, her recovery and their subsequent happiness. Unfortunately only two of the three voice parts of this unusual work have survived (in *CL*, *Lbl*, *Lcm*). There is no musical connection between this madrigal cycle and the consort song with the same title.

Nicholson's compositions, in particular his consort songs, show him to have been a composer with a gift for melody and a technique that can rarely be faulted. Although his music seems to have enjoyed only a limited circulation, the fact that he contributed to Morley's *Triumphes of Oriana* (RISM 1601[16]) suggests that even at that early date he was held in high regard by his contemporaries.

WORKS

Editions: *Consort Songs*, ed. P. Brett, MB, xxii (1967) [contains all the consort songs] [B]
Madrigals, ed. J. Morehen, EM, xxxvii (1976) [contains all the madrigals] [M]

2 anthems: O pray for the peace of Jerusalem, 5vv; When Jesus sat at meat, 5/5vv; *GB-LF*, *Ob*
4 madrigals: Farewell the joys which erst I have conceived, 5vv, M 20; Sing shepherds all, 5vv, M 58; Thou marvaill'st much, 5vv, M 44; What sudden change hath charmed me, 5vv, M 52
1 madrigal cycle: Joan, quoth John, when will it be, M 75
5 consort songs: And hath good grace in her pastance, inc. (quintus only); I am not I of such belief, v, 4 insts; In a merry May morn, v, 4 insts, B 79; Joan, quoth John, when will this be, v, 4 insts, B 80; No more, good herdsman of thy song, v, 4 insts, B 83: *IRL-Dtc*, *GB-Lbl*, *US-CLwr*
2 pavans for 5 viols (l ?inc.); The Jew's Dance, lute, rec (?inc.): *IRL-Dm*, *GB-Cu*, *Lcm*, *Ob*

WORKS OF UNCERTAIN ATTRIBUTION

1 motet, 1 anthem, : Cantate Domino, 5vv; O Lord, consider my distress, 5/5vv: *GB-DRc*, *Lbl*, *Ob*
4 madrigals: And so an end, 5vv, M1; Come, infirmity, this is thy triumph day, 5vv, M 12; Muse not, fair love, 5vv, M 29; Sweet needle, spare my Flora's hands, 5vv, M 38
5 consort songs: Come, Holy Ghost, eternal God, v, 4 insts; O Lord, of whom I do depend, v, 4 insts; O Lord, turn not away thy face, v, 4 insts; Cuckoo, so merrily sings, v, 4 insts, B 78; Sweet, they say such virtue lies in your lips, 2vv, 3 insts, B 84: *Lbl*, *Och*

JOHN MOREHEN

Nicholson, Sir **Sydney (Hugo)** (*b* London, 9 Feb 1875; *d* Ashford, Kent, 30 May 1947). English organist. After leaving Oxford he studied at the RCM and at Frankfurt. For the next 25 years he was successively organist of the Lower Chapel, Eton (1903), acting organist of Carlisle Cathedral (1904), organist of Manchester Cathedral (1908) and of Westminster Abbey (1919). He became acquainted with the need and opportunities to raise the standard of music in parish churches, and with this in mind he left Westminster Abbey in 1928 and founded the School of English Church Music (later the Royal School of Church Music). His purpose was twofold: to establish a teaching centre where courses of instruction to choir-masters, organists and clergy might be held; and to develop an advisory service throughout the country for affiliated choirs. That service was subsequently extended overseas. He received the Lambeth DMus in 1928 and in 1938 he was knighted for his services to church music.

Nicholson edited the 1916 supplement to *Hymns Ancient and Modern* and also the shortened music edition of 1939; he did much of the preliminary work towards the revised edition of 1950. He composed a little church music and some secular stage works including *The Mermaid*, 1928, and *The Children of the Chapel*, 1935.

WATKINS SHAW

Nickel von Hof. *See* DECIUS, NIKOLAUS.

Nico, Dr. *See* KASANDA, NICOLAS and the DEMOCRATIC REPUBLIC OF THE CONGO, §III, 4(ii).

Nicodé, Jean Louis (*b* Jerczik, nr Poznań, 12 Aug 1853; *d* Langebrück, nr Dresden, 5 Oct 1919). German pianist, conductor and composer. He studied in Berlin from 1856

with his father and Hartkäss, entering the Neue Akademie der Tonkunst in 1869 to study the piano with Kullak, harmony with Wüerst and composition with Kiel. From 1875 he taught in Berlin, also establishing the Nicodé Concerts at which he proved himself to be a brilliant and attractive pianist. A concert tour in 1878 through Galicia and Romania with Desirée Artôt further increased his reputation, and he then moved to Dresden as professor at the Royal Conservatory, resigning in 1885 to become director of the Philharmonic Concerts. In 1888 he left to devote himself to composition, reappearing in 1893 as conductor of the Nicodé Concerts. He also directed the Dresden Neustädtischer Chorgesangverein, 1896–1900. In 1919 he became a member of the Berlin Akademie der Künste.

Nicodé was a pianist of warmth and artistic power, and as a conductor he showed an artistic insight that led him to give interpretations full of humanity. His most important compositions include *Das Meer*, a kind of symphonic opera in six movements occupying a whole evening and scored for large orchestra and voices; it makes some use of leitmotif. He also made an impression with his ambitious symphonic ode *Gloria!*, which uses vast forces, offstage bands and extra-musical effects (including 12 tuned police whistles).

WORKS
(selective list)

Choral: Das Meer (K. Woermann), sym. ode, solo vv, male vv, orch, org, op.31 (Leipzig and Brussels, 1889); Gloria! ein Sturm- und Sonnenlied, boy's v, SATB, orch, org, op.34 (Leipzig, 1905)
Orch: Maria Stuart, sym. poem, op.4 (Leipzig, 1880); Die Jagd nach dem Glück (Introduction und Scherzo), op.11 (Leipzig, 1878); Romanze, vn, orch, op.14 (Leipzig, 1878); Faschingsbilder, op.24 (Leipzig, 1881); Sym. Variations, op.27 (Leipzig, 1884)
Pf solo: Andenken an Robert Schumann, 6 Phantasiestücke, op.6 (Leipzig, 1876); [13] Aphorismen, op.8 (Berlin and Posen, 1877); Variations and Fugue, op.18 (Leipzig, 1879); Sonata, op.19 (Leipzig, 1880); Ein Liebesleben, 10 poems, op.22 (Leipzig, 1880)
Other works: Vc Sonata no.2, op.25 (Leipzig, 1882); Bilder aus dem Süden, pf 4 hands, op.29 (Leipzig and Brussels, 1886); Dem Andenken am Amarantha, song cycle, op.30 (Leipzig and Brussels, 1886); Erbarmen, hymn, Mez/A, orch, op.33 (Leipzig, n.d.); songs; pieces for pf 4 hands

DUNCAN HUME/JOHN WARRACK

Nicola da Siena [Nicolaus de Senis] (*b* ?Siena; *fl* late 14th century–early 15th). Italian theorist. He was a friar of the Servite order, and was the author of a brief treatise entitled *Regule in discantu*, copied at Verona in the early 15th century, and containing rules for composition in two voices (named tenor and discantus). Four fundamental consonances are recognized; the 5th, octave, 12th and 15th, of which the latter two are reducible to the former two. The treatise has two sections, both provided with musical examples; in the first, Nicola discusses note-against-note discant, and in the second, counterpoint with several notes (minims and semiminims) from the discantus to one in the tenor.

F. ALBERTO GALLO

Nicolai [Nikolai], **David Traugott** (*b* Görlitz, 24 Aug 1733; *d* Görlitz, 20 Dec 1799). German organist and composer. His father David Nicolai (*b* Görlitz, 1702) was a pupil of Bach in Leipzig and organist at the Hauptkirche in Görlitz from 1730. Nicolai studied music under his father, went to the Görlitz Gymnasium and from 1753 to 1755 read law, physics and mathematics at the University of Leipzig. From 1758 he assisted his father and in 1764 succeeded him as organist of the Hauptkirche; in 1775 he became electoral court organist. In his time he was considered 'one of the greatest living organ players' (*GerberL*), and was respected as an improviser as well as an expert in organ building. He constructed several models of a keyboard musical glasses that attracted attention when he demonstrated it in 1784. From 1796 he was assisted as organist by his eldest son, Carl Samuel Traugott Nicolai, who succeeded him. Among Nicolai's few compositions are a *Fantasie und Fuge* for organ (Dresden and Leipzig, 1789), other organ fugues and piano sonatas, mostly published in collections, and cantatas.

GUNTER HEMPEL

Nicolai, (Christoph) Friedrich (*b* Berlin, 18 March 1733; *d* Berlin, 8 Jan 1811). German editor, author and bookseller. In the 1750s he was one of the leaders of the movement opposing the dominance of French literary taste in Germany. He was an advocate of Klopstock's and Wieland's works and was an important figure in the group that included Lessing and Moses Mendelssohn. Though prominent in the German Enlightenment during the 1750s and 1760s, particularly through his *Allgemeine deutsche Bibliothek*, he was sharply critical of the work of Goethe, Herder, Hamann and other representatives of the growing Romantic movement in Germany in the following decades. His displeasure with the early Romantic interest in folksong (in which he saw amateurish and anti-intellectual tendencies) is reflected in the mock-archaic orthography of the title of his satirical collection *Eyn feyner kleyner Almanach* (1777–8). The two volumes of this work contain 61 unaccompanied songs (27 anonymous or folktunes, 22 by J.F. Reichardt and 12 composed or arranged by Nicolai); 50 of the songs were later included in Kretzschmer and Zuccamaglio's *Original-Weisen* (1840) and thereby became a favourite source of 'folk' material for Brahms in his choral folksongs and other works (e.g. the Piano Sonata op.1).

Despite his unsympathetic view of Romanticism, Nicolai's periodicals were enormously influential even after 1800. They included reviews of music and reflected his friendship with such musicians and theorists as Reichardt, F.W. Marpurg and J.F. Agricola. With the first two he sponsored amateur concerts in the 1770s, an activity that identifies him as an advocate of progressive musical styles.

HOWARD SERWER

Nicolai, Johannes. *See* CLAUX, JOHANNES.

Nicolai [Nicolaÿ], **Johann Michael** (*b* probably at Ulrichshalben, nr Weimar, 1629; *d* Stuttgart, 26 Jan 1685). German composer. Although nothing is known of his musical studies they must have reflected the high level of the musical tradition of Thuringia. Before 1655 he was a member of the court orchestra of the Duke of Saxe-Lauenburg, whose musicians were often invited to play for the Margrave of Brandenburg; in 1675 he dedicated his first set of *Instrumentalische Sachen* to Margrave Christian Ernst in remembrance and gratitude. From 11 October 1655 until his death he was an instrumentalist in the Stuttgart court orchestra, and he also taught the choirboys. Among other instruments he played the violone. According to contemporary accounts, members of the court orchestra met regularly in his house for an 'exercitium musicum'. He was friendly with the composer P.F. Böddecker, organist of the collegiate church, though on less good terms with the deputy Kapellmeister, the composer J.A. Kress.

Nicolai's *Geistliche Harmonien* consists of three-part settings of ten German and two Latin psalm texts; the dedication shows that in spite of their uncommitted nature they were intended for the Protestant liturgy. The manuscript cantatas of the *Evangelische Harmonien* were destined for narrower liturgical use, in accordance with the church's calendar, for the two months from the first Sunday in Advent to the Purification. In several of his numerous instrumental works the lower instruments, such as the bass viol and the bassoon, are contrasted with the violins or viols independently of the basso continuo. In the sonatas two lively central movements are enclosed and connected by short *adagio* sections, and the movements of a single work are often based on the same thematic material in varied rhythms.

EBERHARD STIEFEL

Nicolai, (Carl) Otto (Ehrenfried) (*b* Königsberg [now Kaliningrad], 9 June 1810; *d* Berlin, 11 May 1849). German composer and conductor. His opera *Die lustigen Weiber von Windsor* was the most successful comic opera composed in the first half of the 19th century. As founder of the Vienna Philharmonic Concerts, at that time one of the most modern concert ventures in Europe, he set new standards of orchestral playing, and he contributed significantly to the history of interpretation.

1. LIFE. Nicolai was the first child of the composer Carl Ernst Daniel Nicolai (1785–1854) and his wife Christiane Wilhelmine (née Lauber). Because of his mother's physical and mental illness, the marriage was dissolved a few months after Nicolai's birth. He grew up in the care of foster-parents until 1820, when his father took on responsibility for his education. Nicolai attended the highly regarded Friedrich-Gymnasium in Königsberg, but became so strained by his father's attempts to make a prodigy of him that at the age of 15 he suffered a complete breakdown and had to leave. In mid-February 1826 he ran away and travelled via Memel to his mother in Breslau. She, however, was unable to look after him, and for the next two years he eked out a living as an itinerant pianist. After falling seriously ill in Stargard (Pomerania), he was helped by a local military court judge. The judge sent the impoverished Nicolai to Berlin, where he was introduced to Carl Friedrich Zelter, a friend of Goethe and director of the Sing-Akademie. Zelter resolved to support Nicolai and obtained for him a place at the Institut für die Ausbildung von Organisten und Musiklehrer, where he received tuition from three renowned teachers: Emil Fischer (singing), Ludwig Berger (piano) and Bernhard Klein (composition). By 1833 he had acquired a thorough grounding in composition, as the numerous songs (especially the six collections opp.3, 5, 7, 11, 13 and 16), unaccompanied choral pieces (including the three collections opp.6, 10 and 17) and larger works with orchestra, such as the *Te Deum*, bear witness. His development was also influenced by membership of the Berlin Sing-Akademie, the Jüngere and the Ältere Liedertafel and the Lieder-Verein 1829. Through these various

institutions he formed a valuable circle of acquaintances, including Friedrich Schleiermacher, August Hoffmann von Fallersleben, Karl von Bunsen, Georg Poelchau and the Mendelssohn family. He spent the summer months of 1830 and 1831 on the estate of Adolph von Münchhausen in Neuhaus Leitzkau, from where he undertook profitable journeys to Leipzig and Poznań.

The Prussian ambassador Karl von Bunsen eventually persuaded Nicolai to move to Italy. From January 1834 to March 1836 he held the post of organist at the embassy chapel in Rome. At the same time he studied counterpoint and *a cappella* style with Giuseppe Baini, acquired the nucleus of his considerable collection of early music and took a lively interest in the development of contemporary Italian music. When his period of employment came to an end he had already been nominated honorary music director of the Prussian court, but he stayed on in Italy as a freelance composer for more than a year, searching in vain for a commission to write an opera. Apart from composing a few occasional works, the only success of these years was his appointment to the Accademia Filarmonica in Bologna as *maestro compositore onorario* (a title that Mozart too had held). After many disappointments he was eventually elected assistant Kapellmeister at the Kärntnertortheater in Vienna in 1837.

Nicolai's first stay in Vienna benefited him in two ways. He gained experience in conducting opera and orchestral works, which brought him rapid recognition; and he composed his first opera, *Rosmonda d'Inghilterra*, which provided him with his first success as a composer in Vienna and Italy. This, however, did not occur until two years later when Nicolai, having left Vienna, attempted to settle in northern Italy as a freelance composer. The opera, under its new title *Enrico II*, earned him a *succès d'estime* at its première in Trieste in November 1839; but his second opera, *Il templario*, was received with rapturous enthusiasm in Turin at its première in February 1840. He had become a famous composer overnight (at the same time, incidentally, as Verdi). His third opera, *Gildippe ed Odoardo*, received its première in Genoa in December 1840; it was followed by *Il proscritto* at La Scala, Milan, in March 1841 (Nicolai had rejected the libretto of *Nabucco*, which he considered unsuitable for opera, thus leaving the way clear for Verdi). Both *Gildippe ed Odoardo* and *Il proscritto* owe much stylistically to Bellini and Donizetti. Personal disagreements and the failure of his engagement to the singer Erminia Frezzolini caused Nicolai to leave the country in spring 1841, and once again he was drawn to Vienna.

After his experiences in Italy, Nicolai soon changed his artistic ideals. In late summer 1841 he was appointed principal conductor of the Hofoper at the Kärntnertor, and was able to concentrate on the operas of Mozart and Beethoven, which he particularly admired. Required by contract to compose German operas, Nicolai (because of a lack of suitable librettos) could at first fulfil his obligation only by producing completely revised versions of *Il proscritto* and *Il templario*, which were performed in German as *Die Heimkehr des Verbannten* (1844) and *Der Tempelritter* (1845) respectively. Though these revisions are not entirely convincing, they represent an important point on the way to Nicolai's first original German opera, *Die lustigen Weiber von Windsor*. Begun in 1846, it draws on many characteristics of the European operatic tradition to create a new, independent genre.

Otto Nicolai: lithograph by Josef Kriehuber, 1842

The Philharmonic Concerts, which Nicolai had been giving with members of the opera orchestra since spring 1842, caused an even greater stir. Only 'classical' music was played: a small repertory of works by Beethoven and Mozart, with the occasional performance of works by other composers. Concertos and Italian bel canto opera were ignored. The two performances he gave of Beethoven's Ninth Symphony in March 1843 were considered to be the first modern and complete interpretation of this epoch-making work (predating by some years Wagner's noted performance at Dresden on Palm Sunday 1846).

In summer 1844 Nicolai undertook a long journey via Prague, Dresden (where he heard accounts of Wagner's recent successes), Leipzig and Berlin to Königsberg, where he performed the *Kirchliche Fest-Ouvertüre* (on the chorale 'Ein feste Burg' for chorus and orchestra), which he had dedicated to his native town, as part of the festival to celebrate the 300th anniversary of the university. King Friedrich Wilhelm IV of Prussia was so impressed that he tried to tempt him to Berlin; Nicolai, however, did not at first respond to the offer. Only when a violent argument with the leaseholder of the Viennese theatre, Carlo Balochino, about the performance of *Die lustigen Weiber von Windsor* had caused Nicolai's contract not to be renewed did the king's plans become reality. After a successful farewell concert, in which Jenny Lind took part and which included the première of the Moon Chorus ('O süsser Mond'), the Midges' Dance (*Mückentanz*) and the dance of the elves from Act 3 of the new opera, Nicolai left Vienna in 1847.

October 1847 saw him installed as Kapellmeister at the Königliches Opernhaus in Berlin and, as Mendelssohn's successor, artistic director of the cathedral choir. Wishing to reform Prussian church services, he immediately began to compose a series of large-scale religious works. Preparations for the première of *Die lustigen Weiber von Windsor* were interrupted by the March Revolution of 1848. Soon afterwards Nicolai joined the Tonkünstlerverband, a society concerned with the reorganization of Prussian musical life; *Die lustigen Weiber* eventually received its première, without huge success, on 9 March 1849. Two months later, on 11 May, Nicolai died. On the same day he was elected a member of the Akademie der Künste, but too late to receive the news.

2. WORKS. Nicolai's output comprises some 235 works. Less than half of them were published and in the 20th century few were available in modern editions. Nicolai concentrated mainly on vocal music, including operas, songs and choral works. Among the comparatively few piano and chamber works and large-scale orchestral and choral-orchestral compositions, the Piano Sonata in D minor, the String Quartet in B♭, the Mass in D and the Symphony in D are noteworthy.

Nicolai absorbed a great variety of influences and, in his most successful works, created from them his own individual idiom. Stylistically, he kept to the traditions of the forms in which he composed. Classicism dominates the early works of the Berlin years; the songs and small-scale choral pieces follow Zelter's ideals and the larger choral works show the influence of Handel. His musical language was also strongly influenced by Mozart, Beethoven and Weber. The songs composed between 1827 and 1833 are carefully distinguished by the use of the terms 'Lieder' and 'Gesänge'. The lieder are exclusively strophic, composed according to the ideals of Zelter and of Goethe, who saw the 'true expression' of the lied to be 'that the singer can bring out the different means of the individual strophes of a melody, thereby performing the function of both the lyric and the narrative poet' (diary, 1801). This ideal contrasts with the musically free, through-composed form of the *Gesang*, in which Nicolai also gave more importance to the piano accompaniment. In addition, Nicolai was influenced by his study of the folksong collections of Anton Zuccalmaglio, Johann Büsching and Friedrich von der Hagen.

The profound impression made on him by performances in Berlin of Handel's music is most clearly perceptible in the large-scale *Te Deum* (1832), written in a Baroque style modelled on the oratorios *Messiah* and *Israel in Egypt*. The later *Kirchliche Fest-Ouvertüre* op.31 also shows the influence of Handel, but enriched by contrapuntal elements deriving from Nicolai's interest in the works of Bach. During his years in Italy Nicolai attempted in *a cappella* works to imitate the austerity of the 'Palestrina style', although this led inevitably to stylistic conflicts. For example, the eight-part *Pater noster* op.33 is impressive for the skilful evocation of the sound of the *stile antico*, but the harmony continually vacillates between modality and the key of D minor.

In the Piano Sonata, the String Quartet and the works for orchestra Nicolai was influenced by the Viennese Classical composers, whose works he regarded as sacrosanct. He used specific works as models: in the Symphony in D, for example, the slow introduction and the exposition of the main theme take the form used in similar sections of Beethoven's Second Symphony, while in the finale the striking quotation of the central themes of the preceding movements derives from the style of Beethoven's Ninth Symphony. In the Piano Sonata Nicolai also made use of other models: the slow movement is a Romantic nocturne inspired by the works of Chopin; there is an arrangement of a Swedish folktune; and the last movement is a rondo in the style of Weber. In his treatment of sonata form as a whole, Nicolai followed the theorist Heinrich J. Birnbach, whose essays (published in Berlin in 1827) had been a revelation to him.

The operas betray Nicolai's admiration of Bellini. He attempted to imitate Bellini's characteristic musical language, for example – as in *Norma* – in melodies that are related to one another and in the intensification of sound, and in the use of comparatively few coloratura passages. The late works of Rossini, in particular *Guillaume Tell* (well known to Nicolai from the time of his first Viennese appointment), also left a clear mark, while the always perceptible tone of German opera (as exemplified by Weber) is in curious contrast to these stylistic adaptations. It is especially prominent in *Il templario*, whose overture is strongly reminiscent of the overture to *Der Freischütz*. The later sacred works composed in Berlin, on the other hand, are stylistically similar to those of Mendelssohn. The settings of Psalms xxxi and xcvii show a pleasing synthesis of the *a cappella* style of the 17th and 18th centuries and romantic Liedertafel songs.

Many of Nicolai's works, despite their craftsmanship, are little more than eclectic imitations. *Die lustigen Weiber von Windsor*, however, described by Nicolai (using E.T.A. Hoffmann's term) as a 'comical fantastical opera', reveals his fluent manipulation of recent European music traditions, and his creation, through a lively and convincing synthesis, of a truly German *opera buffa*. Nicolai had worked towards, and finally achieved, this result through the adaptation of his Italian *melodrammi* as German tragic operas. The fusion of the learned German tradition with Italian facility, the ideal that he himself repeatedly formulated in letters and some remarkable essays, resulted in a masterpiece of memorable and appealing music.

Besides his activities as a composer and as a conductor, Nicolai published five essays that range widely and closely reflect his intellectual and artistic world. They include a detailed account of the Cappella Sistina; aesthetic reflections on German and Italian music; a historical study of the German folksong *Annchen von Tharau*; and comments on performing practice in the recitatives of Mozart's operas.

WORKS

for full list see Konrad (1986)

OPERAS

Enrico II (Rosmonda d'Inghilterra) (melodramma serio, 2, F. Romani: *Rosmonda*), 1836, Trieste, Grande, 26 Nov 1839, mainly lost, 1 aria (Milan, *c*1839)

Il templario (melodramma, 3, G.M. Marini, after W. Scott: *Ivanhoe*), Turin, Regio, 11 Feb 1840, *F-Pn*, vs (Paris, 1841); as Der Tempelritter (trans. S. Kapper), Vienna, Kärntnertor, 20 Dec 1845, *A-Wn**; as Die Sarazenerin (W. Hanke, M. Loy), Berlin, *c*1940

Gildippe ed Odoardo (melodramma, 3, T. Solera, after T. Tasso), Genoa, Carlo Felice, 26 Dec 1840, lost, cavatina (Vienna, 1843)

Il proscritto (melodramma tragico, 3, G. Rossi), Milan, Scala, 13 March 1841, *I-Mc*, part pubd (Milan, 1841); as Die Heimkehr des Verbannten (tragische Oper, trans. Kapper), Vienna, Kärntnertor, 3 Feb 1844, *A-Wn**, *D-Bsb**, *GB-Cfm**, vs (Vienna, 1845); as Mariana (Hanke, Loy), Berlin, 1943

Die lustigen Weiber von Windsor (komisch-fantastische Oper, 3, S.H. Mosenthal, after W. Shakespeare), Berlin, Kgl, 9 March 1849 (Berlin, 1850), *D-Bsb**

SACRED

Te Deum, 8 solo vv, 8vv, orch, 1832, ed. E. Schliepe (Berlin, 1938/9)
Mass, D, 4 solo vv, 4vv, orch, 1832, rev. 1844, ed. M. Koch (Augsburg, 1918), *A-Sd**
Pater noster, 8vv, op.33, 1836 (Mainz, 1846), *D-Bsb**
In assumptione Beatae Mariae Virginis, off, 5vv, op.38, 1846 (Vienna, 1846/7)
Salve regina, S, orch, op.39, 1846 (Vienna, 1847)
Psalm liv, 10 solo vv, 10vv, 1834, *PL-LZu**
Psalm iii, A/B, orch, 1844, vs with org acc. ed. O. Wermann (Leipzig, *c*1890)
Psalm xiii, 8 solo vv, 8vv, org ad lib, 1846, *D-DT*
Psalm c, 4 solo vv, 8vv, 1848, *Bim*
Psalm xxxi, 8vv, 1849, Psalm xcvii, 4vv, *c*1848; both ed. E. Naumann, Musica sacra, viii (Berlin, 1855)
2 motets, 8vv: Die Strafe liegt auf ihm, Ehre sei Gott in der Höhe, 8vv; both ed. H.A. Neithardt, Musica sacra, v (Berlin, 1853)
4 other psalms; 2 German liturgies, Kyrie, Gloria, Agnus Dei, Hymnus, motets, chorales, all unpubd, some lost

SECULAR CHORAL

Preussens Stimme (K.W. Lange), 1v, pf/(1v, 4vv, gui)/4 male vv, op.4, 1830 (Berlin, 1830), arr. 1v, 4vv, military band, orch, 1848 (Berlin, 1849) [from 3 Königslieder, 'Preussenmut']
6 Lieder, 4vv, op.6, *c*1830 (Leipzig, 1831): Frühlingslied (A. von Schlippenbach), Mailied (Sundine), Trinklied (W. Müller), Reiten lassen (K.H. Wackernagel), Mailied (J.W. von Goethe), Wechselgesang (L. Uhland)
Verschiedene Empfindungen an einem Platz (Goethe), S, 2 T, B, pf, op.9, *c*1830 (Halle, 1832)
3 Königslieder, 4 male vv, op.10, *c*1830: Preussenmut, Stosset an, Friedrich Wilhelm lebe hoch (A. Kopisch), Brave Männer, stosset an (A.F. Ribbeck); lost
4 Gesänge, 4 male vv, op.17, *c*1832: Ausgehalten! Kämpft sie nieder, Hast du das Schloss gesehen (Uhland), An Wasserflüssen Babylons (after Ps cxxxvi), Trinklied
Lied am runden Tisch (Köppen), 8vv (Berlin, n.d.)
33 other works, incl. cantata, male choruses and partsongs, some lost

OTHER VOCAL

for solo voice and piano unless otherwise stated

Wenn sanft des Abends (F.A. Kuhn), S, B, pf, op.2 (Magdeburg, 1830); 3 Lieder, op.3 (Berlin, *c*1830); 4 Lieder, op.5 (Berlin, *c*1830); Rastlose Liebe (Goethe), S, B, pf, op.23 (Berlin, *c*1830); Deutsche Lieder, op.13 (Berlin, 1832); 6 Lieder und Gesänge, S/T, pf, op.16 (Leipzig, 1832); Napoleons Grenadier auf dem Schlachtfeld von Waterloo, 1v, gui/pf (Berlin, *c*1832); 2 duets, S, B, pf, op.14 (Berlin, 1833); 3 duets, S, B, pf, op.15 (Berlin, 1833); 7 Lieder, op.18 (Berlin, *c*1833)
Variationen über Webers Schlaf Herzenssöhnchen, S, pf/orch, op.19 (Berlin, 1833/4); Mein Röschen, 4 lieder, T, pf, op.11 (Berlin, 1834); 3 Romanzen, op.24 (Vienna, 1838); Variazioni concertanti sopra . . . La sonnambula, S, hn/cl/vc, pf/orch, op.26 (Vienna, 1838); Tell auf der Strasse nach Küssnacht, scena and aria, B, pf/orch, op.22 (Berlin, 1841); 6 Lieder und Gesänge, B, pf, [op.7] (Berlin, 1842); Wilhelmine (C. von Münchhausen), A/Bar, pf, op.29 (Vienna, 1843)
Die Träne (I. Castelli), A/Bar, hn/vc, pf, op.30 (Vienna, 1843); Künstlers Erdenwallen (R. Reinick), 2 male vv, pf, op.32 (Leipzig, 1845); Stammbuch-Blätter, 12 Lieder und Gesänge, 1–2 vv, pf, op.34 (Vienna, 1845); Herbstlied (L. Tieck), S/T, pf, op.37 (Vienna, 1846); 4 deutsche Lieder (H. Hoffmann von Fallersleben), B, pf, op.35 (Hamburg, 1847); 2 Lieder, S/T, pf, op.41 (Berlin, 1849/50); Welch mächtiger Ruf, scena and aria, T, pf/orch, op.21, ed. (Berlin, 1870)
25 other Ger. and It. lieder, Gesänge and Romanzen, some lost

OTHER WORKS

Orch: 2 Galopps, *c*1830–33, *D-Bsb**; 2 syms., c, 1831, lost, D, 1835, rev. 1845 (Berlin, n.d.); Weihnachts-Ouvertüre über Vom Himmel hoch, orch, 4vv ad lib, org, 1833, ed. (Berlin, 1938); Fantaisie et variations brillantes sur . . . Norma, pf, orch/str qt, op.25 (Leipzig, 1835); Gran marcia funebre . . . onde onorare . . . Bellini (Rome, *c*1835); Kirchliche Fest-Ouvertüre über . . . Ein feste Burg, orch, 4vv ad lib, org, op.31, 1836/44 (Leipzig, 1845)
Chbr: Pf Sonata, d, op.27, 1834 (Vienna, 1841); Str Qt, B♭, 1834, ed. H.-W. Riedel (Mainz, 1985); Rondo capriccioso, pf, *c*1834, ed. (Mainz, 1871/2); Adieu à Liszt, étude, D, pf, op.28 (Vienna, 1838); 3 études, pf, op.40 (Vienna, 1846)
35 other orch and chbr works, some lost

ULRICH KONRAD

Nicolai, Philipp (*b* Mengeringhausen, nr Kassel, 10 Aug 1556; *d* Hamburg, 26 Oct 1608). German theologian, poet and composer. His principal education was with Friedrich Beurhaus in Dortmund, Joachim à Burck and Ludwig Helmbold in Mühlhausen, and Gockel in Korbach. In 1574 he began his theological training in Wittenberg which continued from 1575 to 1579 in Erfurt and again in Wittenberg. After private studies at the Volkhardinghausen Monastery near Mengeringhausen, he became pastor in 1583 at Herdecke (Westphalia). In 1586/7 he was private minister of the Lutheran Hauskirche in Cologne. From 1588 to 1596 he was pastor in Altwildungen. Nicolai's strict adherence to Lutheranism prevented his graduating at Marburg University, then inclined to the Reformed faith; he was only able to receive his degree in 1594 after completing his studies under Aegidius Hunnius at Wittenberg. From 1596 to 1601 he was pastor in Unna and then at St Katharinen, Hamburg.

Nicolai wrote numerous theological works, mostly polemical, but he also produced several volumes of poetry. His importance as a composer lies entirely in his devotional book, *Der Freudenspiegel des ewigen Lebens* (Frankfurt, 1599/*R*), many editions of which were published up to 1674. This work, written at Unna during an outbreak of the plague, contains his two most famous

songs: *Wie schön leuchtet der Morgenstern* and *Wachet auf, ruft uns die Stimme*. The texts recall the medieval mysticism of Bernhard. Both melodies antedate Nicolai and show formal affinities with those of the Meistersinger, particularly with those of the Strasbourg tradition; they quickly became well known and have since been significant in the history of Protestant sacred music.

WALTER BLANKENBURG/FRIEDHELM BRUSNIAK

Nicolai [Nicolay], **Valentino** [Valentin] (*fl* 1775–?1798). Composer and pianist of unknown origin, active in England and France. Biographical information is scant, even in early music lexicons. As he first gained some notoriety in London, he may have been connected to the German F. Nicolai, a page to Queen Charlotte and a violinist with J.C. Bach and Abel in the queen's chamber band. Valentino's compositions appeared in London from about 1776, with his address variously given as Charlotte Street, Portland Place or South Moulton Street. From 1782 his works were reprinted on the Continent. Comparison of English and French publications suggests that he was in Paris between 1782 and 1788 but returned to London, where his opp.9 and 10 were printed 'for the author' by 1789. He was again living in Paris in the late 1790s at rue Dominique no.206 Faubourg-Germain. According to Choron and Fayolle he died in Paris about 1798.

Certain of Nicolai's sonatas (opp.3, 11) were extremely popular and remained so well into the 19th century, being reprinted in the USA, Europe and Dublin. The Sonata in C op.3 no.1 was especially successful and, according to Burney, was 'for many years taught in every school in the kingdom'. This sonata illustrates Nicolai's vitality and facile style, convincingly synthesizing a variety of instrumental effects fashionable at the time. Burney, who had but modest success as a composer, was evidently a trifle peevish in claiming that Nicolai's popularity 'may probably have been more owing to the sprightliness and pleasantry of his style than to the depth or orthodoxy of his knowledge', but he admired the piano duets in which the composer 'displayed a considerable share of good taste, ingenuity and fancy'. In the sonatas for violin and piano, op.7, Nicolai projected a true duality and used the title 'duo concertante' or 'duet', but these were evidently less popular than the sonatas with optional violin parts. The modest technical requirements of the keyboard concertos suggest that they were intended for amateurs and there is no record of a public performance in London. He was possibly the co-author with Felice Bambini of the *Nouvelle méthode pour pianoforte suivie de doigtés* (Paris, n.d.); both composers were apparently in Paris during the 1780s.

WORKS

Orch: 6 syms., 2 ob, 2 hn, str, op.1 (Mannheim, *c*1783), also pubd (The Hague and Brussels, *c*1783); conc., D, hpd/pf, orch, op.12 (Paris, 1788), also pubd (London, *c*1789); conc., G, pf, orch, op.16 (Paris, *c*1795), as op.14 (London, *c*1799)

Chbr (sonatas unless otherwise stated): 6 for vc/bc, op.1 (Berlin, 1785), as op.8 (Paris, *c*1786), also pubd (London, *c*1788); 6 for hpd/pf, vn, op.3 (London, *c*1778), 4 arr. hp/hpd/pf, vn, opp.1–2 (Paris, *c*1780); 6 for hpd/pf, vn, op.5 (London, *c*1780), 4 arr. hp/hpd/pf, vn, opp.1–2 (Paris, *c*1780); 6 for hpd/pf, vn, op.7 (London, 1782), nos.1, 3 and 5 pubd as op.7 (Paris, 1783), nos.2, 4 and 6 as op.10 (Paris, *c*1786); 3 for hpd/pf, vn, vc, op.8 (Paris, 1785); 3 for hpd/pf, vn, vc, op.9 (Paris, 1785), pubd with op.8 as op.10 (London, *c*1789); 6 for hpd/pf, vn, op.11 (Paris, 1788), also pubd (London, *c*1789); 6 for hpd/pf, vn, opp.13–14 (Paris, *c*1795), lost; 3 for pf, vn, op.13 (London, *c*1798) [different from Paris, op.13]; 3 for pf, vn, op.15 posth. (Paris, *c*1800); 6 trios, hpd/pf, vn, vc (London, *c*1776), as 6 sonatas, op.1 (Paris, *c*1796); 6 str qts, op.6 (London, 1781), also pubd (Paris, *c*1782)

Kbd: 4 sonatas, hpd/pf 4 hands, op.9 (London, *c*1788), also pubd as opp.3–6 (Paris, *c*1790), lost, ? 2 in Journal de clavecin, année 6 (Paris, *c*1787); 6 sonatas, pf, op.18 posth. (Paris, *c*1800)

2 airs, 1 duo, vv, orch (Berlin, *c*1790), questionable

Other works including op.17, mentioned in Gerber and Fétis; MSS mentioned in Eitner

RONALD R. KIDD

Nicolaï, Willem (Frederik Gerard) (*b* Leiden, 20 Nov 1829; *d* Bloemendaal, nr Haarlem, 24 April 1896). Dutch conductor, organist, teacher and composer. After attending the Leiden music school (1842–9), which in 1844 opened an organ department specially for him, he continued his studies at the Leipzig Conservatory with Moscheles, Rietz and C.F. Becker and completed his organ studies with Johann Schneider in Dresden. In 1852 he taught the organ at the royal music school in The Hague; from 1857 he also conducted the orchestra there. From 1863 to 1865 he also directed the choir of the Rotterdam section of the Maatschappij tot Bevordering der Toonkunst, where he performed little-known oratorios by Handel. In 1865 he was appointed director and composition teacher of the royal music school which he brought to a high standard. He also directed the choir of the Toonkunst in The Hague (1860–70) and the De Toekomst orchestra (1865–96), with whom he gave the first Dutch historical orchestral concert (1868). As editor of the monthly *Caecilia* from 1871 to his death, he wrote a series of articles on Wagner, beginning in 1875. His own music is conventional and includes the song collection *Loverkens* op.12 (on old Dutch texts edited by A.H. Hoffmann von Fallersleben) and an oratorio *Bonifacius*, which was often performed during his lifetime both in the Netherlands and abroad.

JAN TEN BOKUM

Nicolas [?Guillaume] (*fl* ?1533–78). French composer. 60 chansons for three to six voices were attributed to 'Nicolas' in collections published in Paris between 1547 and 1578. Five printed by Attaingnant between 1547 and 1550 may have been composed by Guillaume Nicolas, singer and chaplain in the chapel of François I in 1533. These five songs comprise an extended rustic narrative (*La, la, la que ne m'ayme*, 1547[10]), set in the syllabic style of Janequin, and four courtly *épigrammes* using the more homophonic manner of Sermisy.

55 more chansons (40 ed. in SCC, xx, 1991) attributed to 'Nicolas' by Le Roy & Ballard between 1559 and 1578 may otherwise be by NICOLAS DE LA GROTTE. This might be thought more likely in view of the chronology although the poems are mostly anecdotal *épigrammes* by Marot and his contemporaries, set in a light, imitative style quite different from the strophes of Ronsard set homophonically in the publications specifically devoted to La Grotte. Many of the five- and six-voice pieces ascribed to Nicolas in the *Meslanges* (Paris, 1560; 1572[2]) are reworkings of melodies taken from earlier polyphonic settings by Sermisy, Richafort, Janequin and Lassus. However, nine four-voice chansons in a collection of 1564 (1564[8]) are original compositions in the resolutely chordal manner of the newer *voix de ville*; another chanson, a setting of Du Bellay's *En ce mois delicieux*, evokes the style and structure of the newly imported Italian villanella. These works often feature triadic melodies, some rather unvocal leaps (diminished 4ths, 7ths and 10ths) as well as a number of harmonic crudities (2nds, 7ths, augmented and diminished triads).

WORKS

only those definitely by Nicolas; for 4vv unless otherwise stated

Chansons: 1 in 1547[10]; 3 in 1547[12]; 1 in 1550[5]; 1 in 1559[8]; 1 in 1559[11]; 1 in 1559[12]; 9 for 5vv, 7 for 6vv in 1560e; 11 (incl. 1 for 3vv) in 1564[8]; 1 in 1565[5]; 2 in 1567[8]; 14 for 5vv, 7 for 6vv in 1572[2]; 1 in 1578[14]

FRANK DOBBINS

Nicolas, Ernest. *See* NICOLINI, ERNEST.

Nicolas Liégeois. *See* CHAMPION family, (2).

Nicolas the Serb (*fl* late 14th century). Serbian composer. He is known for a Slavonic *theotokion* preserved in *GR-ATSgreat lavra* ε 108 and for a Cheroubikon setting in Greek which appears in *GR-An* 928. Both manuscripts are dual-language (Slavonic and Greek) akolouthiai, the former dating from the end of the 14th century and the latter compiled and written about a century later by ISAIAH THE SERB. The *theotokion* is the earliest known example of a Slavonic KALOPHONIC CHANT; it is a moderately florid setting ending with a *kratēma*. (A. Jakovljević: 'Musical Works of Serbian Composers Stefan and Nikola the Serb from 14th-Century Bilingual Anthology of Great Lavra (E–108)', *Balcanica*, xv, 1984, pp.69–82)

DIMITRI CONOMOS

Nicolau, Antonio (*b* Barcelona, 8 June 1858; *d* Barcelona, 26 Feb 1933). Spanish composer and conductor. After studying the piano with Juan Bautista Pujol and composition with Balart, he embarked on a medical career, which he soon abandoned in favour of composition. After living in Paris for eight years, he finally settled in Barcelona in 1886. He belonged, with Luis Millet, Alió y Brea, Vives and Enrique Morera, to the generation that succeeded Pedrell, and is important not only as a composer but also as one of the outstanding Catalan conductors of the 19th century, and as a leader in the revival of Catalan music.

Primarily a composer of choral music, Nicolau also wrote several important operas. The first, the four-act *Constanza*, is deeply rooted in the Romantic tradition. It was first performed at the Liceo on 10 April 1878 but, owing to the unexpected withdrawal of the tenor, Carlo Bulterini, the first two acts had to be omitted; it was later performed in its entirety at the Teatro Principal. Another of his dramatic works, *Un rapto*, was performed in Madrid shortly before the opening of the Exposición Universal in Barcelona (1888), and was acclaimed by both public and critics. His last opera, *El corazón de fuego*, was given its first performance at the Teatro Tivoli in Barcelona in 1895 at the same time as Nicolau was turning to Wagner, whose *Ring* he conducted in March 1896. The *Danza Anakota* from *El corazón* features frequently in concerts in Barcelona.

Some of Nicolau's earliest works were performed by the Orfeó Català, and he soon composed regularly for the group. As a result his style of composition evolved considerably: he abandoned his early orchestral style and looked for inspiration to traditional Catalan music, though straight quotations from folk music were rare in his music. Some of his choral works, based on texts by Jacint Verdaguer (including *El noi de la Mare* and *La mort de l'escolà*), achieved great popularity and placed Nicolau at the centre of the so-caled Escuela del Orfeó Català. He continued to compose choral music until 1930.

WORKS

Stage: La tempestat (dramatic scena), 1877; Constanza (op, 4), 1878; Un rapto (zar), 1887; El corazón de fuego (op), 1895
Orch: Sinfonía Athalia, 1875; El triomf de Venus (sym. poem), 1882
Choral: Hénora, Breton legend, solo vv, chorus, orch; Cant elegíac a la memòria del Dr Robert; Jesús als nois; Himne del poeta, 1899; La mort de l'escolà, 1900; La Mare de Déu, 1901; Divendres Sant, 1902; Entre flors, 1902; El noi de la Mare, 1903; Teresa, 1903; Captant, 1904; La mort del soldat, 1930; Cicle montserratí, 1925–30
Songs with pf acc.: La dama d'Aragó, El mariner, Fulcite me floribus, Cançó de Maria

Nicolaus Cracoviensis [de Cracovita, Krakowczyck]. *See* MIKOŁAJ Z KRAKOWA.

Nicolaus de Capua (*b* ?Capua; before *c*1400; *d* ?after 1460). Italian theorist. He is probably identifiable with the *presbyter* Nicolaus quondam Iohannis de Traconibus de Capua, who was a *mansionario* and *tenorista* at the

cathedrals of Udine (1432–5) and Treviso (1439–42), and who became a *mansionario* at Vicenza Cathedral (1442–61), attracted by that city's better climate (this transfer was expressly approved by the Bishop of Treviso, Ludovico Barbo). He remained at Vicenza until 1461, when he apparently transferred to the church of S Maria in Montebello.

Nicolaus's *Compendium musicale* of 1415 (ed. A. de La Fage, Paris, 1853) offers a full treatment of the theory of *cantus planus* compiled from different sources and written in just the sort of clear, didactic style that would be most useful to a *tenorista* as leader of a choir in plainchant and polyphony. One section describes eight of the ten *conjuntiones*, or transposed hexachords, outlined in the Berkeley Manuscript (*US-BEm* 744). The version of the *Compendium* in *I-Vnm* lat.VIII.82 (=3047) gives a more complete text, but lacks the musical examples present in *Rv* B 83; the latter source was used by La Fage for his edition.

A polyphonic Gloria setting elsewhere attributed to Bosquet and to Antonio Zacara da Teramo (ed. in CMM, xi/2, 1959, xiv, 7) appears in *Bu* 2216 under Nicolaus's name. The Bologna version has a new Amen and an added contratenor part; Nicolaus is probably responsible for these modifications.

Nicolaus Polonus (i) (*fl* ?15th century). Polish theorist. He studied in Paris and was the author of *Tractatus musicalis ad cantum gregorialem brevis et utilis* (*A-Gu* 873), a concise introduction to the art of singing. Reference to his nationality and studies in Paris is found in a colophon to the treatise. Attempts to identify him with the composer Mikołaj Radomski remain unsubstantiated.

Nicolet, Aurèle (*b* Neuchâtel, 22 Jan 1926). Swiss flautist. He studied the flute and music theory in Zürich under André Jaunet and Willy Burkhard, and then in Paris under Marcel Moyse and Yvonne Drappier. In 1947 he won a *premier prix* for flute at the Paris Conservatoire, and in 1948 the flute prize in the Geneva International Music Competition. From 1948 to 1950 he was first flautist in the Winterthur City Orchestra and in 1950 Furtwängler engaged him as solo flautist for the Berlin PO: Nicolet held the position until 1959. Simultaneously he taught at the Hochschule für Musik in Berlin until 1965 and then at the Hochschule für Musik in Freiburg; he then moved to Basle. For tone-quality and technique Nicolet was indebted to the French school. His interpretations of Bach under Karl Richter, and other recordings such as Mozart's flute works, show his stylistic assurance and finely controlled phrasing. He also won an international reputation in modern music, and among composers who have written for him are Klaus Huber, Jürg Wyttenbach, Jacques Wildberger, Rudolf Kelterborn, Albert Moeschinger, Tōru Takemitsu, Edison Denisov, György Ligeti and Heinz Holliger. He published *Flöte (Lektion) Syrinx [von] Claude Debussy* (Wie Meister üben, ii, Zürich, 1967; Eng. trans., 1968) which contains a discography and two records.

JÜRG STENZL/R

Nicoletti, Filippo (*b* Ferrara; *d* 27 Sept 1634). Italian composer. In his youth he studied with Giuliano Cartari, then *maestro di cappella* at S Francesco, Bologna. He appears to have been in Rovigo between 1577 and 1585 – he dated his first two books of five-part madrigals from there. *I finti amori*, dedicated to the *podestà* of the city, contains settings of poetry by local writers including Nicoletti himself, as well as by better-known ones from Ferrarese circles. In 1579 Nicoletti attempted to transfer to the Gonzaga court at Mantua; he was unsuccessful despite the recommendation of Alessandro Nodari who praised his compositional skills and excellent voice. In April 1588 he entered the service of Duke Alfonso II d'Este as a *cappellano* in the ducal chapel at nearby Ferrara, and although he remained there until the dissolution of the court in 1598, and probably for some time afterwards, he was evidently dissatisfied with his post. In 1592 he applied unsuccessfully for a 'vicariato perpetuo' at S Romano, Ferrara, and in 1603 he was still resident in the city. While in Ferrara he was a member of the famous *ridotto* of Counts Bonifacio and Luigi Bevilacqua, to whom Nicoletti dedicated the collection *La gloria musicale* (RISM 1592^{14}) which he also edited. Probably in 1604 and certainly by 1605 he had moved to Rome to take up the appointment of *maestro di cappella* at S Lorenzo in Damaso. The dedication of Nicoletti's *Villanelle a tre voci*, to Guglielmo Bevilacqua, is dated from Rome on 25 November 1604, and he was at S Lorenzo in Damaso by the time the 1605 edition of the *Primo libro a due voci* was published. From 1607 until 1612 Nicoletti served as *maestro di cappella* at S Maria della Consolazione, and from July 1613 until his death in 1634 as *maestro* at S Maria di Loreto. He was also a member of the Compagnia dei Musici di Roma. Details of his career were included in the basso continuo part of the *Corona di gigli et sacre rose* by Francesco Romano and G.B. Massari (Venice, 1619), of which no copies are now known. A series of his letters from 1592 to 1608 is extant (in *I-MOs*).

La gloria musicale (1592^{14}) was the last Ferrarese anthology published before the duchy passed to papal control in 1597. Although Nicoletti was at Ferrara when the city was at its most progressive, his own music remained consistently conservative. In Rome, where the cultural climate better suited his style, he indulged in the popular fashion for devising strict, elaborate canons that established his reputation, but none now survive. Briccio wrote admiringly of his 'canoni enigmatici' and Pitoni (in the 18th century) included Nicoletti in his list of skilled

contrapuntists. This proficiency is evident in his didactic *Madrigali a due voci*, his most popular work. All the texts in this collection had previously been set in the same sequence by Andrea Gabrieli in his *Libro primo de madrigali a tre voci* (Venice, 1575). A book of Nicoletti's Latin poetry, *De divini verbi nativitate, passione et resurrectione carmina*, was published in Rome in 1634.

IAIN FENLON

Nicolini [Grimaldi, Nicolo] (*b* Naples, bap. 5 April 1673; *d* Naples,1 Jan 1732). Italian alto castrato. He studied under Provenzale, in whose *La Stellidaura vendicata* he made his début in 1685, in Naples. He sang in Naples Cathedral and the royal chapel as a soprano from 1690. He appeared frequently in opera, at the Teatro di S Bartolomeo and sometimes in the royal palace, between 1697 and 1731 and was particularly associated with Alessandro Scarlatti, singing in his *La caduta de' Decemviri* (1697), *Il prigioniero fortunato* (1698), *Arminio*, *L'amor generoso* and *Scipione nelle Spagne* (1714), *Tigrane* (1715) and *Cambise* (1719); he also sang in operas by C.F. Pollarolo, Giovanni Bononcini (*Muzio Scevola*), Mancia, Mancini, Lotti, Leo, Porpora, Vinci and others, and in Leo's adaption of Handel's *Rinaldo* (1718). He sang in Rome and Bologna in 1699 and 1700, Parma in 1699, Genoa in 1700, Reggio nell'Emilia in 1700 and 1725, Rovigo in 1703, Vicenza in 1707–8, Ferrara in 1713, Salerno in 1719, Rome in 1720–21, Milan in 1725 and 1727, Florence in 1725 and 1728, Bologna in 1727 and 1730, Faenza in 1728, and between 1700 and 1731 he appeared many times in Venice, in works by C.F. Pollarolo, Antonio Pollarolo, Gasparini, Caldara, Albinoni, Leo, Orlandini, Vinci, Porpora, Hasse and others (see illustration).

Nicolini went to London in 1708, promoted by John Vanbrugh, and made his début at the Queen's Theatre in Haym's arrangement of Scarlatti's *Pirro e Demetrio*. He enjoyed a great personal triumph and was largely responsible for the increasing popularity of Italian opera in London. In 1709 he signed a three-year contract with Owen Swiney, in which he undertook to arrange operas for the London stage. He sang in all the operas during that period, many of them pasticcios arranged by Haym

Nicolini with Francesca Cuzzoni: caricature by Anton Maria Zanetti (i), pen and brown ink, probably S Giovanni Grisostomo, Venice, 1730 (Fondazione Giorgio Cini, Venice)

or himself: *Camilla* (G. Bononcini), *Clotilda* and *Tomiri* in 1709, *Almahide* and Mancini's *Idaspe fedele* (including his notorious scene with a lion) in 1710, Bononcini's *Etearco* and Gasparini's *Antioco* in 1711, *Ambleto* and *Ercole* in 1712. In 1711 he sang the title role in the first performance of Handel's *Rinaldo*; in the same year he appeared in Dublin in a concert that raised over £39 for the Blue Coat Hospital. He returned to London in 1715 and created the title role in Handel's *Amadigi*. He continued to sing in pasticcios and revivals up to 1717, and Swiney tried repeatedly to persuade the Royal Academy to re-engage him between 1725 and 1727.

Nicolini was the leading male singer of his age and an outstanding all-round artist. Burney's evaluation, 'this great singer, and still greater actor', was shared by contemporaries such as Steele. Addison called him 'the greatest performer in dramatic Music that is now living or that perhaps ever appeared on a stage'. The two parts Handel composed for him require exceptional agility and breath control, with a compass *a* to *f''*. He never retired, and after singing in Vinci's *Siroe* and Orlandini's *Massimiano* in Venice in 1731 he was engaged for Pergolesi's first opera, *Salustia*, in Naples, but was taken ill and died during rehearsals.

WINTON DEAN

Nicolini [Nicolas], **Ernest** (*b* Saint Malo, 23 Feb 1834; *d* Pau, 19 Jan 1898). French tenor. He studied at the Paris Conservatoire and made his début (as Nicolas) in 1857 at the Opéra-Comique in Halévy's *Les mousquetaires de la reine*. After further study in Italy, he sang at La Scala in *La traviata* (1859), Rossini's *Otello* (as Rodrigo), *I Lombardi*, Giorza's *Corrado, console di Milano* and *La sonnambula* (1860). From 1862 to 1869 he appeared at the Théâtre Italien, Paris, and he made his Covent Garden début (under the pseudonym Nicolini) in 1866, singing opposite Patti in *Lucia di Lammermoor*, but without great success. In 1871 he returned to London to sing in *Faust* and *Robert le diable* at Drury Lane, and from 1872 to 1884 he was engaged every season at Covent Garden. He appeared in many roles, including Pery in Gomez's *Il guarany* (1872), Lohengrin (1875), Radamès in *Aida* (1876) and Fabio in Jules Cohen's *Estella* (1880), all first London performances, and he sang Celio at the première of Lenepveu's *Velléda* (1882). His voice had a wide vibrato that some of his contemporaries found distressing, but his fine stage presence and intense acting were particularly appreciated in such roles as Gounod's Faust and Romeo. He accompanied Patti on tours of Europe (to Vienna, Milan, Brussels, Berlin, Hamburg and other cities), and of the USA and South America. In 1886 he became her second husband, and that year made his final stage appearance, as Almaviva in *Il barbiere di Siviglia* at Drury Lane, though he continued to sing in concerts for some time.

ELIZABETH FORBES

Nicolini [Niccolini], **Giuseppe** (*b* Piacenza, 29 Jan 1762; *d* Piacenza, 18 Dec 1842). Italian composer. The sixth of 14 brothers, he first studied music with his father, Omobono Nicolini, organist and *maestro di cappella* in Piacenza, and singing with Filippo Macedone. With financial help from Duke Gian Girolamo Sforza Fogliani of Piacenza he studied composition for seven years, probably from 1778 to 1784, at the Conservatorio di S Onofrio in Naples, where his teachers were Insanguine and later Cimarosa. After composing the oratorio *Daniele nel lago dei leoni* (1781, Naples) and the *azione sacra Giuditta* (1785, Venice), he made his opera début with *La famiglia stravagante* (1793, Parma). This first success was followed by at least 45 works, produced at the rapid pace imposed by the market.

As one of the last representatives of the old Neapolitan school, which by 1800 was in decline and was soon to be engulfed in a process of national unification of musical taste (to which the work of Rossini was to give the strongest impetus), Nicolini imitated its models with ability but reduced them to stereotyped formulae. Nevertheless, for about 20 years, principally between 1811 and 1820, he could count on an enormous public, even outside Italy, who exalted him to the level of the most celebrated masters. In 1807 in Rome, his *Traiano in Dacia*, starring the castrato Velluti, defeated Cimarosa's much-loved classic *Gli Orazi ed i Curiazi* in a contest for popular favour. His operas were performed by the best virtuosos of the time, including (besides Velluti) Bonoldi, Pasta, Pisaroni and the young Catalani, who sang in *I baccanali di Roma* at La Scala in 1801. In 1816, when the administration of the Teatro Nuovo (thereafter the Teatro Comunale) passed from the Duchess Maria Luisa to the municipality of Piacenza, he was appointed for life to the service of that theatre by a special decree from the duchess, and from that time he wrote little for the stage. In 1819 he was elected *maestro di cappella* of the cathedral. In the meantime his fame had become obscured by that of Rossini, although in his final years he assimilated some of the features of Rossini's style. He abandoned the theatre completely in 1831 to devote himself to sacred music. During his last years, lack of means obliged him to serve in some of the choirs of his city; he died in poverty and forgotten. In 1914 Piacenza named its Liceo Musicale after him.

Nicomachus [Nikomachos] **of Gerasa** (*fl* late 1st – early 2nd century CE). Greek mathematician and music theorist. His *Introduction to Arithmetic* (*Arithmētikē eisagōgē*) won him high praise and instant fame in antiquity. This work and the *Manual of Harmonics* (*Harmonikon encheiridion*) have survived in their entirety; ten extracts (*Excerpta ex Nicomacho*, ed. Jan, 266–82) remain from a longer treatise on music, and portions of another work, *Theology of Arithmetic* (*Theologoumena arithmetikēs*), are preserved in an anonymous treatise of the same title.

The *Manual of Harmonics* is the only work on Greek music to have come down from the long period between the appearance of the *Harmonic Elements* of Aristoxenus and the Euclidean *Division of the Canon* in the 4th century BCE, and that of the *Harmonics* of Nicomachus's celebrated younger contemporary Claudius Ptolemy in the 2nd century CE. The *Manual* is important for its influence on numerous later writers, and especially for the canonical material that it alone preserves. It is the first work in the literature to transmit the time-honoured story of Pythagoras's momentous discovery that musical pitch is ruled by number. As Nicomachus tells it (chap.vi), Pythagoras's revelation was inspired by the ringing sounds he chanced to hear issuing from a blacksmith's anvil. Recognizing them to be the very concords – octave, 5th and 4th – that he could produce on the strings of his lyre, Pythagoras performed a series of experiments and found the elegantly simple truth about musical sound: the pitch from a plucked string depends on the length of the string, and the concords are produced by strings whose lengths are to each other as the ratios of the whole numbers: 6:8:9:12.

No less significant is Nicomachus's detailed account of the first unified theory of the cosmos. It contains what may be the most ancient version of the distinctly Pythagorean-Platonic concept that the harmonic properties of music, discoverable in the ratios of the concords, are implicit in the orderly distribution of the heavenly planets (*see* MUSIC OF THE SPHERES). Nicomachus's discussion of this theory, along with Plato's in the *Timaeus*, influenced astronomical thought for centuries, converging eventually with cosmic reality in the celestial physics of Johannes Kepler.

Nicomachus was the first writer on music to attribute the invention of the octachord (eight-string lyre) to Pythagoras (*Manual*, v); he is also the source (*ibid.*, ix) of one of the oldest pieces of evidence on musical scales, a fragment of Philolaus's *On Nature*, the first written document on the teachings of Pythagoras.

In his discussion of the inverse proportion that obtains between a sounding body and musical pitch (the higher the pitch, the smaller the body, and conversely) and the reciprocal relation between pitch and tension (the greater the tension, the higher the pitch, and conversely), Nicomachus provides (*Manual*, iv and x) valuable information on diverse musical instruments. The most exotic and obscure of the strings mentioned by him is the *spadix*, apparently a lyre-type instrument shaped like a palm frond. Equally interesting is his evidence on the pandoura, a lute of remote antiquity which he likens to the Pythagorean research instrument, the monochord.

Perhaps the most curious feature of the *Manual* is the incorporation (in chap.ii) into an otherwise strictly Pythagorean programme of a decidedly non-Pythagorean concept imported from the theory of Aristoxenus. For Aristoxenus's theory is based on the notion of a tonal continuum (*topos*) whose division by the placement of pitches and intervals is under the sole governance of the human voice and ear. In the conventional Pythagorean approach, however, the division of musical space is determined solely by the mathematical laws of harmonic proportion. Thus, without citing him, Nicomachus spoke the language of Aristoxenus, and in his effort to credit the Pythagoreans with the invention of all things musical, he attributed to them the very doctrine that is contravened by their mathematically based harmonic principles.

FLORA R. LEVIN

Nicosia, Paulo Caracciolo da. *See* CARACCIOLO, PAOLO.

Niculescu, Ştefan (*b* Moreni, Dâmboviţa, 31 July 1927). Romanian composer. He studied in Bucharest at the Royal Academy of Music (1941–6), the Polytechnic Institute (1946–50) and the Academy of Music (1951–7) under Andricu (composition), Jora (harmony) and Muza Ghermani-Ciomac (piano); he also attended the Darmstadt summer courses (1966–9) and Kagel's electronic music course in Munich (1966). In Bucharest Niculescu worked as a piano teacher (1958–60), researcher at the Institute of Art History (1960–63) and then lecturer in composition and analysis at the Academy of Music; he was made professor at the academy in 1993. He was composer-in-residence at the Deutscher Akademischer Austauschdienst in Berlin (1971–2), founder-director of the international Week of New Music, Bucharest, and guest lecturer at the Darmstadt summer courses in 1992.

Works such as the String Trio, Cantata II and Symphonies for 15 Soloists placed Niculescu at the forefront of the Romanian avant garde during the 1950s. Subsequently, he embarked on a study of heterophony. This led to a radical rethink of his composition technique and the application of modern mathematics (e.g. the theories of graphs and sets) in works such as Cantata III, Hétérophony and Heraclit's Aphorisms. During the 1970s and 80s he developed this interest further by creating new heterophonic shapes, but in a diatonic language dramatically opposed to the serial chromaticism of his earlier works. During the 1990s he attempted to fuse diverse trends, such as diatonicism and chromaticism; the natural harmonic scale and scales not built around octaves; heterophony and polyphony; homophony and melody; and the continuity and discontinuity of speech. His later works are often monumental in scale and have veered towards a new kind of sacred music, in which aspects of the Romanian Byzantine and similar traditions of the world are integrated and transfigured.

Niculescu is one of the most original Romanian contemporary composers of his generation. He has received many awards from the Romanian Composers' Union and Romanian Academy, and was made a member of the latter in 1993. Outside Romania he has received the International Record Critics Award (1985), the Herder Prize, Vienna (1994), and an award from the French Academy (1972 Prix d'Académie des Beaux Arts).

VIOREL COSMA

Nidaros. *See* TRONDHEIM.

Nidecki, Tomasz Napoleon (*b* Studzianka, nr Radom, 2 Jan 1807; *d* Warsaw, 5 June 1852). Polish composer, conductor and teacher. In 1822 he began to study the piano with Alojzy Stolpe, the violin with Józef Bielawski and the organ with Wilhelm Würfel; he also studied composition with Elsner at the Warsaw School for Music and Dramatic Art and in the Higher School of Music (1824–7) and was awarded a grant to study in Vienna (1828–31). There, in 1833, he became conductor of the Leopoldstadt theatre orchestra, and composed vaudevilles and musical comedies. In 1838 he returned to Warsaw, where he taught in the singing school attached to the Wielki Theatre; he was appointed deputy conductor of the opera, and in 1840 took over from Karol Kurpiński as director and permanent conductor. He staged a number of first Polish performances of operas: Bellini's *Norma*, Flotow's *Martha*, Moniuszko's *Loteria* and works by Donizetti and Verdi. In 1841 he conducted with great success Elsner's oratorio *Passio Domini Nostri Jesu Christi*. He acted as choirmaster for churches in Warsaw, and composed masses and other religious works; until 1850 he also taught singing in a Warsaw school. He translated Adam's opera *Le brasseur de Preston* into Polish.

WORKS

STAGE

first performed in Vienna, Theater in der Leopoldstadt, unless otherwise stated

Kathi von Hollabrun (Parodie, 3, K. Meisl), 11 March 1831

Schneider, Schlosser und Tischler, oder Wer das Glück hat, führt die Braut nach Haus (Posse, 3, A. Gleich), 30 July 1831

Der Waldbrand, oder Jupiters Strafe (Zauberspiel, 3, J.E. Gulden), 19 Dec 1833, excerpts, pf score (Vienna, 1835)

Versöhnung, Wohltätigkeit und Liebe (Gelegenheitsstück, 1, Meisl), 11 Feb 1834

Der Schwur bei den Elementen, oder Das Weib als Mann (Zauberspiel, 3, Gulden), 11 Oct 1834; as Przysięga na żywioly, Warsaw, 1845

IRENA PONIATOWSKA

Niebuhr, Johann. *See* NEUBAUER, JOHANN.

Niecks, Friedrich [Frederick] (*b* Düsseldorf, 3 Feb 1845; *d* Edinburgh, 24 June 1924). British music scholar and author of German birth. From his father, an orchestral musician, teacher and conductor at Düsseldorf, he learnt the elements of music and the violin, starting at the age of six or seven. He then studied with a local organist and, subsequently, under Wilhelm Langhans, Julius Grunewald and Leopold Auer (violin) and Julius Tausch (composition and piano). When he was 13 he made his first appearance as a violinist at a concert of the Musikverein at Düsseldorf, playing Bériot's second concerto; at about the same time he became a regular member of the theatre and subscription concerts orchestra, playing in it for more than eight years. Ill-health in his mid-teens, however, forced him to abandon a public career as a solo instrumentalist and he turned to teaching instead.

In 1868 Niecks was induced by Alexander Mackenzie to leave Düsseldorf and settle in Scotland, where later that year he became the viola player in Mackenzie's Edinburgh quartet, as well as organist and teacher at Dumfries. In 1875 a letter written to *The Monthly Musical Record* led to a permanent engagement with that paper, and in 1879 Niecks became a regular contributor to *The Musical Times*. Meanwhile his general education had been from private teachers, by self-tuition and at Leipzig University (1877–8), where he devoted his attention chiefly to philosophy, with a special leaning towards psychology and aesthetics, fine arts and history. He lectured at the Royal Institution in March 1890.

Niecks was appointed Reid Professor of Music at Edinburgh University (1891), a post he occupied for 23 years. There he conducted the last two of the annual Reid concerts (1892–3), which were then discontinued in favour of historical chamber music concerts each winter. He inaugurated the teaching of music in the university and also instituted a scheme of graduation in the subject, gaining the admission of women to his classes, which numbered well over 100 lectures in each session. He took British nationality in 1880, and in 1898 Trinity College, Dublin, granted him an honorary doctorate. In 1907 he married Christina Struthers, who edited his valuable biography, *Robert Schumann*, for posthumous publication. This and his earlier biography of Chopin (1888) were long considered classics in their subject areas. Niecks's correspondence and other documents relating to his life are held in collections in London and Edinburgh (*GB-Lbl*, *En*, *Er* and *Eu*).

ROBIN H. LEGGE/DUNCAN J. BARKER

Nieder, Fabio (*b* Trieste, 27 October 1957). Italian composer. He studied composition in Trieste with Giulio Viozzi (1973–81) and with Lutosławski in Croatia in 1977. Many of his compositions have been commended at festivals such as the Gaudeamus Week or have won first prizes; he teaches composition at the Trieste Conservatory. The characteristic middle-European ambience of his native city, with its mixture of Italian, German and Slav influences, has shaped his development as a composer. Sound, gesture and the spatial placing of the performers often acquire a symbolic value: improvization co-exists with canonic forms and mathematical structures (*Kresnick*, 1986). His economic approach exploits individual sounds and creates a static quality (*Diapente*, for string quartet explores the potential of the interval of a fifth). As well as quoting folk melodies (*Wåldgschroa*, 1996, which uses a yodel melody from Salzkammergut), Nieder also makes use of vocal techniques from various cultures (*Love Songs on a White Surface*, for soprano, baritone and 11 performers).

WORKS

LICIA MARI

Niederholtzer, Rupert. *See* UNTERHOLTZER, RUPERT.

Niedermeyer, (Abraham) Louis (*b* Nyon, 27 April 1802; *d* Paris, 14 March 1861). Swiss composer and educationist. He received his first music lessons from his father, and at the age of 15 went to Vienna to study with Moscheles (piano) and E.A. Förster (composition). In 1819 he went to Italy to study with Fioravanti in Rome and with Zingarelli in Naples, where he familiarized himself with the vocal writing of the Renaissance, and formed a lasting friendship with Rossini. It was on Rossini's advice that his first opera, *Il reo per amore*, was produced there in 1820, enjoying some success. The following year he went to Geneva, where he gave piano lessons and began writing songs, among them a setting of Lamartine's *Le lac*, which immediately became popular. From 1823 he lived in Paris, apart from a period in Brussels (1834–6) when he taught the piano at the institute founded by Gaggia. Soon after arriving in Paris and again due to the influence of Rossini, his stage works began to be performed there, but none of them was successful, not even *Robert Bruce*, in which Niedermeyer adapted to a French libretto Rossini's score for *La donna del lago*. After the failure of his last opera, *La fronde*, he devoted himself to sacred compositions. In 1853 he reopened the school of church music which Choron had founded in 1818; under the name of the Ecole Niedermeyer, it quickly established itself in the forefront of French musical education, assisted by a grant from the state. In addition to a general education, the pupils received tuition in plainchant and accompanying Gregorian chant. Saint-Saëns was one of its teachers, Fauré, particularly influenced by attitudes to modal harmony, one of its early pupils. In his *Traité théorique et pratique*, a treatise on the practice of plainsong (Paris, 1857, with several later editions), in which 'modern harmony is submitted to the form of the ancient modes', he collaborated with Joseph d'Ortigue, with whom he also founded a periodical for sacred music, *La maîtrise* (1857–61), whose purpose was to uphold the liturgical traditions of church music practice.

As a composer Niedermeyer was most successful in his secular songs and church music. He gave new life to the declining song genre and re-established close ties between the musician and the foremost poets of the time (Lamartine, Hugo etc.). Saint-Saëns wrote that Niedermeyer was the first to break the mould of the old-fashioned French *romance*, creating a 'new and superior genre, analogous to the German lied'. Indeed, he prepared the way for the 'mélodie française' of the next generation of songwriters, particularly Duparc, Debussy and Fauré. His gift for attractive melody and fluent style is also apparent in his sacred music; the famous sacred aria *Pietà, Signore*, usually attributed to Stradella, is now thought to be his work. He devoted himself energetically to a revival of traditional methods of performing the Catholic liturgy, particularly through the work of the Ecole Niedermeyer, which aimed to turn out church musicians with a comprehensive knowledge of both Gregorian chant and the works of the masters of vocal polyphony. In this emphasis, the school differed significantly from other music schools of that time.

WORKS

all printed works published in Paris

OPERAS

performed in Paris unless otherwise stated

Il reo per amore (op), Naples, 1820

La casa nel bosco (comic op, 1), Italien, 15 July 1828 (1877)

Stradella (opéra, 5, E. Deschamps and E. Pacini), Opéra, 3 March 1837 (1841)

Marie Stuart (opéra, 5, T. Anne, after F. von Schiller), Opéra, 6 Dec 1844 (1845)

La fronde (opéra, 5, A. Maquet and J. Lacroix), Opéra, 2 May 1853 (1877)

Music in: Robert Bruce (A. Royer and G. Vaëz), 30 Dec 1846 [rev. of Rossini: La donna del lago]

OTHER WORKS

Vocal: several masses incl. Messe solennelle (1860); antiphons, Ave Maria, motets, hymns; 10 mélodies (Lamartine, Pacini and others) (1858); Super flumina Babylonis, ps, 1858; Le lac (Lamartine) (n.d.); many romances

Ouverture de la dame de Montoreau, orch

Kbd (for pf unless otherwise stated): 2 divertissements (n.d.); Duo avec variations, pf, hp, op.1 (n.d.); 3 fantasias, opp.2–4 (n.d.); 5 sets of variations, incl. opp.5, 12–14 (n.d.) [mostly on themes from operas]; further arrs. from works by Rossini and Bellini; org works

Niedt, Friedrich Erhard (*b* Jena, bap. 31 May 1674; *d* Copenhagen, 13 April 1708). German composer and theorist. He came from a musical family and probably received his earliest musical instruction from his father, a harpist in Jena. On 14 April 1694 he matriculated at Jena

University, where he probably read law, and he also studied music with Johann Nicolaus Bach (J.S. Bach's cousin): he referred to himself in part i of the *Musicalische Handleitung* (1700) as 'Imperial Notary Public in Jena', but in the second part of the same work he described himself simply as 'musician'. According to Erich Wenning (*Chronik des musikalischen Lebens der Stadt Jena* (Jena, 1937), i, 71), Niedt left for Copenhagen shortly before 1700, but the earliest surviving mention of his presence there is on 7 May 1704, when he applied (unsuccessfully as it turned out) to become organist at the church of St Nikolai. He probably married about this time; a son, Friedrich Ludewig, was born to him and his wife Anna Dorethea in 1706 (*d* 1731).

Despite Niedt's obscurity, his few publications became surprisingly well known. This was the result at least partly of the interest of Johann Mattheson who published, after Niedt's death, part iii of the *Musicalische Handleitung*, as well as an extensively revised version of part ii in 1721. J.S. Bach borrowed for his own teaching purposes Niedt's rules for the thoroughbass (in part i), which are extant in a manuscript (in *B-Bc*) once owned by Bach's pupil Johann Peter Kellner, which includes a title-page and annotations in the hand of another of Bach's pupils, C.A. Thieme (see Schulze). Niedt's thoroughbass method has 12 short chapters, and presents concisely the fundamentals of the practice. Equally important is his lengthy introduction (24 pages), a satirically conceived narrative, rather in the style of such writers as Printz and Kuhnau, in which he described vividly the ultra-conservative state of contemporary musical training in Germany, especially the requirement that organists devote years of practice to the German organ tablature (see Strunk for a complete English translation).

Part ii of Niedt's treatise, *Handleitung zur Variation* (1706), contains substantive information about the practice of improvising over a thoroughbass, a technique of great value to organists in the 18th century. Numerous music examples show how to change simple bass progressions into various kinds of elaborate rapid passage-work. Equal attention is paid to keyboard techniques for varying chords in the right hand, and there are various demonstrations of how to improvise preludes as well as different dance pieces. Mattheson's revised second edition adds important data regarding the register dispositions of more than 60 north European, mostly German, organs.

Part iii of the *Musicalische Handleitung* concludes Niedt's practical manual for musical composition with instructions in counterpoint, canon, motet, chorale and recitative style. He also published *Musicalisches A, B, C* (1708), an elementary instruction manual incorporating much of the above materials. Although Niedt was active as a composer, his music is almost entirely lost. A motet, *Ich will aufstehen und suchen* (DDT, xlix–l), has a conflicting attribution to Nicolaus Niedt, an unrelated Thuringian composer.

WRITINGS

Musicalische Handleitung oder: Gründlicher Unterricht. Vermittelst welchen ein Liebhaber der edlen Music in kurzer Zeit sich so weit perfectioniren kan, dass er nicht allein den General-Bass nach denen gesetzten deutlichen und wenigen Regeln fertig spielen, sondern auch folglich allerley Sachen selbst componiren und ein rechtschaffener Organist und Musicus heissen könne.

GEORGE J. BUELOW

Niedt, Nicolaus (*d* Sondershausen, Thuringia, 16 Aug 1700). German composer and organist. He is first heard of in 1677, when he was engaged as a chancery clerk at the court of Schwarzburg-Sondershausen. From then until 1683 he was also municipal organist of Sondershausen, at the Trinitatiskirche. He died in poverty and without surviving relatives. He was one of the numerous competent church composers in the Germany of his day, and his music was known not only in Thuringia but as far afield as Silesia (according to *MattheseonGEP*), Strasbourg and Königsberg. His one publication, *Musicalische Sonn- und Fest-Tags-Lust* (Sondershausen, 1698), was the last big collection of German church music of the 17th century. It comprises 73 church cantatas, for every Sunday and feast day of the church's year, each consisting of the same three sections: first a biblical passage set in concerted style for five voices and five instruments, then a 'beautiful aria' from one of the gospels for two trebles and bass and finally a chorus. Niedt expressly intended them for performance in villages and for as wide a range of performers as possible. He and his publisher sought to achieve this by using only German texts, renouncing ambitious compositional techniques and demanding uniformly simple forces, which could be further reduced to make performance easier still. The music was very carefully presented: bar-lines were inserted, and for greater legibility the type was made to look like manuscript. In a modern edition (DDT, xlix–l, 1915/*R*) five Christmas and New Year songs from manuscript collections have been attributed to Niedt (the preface to his 1698 volume mentioned the existence of several other works in manuscript). Their bipartite form of trio (SSB or ATB) and five- or six-part concluding chorus resembles that of his printed works without the opening concerted section.

KARL-ERNST BERGUNDER

Niedzielski, Stanisław (*b* Rudki, 13 July 1842; *d* Warsaw, 4 March 1895). Polish baritone, choral conductor, singing teacher and composer. He studied the piano and music theory under Karol Mikuli at the music school of the Galician Music Society in Lemberg, then from 1863 at the singing school of the Vienna Hofoper; he also studied harmony and counterpoint under Franz Krenn. After a few performances in Graz Niedzielski returned to Poland; he made his début in *Halka* on 29 November 1866 in Kraków, where he remained until 1867. In 1872 he sang in and organized opera in Lemberg, and subsequently acted as director and conductor. He was artistic director and conductor of the Muza Society in Kraków (1875–86) and transformed it into a music society; he organized and conducted choral and orchestral concerts, and taught singing in the society's school. From 1886 until 1892 he lived in Warsaw, performing in opera and in concerts of the Warsaw Music Society, and working with Piotr Maszyński in the Lutnia choral society. In 1892 Niedzielski was appointed artistic director and conductor of the Łódź Lutnia, but he returned to Warsaw in 1894. His compositions include choral songs, for example *Maryś*, *Hejnał* ('Reveille') and *Pastuza fujarka* ('The Shepherd's Pipe'), and solo songs with piano accompaniment, notably *Na dobranoc* ('For Good Night'), *Piosenka Krzysi* ('The Song of Krzysia'), *Śpij Lili* ('Sleep Lili') op.29, Two Krakowiaks op.22, *Na jeziorze* ('On the Lake') op.34, Two *Dumky* op.32 and *Piosnki dla dzieci* ('Songs for Children', after M. Konopnicka) op.38.

IRENA PONIATOWSKA

Nie Er [Nieh Êrh] (*b* Kunming, Yunnan province, 15 Feb 1912; *d* Fujisawa, Japan, 17 July 1935). Chinese composer. Originally named Nie Shouxin, he was one of the leading composers of revolutionary songs in China in the early 1930s. After studying several Chinese instruments, including the *dizi* and the *erhu*, he spent six months as a soldier in 1928. He took up the violin and the piano, and in 1931 joined Shanghai impresario-composer Li Jinhui's Bright Moon Song, Dance and Theatre Troupe as a violinist. By 1933 Nie had joined the Communist Party and gained experience as a composer of film songs, and the following year he took a post with the Pathé (Baidai) Record Company in Shanghai, working on a succession of left-wing film projects until his death by drowning in 1935.

In his 37 songs Nie employs both a Western heptatonic and a Chinese pentatonic melodic language, sometimes together in the same song. March rhythms and fanfare motifs are common, and the mainly syllabically set texts are predominantly concerned with the expression of revolutionary sentiments. Many of the songs first appeared in films, and were widely used by left-wing activists in the conflicts with Japan in the 1930s as well as in subsequent political movements. While his early death robbed the Communist Party of a skilful melodist, it also provided them with a convenient revolutionary role model for subsequent generations of professional musicians. Nie's importance lies more in this symbolic aspect than in his specific compositions. Further information is given in Wang Yuhe: *Zhongguo jin- xiandai yinyuejia pingzhuan* [A critical biography of modern and contemporary Chinese musicians] (Beijing, 1992), 131–64.

JONATHAN P.J. STOCK

Niegehoff. *See* NIEHOFF family.

Niehaus, Manfred (*b* Cologne, 18 Sept 1933). German composer. He studied at the Rheinische Musikschule and at the Cologne Musikhochschule with Bernd Alois Zimmerman, among others (1954–61); he also read German philology at Cologne University. After teaching in Remscheid and Wuppertal (1962–3) he worked as dramaturg and director at the Württemberg Landesbühne in Esslingen am Neckar (1963–5) and as a freelance composer and producer (1965–7). In 1966 he received the Förderpreis in music of the City of Cologne. The following year he was appointed editor in the music department of West German Radio, where he was jazz editor from 1977 to 1989. He has also served as choir director, stage manager, producer and improvising violist for Gruppe 8, the Russian-German Composers Quartet and other ensembles. He is known chiefly for pieces of absurd or surrealist music theatre, small in scale, flexible in form and designed for studio or workshop venues. He has also worked intensively in music for amateur performers and has championed the deritualization of performance through 'open' concert forms and communal musical activities. As a member with Humpert of the Gruppe 8, he had a hand in the collective composition *Oktabus* (1969).

Nieh Êrh. *See* NIE ER.

Niehoff [Nyhoff; Nyeuwenhoff or 'Nyeuwenhuys' in the Low Countries, Niegehoff in Lower Saxony and Neuhoff in Franconia]. North Netherlandish family of organ builders of German origin. Active in the Low Countries, the Rhineland, Hessen and Franconia, it includes the brothers Heinrich [Hendrik] (*b c*1495; *d* 's-Hertogenbosch, Dec 1560) and Hermann (*b c*1495; *d* after 1546), Heinrich's son Nikolaus (*b* Amsterdam, *c*1525; *d* 's-Hertogenbosch, *c*1604) and Nikolaus's son Jakob (*b* 's-Hertogenbosch, *c*1565; *d* ?Cologne, 1626). The family originated in Münster; in 1540 Heinrich was called 'Hendrik van Munster' in 's-Hertogenbosch, and the authentic form of the name, Niehoff, is even now more common in Münster than anywhere else.

About 1520 Heinrich went to work for Jan van Covelens (*d* Amsterdam, 1532), whose workshop was in Amsterdam though the type of organs he built suggests that he originally came from the Rhine valley north of Cologne (the assertion that his surname was Franckens and that he came from Koblenz is erroneous). Heinrich won the master's approval and took over the business in 1533. He moved to 's-Hertogenbosch in 1538. In 1537 or 1538, on the instructions of the church of St Jan in 's-Hertogenbosch, he visited Maastricht and Liège to study the new type of organ being introduced to the Low Countries by PETER BREISIGER, who was working in Maastricht, and Hans Suys (*see* SUISSE), who was probably at Liège. He returned to 's-Hertogenbosch accompanied by Suys as his business partner. After Suys's death, at the latest in 1544, he took Jasper Johannsen [Brouckmann] (*d* 1558) of Münster as his associate. In 1561 Nikolaus Niehoff took over the business, which he conducted in partnership with Arnold Lampeler until 1573; he was eventually succeeded by his son Jakob.

Together with Suys, Heinrich Niehoff built the organ in the Oude Kerk, Amsterdam (1539–45; three manuals, 25 stops), which was later played by Sweelinck. Instruments built with Johannsen include those at Zierikzee (1547–9; two manuals, *c*18 stops), the Petrikirche, Hamburg (1548–51; three manuals, *c*35 stops), the Johanniskirche, Lüneburg (1551–3; three manuals, 26 stops; the case and several stops survive), and St Janskerk, Gouda (1556–8; two manuals, 18 stops; the case is preserved at Abcoude). Nikolaus worked in Cologne Cathedral (1569–73; three manuals, 25 stops), in Mainz Cathedral (1584–5) and elsewhere, and perhaps built the organ of the Johanniskirche in Hamburg (1567) which, rebuilt by Arp Schnitger, is now in Cappel, Wursten. Jakob built organs in the abbey at Steinfeld, Eifel (*c*1600; 13 stops extant), St Johann Baptist, Cologne (1613–15), and Würzburg Cathedral (1615–18; two manuals, 20 stops).

Heinrich Niehoff adopted the type of organ developed by Johann Kovelens, the first builder deliberately to incorporate a group of wide-scale pipes to contrast with the Principal chorus. Johann had taken up the store of new, 'alien' stops imported by Suys and had added these, together with the spring-chest principle, to the basic scheme of the north Rhineland organ. He divided the *Hauptwerk* into Principal (with Diapason, Principal, full Mixture and sharp Mixture) and *Oberwerk* (comprising the remainder of the flues – including the flute upperwork – and the reeds). There were, in addition, a *Rückpositiv* (with the same three groups of stops) and Pedal (with Trumpet 8′ and Flute 2′). The keyboard ranges were *F*′ to *a*″, *C* to *a*″, *F* to *a*″ and *F* to *d*′; and there were couplers from *Oberwerk* to *Rückpositiv* and from Principal to Pedal. This was the model also followed by two other Brabantine families of organ builders: the Lampelers of Mill (the brothers Arnold, Reinhard and Dietrich), who built instruments at St Lamberti, Münster (1573–9; three manuals, 25 stops), and Münster Cathedral (1585–8; three manuals, 26 stops), and the Hocque(t)s of Grave (Florenz and the brothers Nikolaus and Florenz), who built instruments at Cleves Abbey (1575), Trier Cathedral (1590–93, three manuals, 25 stops), Echternach Abbey (1605), and St Janskerk, 's-Hertogenbosch (1618–34; the case and some ranks of pipes survive). Heinrich Niehoff exercised a powerful influence on organ building in Hamburg.

HANS KLOTZ

Niel [Nieil, Nielle], **Jean-Baptiste** (*b* ?1690s; *d* ?1775). French composer. He is first heard of in 1720 when an *air* of his composition was published in the *Mercure de France*. He was a conductor at the Opéra while it was under the direction of Berger. But he was best known as the composer of the stage works *Les romans* and *L'école*

des amants, and was so listed (also as a *maître & musique*) in the 'Musicien vivant' section of the *Almanach des spectacles* until 1772.

Niel's *ballet-héroïque*, *Les romans*, was successfully performed at the Opéra in August 1736; subsequently another *entrée*, '*Le roman merveilleux*', was added, and the entire production was staged again the following month. *L'école des amants*, an opéra-ballet, was similarly well received in 1744 and expanded the next year. These are Niel's only two stage works. A third ballet, untitled, was rehearsed in 1735 but never publicly performed; and Fétis erroneously attributed Boismortier's *Les voyages de l'Amour* (1736) to him. Niel also composed some motets, which were performed at the Concert Français in May 1728 and at the Concert Spirituel in May 1742. His keyboard pieces, according to Briquet, are lost. His success has been attributed to the excellent presentation and performances of his stage works; though charming and at times reminiscent of Rameau, his music is not greatly distinguished.

WORKS

Stage works: Les romans (ballet-héroïque, prol, 3, M. de Bonneval), Paris, Opéra, 23 Aug 1736, rev. (prol, 4), Opéra, 23 Sept 1736 (Paris, 1736); L'école des amants (opéra-ballet, prol, 3, L. Fuzélier), Paris, Opéra, 11 June 1744, rev. (prol, 4), Opéra, 27 April 1745 (Paris, 1744)

Grands motets, both *F-Pn*: Lauda Jerusalem, Paris, Tuileries, May 1728; Omnes gentes, Paris, Tuileries, May 1742

Quand je plaisais à tes yeux, aria, 1v, bc, in *Mercure de France* (July 1720), 148

Pièces pour le clavecin, lost, cited in Privilège (1 Aug 1736)

Airs pubd in 18th-century anthologies

VIVIEN LO

Niël, Matty (*b* Maastricht, 23 Oct 1918; *d* Sittard, 7 May 1989). Dutch composer and music teacher. After a thorough grounding at the Maastricht Musieklyceum (with Alphonse Crolla, Benoit Franssen and Henri Hermans), he studied piano in Liège (1937–9) with Louis Closson and in Amsterdam with Alexander Borowsky (1939–41). Around that time he also studied composition with Badings. Hermans referred him to Webern in Vienna, whose private pupil he became (1941–3). In 1944 Niel completed his studies in Paris with Lesur and Messiaen. At the intercession of Hermans, he worked for the Limburg Regional Broadcast. He also taught at the music schools of Heerlen and Sittard and the music academies of Maastricht and Leuven. In 1978 he stopped teaching, devoting himself only to composition.

During his lifetime Niël had to endure incomprehension and ignorance, as a result of which performances of his works were infrequent. Nevertheless he pursued an independent path, going counter to public opinion. Most of his works remained unpublished and unperformed during his lifetime. A book on Niël and his music by Peter Soeters is in preparation; his manuscripts are held in the Maastricht Municipal Records Office.

HANS VAN DIJK

Niel [Nielle], **Pierre de.** *See* NIERT, PIERRE DE.

Nielsen, Alice (*b* Nashville, TN, 7 June 1868 or 1876; *d* New York, 8 March 1943). American soprano. Her year of birth is ordinarily given as 1876, but according to her death record, she died at the age of 74. She began as a singer in church choirs, and made her professional début in 1893 with the Pike Opera Company in Oakland, California. She was then engaged to sing at the Tivoli Theatre in San Francisco, where she soon became a favourite. Henry Clay Barnabee heard her sing, and offered her a position with what was then America's leading light opera company, the Bostonians. She spent two years with the ensemble, singing such roles as Maid Marian in De Koven and H.B. Smith's *Robin Hood* and Yvonne in Victor Herbert's *The Serenade*. After she left the troupe (taking with her several of its leading players and precipitating its demise), she starred in two operettas which Herbert composed especially for her, *The Fortune Teller* (1898; also in London, 1901) and *The Singing Girl* (1899). In 1902 she abandoned the popular musical stage to study opera in Rome. The following year she made her European début in Naples as Marguerite in Gounod's *Faust*. For a time she was popular at Covent Garden, where among many other roles she sang Mimì to Caruso's Rodolfo and Gilda to Victor Maurel's Rigoletto. Later she sang at the S Carlo, Naples, and the Metropolitan, and with the Boston Opera Company (1909–14). By World War I her popularity had waned, and she attempted a return to Broadway in Rudolf Friml's *Kitty Darlin'* (1917). The critical consensus was that her small, pure voice and youthful appeal had faded; she later played small parts in a few non-musicals, then quietly retired.

GERALD BORDMAN/R

Nielsen, Carl (August) (*b* Sortelung, nr Nørre Lyndelse, Funen, 9 June 1865; *d* Copenhagen, 3 Oct 1931). Danish composer. One of the most important and free-spirited of the generation of composers who straddle the 19th and 20th centuries, his music covers a wide range of styles, from Brahmsian Romanticism at the outset to a high-principled, personal brand of neo-classicism in his last years. He composed in virtually all the main genres of the time, but he is best known for his six symphonies, which significantly contributed to the renewal of the genre in the 20th century. In Denmark he has been equally revered for his large output of popular strophic songs, which helped to redefine the national song tradition. His activities as conductor, teacher and writer made him the most prominent and influential Danish musician of his time,

and although international recognition was sporadic in his lifetime, it has grown steadily since the 1950s, especially in Britain and the USA.

The outward defining points of Nielsen's career are his childhood on the island of Funen (1865–84), his studies and early freelance years in Copenhagen (1884–9), his post as second violin in the Royal Chapel (the opera orchestra resident at the Royal Theatre; 1889–1905), his conductorship of the same orchestra (1905–14; salaried from 1908), his years of marital crisis, renewed freelance activity and travel (1914–22), and his last decade (1922–31), when his creative activities were hampered by administrative duties and illness. The onset of the crisis years in 1914 is clearly reflected in his music. Until that time Nielsen's musical and philosophical horizons were steadily expanding; afterwards his continued explorations encountered increasingly inimical forces, leading to a more acerbic and concentrated style.

1. Early years. 2. Studies. 3. Career to 1914. 4. Career from 1914. 5. Posthumous reputation. 6. Scholarship. 7. Performance. 8. Chamber and solo instrumental music. 9. Orchestral music. 10. Songs. 11. Theatre and choral works.

1. EARLY YEARS. Nielsen was the seventh of 12 children born to Niels Jørgensen (1835–1915), a house-painter and amateur musician, and his wife Maren Kirstine, née Johansen (1833–97), in a village 15 km south of Odense on Funen (Fyn). This flat island, with its mainly mild climate, is sometimes known as the Garden of Denmark. In later life Nielsen admitted that he often had the sights and sounds of Funen in front of him when he composed, and in his charming autobiography, *Min fynske barndom* ('My childhood on Funen'), he tells of his formative musical impressions. Chief among these were the wistful songs his mother used to sing 'as if she were longing for something far away beyond the farthest trees of the land', and the wedding parties and festivities at which his father played violin and cornet, and in which the young Nielsen participated once he had sufficiently mastered the violin. Significantly, his earliest compositions, from about the age of eight or nine, were a lullaby (now lost) and a polka (notated in the autobiography). Alongside these fundamental contacts with song and dance, he developed a fascination with the underlying animating forces of nature and human character. These were to become constant sources of inspiration for his own music, as archetypal embodiments of oneness and conflict respectively.

His earliest encounter with classical music came through a local 12-piece amateur orchestra by the name of Braga (after a Nordic god of bards) founded around 1874. This gave him a special affection for the Viennese classics, which was to be another constant thread in his work.

Nielsen dictated his autobiography over a two-year period after his 60th birthday, and he made no claims for its detailed factual accuracy. Nevertheless, the essential outlines of his early life as he described them are undisputed. Following an unhappy three-month apprenticeship to a grocer in 1879, he joined a military orchestra in Odense, playing signal horn and alto trombone. From that time he received violin lessons from a local musician, played string quartets, and studied theory and the piano. He never became an accomplished pianist, but he composed at the instrument throughout his life.

Much down-played in *My Childhood* is the context of Denmark's social evolution. Following defeat in the 1863–4 war with Prussia, in which Nielsen's father was a conscripted soldier, territories in South Jutland were ceded (they were partially regained after World War I). The subsequent mood of wounded national pride was summed up in the slogan 'what has been lost on the outside must be won on the inside'. This was put into practice in the literal sense of land reclamation in Jutland, but it also inspired a strengthening of the social fabric of the nation, building on reforms already set in train after the European revolutions of 1848. Communal activities, liberal institutions and young talent were now carefully fostered. Outside the main cities the country remained extremely poor, and several of Nielsen's brothers and sisters emigrated in the 1870s and 80s to Midwest America, as did his parents (albeit briefly, from 1891 to 1894). But Nielsen himself benefited materially from the spirit of national resurgence when he was talent-spotted by dignitaries in Odense and sent to Copenhagen, where he successfully auditioned for a place at the conservatory. His sponsors, who continued to support him during and after his studies, included the schoolteacher Klaus Berntsen, later to be Danish Prime Minister.

2. STUDIES. Nielsen studied at the Copenhagen Conservatory from the beginning of 1884 until December 1886. He was not an outstanding student and he composed relatively little in these years. He did make steady progress as a violinist under Valdemar Tofte, however, and he received a solid grounding in theory from J.P.E. Hartmann and, most importantly, Orla Rosenhoff, whose exercises in harmony and counterpoint he carried out with some diligence. Rosenhoff was to remain a valued adviser in Nielsen's early years as a professional composer. In the 1880s the conservatory was headed by Denmark's best-known composer, Gade. However, Nielsen gained less from Gade's rather informal tuition in music history than from contact with the older man's generous personality, and from his negative example of a kind of smoothed-over-Germanic composing style that he was determined not to emulate. Equally important to Nielsen in these years were his contacts with fellow students and cultured families in Copenhagen, some of which would blossom into lifelong friendships. His background as a patchily educated country boy had left him with an insatiable curiosity for the arts, philosophy and aesthetics, as well as a highly personal, common man's point of view on those subjects.

3. CAREER TO 1914. Nielsen had progressed sufficiently as a violinist to be able to gain a place in the Royal Chapel, the orchestra of the Royal Theatre, in September 1889, three years after his graduation. This post in the second violins was to be a source of considerable frustration to him, but it provided his basic income for some 16 years. In the period between graduation and gaining this post, he made a modest living as a freelance violinist and teacher and enjoyed continued support from his patrons. Some of his string chamber works from this time were performed, including a Quartet in F which he took to mark his official public dêbut as a composer on 25 January 1888, although he had previously had an Andante tranquillo and Scherzo for strings performed at Tivoli Hall (17 September 1887). It was his subsequent Suite for Strings which made the biggest impression at its performance at Tivoli on 8 September 1888 and which he was to designate his op.1, with a dedication to Rosenhoff.

Nielsen had higher career aspirations than rank-and-file violinist. He was eager to travel and to sample cultural life in the great cities of Europe, and less than a year after gaining his post in the Royal Chapel he was awarded an Ancker scholarship of 1800 kroner, enabling him to spend a number of months in Europe. He left on 3 September 1890 and, to mark the occasion, began a diary, a crucial source for understanding Nielsen's developing sense of identity. In the course of many formative encounters during his nine-month tour he fell in and out of love with Wagner's music dramas, sharpened his views on music and the visual arts, and gained numerous impressions of the most famous performers and orchestras of the day. He revered Bach and Mozart, but was ambivalent towards much 19th-century music, judging it according to such criteria as manliness, healthiness and absence of self-pity, and so echoing contemporary debates over the relative merits of Brahms and Wagner and of Classicism and Romanticism.

In Paris he met and fell in love with the Danish sculptress Anne Marie Brodersen, also travelling on a scholarship. The couple toured Italy, marrying in Florence on 10 May 1891, before returning to Denmark at the end of June to pacify their somewhat startled parents and establish their professional and family life in Copenhagen. Nielsen then completed the First Symphony he had begun to sketch in Berlin. As well as being a love-match, the marriage was a meeting of minds. Anne Marie was a gifted artist, especially skilled in modelling animals in motion. She was also a strong-willed and modern-minded woman, determined to forge her own career, which she did with considerable success, receiving several important commissions and gradually winning a national reputation. During the 1890s and 1900s she frequently spent long periods at work on location, leaving Nielsen to cope with their three young children at the same time as fitting his composing around his duties in the opera orchestra. His anger and frustration at this state of affairs, which even led him to suggest divorce in March 1905, was sublimated in a number of works, notably those from around 1897–1904, sometimes referred to as his 'psychological period'. At this time his interest in the driving forces behind human personality crystallized in the opera *Saul og David* and the Second Symphony ('De fire temperamenter') and the cantatas *Hymnus amoris* and *Søvnen*.

As Nielsen's reputation grew through the 1890s, he found himself in demand for incidental music for the theatre and for occasional cantatas, which provided a welcome source of extra income. A reciprocal relationship grew up between his programmatic and symphonic works; sometimes he would find stageworthy ideas in his supposedly pure orchestral music; sometimes a text or scenario forced him to invent vivid musical imagery which he could later turn to more abstract use.

From 1901 he received a modest state pension of 800 kroner per annum (which rose over the years to 7500 kroner by 1927) to top up his violinist's salary and obviate the need to take private pupils. From 1903 he also had an annual retainer from Wilhelm Hansen Edition, his principal publishers until 1924.

Nielsen and his wife travelled together again in 1904 to Greece, this time on the strength of her Ancker scholarship. Here Nielsen had the chance to develop what was already a consuming interest in the culture of ancient Greece, and to feed his characteristically Scandinavian

1. Carl Nielsen

intense reaction to the South (see Alfvén's Second Symphony and Stenhammar's *Serenade*). The overture *Helios*, depicting the rise and fall of the sun over the Aegean Sea, was composed during this trip.

Nielsen's first assignment as a conductor was at the Odense Music Society on 16 October 1888 when he conducted his Suite for Strings (he repeated it the following May in Tivoli). After sporadic appearances in the 1890s, from 1905 he was occasionally invited to stand in for the Royal Chapel's two main conductors, Johan Svendsen and Frederik Rung, and in 1908 he succeeded Svendsen as second *kapelmester*. This was the beginning of his most financially comfortable but professionally stressful period.

From his early days as a composer Nielsen had been, as he acknowledged in 1908, 'a bone of contention ... because I wanted to protest against the typical Danish soft smoothing over. I wanted stronger rhythms and more advanced harmony.' He attracted a loyal and vociferous following in musical and intellectual circles, but sceptical voices were raised in the press. An enormous boost to his reputation came in 1906–7 with the comic opera *Maskarade*. It was at this time too that his most influential essays started to appear, on Mozart (1906) and on 'Words, Music and Programme Music' (1909), later to be collected in the volume *Levende Musik* ('Living Music'). Abroad he rarely achieved more than a *succès d'estime* for his compositions in his lifetime, although isolated pockets of enthusiasm were established, and he made a big impression, both as conductor and composer, in Sweden. His cause was energetically furthered by musician-friends such as Johan Julius Rabe in Sweden, Knud Harder in

Munich, Julius Röntgen (i) in the Netherlands and Emil Holm in Stuttgart.

The polarization of opinion was sharpened when it came to his conducting activities. His performances were praised for their energy and spirit, but he could also be an absent-minded and accident-prone conductor, and he was certainly no great technician, as reviewers were not slow to point out. Nevertheless, he was at the height of his physical powers in these years, and his creative self-confidence peaked with the Third Symphony and the Violin Concerto in 1911, which won over previously dissenting critics and enhanced his reputation as conductor. At the same time his *Strofiske sange*, deliberately aimed at renewing the national song tradition, were beginning to sweep the country.

When Rung died in January 1914, Nielsen was offended at not being offered the post of first *kapelmester*. After a series of difficult negotiations he resigned and left the Royal Theatre at the end of June, embarking on the career of a freelance musician for the first time in 25 years.

Nielsen and his family moved several times within Copenhagen before finally settling in 1915 in a state-owned house previously occupied by the sculptor Christian Gottlieb Vilhelm Bissen. This provided Anne Marie with a roomy, though damp and draughty studio and Nielsen himself with a study. But before they could enjoy stability there a crisis intervened.

4. Career from 1914. In the second half of 1914 the strains of constant separation and dual careers came to a head. Anne Marie already knew of a child Nielsen had fathered in his student years and whom she had offered to adopt. But he had had more than one extra-marital affair since that time, and he had fathered at least one more illegitimate child of whom she may never have known. When the truth of his latest lapse came to light, involving a governess to the children, it precipitated a breach in the marriage which was only to be healed eight years later. During most of that time the couple lived apart. This hastened Nielsen's encounter with a creative crisis which had been long brewing and which was to enforce a profound self-reappraisal. It was at least as powerful an influence as World War I (in which Denmark was neutral) and developments in his professional life. These three factors impacted strongly on the Fourth and Fifth Symphonies, arguably his greatest works.

The positive role of Anne Marie in Nielsen's developing outlook on life is not to be underestimated. She helped to define his central aesthetic preoccupations with movement, clarity, boldness and the essential drives of human nature, and it was precisely the multi-faceted strength of their bond which made its loosening so difficult to bear.

Cut off from the family and professional ties which had previously given him stability, Nielsen diversified his activities. In March 1915 he succeeded Franz Neruda as head of the Musikforening ('Music Society'), where he was contracted to conduct three or four concert programmes a season from 1915 to 1927. Apart from that he appeared mainly in Sweden, as guest conductor for Stenhammar at the Göteborg Orchestral Society from October 1918. In later life as his health deteriorated he occasionally handed over the baton to his son-in-law Emil Telmányi.

Also in 1915 he succeeded Otto Malling on the governing body of the Copenhagen Conservatory, teaching theory and composition there from 1916 to 1919. He had taken violin pupils from his student days onwards, but it was not until October 1893 that he had begun to give private lessons in composition. He generally followed the principles he had received from Rosenhoff, involving exercises in strict counterpoint after Fux and Bellermann and composition following classical models. He encouraged the study of counterpoint 'not in order to become learned and complicated, but on the contrary to achieve greater strength and simplicity'. Among his best-known pupils were Simonsen, Schierbeck, Jeppesen, Jørgen Bentzon, Høffding and Wöldike, all of whom would play a major role in propagating Nielsen's music and his aesthetic principles in the quarter-century after his death. Others such as Nancy Dalberg helped out occasionally as copyist and even co-orchestrator in projects such as the incidental music for *Aladdin*, composed reluctantly for the Royal Theatre in 1918. Shortly before his death he was appointed director of the Copenhagen Conservatory in succession to Anton Svendsen.

In 1925, when Nielsen was at the height of his fame, his 60th birthday was an occasion for national celebration. At this time he told a newspaper interviewer that he had never been able to make a secure living for himself as a composer. This apparently uncharacteristic comment caused widespread consternation and led to a break with his publishers, who had been under severe economic pressure since the war. In the longer term, however, it may well have contributed to an improvement in conditions for later generations of Danish composers.

The following year Nielsen had a serious attack of angina, a condition which had already forced him to slow down his activities early in 1922. Although not an orthodox believer – he had no belief in the afterlife and was criticized for presuming to write hymns without being a regular church-goer – he had a profound respect for religious texts, and often turned to them in times of crisis. This urge was related to his aesthetic commitment to purity and simplicity, and the two concerns bore fruit in late works such as the Three Motets and 29 Preludes for organ, culminating in the masterful *Commotio* for organ, modelled on the Baroque toccata. Nielsen's heart condition finally killed him on 3 October 1931. His funeral was an occasion for national mourning.

5. Posthumous reputation. Until the 1950s the international public and critics tended to equate 20th-century Scandinavian music with Sibelius, to the virtual exclusion of Nielsen. It was only after World War II, with the visit of the Danish Radio Symphony Orchestra to the Edinburgh Festival, the advent of the LP, and the appearance of Robert Simpson's classic book *Carl Nielsen: Symphonist*, that Nielsen's reputation began to take off in English-speaking countries. His centenary year in 1965, coupled with the advocacy of conductors such as Bernstein, gave him a further significant boost. With the growing disenchantment with a view of music history culminating in the Second Viennese School and the postwar avant garde, the way cleared for Nielsen to emerge as one of the most powerful and individual personalities demanding reassessment. Until the mid-1990s Germany and Austria still proved resistant, prompting the Danish government and artistic organizations to mount a concerted effort on behalf of Nielsen and others.

6. Scholarship. Few in-depth commentaries on Nielsen's music appeared in his lifetime, those that did

generally stemming from his pupils. Henrik Knudsen published a short guide to the *Sinfonia espansiva* (1913) which impressed the composer, but Povl Hamburger's article (translated in Miller, 1994) largely on the same work did not, since it dealt with technical details Nielsen had not been aware of in the process of composition. A landmark study was Simpson's book (1952, rev. 1979), which argued powerfully for the presence of 'progressive tonality' in Nielsen's major works. Simpson's aggressive championing of the composer, often at the expense of his contemporaries, influenced English-language commentaries for decades afterwards. Through the 1970s and 80s the leading Danish Nielsen scholar was Torben Schousboe, who published a series of invaluable documentary studies. More recently the American pianist and musicologist Mina Miller stimulated a new wave of English-language studies. Joint initiatives from the Carl Nielsens og Anne Marie Carl-Nielsens Mindelegat and the Danish Government led to the establishing of a Nielsen Museum in Odense in 1988 and to a new complete edition of the music from 1994, both of which have had a powerful and beneficial effect on Nielsen scholarship.

7. PERFORMANCE. No recordings survive of Nielsen conducting or performing his own music, but a number of Danish conductors and performers who worked or studied with him left recorded interpretations, notably the conductors Mogens Wöldike, Launy Grøndahl and Thomas Jensen, members of the Copenhagen Wind Quintet, and the violinist Emil Telmányi. Many of their interpretations are to be found on the series of 17 CDs issued in the 1990s by the Danish company Danacord. This series contains valuable transfers from 78s of early performances of the songs; undoubtedly the doyen of Nielsen singers was the tenor Aksel Schiøtz. In the 1960s a number of internationally renowned conductors took up Nielsen's cause, by far the most successful, albeit inconsistently so, being Bernstein. Composer-conductor Ole Schmidt made the first complete recorded cycle of the symphonies in 1973, and alongside Herbert Blomstedt and Simon Rattle he continued to give the most authoritative performances of the orchestral works up to the mid-1990s.

8. CHAMBER AND SOLO INSTRUMENTAL MUSIC. Nielsen's early compositions were principally in the field of chamber music, notably string quartets, which he could try out with his own friends. Composed just before and just after his conservatory years, these works are mainly in straightforward imitation-Viennese-Classical style and include an exercise modelled bar-for-bar on the first movement of Beethoven's op.18 no.1. Remarkably, in the light of Nielsen's later mastery of evolving key schemes, they tend to be very timid in their modulatory scope. Even his first two officially numbered quartets, which won him some acclaim, remained exceptionally conservative in terms of tonal layout; the F minor in particular is almost cantankerously rooted to its tonic, as he later admitted. At the same time as his first two quartets, Nielsen made his official début as a composer with his Suite for Strings, a charming, serenade-like piece with its roots in Grieg and Mozart, and featuring in its middle movement an irresistible waltz which epitomizes his gift for inventing fresh-sounding, memorable, diatonic tunes.

It was with the Third String Quartet (1897–8) that he achieved maturity in the medium, outgrowing the somewhat congested textures he had inherited from Franck and Reger and allowing the music to flow in its own idiosyncratic channels, albeit still within the confines of tonally-centred structures. The more relaxed Fourth Quartet (1906, rev. 1919), originally entitled *Piacevolezza*, is even more free-flowing. After that he composed no more string quartets, although he never ruled out the possibility of returning to the medium. His next significant chamber work was the Second Violin Sonata of 1912, a watershed piece which deliberately turns away from the solid stability achieved in the Third Symphony and Violin Concerto and prepares the way for his tougher late style. Nielsen returned to the violin for two of his most experimental pieces in the 1920s – the *Preludio e presto* and the *Praeludium og Tema med Variationer*, both written with his son-in-law Emil Telmányi in mind. Otherwise he turned his attention to wind instruments, producing the Wind Quintet in 1922 as a relaxation from the Fifth Symphony. This genial, melodious work has become one of the most widely played 20th-century pieces for its medium, and it inaugurated a way of composing based on the character of the individual instruments.

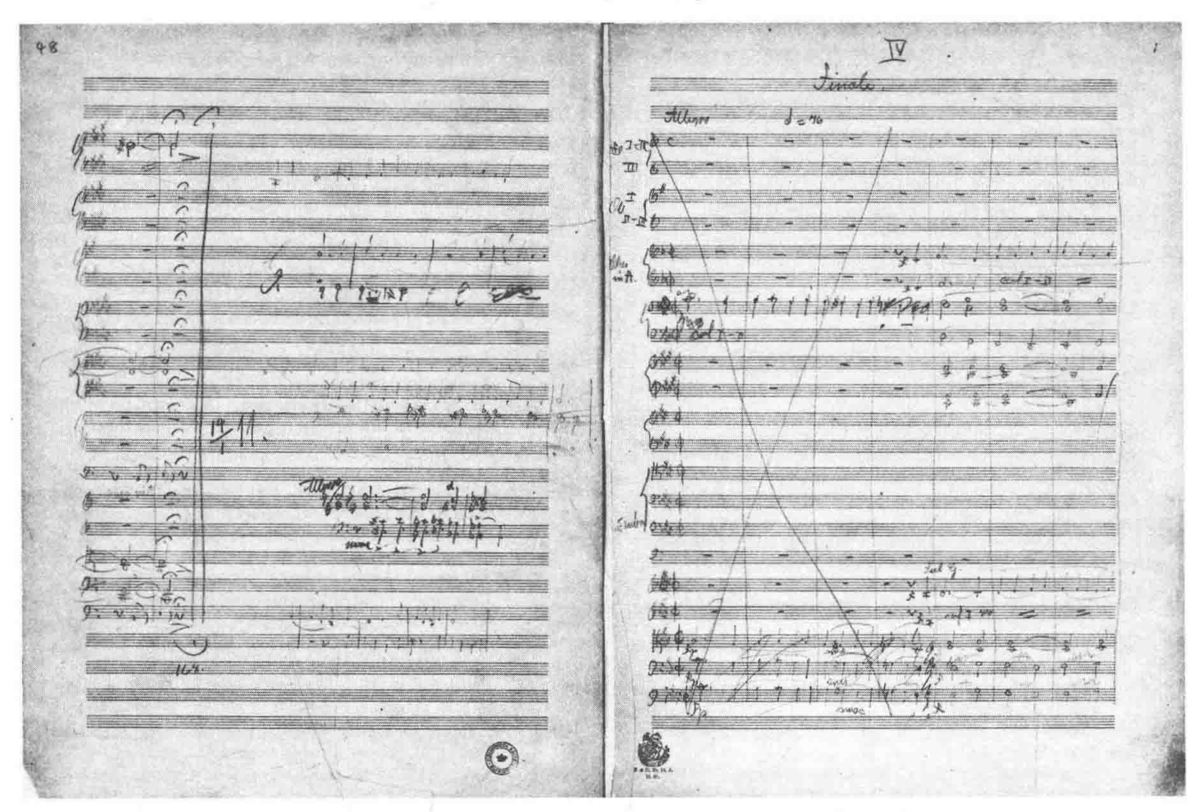
Nielsen composed at the piano throughout his life, but never felt comfortable as a performer on the instrument. His piano works, though high in quality, are to some extent laboratories for ideas which would flourish more freely in other media. His great work for organ, *Commotio*, is another matter. Modelled on Bach's toccata style in its alternation of fantasy and fugue sections, and building on Nielsen's study of Renaissance polyphony and organ style, *Commotio* is the inspired realization of his often expressed interest in a return to 'pure sources'. It also shows him on the threshold of new stylistic worlds which death prevented him from exploring.

9. ORCHESTRAL MUSIC. In 1888 Nielsen composed the first movement of a symphony. Now known, misleadingly, as *Symfonisk Rhapsodi*, this easy-going sonata form movement, excessively dependent, as he recognized, on the example of Svendsen's Second Symphony, prefigures a series of swinging, athletic triple-time symphonic movements which were to become one of his specialities. Two years later his diaries and letters reveal plans for an ambitious symphony with the programme 'From earth you have come; to earth you shall return'. Shortly afterwards, during his European trip of 1890–91, he conceived what would be his first completed symphony, though he did not complete it until a year after his return. The work was given its première by the orchestra of the Royal Chapel under Svendsen on 14 March 1894, and the young composer stepped out of the second violins to take the applause. The First Symphony is an impressive declaration of intent. For all its stylistic echoes of Brahms, Dvořák and Svendsen, its fundamental attitude is Beethovenian. The first movement in particular reflects Nielsen's admiration for the rhythmic drive and motivic economy of Beethoven's Fifth Symphony, a piece he had set himself the task of memorizing and writing out in full score. The overall structure derives its large-scale tonal design from the harmonic and melodic idiosyncrasies of the material, namely the interplay of G minor and C major, with E♭ as mediator. The work is notionally in G minor, but the coda to the finale drives into C major with a compelling sense of discovery and psychological achievement, made possible by a deep underlying logic. Such 'non-centric' (Reid), 'progressive' (Newlin) or 'emergent'

(Simpson) tonality has its roots in operatic structures and in certain instrumental works of Beethoven. Its possibilities were then notably explored by Chopin (Second Ballade, Second Scherzo, Fantasy) and it would be taken up, though more loosely, by symphonists as diverse as Mahler, Kabalevsky and Martinů. But it had never before been so boldly applied across the four movements of a symphony as by Nielsen. Just as important, though hardly acknowledged in musicological studies, is the interpenetration of modal and tonal elements, which accounts for much of the characteristic flavour of Nielsen's harmony and which reaches a peak of subtlety in the Fifth Symphony.

Nielsen's later symphonies show a steady broadening of philosophical horizons and a corresponding deepening of stylistic and structural innovation, all stimulated by life experiences and fertilized by other genres, notably tone poems and music for the theatre. Their progression through empathy to a concern with the life-force is a token of Nielsen's distance from contemporary issues of subjective versus objective and late Romantic versus modern. The Second, Third and Fourth Symphonies (1901–2, 1910–11, 1914–16) retain the traditional four-movement structure, but progressively subordinate it to psychological/dramatic concepts, summed up in their subtitles.

The Second Symphony ('De fire temperamenter') seeks to capture the essence of human character-types, one movement corresponding to each of the medieval 'humours'. In the outer movements dualistic oppositions are set out – the choleric personality regrets but cannot control his own anger, and the sanguine is afflicted by but ultimately learns from his moments of anxious reflection. By contrast the middle movements – the phlegmatic and the melancholic – are weighed down by the absence of such contrasts. This concept prompted explorations of stylistic excess, straining at the limits of Nielsen's Brahms–Dvořák inheritance. At the same time the dualistic movements paved the way towards more abstract principles of conflict, while the monistic ones led to a fascination with non-movement, the 'vegetative' principle as Nielsen later liked to call it, providing the counterpole to his overriding interest in movement and growth. This 'vegetative' state could be an expression of blissful oneness with nature, and as such it was poetically explored in the overture *Helios* (1903) and the tone poem *Saga-drøm* ('Saga-Dream', 1907–8); or it could be an expression of unhealthy emotional paralysis (Fourth, Fifth and Sixth Symphonies).



The Third Symphony, *Sinfonia espansiva*, embodies Nielsen's fascination with the life-force in general. This is reflected at various levels. The first movement's proliferation of tonalities conveys something of the untrammelled energy of the human spirit; Nielsen suggested that the finale could be taken as a hymn to work and the ordinary man; both outer movements are built on an overall perfect 5th ascent in tonality, a progression already associated with psychological growth in the finale of the Second Symphony. Even the pastoral slow movement confronts its initial vegetative inaction with the dynamic growth principle before concluding in an ecstatic nature-worship, embodied in vocalises for soprano and baritone soloists. This symphony of well-being has a close spiritual cousin in the first of Nielsen's three concertos, for violin.

The steady expansion of philosophical concerns in his symphonies was abruptly challenged by the crisis-period of war, career changes and marital disharmony. Stylistically the Third Symphony had already taken him to a threshold of a new language: 'We should once and for all see about getting away from keys', he wrote to Knudsen, 'but still remain diatonically convincing'. With his Fourth Symphony he strove to put this into practice with a more modern-sounding style, more fractured continuity and more provocative images of negativity, encapsulated in a battle between two sets of timpani placed diagonally opposite one another. The symphony's ethical concerns are summed up in the subtitle 'Det uudslukkelige' ('The Inextinguishable'), and the foreword to the published score coins the famous motto 'Music *is* Life, and, like it, Inextinguishable'.

Even more daringly, the Fifth Symphony of 1921–2, now widely held to be Nielsen's greatest masterpiece, pits a side drum against the full orchestra in its first movement, following this with a double-function finale in which the sonata development section is a controlled collapse, the interposed scherzo and slow movement convey panic-ridden stasis and thoughtful reconstruction, and the recapitulation channels energies away from formerly dangerous paths into positive life-assertion. The tone poem *Pan og Syrinx* of 1917–18 and the incidental music for *Aladdin* (1918) supplied him with some of the exotic harmonies and timbres which this symphony turns to more abstract, large-scale use.

Nielsen frequently stated his intention that his Sixth Symphony (1924–5) should be 'simpler' than its precursor. However, illness, disillusionment with his own lack of international success, and bewilderment at the state of modern music, clouded his mood. At the same time his ceaseless spirit of adventure was not to be denied. This *Sinfonia semplice* turned out to be the most complex and puzzling of his large-scale works. It may still be said to be about the aspiration towards simplicity, but it is held together by a recurring pattern of violated innocence. Such positive resolution as it enjoys has to do with acceptance, resignation and defiance. In a more relaxed, yet still exploratory vein, the Flute Concerto (1926) and Clarinet Concerto (1928) are studies in empathy, recalling the temperaments of the Second Symphony, but in more modernistic terms. They deal respectively in well-mannered elegance in the face of brute opposition, and in irascibility alternating with regret.

10. SONGS. If Nielsen's chamber and orchestral music epitomizes the exploratory, growth-orientated side of his nature, his songs contain the essence of his search for the 'simple original'. Before 1895 his favourite poets for song-setting were Jens Peter Jacobsen and Ludvig Holstein, and his settings were generally in a through-composed manner, reminiscent of Schumann, Grieg and the Danes, Heise and Lange-Müller. From 1905 onwards he turned towards simple strophic settings, very much influenced by the example of the organist Thomas Laub. With Laub from 1914 he set about renewing the national song tradition, aiming to produce songs which the man in the street could sing, and which had the 'semblance of the known'. The climax of their endeavours was in their extensive contributions to the *Folkehøjskolens melodibog*, published in 1922 and whose success confirmed a decisive reorientation of the Danish art song away from lied and romance styles towards folksong. From 1914 to 1916 Nielsen undertook

2. Autograph score of the close of the third movement (with sketches for the fourth), and opening of the fourth movement, from Nielsen's Symphony no.3 (Sinfonia espansiva), composed 1910–11 (DK-Kk Nielsen Samling 1946–7, 397.2°)

a similar reform project with church music, producing a collection of 49 *Psalms and Spiritual Songs*.

The subject matter of Nielsen's earlier songs crystallized around the amorous, the pastoral and the saga-like. To these he later added songs of national pride, much influenced by the incidental music he composed for more or less patriotic plays. But the type of song with which he became most identified embodied a celebration of the ordinary Danish man – adumbrated in 1894 in the fourth song of op.10, *Song behind the Plough*, and producing the enormously popular third of the op.21 *Strofiske sange*, *Jens the Roadmender*. Although the song caught on only in 1910, three years after its publication, it has since become known to all Danes and has been arranged for almost every instrument and combination of instruments.

11. THEATRE AND CHORAL WORKS. The success of the First Symphony in 1894 brought with it a commission for music to accompany Holger Drachmann's melodrama *Snefrid*, the first significant example of Nielsen's commissioned music for the theatre and occasional cantatas. These would serve three important functions in his career – as a source of income, as a means of making a tangible contribution to society, and as a stimulus to creating vivid musical images which could pass over into operas, choral works and even 'abstract' symphonic works. Of the many theatrical projects Nielsen undertook, some were mere *pièces d'occasion*, tossed off at high speed and sometimes orchestrated by one or other of his pupils. Other undertakings were both more original in their own right and more potentially useful as a quarry for symphonic projects, the most striking being the 90 minutes of music for a new production of Adam Oehlenschläeger's *Aladdin* in 1919. The production itself was an expensive failure, and Nielsen disowned the Royal Theatre's cavalier treatment of his music. But the imagery he had been forced to invent – of exoticism, imprisonment and violence – served him well in the more abstract contexts of his last two symphonies and the two great wind concertos.

Nielsen wrote numerous cantatas for special occasions. One of these, *Fynsk foraar* ('Springtime on Funen', 1921), has won popularity both inside and outside Denmark for its fund of memorable melody and its unaffected human sympathy. The two best-known earlier cantatas, *Hymnus amoris* (1896–7) and *Søvnen* (1903–4), neither of which was commissioned, are expressions of fundamental aspects of the human condition, paving the way towards the philosophical heights of the middle symphonies.

Nielsen's two operas are highly contrasted. His interest in the biblical story of *Saul og David* (1898–1901) centred on the conflict between divine will and human freedom, his sympathies lying as much with the God-cursing and God-forsaken king as with the God-fearing and God-favoured harpist-hero. Musically the opera is first-rate, but the score is almost too symphonically self-sufficient to allow for character interaction, and the oratorio-like deployment of the chorus also militates against stage productions. The comic opera *Maskarade* (1904–6) soon became, and remains, the Danish national opera. During the process of composition Nielsen felt he had become a mere vehicle for the piece, and this is reflected both in its apparently inexhaustible fund of melody and, less happily, in the comparatively loose structure of the second and third acts. The first act, however, contains arguably the finest comic opera music of the 20th century.

DAVID FANNING

Nielsen, Hans [Fonteio, Giovanni; Fonteijo, Giovanni] (*b* ?Roskilde, *c*1580; *d* ?Copenhagen, 1626 or later). Danish composer and lutenist. He was one of the group of Danes sent to Venice to study with Giovanni Gabrieli in 1599. After a year he returned to Copenhagen and was put in the charge of Melchior Borchgrevinck but was again in Venice for the period 1602–4. He then became a lutenist at the Danish court. During the years 1606–8, however, he was again studying abroad, this time at Wolfenbüttel with Gregorio Huet. From 1608 to 1611 he was once more a lutenist at the Danish court, but when the royal chapel was reduced because of the outbreak of war he took the opportunity to enrol as a student at Heidelberg University. He apparently stayed there for only a year and incurred debts. In 1623 he succeeded Mogens Pedersøn as deputy director of the royal musical establishment, Copenhagen, but on 15 December 1624 he either retired or was dismissed. The last record of him is a small payment of arrears made to him in May 1626 for expenses he had incurred on behalf of the choirboys who had been in his charge. As a composer he is known only by *Il primo libro de madrigali a 5 voci* (Venice, 1606), published under his italianized name Giovanni Fonteio. It contains 21 madrigals (one of which is also in RISM 1605[5], ed. in Dania Sonans, ii–iii, Copenhagen, 1966–7) and displays a fluent command of relatively up-to-date techniques found in the Italian madrigal. An incomplete motet, *Beati omnes qui timent Dominum*, which appears in a manuscript from the 1620s (in *PL-GD*) ascribed to Johannes Fontesio, may be by Nielsen.

JOHN BERGSAGEL/OLE KONGSTED

Nielsen, Inga (*b* Holbaek, 2 June 1946). Danish soprano. After studying in Vienna and Stuttgart, she made her début in 1971 at Gelsenkirchen; engagements followed at Münster, Berne and Frankfurt. She sang a flowermaiden at Bayreuth (1979); her roles at this period included Zerlina, Blonde, Ilia, Norina, Nannetta and Aennchen. She sang Donna Clara in Zemlinsky's *Der Zwerg* with the Hamburg Staatsoper at Edinburgh in 1983, later recording the role, and created Minette in Henze's *The English Cat* at Schwetzingen, repeating the role in the French and American premières of the opera in Paris and Santa Fe (1985). Nielsen sang Amenaide (*Tancredi*) at Wexford (1986), Konstanze at Salzburg and for her Covent Garden début (1987), Fiordiligi at Strasbourg (1989) and Christine (*Intermezzo*) at Geneva (1991). More recently, as her pure-toned, agile soprano has grown in volume, she has taken on such roles as Agathe, Salome, the Marschallin, Ursula (*Mathis der Maler*), which she sang at Covent Garden in 1995, and Elsa, which she first sang at Hamburg in 1998. Nielsen is equally active as a concert singer, and has recorded works including Bach cantatas and his *St John Passion*, Schumann's *Der Rose Pilgerfahrt* and Mahler's Eighth Symphony, in addition to roles in Mozart's *Il re pastore* and Heise's *King and Marshall*.

ELIZABETH FORBES

Nielsen, (Karl Henrik) Ludolf (*b* Nørre Tvede, nr Naestved, 29 Jan 1876; *d* Copenhagen, 16 Oct 1939). Danish composer. He moved to Copenhagen in 1892 to study the violin. At the Royal Danish Conservatory (1896–8) he studied with Valdemar Tofte (violin), J.D. Bondesen (theory) and Albert Orth (piano). As a composer he was self-taught, and his earliest compositions date from his first years in Copenhagen. From 1898 he was a viola soloist in the Tivoli orchestra, and from 1903 also assistant conductor. Active as a chamber musician, particularly in the Bjørvig Quartet, in 1903 he was one of the founders of the Association of Danish Composers. He

worked increasingly as a private instructor in theory and composition, and between 1914 and 1920 conducted the amateur symphony orchestra Euphrosyne. He was the first musical consultant for the newly formed Danish State Broadcasting Company (1926–32), and he composed and arranged a number of pieces for the radio orchestra.

Nielsen achieved his greatest success with his many romances, but the emphasis in his fairly extensive output is on orchestral music, which is generally of a high quality. Stylistically he expanded the Danish Romantic tradition by combining in an original way elements of symbolism, French Impressionism and German late Romanticism with the often national subjects of his works. His predilection for cyclic themes was unusual in Danish music of the period, and he seems to have been the first Danish composer to work with whole-tone and pentatonic scales. His later works increasingly emphasize counterpoint and bitonality. After the outbreak of war in 1914 he did not write music for a number of years. At that time, his most ambitious works, the Third Symphony and the choral work *Babelstaarnet* ('The Tower of Babel'), met with an indifferent reaction from the Danish public. His only notable success thereafter was the ballet *Lackschmi* (1921). From the 1930s Nielsen came to be regarded as conservative in musical circles, and after his death his works largely disappeared from the repertory.

JENS CORNELIUS

Nielsen, Ludvig (*b* Borge, Østfold, 3 Feb 1906). Norwegian composer, organist and conductor. After studies with Sandfold and Lange at the Oslo Conservatory, he attended the Leipzig Conservatory as a pupil of Straube, Raphael and Hochkofler (1931–2). He returned to Oslo to study with Steenberg and Walle-Hansen. He made his début as an organist in 1926 and as a pianist in 1930, both in Oslo. From 1924 to 1932 he was organist of the Høvik Church, in Baerum, Akershus Castle, and then at the Ris Church in Aker (1932–5). From 1935 to 1976 he was organist and conductor of the three choirs at Trondheim Cathedral. He taught at the Oslo Conservatory (1934–5) and at the Trondheim Music School (1942–76). Considered one of the finest of Scandinavian organists, he has given numerous recitals throughout Norway and Sweden. He has conducted annual performances of oratorios and passions in Trondheim Cathedral and ranks among his country's leading composers of church music. Among the awards he has received are the music prize of the Norwegian Culture Council (1976), the Lindeman Prize (1979) and the Culture Prize of the Municipality of Trondheim (1980). He is a Knight of the Order of St Olav (first class) and of the Order of Danebrog.

Nielsen's music is monumental and dignified, but also introverted and meditative. Key ingredients of his style are polyphony, Norwegian folk music and the music of medieval Norway, as are the use of ecclesiastical keys and leitmotif technique. His earliest works were influenced by Palestrina (e.g. in the organ works *Variasjoner over Ingen vinner frem til den evige ro* and *Oslofantasi*, both 1941); in the Te Deum (1945) a more national element is discernible, and *Messe på Olavsdagen* (1948) makes wide use of medieval material. In later compositions, such as the choral work *Fagnadagsongar* (1957), Nielsen's use of dissonance is more apparent; the oratorio *Draumkvedet* (1962) takes its material from the Middle Ages, and in the choral work *Lilja* (1978) freer tonality is employed.

KARI MICHELSEN

Nielsen, Riccardo (*b* Bologna, 3 March 1908; *d* Ferrara, 31 Jan 1982). Italian composer. A pupil of Carlo Gatti in Milan, he received a diploma in composition at the Bologna Conservatory in 1931. Between 1946 and 1950 he was superintendent at the Teatro Comunale in Bologna, and from 1952 director of the Istituto Musicale, later Conservatory of Ferrara. He won many prizes, including an Italia Prize in 1953 for his radio opera *La via di Colombo*. He published several editions of Renaissance and Baroque music.

As with many Italian composers of his generation, Nielsen's stylistic development passed from neo-classicism, under the influence of Casella (Sinfonia concertante, 1931) and Stravinsky (*Musica* for 2 pianos, 1939 and *Psalmus in confessione xcix*, 1941) to the rigorous application of 12-note procedures, beginning with *Musica per archi*, first performed at the Festival of Contemporary Music in Venice in 1946. Schoenberghian Expressionism is also evident in the surreal monodrama *L'incubo* (1948). Subsequently Nielsen moulded his serial processes to bring out recognizably tonal formations within simple, airy formal structures. Examples of this approach are the radio opera *La via di Colombo*, with its clear, stylish instrumental writing, and works of the early 1950s, such as the Sonata for two pianos and the two sonatinas for piano. Later he adopted a more radical Webernian rigour; his last works – *Varianti* and *Fasce sonore* – approach the integral serialism of the post-Webern avant garde.

ROBERTA COSTA

Nielsen, Tage (*b* Copenhagen, 16 Jan 1929). Danish composer. He had early instruction from Langgaard and took the MA in music and French at the University of Copenhagen (1953). He worked for Danish radio (1951–63), and in 1964 was appointed professor and principal at the Jutland Conservatory. As deputy chief of the music department of Danish Radio (1957–63) and in Jutland he has sought to make Danish musical life more open to modern music, and to displace the provincialism which threatened during the years after World War II. He was the director of the Danish Academy in Rome from 1983 to 1989, since when he has lived in Copenhagen.

He began his career as a composer in a traditional style (works of this period include the neo-classical Piano Sonata and Toccata for organ), but with the Two Nocturnes for piano (1960) he turned in a more adventurous direction determined especially by timbre. From this he developed a free avant-garde style, containing significant popular elements in such works as *Bariolage* for orchestra (1965) or the organ divertimento *Marker og enge* ('Fields and Meadows', 1971), and *Passacaglia* for orchestra (1981) which varies the Baroque *lamento* bass.

When in Rome he wrote a number of chamber music works, including *Paesaggi* for two pianos (1985), in which the sound element is exposed to the detriment of the thematic, and *5 operafragmenter* for 13 instruments, a preliminary study for his opera *Latter i mørket* ('Laughter in the Darkness') to a text by Nabokov, first performed in Århus in 1995 and later in Berlin, Innsbruck and Copenhagen. In this work, Nielsen creates a synthesis of the neo-classical and modernist aspects in his earlier works and brings in stylistic quotations as characteristic elements. This gives the music an ironic feature at the same time as underpinning the text's critique of civilization in its character depictions. He has written works involving Expressionist and neo-romantic elements such as the organ work *Lamento* (1993); this formed the basis for *Konzertstück for klaver og 11 instrumenter* (1998) in which a soloist and chamber ensemble contrast in tempo and character in a contemporary commentary on the slow movement of Beethoven's Fourth Piano Concerto.

JENS BRINCKER

Niemann, Albert (*b* Erxleben, nr Magdeburg, 15 Jan 1831; *d* Berlin, 13 Jan 1917). German tenor. He made his début

in 1849 at Dessau, singing small roles and chorus parts. After studying with Friedrich Schneider and Albert Nusch, in 1852 he was engaged at Halle. Two years later he moved to Hanover, where the king paid for him to study further with Gilbert Duprez in Paris. Having first sung Tannhäuser (at Insterburg) in 1854, Lohengrin in 1855 and Rienzi in 1859, he was chosen by Wagner to sing in the first Paris performance of *Tannhäuser*. He was granted a year's leave of absence from Hanover, his contract with the Paris Opéra running from 1 September 1860 to 31 May 1861 at a salary of 6000 francs a month. After the fiasco of the first (13 March 1861) and two subsequent performances, Wagner withdrew his score and Niemann returned to Hanover.

In 1864 Niemann made a very successful guest appearance in Munich, singing Tannhäuser, Lohengrin, Faust and Manrico (*Il trovatore*). From 1866 until his retirement in 1889, he was engaged in Berlin, where he sang in the first local performances of *Die Meistersinger* (1870), *Aida* (1874) and *Tristan und Isolde* (1876), also taking part in a gala performance of Spontini's *Olympie* (1879). He sang Siegmund in *Die Walküre* during the first complete *Ring* cycle at Bayreuth (1876) and in the first cycle given in London, at Her Majesty's Theatre (1882). It was also as Siegmund that he made his New York début at the Metropolitan (1886). During his two seasons there he sang in the first New York performances of *Tristan und Isolde* (1886), Spontini's *Fernand Cortez* (1888), and *Götterdämmerung* (1888). His last appearance in Berlin was as Florestan (*Fidelio*) in 1888.

Of immense physical stature, Niemann was unrivalled as Siegmund and Tristan during his lifetime. His powerful, heroic tenor voice could express, according to a contemporary, not only 'love and hate, sorrow and joy, pain and delight, but also anger, despair, scorn, derision and contempt'.

ELIZABETH FORBES

Niemann, Walter (*b* Hamburg, 10 Oct 1876; *d* Leipzig, 17 June 1953). German composer and writer on music. He came from a musical family. His father, Rudolph (Friedrich) Niemann (*b* Wesselburen, Holstein, 4 Dec 1838; *d* Wiesbaden, 14 May 1898), was a pianist and composer, a pupil of Moscheles and David in Leipzig, Marmontel and Halévy in Paris (*premier prix*, 1858), and von Bülow in Berlin, then worked at Hamburg (1864–83) and as a teacher at the conservatory in Wiesbaden; he was a virtuoso pianist and his compositions (opp.1–54) are in a fluent and expressive late Romantic style. Rudolph's brother Gustav Adolph Niemann (*b* Wesselburen, 6 Dec 1843; *d* Helsinki, 5 Dec 1881) was a violinist, a pupil of David at Leipzig and later a prominent figure in Helsinki musical life.

Walter Niemann was a pupil of his father, then of Humperdinck, and from 1898 at Leipzig Conservatory under Reinecke and at the University of Leipzig under Riemann, graduating with a dissertation on early ligatures and mensural music. He worked first (1906–7) as a teacher in Hamburg, then in Leipzig. He was briefly editor of the *Neue Zeitschrift für Musik*, but worked principally as teacher, composer, pianist and writer, serving as critic of the *Leipziger neueste Nachrichten*, 1907–17. Niemann was a prolific composer, especially for the piano (his opus numbers reach 189); at first influenced by Schumann and Brahms, he later admitted folksong and narrative elements, and drew too on impressionism and exoticism. He composed sonatas, educational music, dances and abstract works, but above all numerous character-pieces, often programmatic or portraying Nature.

Niemann was an outspoken and sometimes vitriolic critic, whose influence can be gauged from Max Reger's threat in 1910 to pursue a libel suit against him. An adherent of the *Heimatkunst* movement, he contributed to various *völkisch* periodicals, and he attached great importance to the discipline of ethnomusicology. He praised nationalist composers such as Pfitzner, Sibelius and MacDowell, while denouncing the 'pathological' and 'sensuous' music of Richard Strauss, Mahler and Schoenberg. Niemann's important biography of Brahms sought to distance the composer from his liberal milieu, placing him within the context of North German regionalism.

ROSE MAURO

Niemecz [Němec], **Joseph** [Pater Primitivus] (*b* Vlašim, 9 Feb 1750; *d* Vienna, 9 Jan 1806). Bohemian maker of mechanical instruments and viol player. He was ordained as a priest in 1776, taking the name of Father Primitivus. In 1780 he was appointed librarian to Prince Nikolaus Esterházy, with additional duties as viol player in the orchestra under the direction of Joseph Haydn. In 1795 he moved with the Esterházy household to Vienna. Niemecz became one of the most innovative of the Viennese clockwork barrel organ makers (*see* MUSICAL CLOCK), although there is no record of where he learnt

such skills. Haydn admired his mechanical ability and produced a number of pieces of music (H XIX) for him to transcribe on to his organ cylinders. Four of his organs dating from the early 1790s still exist, each playing various of these Haydn pieces. Niemecz also made instruments for Müller's Kunstkabinett, a Viennese exhibition for which Mozart wrote three pieces of music (K594, K608, K616), and Beethoven a further three. He is also said to have made a musical chair which played a tune when a person sat down on it, and a musical spinning wheel. A full account of his career is given in A.W.J.G. Ord-Hume: *Joseph Haydn and the Mechanical Organ* (Cardiff, 1982).

ARTHUR W.J.G. ORD-HUME

Niemetschek [Niemeczek], **Franz Xaver** [Němeček, František Xaver (Petr)] (*b* Sadska, Bohemia, 24 July 1766; *d* Vienna, 19 March 1849). Czech teacher and music critic. Born into a large and musical family, he attended the Gymnasium in Prague (1776–82) and studied philosophy at the university. He taught poetry at the gymnasiums in Plzeň (1787–92) and in the Malá Strana district of Prague, meanwhile developing his music publishing activities. In 1800 he was awarded the doctorate, and in 1802 appointed professor of philosophy at Prague University, where he also lectured on logic, ethics and pedagogy; among his pupils was the composer Voříšek. He also served as book censor and as director of the institute for the deaf and dumb. In 1819 he sided with the dean of the philosophical faculty, who was charged with having an undesirable influence on the students; and in 1820 he was formally transferred to Vienna and there prematurely retired at his own request. His estate, which included a rich correspondence with the Mozart family, was formerly in the possession of A. Richter of Portschach, Lower Austria, but is now lost.

Niemetschek was one of the earliest music critics in Prague. Among the first to appreciate Italian opera, he blamed Viennese Singspiel for the decline of musical taste in Prague. He saw in the works of Mozart the fulfilment of his aesthetic ideals; his monograph (1798), for which Mozart's widow lent him many documents, was the first independent publication on Mozart and has remained a valuable source, not the least of its interest lying in its revelation of the Bohemian enthusiasm for Mozart and his music and in Niemetschek's early appreciation of *Idomeneo* and other then little-valued pieces. He was also responsible for the posthumous edition of Mozart's works by Breitkopf & Härtel and other publishing firms. After Mozart's death he accepted responsibility for the education of the composer's son, Carl Thomas.

TOMISLAV VOLEK

Niemöller, Klaus Wolfgang (*b* Gelsenkirchen, 21 July 1929). German musicologist. He studied musicology (from 1950) with Fellerer at Cologne University, where he took the doctorate in 1955 with a dissertation on Nicolaus Wollick (1480–1541). After studying in Paris, Rome and Freiburg (1955–6) and holding an assistant lectureship at the musicology department of Cologne University (1958–64), he completed his *Habilitation* in musicology at Cologne in 1964 with a dissertation on music in Germany's Latin schools from the late Middle Ages to 1600. He then became a lecturer in musicology at Cologne University, supernumerary professor (1969), research fellow and professor (1970). He was subsequently made director of the musicology department of the universities of Münster (1975–83) and Cologne (1983–94). He is an active administrator (chairman of the Joseph-Haydn-Institut, 1977–; chairman of the Gesellschaft für Musikforschung, 1983–93; chairman of the Robert-Schumann-Forschungsstelle, Düsseldorf, 1983–; vice-president of the Nordrhein-Westfälischen Akademie der Wissenschaften, 1996–) and has edited many congress reports to which he has also contributed. He is a member of the editorial board of the new collected edition of Schumann's works. He was awarded the Dent Medal in 1971. He specializes in music theory, Renaissance music, 19th- and 20th-century composers (Schumann, Liszt, Shostakovich, Prokofiev, B.A. Zimmermann), the music history of the Rhineland, and interdisciplinary studies related to music and language.

HANS HEINRICH EGGEBRECHT/WOLFRAM STEINBECK

Nierop, Dirck Rembrandtszoon van (*b* Nieuwe Niedorp, North Holland, *c*1610; *d* Nieuwe Niedorp, 1682). Dutch amateur scientist. His manuscript notes (dated 1642–4) in a copy of Jacob Vredeman's *Isagoge musice* (1618; copy now in *NL-LE*) suggest that this book played an important part in his music education. It is said that he also benefited from talking to Descartes when the latter was at Egmond, near Alkmaar, around 1645–8. Van Nierop wrote many popular scientific books and booklets in Dutch, disseminating among laymen recent discoveries in, for example, astronomy, physics, mathematics and navigation. His brief music treatise *Wis-konstige musyka* ('Mathematical music'; Amsterdam, 1659) is of the same nature. In four sections, it includes the fundamentals of acoustics and musical proportions, instructions on the tuning of the cittern and harpsichord, and something about Greek music theory. Further musical material may be found in his *Tweede deel op de wiskonstige rekening* ('Second volume on mathematical calculus'; Amsterdam, 1680).

RUDOLF A. RASCH

Niert [Nyert, Niel, Nielle, Denièle], **Pierre de** (*b* Bayonne, *c*1597; *d* Paris, 12 Feb 1682). French nobleman, courtier, singer and singing teacher. He was an avid musical amateur whose interest in the Italian vocal revolution of the early 17th century had profound effects on French vocal music by the middle of the century. He visited Rome in 1633 in the company of Marshal de Créqui, French Ambassador to the Holy See; there he heard the new Italian style of dramatic singing in the operatic productions of the Barberini family and apparently became acquainted with a number of Italian singers and studied under them. He returned to France in 1635, became 'premier valet de la garde-robe' to Louis XIII in 1638 and later 'premier valet du chambre' to Louis XIV. He took part in *ballets de cour*, and one song by him survives (*Si vous voulez que je cache ma flame*, *F-Pn*). Luigi Rossi is said to have found his singing so moving that he wept (see 'Discours' added to B. de Bacilly: *Remarques curieuses sur l'art de bien chanter*, Paris, 2/1671 and subsequent edns only). By 1640 he had begun to have a profound influence on musicians of the French court such as Lambert and Bacilly, both of whom studied with him and adopted his italianate concerns for natural prosody, clear pronunciation, subtle declamation and a more sensitive approach to texts. He also urged that more agile diminutions be employed in the improvised variations of the second verses of *airs* and that they be better related to the meaning and structure of the poetry. His profound influence can be seen in the radical change in the style of *airs* after 1640 following his precepts and in the paeans of praise with which many court composers dedicated their works to him. He was also admired by several non-musicians, including Jean de La Fontaine, who in 1677 wrote an *Epître à M. de Nyert*.

Nieto, Miguel (*b* Reus, 17 Oct 1844; *d* Madrid, Aug 1915). Spanish composer. At the age of nine he was a member of the military band in which his father also served, and when he was 15 his first zarzuela, *La toma de Tetuán*, was given in Córdoba. He taught the piano in Badajoz from 1861 to 1863; for the next six years he conducted and taught the piano and flute in Valladolid. Settling in Madrid, he was choirmaster of the Teatro Rossini and Teatro Real, and was active as a conductor; most of his nearly 200 zarzuelas were composed during this period, including the very successful *Cuadros disolventes* (performed in 1896). A dance-tune from this work, *Con una falda de percal planchao*, became extremely popular in Spain. He also wrote an autobiography, *Memorias añejas ... que comprenden mi infancia y mi primera juventud hasta los 29 años* (Madrid, 1915).

ANTONIO IGLESIAS

Nietow, Gottlieb. *See* NITTAUFF, GOTTLIEB.

Nietzsche, Friedrich (Wilhelm) (*b* Röcken, nr Leipzig, 15 Oct 1844; *d* Weimar, 25 Aug 1900). German philosopher. His chief significance for the aesthetics of music is the distinction he drew between the 'Romantic' and the 'Dionysian' – a distinction which leads to the repudiation of Romanticism as an expression and product of sickness. The immediate application – and quite certainly what Nietzsche had principally in mind – is to the music of Richard Wagner. In 1868, when he was 24, he was introduced to Wagner, who was more than 30 years his senior, and became, as he afterwards wrote, 'one of the corruptest Wagnerians'. He was an intimate of Wagner's household and one of the most active advocates of Wagner's cause. His first published book, *Die Geburt der Tragödie aus dem Geiste der Musik* (1872), was regarded by its first readers, and by Nietzsche himself, as primarily a work of Wagnerian propaganda: to a subsequently very influential theory of the ritual origin of Greek tragedy, originally framed within the context of his classical studies and without any thought of Wagner, is appended a much inferior thesis that Wagnerian music drama represents a modern rebirth of tragedy – the final effect being to make the earlier sections of the book, in which its value in fact lies, seem only a preparation for the later. *Richard Wagner in Bayreuth*, published in 1876 to coincide with the inauguration of the Bayreuther Festspiele, attempts an analysis of Wagner's character and aims which is vitiated by the disciple's determined exaggeration of the significance of Wagner's art. But it is clear from the present knowledge of Nietzsche's biography that by 1876 it required an effort of will for him to continue to side so completely with the composer; during the festival itself this effort was no longer forthcoming and Nietzsche left Bayreuth, suffering from severe headaches, and began work on *Menschliches, Allzumenschliches*, in which Wagner is not mentioned by name but which contains many critical aphorisms on 'the artist' which obviously refer to him. Thereafter Nietzsche maintained a continuously sceptical attitude towards the pretensions of the Wagnerians and an increasingly critical evaluation of Wagnerian opera which culminated in *Der Fall Wagner* (1888), an extremely brilliant and ferocious attack which, without for a moment diminishing one's sense of Wagner's artistic importance, undercuts his every claim to greatness. This volte-face with regard to Wagner was explained by Nietzsche as the consequence of his having come to recognize that in evaluating Wagner's art so highly he had committed a specific error: the error of mistaking the Romantic for the Dionysian. 'With regard to all aesthetic values', he wrote in *Die fröhliche Wissenschaft* (book 5), 'I now avail myself of this principal distinction: I ask in each individual case "is it hunger or is it superfluity which has here become creative?"'. He explained this distinction:

Every art, every philosophy may be viewed as an aid and remedy in the service of growing and striving life: they always presuppose suffering and sufferers. But there are two kinds of sufferer: firstly he who suffers from superabundance of life, who desires a Dionysian art and likewise a tragic view of and insight into life – and then he who suffers from poverty of life, who seeks in art and knowledge either rest, peace, a smooth sea, delivery from himself, or intoxication, paroxysm, stupefaction, madness. The twofold requirement of the latter corresponds to all Romanticism in art and knowledge, it corresponded ... to Schopenhauer and Richard Wagner, to name the two most famous and emphatic Romantics which were formerly misunderstood by me.

Romantic music is neurotic: 'Wagner's art is sick ... *Wagner est une névrose*' (*Der Fall Wagner*). Against Wagner's music he sets that of *Carmen*, which seems to him 'perfect':

It approaches lightly, lithely, politely. It is amiable, it does not sweat. 'The good is easy, everything godlike runs on light feet': first proposition of my aesthetics. This music is wicked, cunning, fatalistic: it remains at the same time popular ... It is rich. It is precise. It constructs, organizes, finishes: it is therewith the antithesis of the polyp of music, 'endless melody'.

Carmen dispenses with 'the *lie* of the grand style'. He concludes: '*Il faut méditerraniser la musique*' and demands a 'return to nature, health, cheerfulness, youth, *virtue*' in music. Finally, in his autobiography *Ecce homo* (1888; published in 1908) he sums up: 'What is it I suffer from when I suffer from the destiny of music? From this: that music has been deprived of its world-transfiguring affirmative character, that it is *décadence* – music and no longer the flute of Dionysus'. This contrast between neurotic, decadent, perspiring Romantic music and healthy, light-footed, unburdened Dionysian music is sufficiently close to that drawn by the anti-Romantic reaction of the 1920s and later to make of Nietzsche a strikingly direct precursor of that reaction, and of the 20th century's repudiation in general of all that is overburdened, over-decorated and heavy in the art of the 19th.

It should be remarked that Nietzsche was an excellent pianist, and during his youth – roughly 1854–74 – an amateur composer: he published one later composition, *Hymnus an das Leben* (Leipzig, 1887), a setting for chorus and orchestra of a poem by Lou von Salomé. Some of his songs appeared in a critical edition (Leipzig, 1924), but until Janz's critical edition of all Nietzsche's surviving works, most of his compositions, including sacred and secular choral works and many piano pieces, were available only in manuscript (in *D-WRgs*). Late 20th-century recordings of some of his compositions have served only to make more clearly apparent their lack of individuality. A number of musical works have been based on or inspired by Nietzsche's writings, particularly by *Also sprach Zarathustra*; the most important of these are the fourth movement of Mahler's Third Symphony, Delius's *A Mass of Life* and Requiem, Diepenbrock's *Im grossen Schweigen* for baritone and orchestra, Rezniček's *Ruhm und Ewigkeit* for tenor and orchestra; songs by Delius, Medtner, Peterson-Berger, Ludomir Różycki, Schoenberg and S.I. Taneyev; and programmatic works by Campo (the string quartet *Las horas de Nietzsche*), Ingenhoven (*Symphonische Fantasie über Zarathustras*

Nachtlied) and Richard Strauss (the symphonic poem *Also sprach Zarathustra*).

R.J. HOLLINGDALE

Nieuwkoop, Hans van (*b* Voorhout, 16 July 1948). Dutch organist and organologist. He studied at the Amsterdam Conservatory with Albert de Klerk, where he was awarded the *prix d'excellence* in 1974, and won first prize in the Internationale Orgeldagen Rijnstreek in 1976. In 1978 he took his doctorate in musicology at the University of Utrecht with his dissertation *Haarlemse orgelkunst van 1400 tot heden*. In 1983 he was appointed to teach the organ at the Sweelinck Conservatory at Amsterdam. He also taught at the Antwerp Conservatory and was a member of the jury at several international organ competitions. As a performer van Nieuwkoop specialized in the period 1600 to 1750, and he made recordings on the historic organs in Alkmaar, Oosthuizen and Groningen. In 1997 illness forced him to stop playing in public and to relinquish his teaching duties. He has published studies of historic Dutch organs, and was editor of the encyclopedia *Het Historische Orgel in Nederland*.

GERT OOST

Niewiadomski, Stanisław (*b* Saposzyn, nr Lemberg [now L'viv], 4 Nov 1859; *d* Lwów [now L'viv], 15 Aug 1936). Polish composer, teacher and critic. He studied with Mikuli in Lemberg, with Krenn in Vienna (1882–5), with Paderewski (1885) and with Jadassohn in Leipzig. In 1886–7 he managed the Lemberg Opera, and from 1887 until 1914 he was professor of history, harmony, counterpoint and the piano at the conservatory; he contributed music criticism to periodicals in the city from 1885. During World War I he stayed in Vienna where he organized a music school for Polish refugees. In 1918 he returned to Lemberg as manager of the opera and editor of the *Gazeta muzyczna*. He was appointed professor at the Warsaw Conservatory in 1919. In 1924 he was founder-chairman of the Polish Society of Music Writers and Critics, and he was first chairman of the Section of Modern Polish Composers founded in 1915. Almost all of his abundant output was of vocal music. Along with Moniuszko and Gall he was one of the greatest Polish song composers: among European contemporaries he may be compared with Massenet, Saint-Saëns, Tosti and Rubinstein. His songs, many of which became extremely popular, are characterized by melodic richness, simple rhythm and colourful, but not exquisite, harmony; folk rhythms and melodic patterns are often incorporated.

WORKS

(*selective list*)

Songs: Pieśni i piosnki [Songs and Little Songs], opp.5, 23, 29, 37, 39, 40; Z wiosennych tchnień [Breaths of Spring], opp.11, 18; Jaśkowa dola [Jaśko's Fate], opp.14, 20–21; Kurhanek Maryli [Mary's Tombstone], op.24 (*c*1928); Chansons d'avril, op.46; Słonko [The Sun], op.49; Maki [Poppies], op.50

Arr. songs: Polskie pieśni żołnierskie [Polish Soldiers' Songs], op.42; 12 polnische Volkslieder, op.43; Z wysokich Parnasów [From Parnassian Heights], op.48; Jadą ułany [The Mounted Guard are Coming]

Other works: 2 syms.; 4 ovs.; Str Qt, d; Thème et variations, d, pf (1928); choral works

TERESA CHYLIŃSKA

Niger (Fr. République du Niger). Country in West Africa. It has a total area of 1,186,408 km², and a population of 10·8 million (2000 estimate). Like its neighbour Mali, Niger is situated between Arab cultures to the north and sub-Saharan African to the south. A sovereign state since 1960, Niger is historically, linguistically and culturally diverse and is far from possessing a unified national identity.

1. LANGUAGES, ETHNIC GROUPS AND HISTORICAL BACKGROUND. Four languages with subdialects are spoken, each belonging to one of the major African language families: Hausa, Songai-Dyerma (Songhai-Dyerma), Tamajeq (Tamachek) and Fulfulde. There are at least four major population groups – Hausa, Songai-Dyerma, Tuareg and Fula (Fulani or FulBe) – and within each subgroups are recognized. Several minorities are also known, such as the Manga in the far south-east, who speak Hausa, but are culturally akin to the Kanuri. Also to the east of Zinder live a number of Kanuri-speaking peoples formerly known as 'Beriberi' (now considered a derogatory name), and small communities of Kanembu and Buduma on the shores of Lake Chad.

Despite this cultural and linguistic diversity, several factors account for a certain degree of homogeneity in the musical traditions of the country. Most of the area, from at least the 11th century, had slowly come under the homogenizing impact of Islam, even though important pockets of resistance to Islamicization continued to persist into the 19th century and even to the present. Several waves of powerful centralized states (most notably the Songai empire in the 15th–16th centuries and, to a lesser extent, the empire of Ghana in the 9th–11th centuries, the Hausa states from 1400 to 1800 and the Sokoto caliphate in the 19th century) have imposed a certain cultural uniformity and facilitated the spread of certain goods (including musical instruments) and practices associated with the ruling dynasties to the dominated groups, such as the display and glorification of chiefly power in musical performances. A third factor contributing to the cross-cultural mixing of performance styles and musical instruments is the high degree of nomadism in the area and the existence of old networks of long-distance trade linking the Guinea Coast and North Africa.

2. MUSIC OF THE MAIN ETHNIC GROUPS. For further information on each of the four main ethnic groups *see* HAUSA MUSIC, SONGAI MUSIC, FULBE MUSIC and TUAREG MUSIC.

(i) Hausa. The Hausa comprise a cluster of populations living in the southernmost strip of the country who speak Hausa and who mostly identify themselves as belonging to one of several historical centres of Hausaland, e.g. Katsinawa and Gobirawa from the kingdoms of Katsina and Gobir, respectively, Aderawa from the region of Ader etc. Others, such as the Anne of the region of Maradi, consider themselves to be in a different category because of their allegiance to cultural and religious practices predating the Fulani conquest and Islamic *jihad* (holy war) of 1804–11. Not strictly Hausa, but speaking the Hausa language, are a number of Arabic groups called Mauri, who live north of Dosso. Differences between these groups with regard to music are minimal and relate mostly to dance styles, lyrical content of songs and, less frequently, to musical instruments and musical structure.

An important feature of Hausa musical life is the existence of musical professionals, often incorrectly referred to as *griots*, who are allocated a particular position within society. Strictly speaking, even the use of the term 'professional' for these individuals can be misleading, since the degree of economic specialization does not always coincide with their assigned cultural role. Thus, many professional performers may actually derive most of their income from farming, while a farmer who depends on extra money earned through praise-singing will not usually be considered a professional praise-singer. Instead, Hausa think of certain forms of music-making as *sana'a* (a craft), a designation that refers more to certain normative social behaviour, such as particular marriage restrictions and hereditary rules, than any marked degree of economic specialization. Even the term 'music', in this context, can be misleading, since certain crafts may include performers of instrumental music and singers but also persons whose speciality would be more properly considered as speech-related.

Several categories of crafts involve various forms of instrumental and vocal performance corresponding more or less to Western notions of music. The most generic term for such a performer is *maka'di*, i.e. someone who does *ki'di* (drumming and, by extension, handling of any other musical instrument). Although *maka'da* (pl. of *maka'di*) occupy the lowest rank among all crafts groups, there are numerous recognizable subdivisions within the *maka'da* class that mirror the stratification of Hausa society. The highest-ranking *maka'da* are those associated with the kings and *sarakuna* (chiefs), followed by those performing for *noma* (farmers) and *maka'da* whose patrons are butchers, traders and *yam mata* (young girls). The least prestige is attached to *maka'da* performing for *yam bori* (adepts of the *bori* cult), prostitutes and other *maka'da*. All these performers seek permanent relationships with their patrons that often last for generations. Another category of performers are *marok'a* (sing.: *marok'i*). They are considered beggars who derive their income from eulogizing the rich and powerful in song and speech and who, unlike the *maka'da*, do not attach themselves to a particular patron.

(ii) Songai-Dyerma. Although the Songai language belongs to a completely different language family, Songai-Dyerma music shares many of the characteristics of Hausa music. No systematic study of it has yet been undertaken. By contrast, the *holey* possession cult of the *hauka* spirits has been the object of considerable scholarly inquiry, primarily by anthropologist Paul Stoller and film maker Jean Rouch, whose works also contain useful information on Songai-Dyerma musical performance (see §4 below).

(iii) Fulani. The Fulani in Niger are part of a large group of mostly cattle-owning people distributed widely over

West Africa. The origins of today's Fulani groups in Niger (e.g. Jelgoo'be) lie in Masina in contemporary Mali, from where they migrated east in the 15th century. Hence, it is with the musical traditions of the Fulani of Mali that there exist numerous similarities. Monophonic, pentatonic call-and-response singing dominates, and instrumental accompaniment frequently involves the use of a *sereendu* (flute), *teekuluwal* (reed-pipe), hand-clapping and calabash *tummude* (drums) or gourd rattles.

A number of nomadic groups (Wodaabe and Weweebe) collectively known as Bororro form an important subgroup of the Fulani. Although they speak Fulfulde, their social organization and culture differ substantially from those of their Fulani neighbours. Most prominent among their performance genres are dances such as *ruume*, *yake*, *bamoul* or *lilore*. Danced and sung by youths during major annual festivals such as the *geerewol*, these genres feature restrained leisurely movements and are characterized by call-and-response structures and the accompaniment of elaborate hand-clapping patterns.

(iv) Tuareg. The principal Tuareg group living in Niger is the Kal (Kel) Gress, and it has been claimed that subtle differences exist between their music and that of other Tuareg groups in neighbouring Algeria. As with the Tuareg of Algeria, poetry is the basis of all musical performance in Niger, and the various poetic metres (*ilaner jalla*, *seienin*, *heinena* etc.) determine numerous aspects of Tuareg song. Each song is said to be based on a *tuit*, a model of melodic and rhythmic patterns that combines the essential features of a poetic metre with certain melodic formulae used within and at the end of each verse.

The principal performance genres are *tindé nomnas*, female praise-songs, and *tindé n'gouma*, songs for spirit possession. These genres derive their names from the drum *tindé* that consists of a mortar covered with a goatskin that the performers pull tight at both ends. The corresponding male genre is an unaccompanied solo song called *tichioue*.

3. Musical features and instruments. Features common to the musical traditions of all peoples in this zone are: a monophonic structure with the occasional element of harsh-sounding heterophony, a strong admixture of Arab-influenced melisma and traces of chromaticism, and a rudimentary polyrhythmic structure. Equally prominent in all groups is a high degree of specialization. Among the Tuareg there is a small number of skilled and renowned female players of the *imzad* (bowed lute), while the Songai-Dyerma and especially the Hausa have adopted a complex system of craft groups that comprises a variety of musical specializations, such as praise-singing, drumming for public dances, begging etc.

Throughout the area, with the exception of the Fulani-Bororro, who do not seem to use any musical instruments other than the *bomboro* (jew's harp), there is a great variety of musical instruments, including the following major categories: mono- and polychord lutes (Hausa: *garaya*, *molo*; Fulfulde: *molooru*; Songai-Dyerma: *kuntiji*); single-string bowed lutes (Hausa: Goge; Tuareg: *imzad*; Songai-Dyerma: *goje*; Fulfulde: *gegeeru*); calabash drums (Hausa: *kwarya*; Fulfulde: *tummude*; Songai-Dyerma: *gasi*); single-head gourd drums (Hausa: *duma*), single- and double-head hourglass drums (Hausa: *kotso*, *kalangu*, *kazagi*; Songai-Dyerma: *doodo*); end-blown flutes (Tuareg: *sarewa*; Fulfulde: *sereendu*). Most of these instruments can be considered indigenous to West Africa; the alleged Arab origin of the bowed lute may be disputed.

Other instruments of North African origin that came with Islam and are found wherever there is a chiefly court include large double-headed cylindrical drums (Hausa and Songai-Dyerma: Ganga); long metal trumpets (Hausa: Kakaki), the oboe Algaita and a variety of kettledrums of different sizes.

4. Music and society. Music is an integral part of social life, and in each ethnic group it facilitates the celebration of major social and political events affecting the community (public holidays, ceremonies concerning the traditional chiefs and authorities, and the Islamic festivals of *'Īd-al-Fiṭr* and *'Īd-al-Adhā*). Music also marks the various stages of the life-cycle (most significantly at weddings) and accompanies key economic activities such as farming, harvesting, hunting and fishing. Smaller occupational groups such as blacksmiths, tanners and prostitutes are also frequently associated with specific performance genres. Two aspects of music's social uses are detailed below.

Practically all performance genres in Niger involve some form of eulogizing of individuals (and frequently of cattle and camels). Praising is an essential means of establishing and validating power relationships, and genres in which praise is expressed are important markers of social position. The act of praise-singing is not the exclusive domain of professional performers but is also widely used as a form of respectful address among ordinary

1. A bori ceremony in Maradi, 1979 (the spirit seen in the picture is 'Dan galadima)

2. *A woman (under blanket) being initiated into the bori cult, Riadi, 1979*

performers, forming a part of many social events such as evening dances, wedding ceremonies etc.

Since Islamic liturgical practice, strictly speaking, excludes any kind of music (chanting of Qur'anic verses and religious hymns are excluded from the definition of music), Hausa, Songai-Dyerma, Tuareg and, to a lesser degree, Fulani use music primarily in connection with spirit-possession rituals. The Hausa *bori* and the Songai-Dyerma *hauka* cults are among the most widespread of these rituals (figs.1 and 2). Numerous varieties of these cults are found that depend on the nature of the spirits invoked, and the types of songs and musical instruments used vary accordingly. The predominant instruments, however, for both *bori* and *hauka* ceremonies are the bowed lute *goge* or *goje* and the calabash drums *kwarya* or *gasi*. The latter are beaten with wooden sticks among the Hausa and with a brush among the Songai-Dyerma. Also, among the latter the calabash drums are suspended over a large hole in the ground to increase resonance.

5. MODERN DEVELOPMENTS. The influence of Western popular music on Niger has been limited. Malian pop singers are popular in cities such as Niamey, and some modern pop bands from Benin play in a small number of clubs in Niamey. Groups performing in Songai-Dyerma or Hausa are extremely rare. In recent years, the Centre El Hadj Taya under its director Alhaji Mahaman Garba, a well-known Maradi-born singer, has begun training students in Western music and jazz performance.

6. RESOURCES. Collections of musical instruments are found at the Musée d'Ethnologie in Niamey and at the Musée d'Ethnographie of Neuchâtel, Switzerland. Historically important recordings of Hausa, Fulani, Songai-Dyerma and Tuareg music were made in the 1950s and 60s by the French Office de Coopération Radiophonique (OCORA) and in part released on its label, a tradition that has since been discontinued. Major holdings of unpublished sound and video recordings are found at the Museum für Völkerkunde, Berlin, and at Westdeutscher Rundfunk (WDR), Cologne. French cinematographer and ethnographer Jean Rouch made numerous films of the Songai *holey* (most notably *Yenaandi de Ganghel*, *Dongo horendi* and *Les tambours d'avant: Turu et bitti*) that include important material on music.

VEIT ERLMANN

Niger, Franciscus [Negro, Pescennio Francesco] (*b* Venice, 17 April 1452; *d* after 1523). Italian theorist and humanist. His studies at Venice and Padua were encyclopedic and naturally included music. He is primarily known for his grammatical treatise *Brevis grammatica* (Venice, 1480 and later editions), which includes five monophonic musical settings appropriate for different Latin metres: hexameters ('heroica gravis' and 'heroica bellica'), elegiacs, sapphics and a remaining category called 'lyrica'. Printed without staves, these are the first examples of printed mensural notation, as well as the first humanistic odes. Niger is also the author of a lost *Musica praxis*. His *Cosmodystychiae libri XII* (*I-Rvat* Vat. lat. 3971), sent to Pope Leo X in 1514, includes two sections on music: one repeats that in the *Brevis grammatica*; the other, on mensural music, is based largely on Johannes de Muris' *Libellus cantus mensurabilis* but also includes a division of the monochord (Gallo).

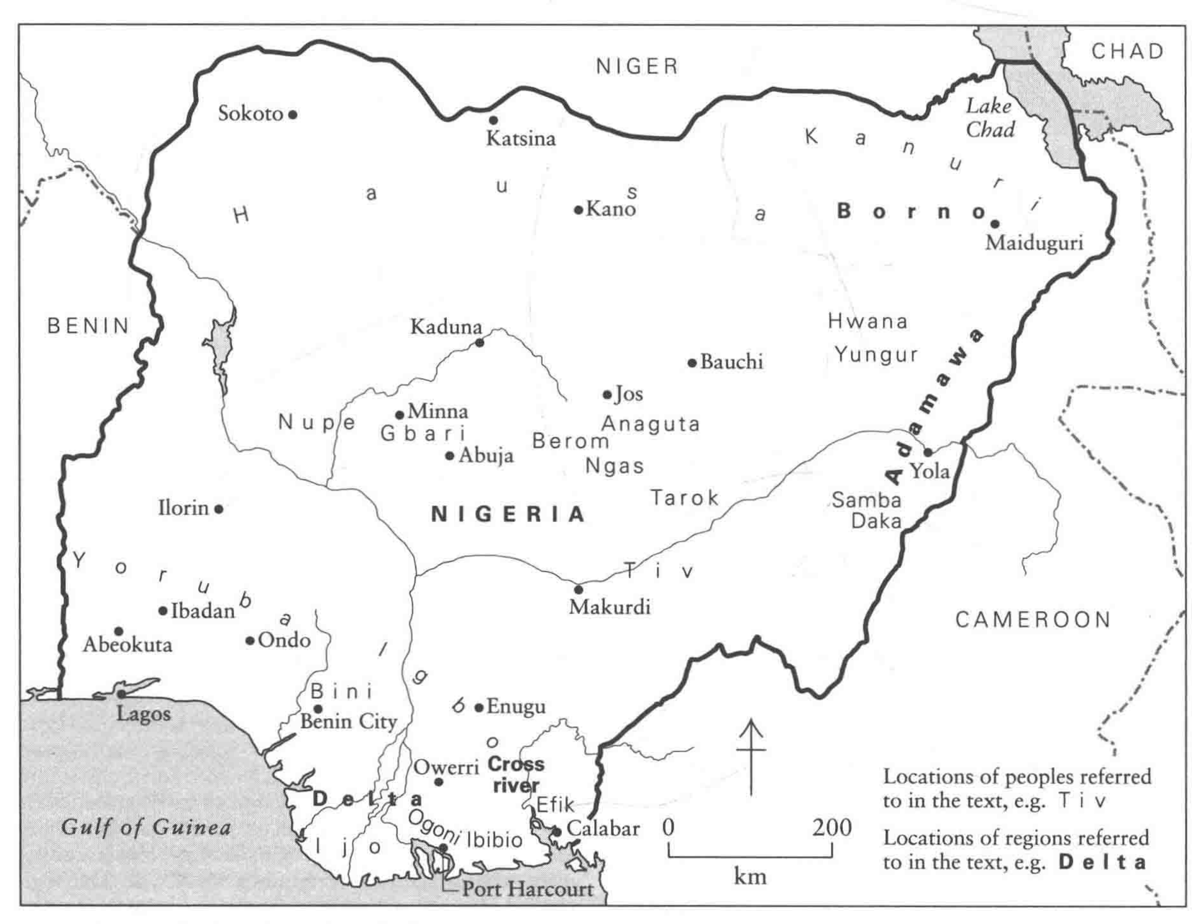
BONNIE J. BLACKBURN

Nigeria, Federal Republic of. Country in West Africa. It has an estimated population of 128·79 million (2000 estimate) and a total area of 923,773 km². It is one of the most musically diverse countries in Africa. The high profile of music of a few groups (*see* HAUSA MUSIC, YORUBA MUSIC and IGBO MUSIC), and the relative

familiarity of certain heavily promoted urban subgenres serves to obscure the overall picture of Nigeria (fig.1).

If the pattern of musical styles and musical instrument types can be reduced to a single factor, it is the interweaving of Islamic influence, spreading southwards from the desert kingdoms in Niger and Chad, encountering the differing types of music characteristic of such southern peoples as the Yoruba, Edo (Ẹdọ or Bini), Ijo (Ịjọ), Igbo and Efik/Ibibio. Christianity became a significant factor on the 19th century, spreading widely throughout southern Nigeria and in parts of the north, such as the Jos plateau, where Islam has been resisted.



1. Music and society. 2. Surrogate speech. 3. Music and dance. 4. Music and gender. 5. Children's music. 6. Impact of world religions. 7. Musical forms. 8. Musical instruments. 9. Modern developments. 10. Research.

1. MUSIC AND SOCIETY. Music in Nigeria cannot easily be separated from the society that produces it; all music has a function, and it is not usually conceptualized as an art in the Western manner. The appropriate use of text is often a cause for admiration, rewarded by 'spraying' (i.e. placing a monetary gift against the forehead of the musician). Music accompanies life-cycle rituals, weddings, funerals, religious ceremonies, political rallies and all types of work. Solo performance is unusual, although older people and children play instruments for their own amusement. Performance is strongly linked to seasons or activities such as planting or harvest; in the semi-arid regions it is common to find prohibitions on particular instruments during part of the year, for example when crops are growing. Musical forms allow something to be sung that would be offensive if spoken.

The professionalization of music is highly variable within Nigerian societies. Among the Islamic peoples of the north, for example, musicians form specialized occupational groups. In Adamawa, in the extreme east, musicians belong to castes associated with blacksmithing and funerals. In much of the southern and central areas musicians are not specialized, and there are no social prohibitions against playing an individual instrument, although a tradition often runs within families. It is often thought that playing an instrument is not a skill that needs to be learnt and that practice is unnecessary.

The ideology of composition also shows striking variations; in some cases, for example among the Tiv, all songs are the product of a named composer, except perhaps children's songs. In the north-east, among the Hwana for example, all songs are attributed to the ancestors, even when contemporary references suggest this cannot be true. Among the Efik/Ibibio, songs with ritual content are never innovated, whereas it is quite normal to compose secular songs.

Music frequently accompanies work, keeping the rhythm of a particular activity and encouraging physical labour, especially in the fields or in housebuilding. In the riverine areas, paddling songs were used to keep the pace

1. Map of Nigeria showing main peoples and regions

of canoes. Groups of women frequently pound yams in large mortars that require accurate coordination; elaborate rhythmic patterns with ornamental flourishes accompany the pounding songs. In most of the regions north of the forest, the seasonality of rainfall requires farmers to work collectively on their farms. The host farmer is usually expected to have musicians to entertain the labourers.

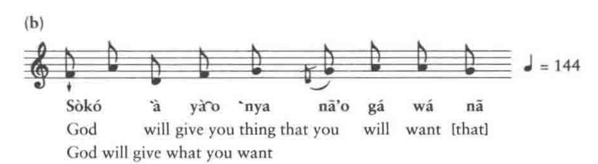
Trance or ecstatic music is principally associated with the Hausa *bori* (*bòòríí*) cult, widespread in Sahelian Africa and carried to Tripoli by the Saharan trade. Accompanied by either the GOGE (*gòògè*) fiddle or the *garaya* (*gàrááyáá*) lute and a struck hemispherical calabash, women and other socially excluded groups fall into trances and act out characters or personalities. Often the stereotyped behaviour and the gestures that are adopted, such as becoming a pig or mimicking sexual behaviour, are forbidden in 'normal' contexts. The possessed characters have individual praise-songs or 'litanies' (*kirari* or *kíràrì*). In the Niger delta the 'mermaid' cults also have an ecstatic character.

Apart from masquerades, there is a tradition of travelling musical theatre in some regions. In the eastern delta among the Ogoni and Tiv (*kwagh-hir*) and Borno, itinerant puppet theatres move around accompanied by musical ensembles. The plays are a blend of humour and moralizing and were updated with topical references to specific communities. These have largely disappeared, although the Tiv still perform plays with adult performers. Yorubaland has a rich tradition of *alaarinjo* (*Aláàrìnjó*), a type of travelling dance-theatre that dates to the 16th century and that was recorded by early European travellers. The *alaarinjo* probably developed from the *egungun* (*egúngún*) mask, but soon became professional and subdivided into competing groups. The development of road infrastructure in the colonial era allowed these troupes to travel farther and to attempt to outdo other groups with special effects. The heart of these groups is traditional drums, but these are increasingly displaced by amplified European instruments, recorded sound tracks and even short film extracts. The *alaarinjo* groups were also the inspiration for the 'African Music Research Party' introduced by Chief Hubert Ogunde in 1946, the ancestor of modern professional theatre troupes.

2. SURROGATE SPEECH. Music in Nigeria tends to be conceptualized in song. Even with instrumental music, the underlying song is usually identifiable. Performers are usually praised in terms of the textual content of their songs, rather than delivery or vocal quality. With few exceptions, Nigerian languages are tonal, that is, syllables are assigned musical pitches that are essential to their prosody. Some languages may include as many as five pitch levels, although two or three are more usual. On this basis, a sound-producer (even whistling) that faithfully reproduces the tonal contours of a spoken utterance may be said to 'speak' and be understood by those competent in the language. Some languages are more amenable to this than others, depending on the number of level tones and the phonological contrast in segments. Where intelligibility is relatively low, 'talking' instruments have a number of set idioms or standard paraphrases with which audiences are familiar. However, in other languages, almost any spoken utterance can be readily translated into surrogate speech.

The following examples illustrate the principle of speech surrogates. Exx.1*a* and 1*b* were played on the *evogi* lute of the Nupe, a two-string spike lute with a calabash resonator. The player was a hunter 'speaking' common proverbs on his instrument. In this transcription the melody closely follows the relative pitch contour of the utterance.

The use of musical instruments for surrogate speech is fundamental to the maintenance of social structures and of ethnic boundaries. Surrogate speech is essential in musical performances within hierarchical societies, since the praises of powerful individuals are uttered on instruments. Loud instruments, such as long trumpets or hourglass drums, broadcast the current status of individuals more rapidly and effectively than sung praises.



Surrogate speech is also found in egalitarian societies, however. Among some Igbo groups, for example, narrative songs can be performed on multi-player xylophones. The performer playing the high notes will create the narrative, while two players on the lower register of the instrument repeat ostinato patterns that are actually short phrases meaning 'it is true' or some similar affirmation. Among the Bena (Ɓɛana or Yungur) in the north-east, the xylophonists accompanying a dance play a truncated proverb with the right hand when someone new enters the dance circle; the audience understands the application of the proverb to a particular individual. The Nupe transverse clarinet is played at harvest time to announce the names of proposed wives, as shown in ex.2.

If you plead with God

In the Niger delta, among the Kolokuma Ijo, drummers use drum pitches to 'speak' to masqueraders, communicating a sequence of dance steps. In this case, more strikingly, the dancers, who hold curved swords, slap the jingles around their ankles in a particular sequence and 'speak' back to the drummers, indicating a particular phrase or pattern. The Gbari people sometimes use pairs of gourd rattles, which, although of no specific pitch, have distinct timbres, so that an equivalence is set up between

language with only two tone-heights that can be more easily represented by paired rattles.

3. Music and dance. Dance pervades most musical performance in Nigeria; only praise-music and some types of ceremonies are not conceptualized in terms of dance. In many languages, the terms for 'song' and 'dance' are either exactly the same or closely related. The repertory of solo instruments played for amusement, such as the *sansa* (lamellophone) or the raft zither, generally consists of dance-songs. The most energetic dances are found in the forest area, while those in the north tend to be more restrained, a possible result of Islamic influence. Dancers frequently wear rattles on their arms or legs, which are sounded rhythmically with the dance; women frequently play gourd rattles in more southern areas. Masks frequently involve quite elaborate dances, a considerable feat in the sometimes cumbersome costumes.

4. Music and gender. Gender roles are strongly marked in Nigerian music. Throughout the country, men dominate in instrumental playing, and in extreme cases women hardly play any instruments at all, for example in the strongly Islamicized regions of the north. In the south and south-east, it is common for women to play a wide variety of instruments within their own associations, but it is men who play at public events. Instruments usually played by women include gourd rattles and, less often, other types of idiophones. This tradition carries over into church music, where women play percussion instruments to accompany services.

By contrast, women dominate in singing in many societies. Even in some strongly Islamicized areas of the north, women are thought to be more proficient than men, and their grasp of appropriate proverbs and epithets more fluent. As a result, among the Nupe or the Kanuri, for example, women singers can become extremely wealthy and influential in ways that would otherwise be impossible. Among the Nupe, some well-known praise-singers (*enígbá*) form their own ensembles (*enyàkó*) of drummers and flautists to perform at major ceremonies, both public and private.

5. Children's music. In most Nigerian societies, children have distinct musical cultures, both in terms of sung repertories and in the construction of sound-producers. Singing games are popular among children and are usually accompanied by call-and-response patterns with lyrics that may be archaic or obscure. Some children's songs have explicitly erotic lyrics; among the Tarok people of east-central Nigeria, the herders have an entire repertory of obscene songs (*ǹnap-ǹshì ován gi bil*), accompanied by a pottery drum. Although tolerated in the context of 'the bush', such songs are never sung near the village. Similar singing games exist in many different societies with different song texts. In some societies, for example among the Idoma, adults consider the correct performance of children's games part of their moral education, and an adult will undertake to supervise them on moonlit nights.

Children make and use their own distinctive sound-producers. Sometimes these imitate those of adults, for example unpitched raft zithers of cornstalks and tin-can drums with plastic heads. Other instruments, such as the widespread *zagadu* (*zàgàdúú*), a jew's harp made from sorghum stalk, and the *kabushi* (*kàbúúshì*), a double-reed pipe made from a green papaya stem slit lengthways, seem to be restricted to children. Hausa children capture and irritate puffer fish so that they inflate, allowing the children to beat out rhythms on their stomachs. Children also imitate 'forbidden' sound-producers, reproducing the wooden-plaque bullroarers of male secret societies with sorghum internodes and the voice-disguisers with cereal stalks made into simple mirlitons.

6. Impact of world religions. Apart from instruments directly imported from North Africa, Islam has brought specific musical forms such as the *dhikr* (or *zikr*). The large ceremonial ensembles characteristic of the northern Nigerian courts, including kettledrums slung on camels' backs, trumpets and shawms, are typical of the Maghreb. Vocal production of Hausa praise-singers is influenced by Arab singing styles as well as the monodic recitational ensembles that gather during Ramadan. Islamic folk culture is also present; the ecstatic *bori* cult resembles other Islamic cults, such as the Somali *zar*, and uses the one-string horsehair fiddle, while the *gani* cult of the Nupe, performed with hobby-horse and dancers with brightly coloured clothes, is part of the same tradition as Morris dancing. The essentially monodic style of North African music has virtually eliminated polyphony in all areas influenced by Islam.

European musical traditions were imported in the 19th century, but they seem to be blended with musical styles brought by ex-Sierra Leoneans who were descendants of freed slaves who became entrepreneurs along the coast. Some Nigerian instruments associated with Christianity, such as the frame drum, reflect a direct New World influence. Along the coast, older Anglican churches still reproduce faithfully an English style of service, but in general even established churches use African instruments in services. A typical ensemble consists of frame drums, gourd net-rattles, large struck pots, and smaller hand-held struck pots. Typically these instruments have spread from the coast and remain alien to the cultures of people who play them. There is a lively tradition of church music composition among academic composers, while oral hymn composition flourishes in some communities in the south.

The other aspect of mission culture relevant to music was the destructive prohibition of any type of performance associated with 'paganism'. During the early colonial period, converts were discouraged from taking part in any ceremonies that had non-Christian overtones. In some areas, masks and instruments were physically burnt, and even today some Christians still eschew secular dancing and music. The large number of independent churches actively encourage the use of traditional musical instruments.

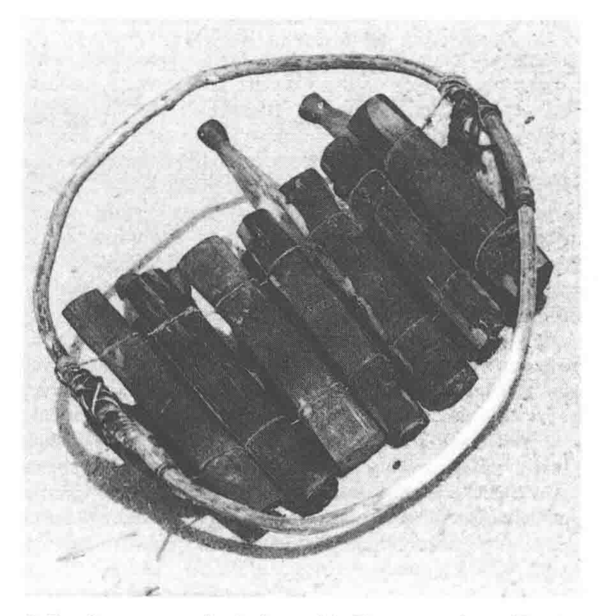
7. Musical forms. The overall pattern of musical forms in Nigeria reflects its historical layering. The most common underlying pattern, as elsewhere in Africa, is

essentially the call-and-response structure where a lead singer articulates a semi-improvised text to which a chorus, vocal but often supported by instruments, responds, either shadowing the lead text or repeating an ostinato vocal phrase. These sometimes overlap, producing a simple polyphony. Beyond this, a distinct difference can be discerned between northern traditions and those of the centre and south of Nigeria. Much of the forest area is dominated by drums and idiophones, and the music is rhythmically correspondingly complex with numerous unpitched instruments playing interlocking patterns. Such solo melody instruments include the *sansa*, pluriarc, arched harp and raft zither. The *oba* (ruler) of Benin who was noted for playing the *akpata* (*ákpátá*) lamellophone *c*1700 would be a relatively unusual figure today (*see* PLURAIC, fig.1).

In the sub-humid regions north of the forest the predominant musical type is the polyphonic wind ensemble, and the structural elements of this form are also found in vocal and xylophone music. Further north, music is essentially monodic, again with a greater emphasis on drums, reflecting the influence of Islam, although some comparative evidence suggests that this may also have been a pre-Islamic pattern. The distribution of these musical forms is also strongly related to ecology and social structure. Polyphonic ensembles, where each player has an equal musical part, perhaps not technically demanding but requiring considerable rhythmic precision to perform the music correctly, are characteristic of small-scale egalitarian societies. Typically, the instruments are aerophones such as side-blown horns, end-blown gourd horns, panpipes, single-note cylindrical whistles or even notch flutes with finger-holes. According to the prevailing scale in a given society, an instrument is tuned to each degree of the octave, and these sets may cover up to three octaves. Each instrument has a short phrase to play and enters in sequence like an extended canon. Sometimes there is a sequenced 'answering' of phrases. Among the Anaguta (Iguta) of the Jos plateau, a flute producing a full scale allows a more elaborate interweaving of complementary melodies.

From the tuning of instruments such as the xylophone and raft zither, we can deduce that pentatonic and heptatonic scales predominate throughout much of the country. There is little doubt that the influence of radio and recordings has normalized tunings to Western intervals, for there seem to be traces of older equiheptatonic scales. Research with Tiv composers suggests that their melodies are not conceptualized in terms of octaves; what seems to matter most are intervals.

Individuals are not usually singled out as expert performers, and there may be no term for 'musician' in the vernacular since everyone is expected to be able to play. Related to this is a notion that one need not practise on a musical instrument since performance is a skill all individuals have. In the more hierarchical societies of the north and south-west, by contrast, proficient and well-rewarded individuals perform vocal and instrumental music and play an important role in the validation of authority structures through praise-singing. Immense changes in demography, infrastructure and the distribution of wealth have begun to blur this pattern in the 20th century, and migrant communities often transport musical forms, adapting them in part to the conditions of their new situation. Some Middle Belt communities now maintain dual ideologies, accepting the ideology of the master-musician for incoming styles, associated with singing the praises of the wealthy and powerful, while still maintaining egalitarian ideologies for the older, polyphonic styles.



This pattern does not correspond to the delta and Cross river areas, where societies are largely small-scale, egalitarian and dominated by numerous cross-cutting associations that reflect gender, religion or economic links. Percussion dominates the music of this region, and wind and string instruments are rare. Melodies are provided by multi-player xylophones or tuned drum sets. However, as with wind ensembles, the musical forms are participatory, with numerous players taking part according to their level of skill. However, since many societies are quite exclusive, particularly those associated with specific masks, specialized musicians are quite common, although they do not serve the political function found in hierarchical societies.

A musical form found only in some places is the performance of epic poetry. Although treated by some authors as 'poetry' in the sense of text, this is always a musical performance. Among the Hausa and the Kanuri, long epic poems are performed by often blind itinerants, either unaccompanied or with a string instrument and sometimes reflecting unorthodox versions of Islam. Many Arabic poetic metres were brought to West Africa and adapted to the prosodic requirements of indigenous languages. These epic recitations are a surviving link to similar traditions in the Maghreb and medieval Europe. The recent rise of orthodox Islam led to prohibitions on some of these performers, making the task of recording and transcribing these epics all the more urgent. In the Niger delta, by contrast, the Ozidi saga, a hero-myth that traditionally takes seven days to perform, includes dancing, mime, narrator, chorus and percussion ensemble.

8. MUSICAL INSTRUMENTS. Nigerian sound-producers are diverse, especially idiophones and drums. Those described below represent only a sample of the most common types. Idiophones are extremely varied and can be subdivided into tuned and untuned instruments. Among the tuned idiophones, the most important is probably the xylophone. Xylophones are found throughout the south and south-east, where they are of the Central African type, loose wooden bars laid across banana logs often with several performers playing one instrument simultaneously, using interlocking patterns. Pit- and box-resonated xylophones are found more rarely in this region. In parts of the Jos plateau and the north-east, xylophones resonated with cow horns or gourds and slung from the performer's neck are used in sets of up to seven instruments (fig.2). The resonators have holes covered with spider-web mirlitons that produce a buzzing sound. Leg xylophones have also been recorded from the plateau area and Igboland, generally played by women for amusement.

Various types of *sansa* (lamellophone) are found throughout much of southern and central Nigeria. The original type seems to have been made from raffia midribs with keys of the same material, tuned with latex, but instruments with iron keys attached to a heavy wooden board, sometimes box-resonated, now predominate. Very large instruments with two or three untuned keys used as bass notes in ensembles are found in the Niger delta.

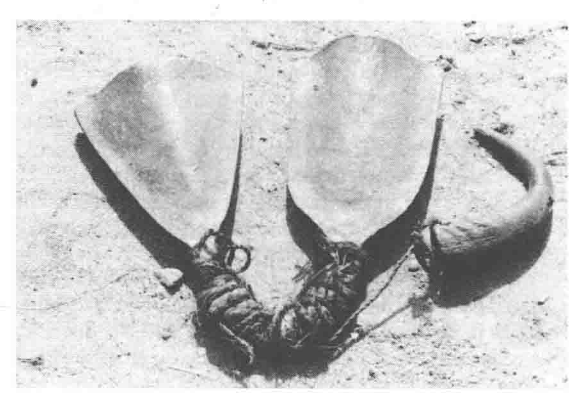
Ensembles of tuned clay pots, beaten on the open mouth with a soft pad, produce deep booming notes with a partially aerophonic component. Usually producing a

2. *Cow horn resonated xylophone of the Yungur, north-east Nigeria*

pentatonic scale, individual pots are tuned by placing water inside them and may be found in one- or two-octave sets. These sets are used throughout the Niger delta and in adjacent areas for entertainment. Untuned single instruments may be used to create a rhythmic bass pattern in some ensembles, as well as in church music.

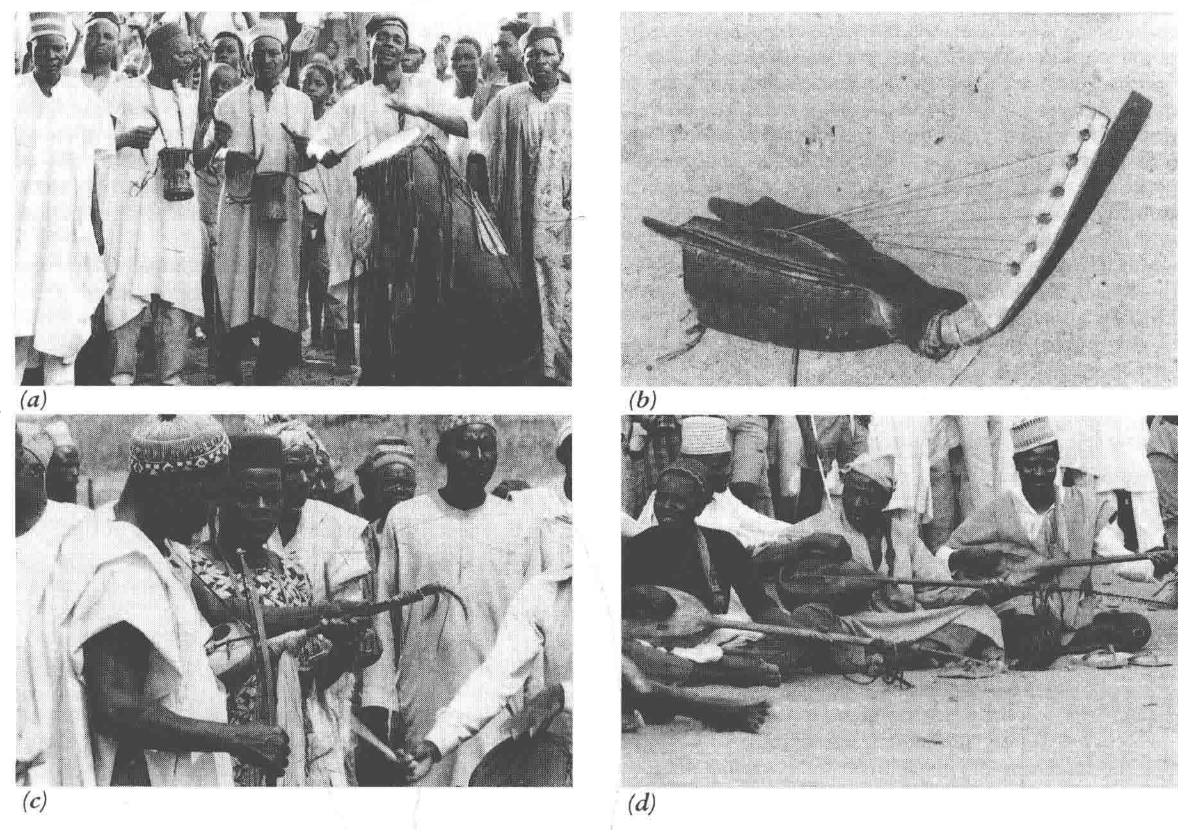
The most important of the untuned idiophones are the slit-drums, hollow logs slit lengthways, often with resonator holes at the ends of the slit, producing two distinct notes. Slit-drums are common throughout southern Nigeria and were formerly used for communication. Very large slit-drums existed at one time in the south-east, but a combination of deforestation and modern transport has caused them to disappear. However, smaller slit-drums made from bamboo internodes are regularly used for dance accompaniments and still sometimes 'speak' in ritual contexts.

Clapperless bells or iron gongs, single or double bells struck with a beater seem to have been originally part of chiefly regalia in most regions. In some Middle Belt societies, they were the prerogative of secret societies, perhaps because iron was rare and expensive. The emergence of cheap iron with European trade made them more available, and they are now used as a common time-keeping instrument in all types of music throughout the country (fig.3). Urban popular groups sometimes attach tuned sets of these bells to a frame. Bronze clapperless bells are found in Islamic chiefly orchestras in parts of the north. Clapper bells of a similar design are used more rarely and usually in ritual contexts.



Struck gourds are a common accompanying instrument; large, hemispherical gourds are placed on a cloth and struck with paired sticks to accompany various types of women's entertainment music as well as for the Hausa *bori* possession dances. They are sometimes held against the chest and beaten with the hands. In a variant of this, the gourd can be upturned in a basin of water, and the pitch adjusted by the amount of air trapped under it. These instruments are common throughout the north-central regions. A recent variant of this recorded in the south-west includes a tuned set of such gourds floating in an oblong trough.

Scrapers of various designs are used throughout the south, but a specific type is the notched stick: a thin piece of hardwood carved with rings, along which is threaded a spheroidal bush-fruit. A scraping noise is produced by sliding the dried fruit-shell along the stick and different pitches result from the speed at which the shell is moved. The notched stick is found throughout most of southern Nigeria and is used primarily by children to produce insulting epithets. However, it can also be a court instrument played by women in some areas of eastern Yorubaland where the stick is replaced by an iron rod with brass mounts.



Gourd rattles containing seeds or pebbles are common almost everywhere, but a more elaborate type is the net-rattle, which has a string network of fruit-shells or beads loosely enclosing a dried gourd. The network is held by the performer and slapped rhythmically against the gourd. The net-rattle is played predominantly by women in ritual contexts, but it has also become central to church ensembles and can be found all over the country in this context.

Drums dominate musical ensembles throughout Nigeria and exist in a variety of shapes and reflect a variety of construction methods. Drums are usually made of single pieces of wood or more recently, salvaged oil-drums, but can also be made from spherical or hemispherical calabashes. One of the most common drum types is the *kalangu* (*kàlàngúú*) hourglass drum, a double-headed drum with laces connecting the heads, held under the arm. The laces are squeezed to alter the pitch of the drum-head during performance and beaten with a curved stick. Often referred to as a TALKING DRUM (although many other types of drum can be used to 'talk'), it is common among Hausa, Yoruba and many other Islamic peoples, and is used by praisesingers to imitate speech-tones. Various single-headed hourglass drums are used as rhythmic accompanying instruments.

The *ganga* (*gàngáá*) double-headed barrel drum, with its two heads laced together, is slung from the performer's shoulder and beaten with sticks or hands (fig.4*a*). It is often used to accompany dancing, praise-singing and various types of secular performance. The performer may damp the second skin with his hand to alter the pitch of the struck head. Single-headed drums, open at the base with the skins either pegged or laced and wedged, are found throughout the country in a great variety of shapes,

3. *Double iron clapperless bell played with antelope horn for secret societies, Vere, south of Yola*

4. *(a) Paired single-headed hourglass drums and long barrel drum played for dancing, Vere, south of Yola; (b) pentatonic arched harp used for songs of social comment, Verse, south of Yola; (c) Hausa performer playing the goge (gòògè fiddle) at an Icen ceremony, south-east Nigeria; (d) ensemble of garaya (gàrááyáá) players accompanying a possession dance, Icem, south-east Nigeria*

sizes and designs. Commonly played with the palm of the hand, these drums are occasionally played with sticks. In the Niger delta and the Cross river area, conical drums with wedges used to tune the heads are made in sets of six or eight and played by a single performer.

Frame drums are less common, but a distinctive type that may have come originally from Brazil is now used in churches and in some types of secular music. The *samba* rectangular frame drum has a second, interior frame that allows wedges to be used to tighten the head. It is usually placed against the knees of a seated player and struck with paired sticks. Frame drums made from the broken necks of pots, with a head kept in place by a network of short sticks, are used to accompany specific praise-song repertories.

Nigerian chordophones are similar to those found elsewhere in West Africa. The oldest type is probably the musical bow, which usually has a mouth-resonated vegetable-fibre cord that is either plucked or struck while a small flat stick is placed against the string to produce different harmonics. The musical bow is played throughout central Nigeria and is often associated either with stages of crop growth or with songs of social criticism.

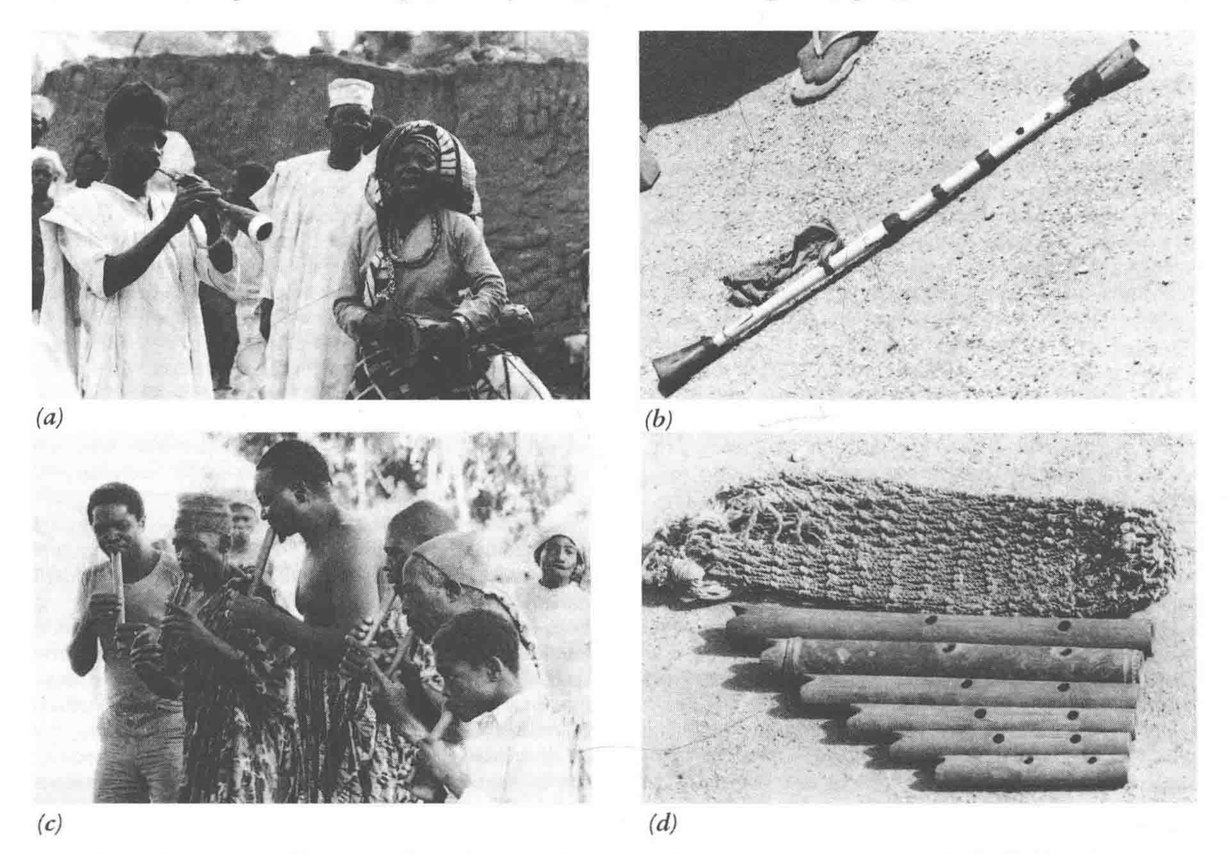
Raft zithers are made from dried cereal-stalks laid parallel and bound together; strings are supported by two bridges and tuned by overwound vegetable fibres. The tuning is usually pentatonic, with the strings arranged in groups of three and the main string doubled on each side at the octave. The raft zither is played with the thumbs using a strumming technique and is found throughout central Nigeria. It is generally a solo instrument used for beer-drinking or other entertainment. Children make untuned replicas of raft zithers at harvest time.

The arched harp is found across a wide area of east-central Nigeria, becoming a dominant prestige instrument along the Cameroon border, where it is frequently associated with the blacksmith caste. Among Tarok composers, the arched harp is associated with songs of social criticism. The harp almost always has five to six strings with a pentatonic tuning, although some two-octave instruments have been recorded (fig.4*b*). Pluriarcs with five or six strings are found in the Igbo areas and in some parts of the south-east. Pluriarcs were strongly associated with ritual but now seem to have largely disappeared.

One of the most prestigious instruments in the north is the one-string *goge* horsehair fiddle, a bowl-resonated spike fiddle with a lizard-skin table (fig.4*c*). It is of North African origin and is related to similar instruments in both Ethiopia and Central Asia. It is principally played in Islamic societies to accompany praise-singing and ecstatic cults such as the Hausa *bori*. A Hausa proverb, '*gòògè kan bidi'a ke nan*' (the *goge* is the source of heresy), associates the *goge* with worldly and deviant beliefs.

There are different types of spike lutes, especially among the Hausa and the Kanuri. The *molo* (*móólóó*), a two-string lute with a trough-shaped wooden soundbox, is similar to those found widely across the West African savanna and is used both for *bori* and by hunters. The *kuntugi* (*kùntúgì*) is a related type with one string and a

resonator made from an oval herring-tin, played by popular radio singers. The *garaya* (*gàràáyáá*) has a spherical ground resonator covered in skin and can be quite large. *Garaya* are often played in ensembles of three to four instruments that produce a rhythmic thrumming associated with possession dances (fig.4*d*). Lutes with necks that transpierce the resonator to anchor the strings beneath it are sometimes found among other peoples of central Nigeria.



Aerophones include a variety of instruments, such as those associated with Islamic courts throughout the north. The best known of these is the *kakaki* (*kààkààkíí* or long trumpet) usually made of brass or bronze, although now frequently made of scrap materials including aluminium. They are usually played in pairs, but sometimes in sets of up to six, and are used to imitate speech. Permission to have a set made was widely recognized as the seal of authority of a newly established or upgraded polity. They are almost always played together with the *algaita* (*àlgáità*) oboe (fig.5*a*) and are historically linked to analogous ensembles in Morocco and Uzbekistan. Instruments operating on the same principle, though historically unrelated to the *kakaki*, include the end-blown wood trumpets common in ensembles in the plateau area and the end-blown gourd trumpets made of cylindrical and spherical gourds played by the Samba Daka in tuned ensembles along the Cameroon border.

Horns are usually side-blown. Some southern chieftaincies had large side-blown elephant tusks similar to those in the Democratic Republic of the Congo (formerly Zaïre), but antelope horns are more common. These are disappearing for lack of antelope, now replaced by either cow horns or wood. The distal end may be open or closed, producing either one or two notes. Although most commonly treated as unpitched, on the Jos plateau, among the Ngas and related peoples, they are played polyphonically in tuned sets, the largest ensemble spanning three octaves. These horns are used as a ceremonial or signal instrument.

Long trumpets are invariably accompanied by the ALGAITA oboe, a sub-Saharan version of the Maghrib *ghaiṭa* that presumably dates from the medieval trans-Saharan trade. The *algaita* is almost always played together with the *kakaki* trumpet in Islamic court ensembles to produce surrogate speech in ceremonial contexts. The Tiv people in the south-east, however, have adapted the instrument for secular dance music, *swange*, increasing both its size and volume.

Tilɓoro (*tilboro*) or *damalgo* side-blown clarinets made from cereal-stalk internodes (fig.5*b*) are found throughout the north-central regions. These clarinets are open at the distal end with the reed cut directly from the stem. Children blow them after the sorghum harvest, although more elaborate instruments that have resonators of bush-orange or animal horn at one or both ends are used for speech imitation.

End-blown flutes blown across a chamfered embouchure, played in a manner similar to the Arab *ney*, with up to four finger-holes are found widely throughout northern Nigeria (fig.5*c*), sometimes with elaborate

5. *(a) Algaita (àlgáità; oboe) and kotso (single-headed hour glass drum), played for dances, Icen, south-east Nigeria; (b) side-blown clarinet with cowhorn bells, Yungur, north-east Nigeria; (c) tuned pentatonic set of notch-flutes being played in Vere, south Yola; (d) ensemble of notch-flutes*

decoration, such as the Kanuri *shilá*. Single closed tubes blown across the top and used in tuned sets are common in the Middle Belt; bound sets forming panpipes are rare. Such ensembles accompany secular dance music.

Cruciform conical wooden whistles (fig.5*d*), blown across the top like panpipes, have two finger-holes in either side of the body, often on projecting arms. Usually untuned, they may have developed from signal instruments, since they are still common among hunters for communicating without disturbing animals. Among the Tarok, they are used on market days to transmit information about the state of the market and who is present. They are often used in dances to mark changes in songs or steps and occasionally found in pentatonic tuned sets. These instruments are the origin of the whistles that mark the Brazilian samba and are made with modern materials. Similarly, spherical fruit-shell ocarinas were probably once designed as hunters' signals; they are now used to make music in the bush or blown to imitate the voices of masks.

Masks and their associated secret societies are one of the most common forms of religious expression, and it is generally held that the spiritual entity inhabiting the mask cannot use ordinary speech or song. It is therefore common for masks to make use of voice-disguisers as well as to sing in ritual or archaic languages. Commonly these voice-disguisers have mirliton membranes similar to a kazoo, inserted in the sidewall of a wooden, bamboo or horn tube. In initiation cermonies, these can be constructed in gradated sets like wind ensembles. Other voice-disguisers include spherical clay pots and wooden megaphones.

9. MODERN DEVELOPMENTS. Even before the establishment of the colonial regime, the first importation of Western music began through the missions and, once recordings became widespread, urban populations were exposed to a wide range of musical styles. Fusions of traditional forms with European instruments began in the 1930s with major growth in the 40s and 50s, probably fuelled by the experience of soldiers. By the 1960s, a wealth of musical styles had developed, especially in the south-west, where the Yoruba had been very active in creating hybrid forms. Music from the former Zaïre had been very influential, along with West Indian calypso, Latin American styles such as samba and some types of African American music such as jazz. Ensembles tend to mix traditional drums and iron clapperless bells with guitars, keyboards and, increasingly, electronics.

Recordings created as exports have songs chopped into three-minute cuts, but in performance individual songs can be extended with improvised segments of praises of those present. Musical styles now develop quickly, and the music press in Nigeria reports and documents these developments. Local subgenres of urban music are found throughout the south, but further north, urban music has remained notably more traditional, where the updating of textual materials is given greater priority than instruments or musical styles. Song texts tend to be in English, pidgin or major languages such as Yoruba, Hausa and Igbo. The market for other languages is rather restricted, and local performers tend to become known via state radio stations or cassettes.

Nigeria has produced many well-known modern performers, some of whom became internationally famous such as FELA KUTI and 'KING' SUNNY ADÉ, as well as those of an earlier generation such as 'Bobby' (Bernard Olabanji) Benson. Nigeria has always had a lively industry for its own urban music, although this remained home-grown until the promotion in Europe of artists such as Sunny Adé in the 1970s. High levels of dubbing of recordings make it difficult for Nigerian recording artists to make an income from local distribution, and many prefer to record, press and distribute outside the country, so that a proportion of sales can earn foreign exchange. CDs have yet to become widespread, but there is a lively market for local cassette production. There are few recordings of non-electric music available except in the case of popular northern praise-singers. Scholarly field recordings of Nigerian music are few, although the Institute of African Studies at the University of Ibadan produced a series of striking recordings, none of which is still available.

Western-style compositions with notated scores have been produced since the late 19th century, usually by musicians trained primarily in the church. The rise of the university system encouraged more composers to experiment with African texts, instruments and rhythms in their music. However, this remains an urban phenomenon, largely restricted to the south-west. Composers of the first generation who experimented with producing African church music include J.T. Ransome-Kuti, A.T. Ola Olude and T.K. Ekundayo-Phillips. More recent composers include FELA SOWANDE, AKIN EUBA, AYO BANKOLE and Lazarus Ekueme.

10. RESEARCH. Sources for the history of Nigerian music are limited. Musical instruments appear on Benin plaques, and medieval chronicles record the introduction of trumpets in the Islamic region. Instruments also appear in the engravings of some early travellers. The first scholarly account dates only to 1892, and history must therefore be derived from secondary sources by plotting the contemporary distribution of instruments and performance types and linking them with known linguistic and archaeological data.

Given the size and richness of Nigerian musical traditions, scholarly interest in the country's music has unfortunately been slight. Music departments in Nigerian universities have contributed greatly with indigenous descriptive work, and some institutions, such as the Centre for Nigerian Cultural Studies (CNCS) in Zaria, have archived student dissertations containing much valuable information about otherwise unknown musical traditions. The archives of the Borno Music Documentation Project (BMDP), based in Maiduguri, contain are unparalleled range of sound and video recordings of the music of north-eastern Nigeria, and material is still being added to their collections. However, the continuing crisis in the university system has severely restricted local research, although information about music can sometimes be found in locally published ethnographies. Nigeria's multiplicitous radio and television stations have recorded a wide variety of materials over the years, but these are not readily accessible to researchers. Recordings made from the 1960s to the 80s by the Institute of African Studies, Ibadan, and the CNCS represent a valuable archive of material, but financial problems put their long-term future in doubt.

ROGER BLENCH

Nigetti, Francesco (*b* Florence, 26 April 1603; *d* Florence, 14 Feb 1681). Italian organist, theorist and composer. His earliest musical education probably took place in the Florentine Compagnia dell'Arcangelo Raffaello, in which he enrolled on 1 January 1613. He certainly studied both composition and the organ with Marco da Gagliano (*maestro di cappella* of the confraternity) and completed his musical education with Frescobaldi while the latter was in Florence in the service of the Medici court (between 1628 and 1634). On 11 December 1629 he became *maestro di cappella* and organist of Prato Cathedral and from 19 August 1649 until his death was first organist of Florence Cathedral. For more than 30 years he devoted himself to the construction and perfection of a Vicentino-inspired instrument, a 'cembalo omnicordo' called 'Proteus', which was very difficult to play. It had five manuals for the division of each ordinary scale-degree into five parts, for the supposed imitation of the three Greek genera and for the production of both large and small semitones; after his death it went to his pupil G.M. Casini and then to Bresciani. Though Bonini declared that Nigetti's compositions were prized in their day like precious stones, only three pieces by him, of no great interest, are known to have survived. They are a solo song, a duet and a trio, all with continuo (all are in *I-Bc* Q49 and the last two also appear, anonymously, in *CZ-Pnm* Sign.II.La 2; the solo song is edited in AMI, v, n.d., 37).

EDMOND STRAINCHAMPS

Nigg, Serge (*b* Paris, 6 June 1924). French composer. After initial studies with Ginette Martenot, he entered the Paris Conservatoire at the age of 17, studying fugue and counterpoint with Plé-Caussade and harmony with Messiaen. He left the Conservatoire in 1946 and took up studies in 12-note technique with Leibowitz. The path that Nigg's music subsequently took was marked by

sudden enthusiasms and violent rejections and may be seen as a reflection of the contradictions of the immediate postwar years. Although Messiaen remained for him 'the awakener' and was a strong influence on his earliest works (e.g. *Timour*), Nigg was one of the first French composers to master 12-note composition, as his Variations of 1947 demonstrate: he viewed serial procedures as a fertile form of discipline and as the logical culmination of musical evolution.

Moved by a concern over communication, he soon formed the desire to 'express no longer the symbols of the past, but the events of our time in every form capable of reaching the largest possible public' (Leibowitz). In such works as *Le fusillé inconnu* (1949) he proceeded to challenge the hermeticism of serial technique; together with Désormière he founded the French Association of Progressivist Musicians and made several journeys to eastern Europe. Pursuing his populist convictions, he turned away from forms that he saw as ideologically limiting to devote himself, in the main, to large-scale choral pieces, capable of making a strong and immediate impression.

It was when he was in his early 30s that Nigg composed the works that he later considered his most important: the Piano Concerto no.1 and the Violin Concerto. Other compositions in conventional forms followed, displaying Nigg's rigorous handling of structure, while a series of orchestral pieces (the *Jérôme Bosch-Symphonie*, *Le chant du dépossédé*, *Visages d'Axel* and *Fulgur*) bears witness to his imaginative powers. During this period he gave lectures in the USA (1967) and in the USSR (1970); in 1967 he was appointed principal inspector of music, with special responsibility for vocal art.

One of the abiding characteristics of Nigg's music is a certain mixture of tenderness and aggressiveness reminiscent of Ravel, the composer with whom he has the deepest affinity. Nigg demands an artisan-like respect for the composer's craft and a strict self-discipline and this approach is very evident in his music. His lyricism blossoms most abundantly in orchestral works, of which *Visages d'Axel* is a most accomplished example; in such pieces a wide variety of elements – modal, polytonal or atonal harmony and serialism – are always finely controlled within a tight fabric.

From 1974, when he reached 50, in a surge of creativity, Nigg embarked on new symphonic works: *Les fastes de l'imaginaire*, *Mirrors for William Blake* (a symphony for orchestra and piano), and *Millions d'oiseaux d'or* (a title taken from Rimbaud) first performed in Boston Symphony Hall (1981). Percussion, celesta and harps are prominent among the instrumental forces employed in these three works, and in the *Poème*, given its première in Quebec in 1990.

During this same period Nigg was awarded several prizes. He became president of the Société Nationale de Musique in 1982, and in the same year he took on the newly created course in instrumentation and orchestration at the Paris Conservatoire. He was elected to the Institut de France (Académie des Beaux-Arts) in 1989, and in 1995 he took on the heavy responsibility of the presidency for its bicentenary year and celebrations.

WORKS
(*selective list*)

ORCHESTRAL

Timour, sym. poem, 1944; Conc., pf, str, perc, 1947; Conc., pf, ww, perc. 1948; 3 mouvements symphoniques, 1948; Pour un poète captif, sym. poem, 1950; Billard, ballet, 1951; Pf Conc. no.1, 1954; Vn Conc., 1957; Jérôme Bosch-Symphonie, 1960; Conc., fl, str, 1961; Visages d'Axel, 1967; Fulgur, after Artaud: Héliogabale, 1968–9; Pf Conc. no.2, 1970–71; Les fastes de l'imaginaire, 1974; Scènes concertantes, pf, str, 1975; Mirrors for William Blake (sym., orch, pf), 1978; Millions d'oiseaux d'or, 1980; Va Conc., 1988; Poème, 1989; much film music

BRIGITTE MASSIN

Niggun. In Jewish music a centonized chant used in the Ashkenazi Synagogue; also a genre cultivated by Ḥasidic Jews. *See* JEWISH MUSIC, §III, 3.

Night Horn. *See under* ORGAN STOP (*Nachthorn*).

Nightingale. A type of bird whistle. *See* BIRD INSTRUMENTS.

Nigrin, Georg. *See* ČERNÝ, JIŘÍ.

Nigun (Heb.: 'melody'; pl. *nigunim*). In the liturgical music of the Ashkenazi Jews, an early form of centonized chant, also known as *nusaḥ*. Among the East European Ḥasidic Jews, the term refers to a type of vocal music, often sung to nonsense syllables and accompanied by dancing, of which one of the important forms is the *nigun devequt*. *See* JEWISH MUSIC, §III, 3(ii)–(iii). Among the Karaite Jews the term *nigun* signifies a mode; *see* JEWISH MUSIC, §III, 10.

Nihon Ongaku-gakkai (Jap.). *See* MUSICOLOGICAL SOCIETY OF JAPAN.

Nijazi [Tagi-zade-Hajibeyov, Nijazi Zul'fagarovich] (*b* Tbilisi, 20 Aug 1912; *d* Baku, 2 Aug 1984). Azerbaijani conductor and composer. He studied composition with Mikhail Gnesin and others (1925–30) and at the Baku Conservatory (1930–32). He was conductor at the Akhundov State Academic Theatre in Baku (1937–51),

becoming principal conductor in 1958, having also been appointed principal conductor and artistic director of the Azerbaijan State SO in 1948. He played an important role in the development of opera and symphonic music in Soviet Azerbaijan, where he fostered the work of local composers and conducted many premières, including such operas as *Vetan* by Hajiyev and Karayev (1955) and Amirov's *Sevil'* (third version, 1959), and the ballet *Gyul'shen* by Sultan Hajibeyov (1951). Nijazi appeared with other companies in the USSR, including the Kirov Theatre, Leningrad, where in 1962 he conducted the première of Melikov's ballet *Legenda o lyubvi* ('Legends of Love'); he also toured in other countries. He commanded a virtuoso conducting technique. As a composer Nijazi was important in the early development of distinctively nationalist Azerbaijani music. One of his best works is a symphonic suite *Rast* (1949), the title identifying the first of the modes of Azerbaijani folk music, which has been widely performed. Nijazi's music is rich in national character and emotional feeling. Besides songs and music for theatre and cinema, he wrote *Khosrov i Shirin* (1942), a romantic opera based on a work by Nizami, the 12th-century Azerbaijani poet and philosopher, and the ballet *Chitra*, based on a work by Rabindranath Tagore; both were performed at Kuybïshov in 1962 and in new versions at the Azerbaijan Opera and Ballet Theatre in 1972.

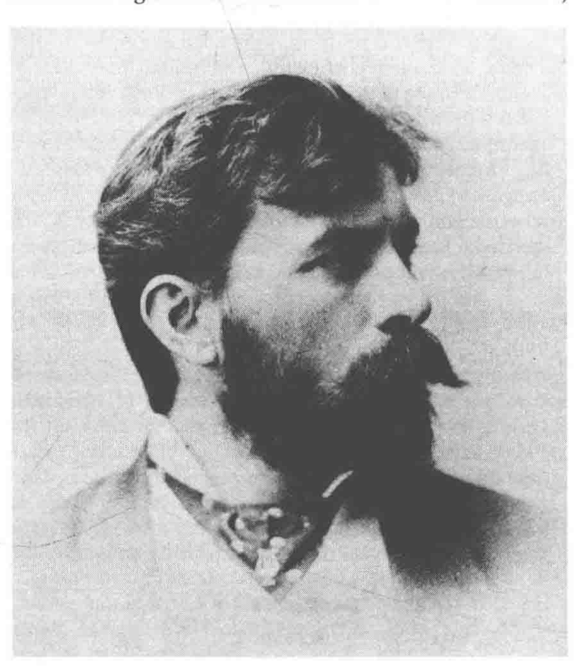
I.M. YAMPOL'SKY

Nijinsky, Vaclav. *See* BALLET, §3(i).

Nikisch, Arthur (*b* Lébényszentmiklós, 12 Oct 1855; *d* Leipzig, 23 Jan 1922). Austro-Hungarian conductor. He was born of a Moravian father and a Hungarian mother, and at an early age he showed exceptional musical ability. He received his first music tuition privately and in 1866 became a student at the Vienna Conservatory, where he studied the violin with Hellmesberger and composition with Dessoff. As a student he won various prizes for composition as well as violin and piano playing, but it was the violin on which he concentrated. He played in Beethoven's Ninth Symphony, conducted by Wagner at the laying of the Bayreuth Festspielhaus foundation stone. In 1874 he joined the Vienna Court Orchestra where he played under Brahms, Liszt, Verdi and Wagner, as well as Herbeck and Dessoff, and also took part in the first performance of Bruckner's Second Symphony under the composer's own direction.



In 1878 he became second conductor at the opera in Leipzig, the city with which he was to maintain connections for the rest of his life, becoming principal conductor in 1879. His career now entered upon a new stage of activity and fame. In 1889 he accepted the conductorship of the Boston SO and undertook many tours throughout the USA. In conservative Boston, his interpretatative liberties – as in Beethoven's Fifith Symphony – ignited a storm of controversy; his Boston predecessors (and succesors) were more literal-minded. In 1893, he took over the Budapest Opera as musical director; but two years later he was offered almost simultaneously the conductorship of the Leipzig Gewandhaus Orchestra (in succession to Reinecke) and of the Berlin PO (in succession to Bülow). He accepted both posts, retaining them to the end of his life, and in 1897 also succeeded Bülow as conductor of the Philharmonic concerts in Hamburg.

With the Berlin orchestra he toured Europe, travelling as far as Moscow. He appeared as guest conductor with the Amsterdam Concertgebouw Orchestra and Vienna PO and in 1921 gave concerts in Buenos Aires. Having conducted a series of concerts in London after coming back from America, he returned in 1902 and was a frequent guest conductor of the LSO from 1904 until 1914, touring America with them in 1912. Occasionally he also conducted at Covent Garden, notably Wagner's *Ring* in 1913. In addition to his many other duties he was director of the Leipzig Opera (1905–6) and the Leipzig Conservatory, where he was also in charge of the conductors' class.

Nikisch was the most impressive and influential conductor of his day. He excelled in Romantic music, and his performances of Schumann, Brahms, Bruckner, Tchaikovsky and Wagner, as well as of Beethoven, have remained famous. It was Nikisch who, with his première of the Seventh Symphony in 1884, first won wide fame for Bruckner, and who, after Tchaikovsky's Fifth Symphony had been coolly received under the composer's direction in St Petersburg in 1888, vindicated it triumphantly in the same city. Tchaikovsky himself, who heard the 32-year-old Nikisch in 1887, has left an impression of his celebrated restraint and discipline:

> Herr Nikisch is elegantly calm, sparing of superfluous movements, yet at the same time wonderfully strong and self-possessed. He does not seem to conduct, but rather to exercise some mysterious spell; he hardly makes a sign, and never tries to call attention to himself, yet we feel that the great orchestra, like an instrument in the hands of a wonderful master, is completely under the control of its chief.

Nikisch was famous for the passionate yet controlled beauty of the string tone he elicited from his players, as well as for his broad and flexible sense of tempo. He influenced a generation of conductors who followed him,

Arthur Nikisch, c1890

including in different ways Furtwängler, his successor in Leipzig and Berlin, and Boult. Among the contemporary composers whom he supported were Mahler, Reger and Strauss. His own music is forgotten, but he also won fame as an accompanist, and in this respect his name will always be linked with that of his pupil Elena Gerhardt. He married the singer Amélie Heusner, and their son Mitja (1899–1936) had a successful career as a pianist.

HANS-HUBERT SCHÖNZELER/JOSEPH HOROWITZ

Nikodemowicz, Andrzej (*b* Lwów [now L'viv], 2 Jan 1925). Polish composer and pianist. Born and educated in Ukraine, he first studied the piano with Nadia Bilenka-Lavrowsky and then Roman Sawycky. In 1944 he entered the L'viv Conservatory, graduating in 1950 from the composition class of Adam Soltys and in 1954 from the piano class of Tadeusz Majerski. He initially supported himself as a church organist (1939–40 and 1947–50), but in 1951 he joined the faculty of the L'viv Conservatory firstly as lecturer (1951–67) before being appointed assistant professor (1967–73) to teach composition, theory and the piano. During this period he was active as a pianist and as resident composer and pianist of the Polish Theatre in L'viv. In 1973 he was dismissed from the conservatory for his firm religious beliefs; he then made his living from private teaching. In 1980 he emigrated with his family from L'viv to Lublin, Poland, where he became professor at the Lublin Catholic University and the University of Maria Curie-Sklodowska. In 1989 he was appointed chairman of the Lublin branch of the Polish Composers' Union. In 1981 he received the Brother Albert Prize for his creative work in composition. His works have been performed not only in Poland and Ukraine but also in England, Germany, Greece, Mexico and the Vatican. He is an extremely prolific composer and although he has written in most genres, he has concentrated on chamber and sacred vocal compositions. His music is imbued with a highly stylized sonoristic theatricality, very typical of the Polish and Ukrainian school of the late 1960s, but this is often pierced with an acute sense of spiritual wonder, laconism and even asceticism of expression. *The Glass Mountain* (1969) is structured around the interaction of music, words, elements of pantomime and puppet theatre. The work is a setting of poems by Bronislawa Ostrowska which concern human conceit, humility, love, punishment and forgiveness, themes of continual interest to Nikodemowicz.

WORKS

Stage: The Glass Mountain (fable-pantomime, B. Ostrowska), nar, inst ens, 1969

Orch: Expressions, 20 miniatures, pf, orch, 1960; Chbr Conc., 1968; Conc., vn, orch, 1973, 2nd version pf, orch, 1994; Sym., 1974–5; Canzona, fl, ww, 1992; 7 Meditations, fl, str, 1997

VIRKO BALEY

Nikolai, David Traugott. *See* NICOLAI, DAVID TRAUGOTT.

Nikolaus von Krakau. *See* MIKOŁAJ Z KRAKOWA.

Nikolayev, Aleksey Aleksandrovich (*b* Moscow, 24 April 1931). Russian composer and writer on music. He graduated from the history faculty of Moscow University (1953) and then from the Moscow Conservatory, where he did postgraduate work under Shebalin and was appointed to teach composition in 1959. Secretary of the governing body of the RSFSR Composers' Union, he holds the title Honoured Art Worker of the RSFSR. His music is distinguished by vivid character, emotional candour and warmth; his themes are remarkable for their simplicity and lyrical charm. The fresh and individual harmony is intimately linked with the Russian tradition, though the expressive quality of Nikolayev's work is distinctly contemporary.

WORKS
(*selective list*)

Stage: Zolotoy klyuchik [The Golden Key] (ballet, Nikolayev, after A. Tolstoy), 1952; Gore – ne beda [Grief – not Misfortune] (op,

Nikolayev, after S. Ya. Marshak), 1956–61, Moscow Conservatory, 1962; Lastochka [The Swallow] (operetta, P. Gayni), 1960–61; Lunoglazka [Mooneye] (ballet, R. Borisova), 1960–61; Tsenoyu zhizni [At the Cost of Life] (op, S. Tsenin, after A. Salïnsky), 1962–4, Moscow, 1965; Togda v Sevil'ye [That Time in Seville] (operetta, G. Granovsk, after S. Alyoshin), 1972–3, collab. A. Kremer; Razgrom [Devastation] (op, M. Zakharov, after A. GALINA GRIGOR'YEVA

Nikolayev, Leonid (Vladimirovich) (*b* Kiev, 13 Aug 1878; *d* Tashkent, 11 Oct 1942). Russian pianist, teacher and composer. He studied the piano with Vladimir Pukhal'sky and composition with Yevgeny Rib in Kiev. He then attended the Moscow Conservatory, graduating in the piano from Safonov's class in 1900 and two years later from the composition class of Taneyev and Ippolitov-Ivanov. After a period as répétiteur at the Bol'shoy Theatre, during which time he also carried out extensive research on Tchaikovsky and Taneyev, he became a teacher at the Moscow Philharmonic School (1904–6). At this time he also produced a number of works which brought him recognition as a composer whose command of form and of harmonic inflection betrayed the influence of Tchaikovsky and Rachmaninoff, yet whose subtler melodic nuances revealed a personal voice of true expressive power. From 1909 he taught at the St Petersburg Conservatory and was made professor in 1912, remaining there until 1942, when he moved to Tashkent to escape the German invasion.

As a teacher, Nikolayev was instrumental in establishing one of the most distinctive yet heterogeneous schools of Russian pianism. Although Leschetizky's legacy was a pervasive influence, the unifying feature among Nikolayev's students was their predisposition to large-scale dynamic structures and imaginative colouristic effects. Most notable among his piano pupils were Sofronitsky, Shostakovich, Yudina and Serebryakov; his composition students included Bogdanov-Berezovsky, Deshevov and Aleksandr Krein. Nikolayev's own compositions include a Piano Sonata, Variations for piano, Tarantella for piano and Suite for two pianos, in addition to a Violin Sonata, a Cello Sonata, three string quartets and songs. He also made transcriptions of organ works by Buxtehude and Pachelbel that gained popularity through the performances of his most distinguished students.

CHARLES HOPKINS

Nikolayeva, Tat'yana (Petrovna) (*b* Bezhitza, 4 May 1924; *d* San Francisco, 22 Nov 1993). Russian pianist, teacher and composer. Her mother was a professional pianist and former pupil of Godenweiser, with whom Nikolayeva herself had lessons from the age of 13. She continued studies with him at the Moscow Conservatory, graduating from his class in 1947 and, following that, from Golubev's composition class in 1950. In the latter year she won first prize at the Bach Competition in Leipzig. Shostakovich was a member of the jury and was so impressed with her playing that he took a special interest in her career and later wrote the 24 Preludes and Fugues op.87 with her in mind. Nikolayeva recorded the set three times. She began teaching at the Moscow Conservatory in 1959, and from 1965 was a professor. Although she had an extensive career throughout the USSR and Eastern bloc countries, it was not until the 1980s that her playing became widely known in Western Europe, where her interpretation of Bach, in particular, was admired for its intelligence and resourceful use of tonal variety. Her repertory was comprehensive, with cyclical performances of works such as Bach's '48' and *Art of Fugue* and the 32 Beethoven sonatas being a speciality. Nikolayeva's own compositions, which include two piano concertos, a set of 24 concert studies for piano, a piano sonata and quintet, as well as symphonic music, are based on firmly polyphonic structures – a characteristic that was so much the mark of her own approach to interpretation.

JAMES METHUEN-CAMPBELL

Nikolov, Lazar (Kostov) (*b* Burgas, 26 Aug 1922). Bulgarian composer. Together with Konstantin Iliev he was a founder of Bulgaria's postwar avant garde, and among the first composers in eastern Europe to subscribe to modernism and the use of non-tonal techniques. His compositional aesthetic ran counter to the doctrines of the communist regime which was particularly oppressive at the start of his career in the late 1940s. For most of his professional life his work was censored.

In 1946 Nikolov completed his formal education at the Bulgarian State Music Academy, having studied the piano and composition with Nenov and composition, briefly, with Pancho Vladigerov. From the time of his graduation to the time he was appointed teacher of score reading at the State Academy (1961) Nikolov worked as an accompanist. From 1966 to 1969 he was secretary of the Union

of Bulgarian Composers; in 1992 he became its chairman. During a distinguished career he has received numerous awards, including major prizes from the Bulgarian Composers' Union (1983, 1984), the Order of the People's Republic of Bulgaria (1982), the title People's Artist (1984) and from the Académie des Beaux-Arts (1992). His works have been performed at the Warsaw Autumn, the Zagreb Biennial, the Berlin Musik-Biennale and the Prague Spring festivals.

In addition to Nenov, Nikolov's early influences included Shostakovich, Stravinsky and Hindemith. Like Iliev he rejected folk music sources and the late Romantic style of Vladigerov, seeking instead smaller forms and economical means of expression that were clear and linear. In early works such as the First and Second Piano Sonatas Nikolov employed Classical forms and polyphony. The bulk of his output is instrumental, preferring instrumental to vocal forces to express purely abstract musical ideas. His first successsful composition and the beginnings of an evolving, individual style was his Concerto for String Orchestra (1949). Following its première the work was criticised harshly by the authorities but quickly gained widespread popularity; it has since become one of his most well-known works. Throughout the 1960s he experimented with instrumental timbre, controlled aleatory elements and highly virtuoso techniques, as evidenced in the First String Quartet (1964–5) and *Pianistichni otblyasatsi* ('Piano Reflections', 1972).

A special place in his compositional output has been reserved for the sonata, a genre he has regularly employed. His piano sonatas (1950–91), in particular, have served to document the various stages of his style. In his later sonatas, as well as other works, Nikolov makes extensive use of aleatory techniques, tone clusters, glissandi played directly on the strings and other colouristic effects. The freer sections, however, are controlled by means of detailed instructions to the performer.

ANN LEYY, GREGORY MYERS

Nikolovski, Vlastimir (*b* Prilep, 20 Dec 1925). Macedonian composer. He studied at the Skopje Music School, at the Leningrad Conservatory with Evlahov (composition, 1947–8) and at the Belgrade Academy of Music, where he graduated from Živković's composition class in 1955. He then worked in Skopje as a music teacher, manager of the opera, a music journalist for Radio Skopje, professor at the pedagogical academy and, from 1966, professor and dean at the University of Skopje School of Music. He became a member of the Macedonian Academy of Sciences and Arts in 1972. After an early romantic period based on folk music, he went on to refine and modernize his style, though without losing contact with Macedonian folklore. The essential features of his work are a use of ancient modes, the derivation of melody from speech intonation and a rich deployment of asymmetrical rhythms. Later pieces are abundantly polyrhythmic and polytonal.

STANA DURIC-KLAJN/DIMITRIJE BUZAROVSKI

Nikol′skaya, Irina Il′inichna (*b* Ukhta, Komi, 27 Dec 1943). Russian musicologist. After studying at the Gnesin Music Teachers' Training College and the musicology institute at Warsaw University (with Lissa), she graduated from Gnesin in 1973. She completed her postgraduate studies at the Moscow State Institute of Art Studies, where she was appointed directing academic officer in 1976. She took the doctorate in 1992. She has received the Asaf′yev Prize for musicology, the medal of the Polish Union of Composers for her 'outstanding contribution towards the study of Polish music' (1989), and the 'Ordre du Mérite Culturel' (1981). Her main areas of interest are 19th- and 20th-century Polish music and 20th-century Russian instrumental music. Her work is particularly concerned with questions of musical style in contemporary Russian music, such as symphonies composed during the 1970s and 80s and the works of Gubaidulina, Ustvol′skaya and Weinberg.

LYUDMILA KORABEL′NIKOVA

Nikomachos. *See* NICOMACHUS OF GERASA.

Nilsson, Anders (Göran) (*b* Stockholm, 6 July 1954). Swedish composer. After beginning as a rock and jazz musician, he specialized in music at the Statens normalskola (1971–3) and at the Birkagården folk high school in Stockholm later in the 1970s, while also working as a theatre musician. He then studied privately with Eklund (1978–9) and later composition with Bucht, Ferneyhough and Sven-David Sandström at the Royal College of Music in Stockholm from 1979 to 1983. In 1986 he became a board member of the Swedish section of the ISCM.

His début as a composer was the condensed and polyphonically structured *Trois pièces pour grand orchestre*, likened by Bucht to 'the leap of a tiger'. The treatment of orchestral sound is subtle yet powerful. He has since then gradually relaxed the complexity of his music, giving it a more open and airy sound and indicating a more intuitive way of working (*Ariel*, Organ Concerto). His works from *Cadenze* onwards show a freer and more spontaneous expression, culminating in a synthesis of all these elements in the musical language of Symphony no.1. One of the most artistically mature of the younger Swedish generation of composers, he uses a tonal language that is basically traditional, reflective of Mahler's late Romanticism. It mirrors not only the cultural vision of Bartók or Berio, but also has an abstraction and concreteness belonging to a new age.

ROLF HAGLUND

Nilsson [Svennsson], (Märta) Birgit (*b* Västra Karups, 17 May 1918). Swedish soprano. She studied at the Swedish Royal Academy of Music, Stockholm, where her teachers included Joseph Hislop. In 1946 she made her début at the Swedish Royal Opera, Stockholm, as Agathe (*Der Freischütz*), later singing Leonore, Lady Macbeth, the Marschallin, Sieglinde, Donna Anna, Venus, Senta, Aida, Tosca and Lisa (*The Queen of Spades*). In 1951 she sang

Birgit Nilsson in the title role of Puccini's 'Turandot'

Electra (*Idomeneo*) at Glyndebourne, creating a stir with her keen-edged, forthright singing. During the 1954–5 season she sang her first *Götterdämmerung* Brünnhilde and Salome at Stockholm and made her Munich début as Brünnhilde in the complete *Ring*. Also in 1954 she first appeared in Vienna and, as Elsa, began her long association with Bayreuth, returning (1957–70) as Isolde, Sieglinde and Brünnhilde. In particular, her interpretation of Isolde in Wieland Wagner's 1966 production was of searing vocal and dramatic power. She first sang at Covent Garden in the 1957 *Ring*, returning as Isolde, Amelia (*Un ballo in maschera*, with the Swedish Royal Opera in 1960), Strauss's Electra, Turandot and Leonore. She made her American début at San Francisco in 1956, and she first sang at the Metropolitan in 1959 as Isolde. Her only new role in the 1970s was the Dyer's Wife (*Die Frau ohne Schatten*), which she sang at Stockholm in 1975.

Nilsson was generally considered the finest Wagnerian soprano of her day. Her voice was even throughout its range, pure in sound and perfect in intonation with a free ringing top; its size was phenomenal. Her dramatic abilities were considerable. Electra was possibly her finest achievement, although the sheer power and opulence of her voice, coupled with a certain coolness, made her an ideal Turandot. In both of these, as well as in Wagnerian roles, her phenomenal stamina was perfectly suited to the rigorous demands of the music. Her many recordings include Brünnhilde and Isolde, in both of which she was unrivalled, as well as the title roles in *Turandot* and *Elektra*; moreover, even her readings of the roles for which she was less renowned, such as Leonore, Aida and Tosca, have had few if any equals since. Her second recording of Isolde (1966, Bayreuth), and her Electra remain perhaps her most thrilling achievements.

HAROLD ROSENTHAL/ALAN BLYTH

Nilsson, Bo (*b* Skelleftehamn, 1 May 1937). Swedish composer. Though living in a small country town (Malmberget) and having had only elementary training from a local music teacher, together with some experience as a jazz pianist, he was able to achieve such skill in handling new techniques, teaching himself from the radio, that at the age of 18 one of his works (the *Zwei Stücke*) was presented in a West German Radio 'Musik der Zeit' concert. In 1957 his *Frequenzen* was performed at the ISCM Festival, and within a few years he had composed an imposing series of pieces that were played wherever avant-garde music was heard throughout Europe.

Nilsson's compositions of the late 1950s, though often indebted to Boulez in instrumentation and to Stockhausen in technique, show a number of features which have remained characteristic: the deployment of silvery percussion sounds as a backcloth for finely wrought vocal or flute (often alto flute) lines, a 'nervous' fluttering of tonal nuances, and a feeling for miniature, calculated forms. The same brilliant and percussive qualities of sound pervade the group of increasingly expansive orchestral works from the *Szene* sequence (1960–61) through *Séance* (1963) to the *Litanei über das verlorene Schlagzeug* (1965). But in *Entrée* (1962) Nilsson returned to late Romanticism, and later in the 1960s he wrote film and television scores of a simple Swedish lyricism. *Nazm* (1973), his first large work after a considerable interval, presents a synthesis of prescribed formulae and free improvisation on a Turkish *maqām* motif for jazz group, solo voices, chorus and orchestra, all amplified. Similar in technique is the belated fourth *Szene* (1975). Nilsson is certainly one of the most enigmatic and highly gifted Swedish composers of post-war years.

HANS ÅSTRAND

Nilsson, Christine [Kristina Törnerhjelm] (*b* Sjöabol, nr Växjö, 20 Aug 1843; *d* Stockholm, 22 Nov 1921). Swedish soprano. She studied with Franz Berwald in Stockholm, where she sang publicly from an early age, and then with P.F. Wartel, N.-J.-J. Masset and Enrico Delle Sedie in Paris. Her stage début was in 1864 as Violetta in *La traviata* at the Théâtre Lyrique, where she sang until 1867. She made her London début in 1864 at Her Majesty's Theatre as Violetta, also appearing as

Marguerite in *Faust*. Although contracted to sing in the first performance of Bizet's *La jolie fille de Perth* at the Théâtre Lyrique, she transferred to the Opéra and sang Ophelia at the première of Thomas' *Hamlet* (1868) and Marguerite in the Opéra's first performance of *Faust* (1869) instead.

She made her Covent Garden début in 1869 in the title role of *Lucia di Lammermoor*, and during the season also sang in the first London performance of *Hamlet*. In 1870 she sang in Benedict's oratorio *The Legend of St Cecilia* for her benefit at the Paris Opéra, was London's first Mignon at Drury Lane and embarked on a tour of the USA managed by Maurice Strakosch. She sang in the first New York performance of *Mignon* at the Academy of Music (1871).

At Drury Lane Nilsson appeared in Mozart, Meyerbeer, Wagner and Verdi roles and took part in the first performance (sung in Italian) of Balfe's posthumous opera *The Talisman* (1874). At Her Majesty's Theatre she sang in the first London performance of Boito's *Mefistofele* (1880). She travelled extensively, visiting St Petersburg and Moscow several times between 1872 and 1875, and her Brussels début was on 3 April 1875, when she sang Ophelia at the Théâtre de la Monnaie. In 1877 she was heard in Vienna and in 1878 at the Court Theatre, Munich.

Returning to New York in 1883 for the opening season of the Metropolitan Opera House, she sang Marguerite in the inaugural performance of *Faust* (22 October) and the title role in the first local performance of Ponchielli's *La Gioconda* (20 December), and shortly afterwards she retired from the stage. Her voice, though not large, was pure and brilliant in timbre, immensely flexible and perfectly even in scale for two and a half octaves up to top E. Ophelia, Marguerite and Mignon were probably her finest roles, while an attractive appearance and a graceful stage personality were great assets in such parts as Violetta. Berwald wrote his opera *Drottningen av Golconda* ('The Queen of Golconda') for her, but it was not performed until many years after her death.

Christine Nilsson as Ophelia in Thomas' opera 'Hamlet'

ELIZABETH FORBES

Nilsson, Torsten (*b* Höör, 21 Jan 1920). Swedish composer, church musician and teacher. After attending the Stockholm Musikhögskolan (1938–43) he took appointments as organist in Köping (1943–53) and at St Maria, Helsingborg (1953–62). He studied the organ and composition with Heiller in Vienna (1961–3), and in 1962 he was appointed precentor and choirmaster to the Oscar Parish, Stockholm. From 1965 to 1970 he taught choral liturgy at Uppsala University and at the Stockholm Theological Institute; he joined the staff of the Stockholm training college for music teachers in 1967 as a theory teacher. As a practising musician and composer he has brought new life to Swedish church music by attempting to break down the barriers between sacred and secular music. His compositions are often forceful and dramatically intense, with improvisation an essential ingredient. In the church operas his work has been pioneering.

WORKS
(*selective list*)

DRAMATIC

Dantesvit (church op, B.V. Wall), op.25, 1968
Jag skriver till dig från ett fjärran land [I am writing to you from a distant land] (N. Hikmet, H. Michaux, J. Prévert), S, male chorus, commedia dell'arte troupe, op.33, 2 pf, 1970
Skapelse [Creation] (church op, Wall), op.34, 1970

ROLF HAGLUND

Nimbus. British record company. Founded in 1971, it achieved early success mastering high-quality LP records, and in 1982 became the first British company to manufacture CDs. Its unsuccessful financial involvement with Robert Maxwell in the late 1980s led to the stripping of the manufacturing plants in Britain and America, and later to the inauguration of Nimbus Technology and Engineering (NTE) to design and construct CD mastering equipment. In the 1990s NTE became one of the developers of the DVD.

Nimbus's early recordings of Vlado Perlemuter, Shura Cherkassky, Bernard Roberts and the Chilingirian Quartet helped consolidate its reputation. A discernible 'Nimbus sound' stems from the use of single microphone technique, 'Ambisonic' surround sound recording and spacious acoustics. To this end the company built its own studio in Monmouth, South Wales, where piano, chamber and some orchestral music is recorded. Its major recordings include Perlemuter's complete Ravel piano works (1973), Roberts's complete Beethoven sonatas (1978–9, and on CD, 1982–5), the first cycles of Beethoven and Schubert symphonies on period instruments (by the Hanover Band, 1982–90) and ongoing series of Bach organ music (by Kevin Bowyer, 1992–) and Haydn symphonies (by the Austro-Hungarian Haydn Orchestra, 1988–). A world music series was inaugurated in 1987, and the 'Prima Voce' series of transfers from 78 r.p.m. discs in 1989. Among the company's other artists in the 1990s were the clarinettist Karl Leister, the violinist Daniel Hope, the pianists John Lill, Mark Anderson and Martin Jones, the composer George Benjamin, the Vienna Piano Trio, the Brandis and Artis Quartets of the Berlin Philharmonic Octet and the BBC National Orchestra of Wales.

DAVID A. THREASHER

Nimo, Koo [Amponsah, Daniel Kwabena; Boah-Amponsem, Kwabena; Ko Nimo, Konimo] (*b* Ofoase, Asante District, Gold Coast, 3 Oct 1934). Ghanaian musician. He moved to the Asante court in Kumasi when his sister married into the royal family in 1941. He attended Adisadel College in Cape Coast, and in 1954 moved to Accra to study medical technology and play guitar in a highlife group, I.E.'s Band. Returning to Kumasi in 1955, he performed on GBC radio where he was assigned his stage name, began songwriting and married. In 1962–5 he studied biochemistry and music in England. His début recordings as 'Koo Nimo' were released in 1966. His songs are typically scored for male vocals, one or two acoustic guitars, bass *mbira* and struck idiophone. His songs in highlife style, such as *Aburokyiri Abrabo* ('Overseas Life') display Western-influenced harmony and guitar styling, whereas songs in indigenous forms such as *odonson* and *kurunku* are more traditional. His thumb-and-forefinger guitar-picking style has been referred to as palm wine guitar. A storyteller in song, his Asante-Twi lyrics comprise traditional proverbs. Themes include village life, marital problems, Asante history, philosophical reflection and modern life. He has toured the USA, the UK, Australia and the Caribbean. He is the subject of several films and the recipient of numerous awards including the Grand Medal for lifetime service to Ghana in 1997.

ANDREW L. KAYE

Nimrī, Tawfiq al- (*b* Husn, near Irbid, 1922). Jordanian traditional composer and singer. After the sudden death of his father he was brought up by his grandfather, a poet-singer and *rabāba* player who regularly took his grandson to church to pray; there al-Nimrī began to learn religious chants. At an early age he sang at wedding celebrations, and subsequently developed his interest in music by studying the *'ūd* with Alfred Samāwī in Husn. After the establishment of the broadcasting station in Jerusalem in 1936, al-Nimrī performed many of his songs for broadcasts. Like most Jordanian musicians of his time, he had a trade other than music; he worked as a watch-repairer while pursuing his interest in singing and composition. He studied music theory in Jerusalem with Yūsuf Baṭrūnī. He also took lessons with Muḥammad Maḥfūẓ in Damascus. In 1949 he joined the Ramallah broadcasting service; in 1959 he was appointed director of the music section of the newly established radio station in Amman and in 1963 became the administrator of the same section. He still held this position in 1999 and received the Independence Badge of Honour for his long service and dedication.

His first recorded song, *Qalbī yihwāhā* ('My heart loves her'), brought him fame in Jordan and the neighbouring countries. He wrote more than 500 songs, most of which he performed himself; he composed the texts for many of his songs in the manner of a traditional poet-singer. His style is folkloric; the words of his songs are in an east Jordanian dialect, while the tunes are Jordanian folksongs or melodies composed in a similar style. His compositions in the idiom of art music were less successful. He played an important part in the spread of Jordanian traditional song throughout the Arab world, participating in many national and international conferences and festivals.

ABDEL-HAMID HAMAM

Nimsgern, Siegmund (*b* St Wendel, Saarland, 14 Jan 1940). German bass-baritone. He studied with Sibylle Fuchs in Saarbrücken, where he made his début in 1967 as Lionel in Tchaikovsky's *The Maid of Orléans* and sang in Enescu's *Oedipe* (1971). In 1972 he was engaged at the Deutsche Oper am Rhein, and the following year made his début at Covent Garden as Amfortas. He sang Telramund at the 1976 Salzburg Easter Festival and made his Metropolitan début in 1978 as Pizarro, returning in 1981 as John the Baptist (*Salome*). His repertory also included Don Giovanni, William Tell, Caspar, Macbeth, Boccanegra, Amonasro, Iago, Escamillo and Scarpia, which he first sang in Chicago (1982). His malign Pizarro was a particularly vivid interpretation, as can be heard on his recording with Masur. He excelled in Strauss (Barak, Kunrad in *Feuersnot*, Mandryka and Altair in *Die ägyptische Helena*), while his Wagner roles included Gunther, Alberich, Klingsor (both of which he recorded), Kurwenal, the Dutchman and Wotan, which he sang at Bayreuth (1983–5). His voice was keenly focussed and finely projected, while his scrupulous musicianship made him a noted interpreter of such 20th-century roles as Bartók's Bluebeard (of which he made a commanding recording with Boulez) and Prokofiev's Ruprecht (*The Fiery Angel*). Nimsgern's evenness of production and firm legato were also admired in the concert repertory, especially in Bach, and he made recordings of the *Christmas Oratorio*, the *St Matthew Passion* and several cantatas.

ELIZABETH FORBES

Nin (y Castellanos), Joaquín (*b* Havana, 29 Sept 1879; *d* Havana, 24 Oct 1949). Cuban pianist and composer, father of composer Joaquín Nin-Culmell and writer Anaïs Nin. He made his début as a pianist in Barcelona at the age of 12 and began touring in 1901. He frequently returned to Spain, where he performed in the Modernist festivals at Sitges between 1902 and 1905. At his Paris début in 1904, he presented works by Chambonnières, Couperin and Rameau, a repertory he was among the first to perform. He later edited two volumes of 18th-century keyboard music by Spanish composers Antonio Soler, Alberto Freixanet and Mateo Pérez de Albéniz (Paris, 1925–8). A participant in one of the 20th century's earliest performance practice debates, he challenged Landowska's advocacy of the harpsichord. Relatively late in his career he turned to composing, evincing a strong interest in popular Spanish materials. He taught at the New University of Brussels and the Schola Cantorum, Paris. His awards include the Cross of Isabel the Catholic (Spain, 1928) and induction into the Légion d'Honneur (France, 1929). In 1930 he became a corresponding member of the Royal Academia de S Fernando. He spent his last decade in Havana.

WORKS
(*selective list*)

Vocal: 20 cantos populares españoles, 1v, pf (1923); Chant élégiaque, 1v, pf (1929); 10 noëls espagnols, 1v, pf (1932); Le chant du veilleur, 1v, vn, pf (1937)

Principal publisher: Eschig

CAROL A. HESS

Nin-Culmell, Joaquín (María) (*b* Berlin, 5 Sept 1908). American composer and pianist of Cuban descent. Son of Joaquín Nin and singer Rosa Culmell, he began his musical studies in Barcelona with Granados student Conchita Badia and later studied at the Schola Cantorum and the Paris Conservatoire, where his teachers included Dukas. Cortot and Viñes were among his piano teachers. During the summers of 1930, 1932 and 1934 Nin-Culmell studied with de Falla and in 1936 gave the first performance of de Falla's *Pour le tombeau de Paul Dukas*. In 1939 he moved to the USA, where he continued to give premières of works by Spanish composers. His teaching appointments have included positions at Williams College (1940–50) and the University of California, Berkeley (1950–74). In 1962 he was named a corresponding member of the Real Academia de S Fernando.

Nin-Culmell strives in his works to capture the spirit, rather than the letter, of Spanish folk music, often changing the rhythm, mode or melodic contour of traditional melodies. A number of his works, including the ballet *El burlador de Sevilla* and the opera *La Celestina*, draw upon Spanish literature.

WORKS

Stage: Yerma (incid music, F.G. Lorca), 1956; El burlador de Sevilla (ballet, T. de Molina), 1957–65; La Celestina (op, F. de Rojas), 1965–85; Le rêve de Cyrano (ballet), 1978

CAROL A. HESS

Nineteenth. *See under* ORGAN STOP.

Nini, Alessandro (*b* Fano, nr Pesaro, 1 Nov 1805; *d* Bergamo, 27 Dec 1880). Italian composer and teacher. His first teacher was Ripini, *maestro di cappella* of his native town. He was appointed *maestro di cappella* and organist at Montenovo, near Ancona, in 1826 and the following year at Ancona itself. In 1827 he entered the Liceo Musicale in Bologna, where he studied with Luigi Palmerini and Benedetto Donelli. At the end of 1830 he accepted the post of director of the school of singing at St Petersburg, where he stayed until 1837. He then returned to Italy and staged his first opera *Ida della Torre* (Venice, 1837), followed by another six, which were given at the leading houses in northern Italy. His most popular work was his second opera, *La marescialla d'Ancre* (1839, Padua). His only failure was *Odalisa* (1842, Milan); none of the operas, however, achieved lasting success, and in the 1840s Nini turned his attention to sacred music. In 1843 he was appointed *maestro di cappella* at Novara Cathedral and in 1847 moved to Bergamo, where he remained for the rest of his life. There he directed the *cappella* of S Maria Maggiore and the Istituto Musicale, retiring in 1877. He was an excellent contrapuntist and composer of church music, and as such was greatly appreciated by Rossini. His dramatic works, though well written and estimable, do not stand out from those of other minor composers of the time. He also wrote chamber music, cantatas and symphonies.

WORKS

OPERAS

Ida della Torre (dramma tragico, 2, C. Beltrame), Venice, S Benedetto, 11 Nov 1837, vs (Milan, 1838/*R*1985: 10G, xxvii), *I-Mr**

La marescialla d'Ancre (tragedia lirica, 2, G. Prati, after A. de Vigny), Padua, Nuovo, 23 July 1839, vs (Milan, 1839), *Mr**; rev. for Milan, Cannobiana, autograph *Mr*

Cristina di Svezia (tragedia lirica, 3, G. Sacchèro and S. Cammarano), Genoa, Carlo Felice, 6 June 1840, vs (Milan, ?1840), *Mr**

Margherita d'Yorck (tragedia lirica, 3, Sacchèro), Venice, Fenice, 21 March 1841, vs (Milan, 1841)

Odalisa (dramma lirico, 2, Sacchèro), Milan, Scala, 19 Feb 1842, *Mr**

Virginia (melodramma, 3, D. Bancalari), Genoa, Carlo Felice, 21 Feb 1843 (Milan, ?1843), *Mr**

Il corsaro (dramma lirico, 4, Sacchèro), Turin, Carignano, 25 Sept 1847

VOCAL

Sacred choral: Miserere, vv, orch; Messa da Gloria; Requiem; Psalms; TeD, 8vv, orch; Lamentations; Bs Vespers; other works

Songs, incl. Se del fiore amor d'aprile, ballata scandinava; Il bacio d'amore, romanza; Mezzanotte, canzone; Assioma d'amore, arietta; La preghiera, arietta; all pubd (Milan, before 1855)

GIOVANNI CARLI BALLOLA/R

Ninna [nanna, ninna-nanna, nonna, nonna pastorale, nonna in pastorale] (It.: 'lullaby'). A category of vocal Christmas PASTORAL, comprising lullabies to the child Christ, cultivated in Italy at least from the 17th century. The term may in this sense be synonymous with 'pastoral'. A 'Nenia [sic] al bambino Giesù' in the *Pastorali concenti al presepe* of Francesco Fiamengo (Venice, 1637) seems to be the earliest example of the category. A 'Canzonetta spirituale sopra alla nanna' entitled *Hor ch'è tempo di dormire* appears in Tarquinio Merula's *Curtio precipitato* (1638); the basso continuo of its first section consists exclusively of the two-note motif shown in ex.1, a motif

Ex.1 Tarquinio Merula: *Hor ch'è tempo di dormire* (Canzonetta spirituale sopra alla nanna) in *Curtio precipitato* (1638), p.35

which resembles that found in Schütz's Christmas History (PASTORAL, ex.4). Manuscripts in Naples (at *I-Nf* and elsewhere) include *ninne* from the 1670s, exhibiting pastoral characteristics, by Cristoforo Caresana, and 18th- and 19th-century *ninne* by a number of composers, including Durante and Paisiello. Weinmann has described a *Pastorale ossia ninna nanna* by Cimarosa (from Naples and now at *D-Rp*), which he implausibly claimed as a model for F.X. Gruber's *Stille Nacht*. The tradition has yet to be studied.

GEOFFREY CHEW

Ninot le Petit [Jo. le Petit, Nynot] (*fl c*1500). ?French composer. His identity is subject to dispute, partly because Ninot is a diminutive of Jean/Giovanni, the most common name of the time, and because 'le petit' is unlikely to be a family name.

That the motets *In illo tempore*, *Psallite Noe* and *Si oblitus fuero* appear in the Vatican manuscript C.S.42 with ascriptions to 'Jo. le Petit' (and as a group in *I-Fn* II.I.232, ascribed 'Ninot') has encouraged identification with the singer Johannes Baltazar alias Petit, who was in the papal chapel from 1488 until shortly before his death, reported by the chapter of Narbonne (where he held a prebend) on 17 May 1502. A letter in French, addressed to Giovanni de' Medici and dated 17 February (almost certainly 1493), is also signed 'J. Petit alias Baltazar'. Further details are in Hudson's edition.

But the mention of 'Nynot' among the eloquent composers listed in the *secunda pars* of Moulu's motet

Mater floreat suggests that he was still alive well after 1502 and implies that he was associated with the French royal chapel. None of his music is known from sources before about 1495; and most of it is in a style that suggests composition in the years 1500–1520. Litterick (following Lesure's earlier proposal) therefore argued that he is far more likely to be the Jean Lepetit who was *maître de la psallette* at Langres Cathedral in 1506–10, thereafter canon until 1529. The appearance of Ninot's mass in the Casale Monferrato choirbooks alongside works of Brubier and Hottinet Barra, who preceded and followed Lepetit as *maître* at Langres, may well support this identification; the mass, which is far more compact in style than his other music, may be one of his latest works.

Ninot's motets show the structural and harmonic clarity typical of longer motets by composers of the French royal chapel at the beginning of the 16th century, and include contrasting triple sections. They closely resemble the works of Févin in some respects (such as the long, unimitated duos), in others (such as rhythmic variety) those of Mouton; the refrain form of *Psallite Noe* appears to be specifically modelled on Mouton's *Sancti Dei omnes*. *Planxit autem David*, the source for whose ascription to Ninot seems more authoritative than those that ascribe it to Josquin, is so different in form, counterpoint and melodic and harmonic style that it is much more likely to be by Josquin (despite dissimilarities with his style as well).

Of Ninot's four-voice chansons, 13 appear together as a group in the manuscript *I-Fc* Basevi 2442. These are extended and light-hearted works, contrasting imitation with homophonic sections, often with sharp changes of pace, and built on texts evidently cobbled together from other material, mainly of a popular nature. Whether they were composed before 1500 or over the next two decades, they still mark Ninot as the leading composer of that genre. Only *Mon seal plaisir* follows a *forme fixe*: it appears in earlier sources and is more traditional in style. So is *Si bibero*, which evidently makes humorous reference to a group of works with similar titles by various older composers: *Si dedero* (Agricola), *Si ascendero* (Craen), *Si dormiero* (?La Rue) and so on. The two extremely compact canonic chansons fit into a tradition that dates back to the 1470s.

WORKS

for 4 voices unless otherwise stated

Edition: *Ninot le Petit: Collected Works*, ed. B. Hudson, CMM, lxxxvii (1979) [H]

SACRED

Missa [sine nomine] (unique to *I-CMac* L(B))

In illo tempore: Assumpsit Jesus; O bone Jesu (unique to 15052); Psallite Noe, Judei credite; Si oblitus fuero tui (also attrib. Obrecht)

SECULAR

Works lacking bassus are unique to I-Fc Basevi 2442, of which one partbook is lost

En chevauchant pres d'ung molin (lacking B); En l'ombre d'ung aubepin; En revenant de Noyon (lacking B); Et la la la, faictez luy bonne chiere; Et levez vo gambe, Jennette (lacking B); Et levez vous hau, Guillemette; Gentilz gallans adventureulx; Helas helas helas (no more text); Hellas, hellas, qui me confortera? (lacking B); Je mi levay l'autre nuytee (lacking B; also in *CT95-6*/*F-Pn* n.a.fr.1817); L'ort villain jaloux (canon 4 in 2 at 4th); Mon amy m'avoit promis; Mon seul plaisir (quodlibet ballade; also ascribed to Josquin); N'as tu poinct mis ton hauls bonnet; Nostre chamberiere si malade elle est; Pourtant si mon amy (canon 4 in 2 at 4th; unique to *S-Uu* 76a; not in H); Si bibero crathere pleno, 3vv (unique to *I-Fc* Basevi 2439)

DOUBTFUL WORKS

Missa 'Miserere mei Deus', 5vv, attrib. 'Johannes Parvus' (almost certainly the papal music copyist, *fl* 1535–80) in *I-Rvat* C.S.39; not in H

Gratia plena ipsa, attrib. 'Nino le petit' in B index of *A-Wn* Mus.15941, 'Mouton' in T index

Planxit autem David, attrib. 'Ninot Lepetit' in *I-Fn* II.I.232 but in several other sources to Josquin; not in H

C'est done par moy, 3vv, attrib. 'Ninon le Petit' in *GB-Lbl* Add.29381 (dated 1741), probably by Willaert; not in H

J'aime bien mon amy, 3vv, unique to *Cmc* Pepys 1760, headed 'N le petit' but attrib. 'de fevin' in original index; not in H

Lourdault lourdault garde que tu feras, attrib. 'Nino petit' in *I-Bc* Q17, almost certainly by Compère

O Jesù dolce (laude), unique to 1508[3], attrib. 'Baldasar'

DAVID FALLOWS, JEFFREY DEAN

Ninth (Fr. *neuvième*; Ger. *Nona*; It. *nona*). The interval of a compound SECOND, i.e. the sum of an octave and a 2nd.

Ninth chord. A chord which, when arranged in close position with its fundamental (or ROOT) in the bass, encompasses the interval of a 9th (ex.1*a*). The common

functions of 9th chords and 11th and 13th chords reflect their construction and interpretation as upward extensions of triads and 7th chords. In the 20th century (especially in jazz and popular music) 9th chords are used as elaborations of simpler chords, particularly as substitutes for a tonic triad at the end of a piece; the 'piling up' of 3rds above the tonic to make a 7th, 9th, 11th or even 13th chord is one of the most important characteristics of jazz harmony. In tonal music up to about 1900, however, the 7th seems to have been the upper limit in chordal consonance; that is, while composers often used 9th and 11th chords for extra power, particularly at climaxes or final cadences, they invariably treated one or more notes in the chord as appoggiaturas (ex.1*b*). The thickness of a complete 9th, 11th or 13th chord in close position was also generally avoided, either by leaving out one or more of its notes (ex.1*c*) or by using a wider spacing (ex.1*d*).

For an 18th-century interpretation of 9th and 11th chords as downward extensions of 7th chords, *see* SUPPOSITION.

JULIAN RUSHTON

Nippon Gakki Seizo KK (Jap.: 'Japan Instrument Manufacturing Co.'). Name given in 1897 to the firm later called YAMAHA.

Nirvana. American grunge band. Formed in 1987, it consisted of Kurt (Donald) Cobain (*b* Aberdeen, Washington, 20 Feb 1967; *d* Seattle, 5 April 1994; guitar and vocals), Krist [Chris] Novoselic (*b* Compton, California, 16 May 1965; bass) and from 1990 Dave Grohl (*b* Warren, Ohio, 14 Jan 1969; drums). They brought the sound and spirit of punk to an unprecedentedly large audience, making alternative music mainstream. Their lyrics were often sarcastic and alienated, and their music relied on heavy, distorted guitar riffs but eschewed the guitar virtuosity of most heavy metal in favour of punk's unpretentious directness. It also featured catchy pop melodies and memorable riffs, along with Cobain's intense, often rage- or pain-filled vocals. They achieved some college radio popularity by the end of the 1980s, but their breakthrough in 1992 was a surprise: the single 'Smells like teen spirit' led their album *Nevermind* (DGC, 1991) to sell over ten million copies. With such success, the band worried that its fans were missing the point of its anti-establishment message, and the contradictions of their stardom weighed particularly heavy on Cobain; the group disbanded after his suicide. Nirvana was widely credited with articulating the desires and frustrations of 'Generation X', the first cohort of American youth that could not expect to be better off than their parents. Their popularity brought heavy metal and alternative audiences together, playing a major part in realigning the genre categories of popular music and establishing influential precedents for the 1990s. (M. Azerrad: *Come As You Are: the Story of Nirvana*, New York, 1993)
